<u>Farm Production</u>	
Production of milk on farms, sales of milk, cream and butter by farmers, and cash receipts from farm marketings, United States, 1924-50	8
Milk production and milk utilized by farmers for sale to plants and dealers as cream and as whole milk, with percentage comparisons, by States, 1940 and 1950	7
Milk: Production on farms, United States, by months, 1929-51	8
Percentage of milk cows being milked on the first of each month in herds kept by crop correspondents, United States, 1925-51	9
Milk: Production per cow on the first day of each month in herds kept by crop correspondents, United States, 1927-51	10
Milk-cattle for breeding and replacement purposes on farms, United States, January 1, 1920-51	11
Artificial breeding programs: Number of active associations and cows enrolled on January 1, by regions, 1939-51	12
Dairy pastures: Feed condition first of month as percentage of normal, United States, selected months, 1917-51	13
Grain and concentrates fed per milk cow per day in herds kept by dairy reporters, United States, 1931-50	14
Grain and concentrates fed per milk cow per day in herds kept by crop reporters, United States, specified dates, 1932-51	14
Value per 100 pounds of concentrate rations fed to milk cows on farms where milk or cream was sold, by regions, 1910-50	15
Grain and other concentrates fed per 100 pounds of milk produced on farms where milk or cream was sold, by regions, 1944-50	16
Cost of concentrates fed per 100 pounds of milk produced on farms where milk or cream was sold, by regions, 1944-50	16
Concentrates fed per milk cow on farms where milk or cream was sold, by regions, 1944-50	18
<u>Factory Production</u>	
Creamery butter: Production, United States, by months, 1919-51	17
Cheese, total: Factory production, United States, by months, 1919-51	18
Evaporated milk, unsweetened, unskimmed, case goods: Production, United States, by months, 1919-51	19
Condensed milk, sweetened, unskimmed, case goods: Production, United States, by months, 1919-51	20
Condensed milk, unskimmed, sweetened and unsweetened, bulk goods: Production, United States, by months, 1920-51	21
Dry whole milk: Production, United States, by months, 1920-51	22
Nonfat dry milk solids, for human consumption: Production, United States, by months, 1935-51	22
Ice cream: Factory production, United States, by months, 1918-51	23
Oleomargarine, colored and uncolored: Production, United States, by months, 1917-51	24
<u>Stocks, Cold Storage</u>	
Butter, creamery: Total cold storage holdings, United States, first of month, 1915-51	25
Cheese, all varieties: Total cold storage holdings, United States, first of month, 1917-51	26
<u>Stocks, Manufacturers'</u>	
Evaporated milk (case goods): Manufacturers' stocks, United States, first of month, 1920-51	27
Condensed milk (case goods): Manufacturers' stocks, United States, first of month, 1920-51	28
Dry whole milk: Manufacturers' stocks, United States, first of month, 1921-51	29
Nonfat dry milk solids, human food: Manufacturers' stocks, United States, first of month, 1930-51	30

CONTENTS (Continued)

	Page
<u>Prices and Price Ratios, Farm</u>	
Butterfat: Average price per pound received by farmers, United States, by months, 1909-51	31
Milk: Average price per 100 pounds received by farmers for delivery to plants and dealers, United States, by months, 1909-51	32
Butterfat: Prices received by farmers as percentages of parity prices, 1920-51	33
Milk, wholesale: Prices received by farmers as percentages of parity prices, 1920-51	34
Butterfat-feed price ratio: Pounds of feed equivalent in value to one pound of butterfat, United States, by months, 1910-51	35
Milk-feed price ratio: Pounds of feed equivalent in value to one pound of wholesale milk, United States, by months, 1910-51	36
Condensery milk-beef cattle price ratio: Pounds of beef cattle equivalent in value to one pound of condensery milk, United States, by months, 1922-51	37
Condensery milk-hog price ratio: Pounds of hog equivalent in value to one pound of condensery milk, United States, by months, 1922-51	37
Butterfat-beef cattle price ratio: Pounds of beef cattle equivalent in value to one pound of butterfat, United States, by months, 1910-51	38
Butterfat-hog price ratio: Pounds of hog equivalent in value to one pound of butterfat, United States, by months, 1910-51	39
Milk, standard grade, 3.5 percent butterfat: Average price per hundredweight paid by dealers, for city distribution as milk and cream, United States, by months, 1922-51	40
Milk, 3.5 percent butterfat: Average price per hundredweight paid to producers for milk delivered at condenseries, United States, by months, 1922-51	41
Prices paid by plants for milk of specified uses and prices for certain manufactured dairy products, United States, by months, 1947-51	42
<u>Prices, Wholesale</u>	
Creamery butter, 92-score: Average wholesale price per pound, Chicago, by months, 1910-51	43
Cheese, Fresh Single Daisies: Average wholesale price per pound, Chicago, by months, 1921-51	44
Cheese, American Cheddars: Wholesale price per pound on the Wisconsin Cheese Exchange, by months, 1910-51	45
Evaporated milk, unsweetened: Average wholesale selling price per case (forty-eight 14 1/2-oz. cans) at manufacturers' distributing points, United States, by months, 1920-51	46
Milk, dry or powdered whole: Manufacturers' average selling price per pound, United States, by months, 1926-51	47
Nonfat dry milk solids, human food: Average price per pound, bulk goods, f.o.b. factory, United States, by months, 1934-51	48
Dry skim milk, animal feed: Average price per pound, f.o.b. factory, United States, by months, 1934-51	48
<u>Prices, Retail</u>	
Milk, Fresh, delivered: Average retail price per quart in leading cities of the United States, by months, 1913-51	49
Evaporated milk: Average retail price per 14 1/2-oz. can in leading cities of the United States, by months, 1919-51	50
Cheese: Average retail price per pound in leading cities of the United States, by months, 1913-51	51
Butter: Average retail price per pound in leading cities of the United States, by months, 1913-51	52
Oleomargarine, uncolored: Average retail price per pound in leading cities of the United States, by months, 1919-51	53

	<u>Page</u>
<u>Statistics for Federal Order Markets</u>	
Producers, receipts, and sales of whole milk, fluid skim items, and butterfat in cream, by marketing areas, and by months, 1948-50	54-68
<u>Utilization and Consumption</u>	
Statistical flow chart for milk and dairy products, 1950	69
Total supply and utilization of milk in the United States, 1929-50	70
Total milk fat: Supply and distribution, United States, 1924-50	71
Total milk solids-not-fat: Supply and distribution, United States, 1924-50	72
Fluid milk and principal manufactured dairy products: Supply and distribution, United States, annually, 1909-50	73-83
Monthly domestic disappearance of creamery butter, total cheese and evaporated milk, 1920-51	84,85
Oleomargarine, actual weight: Supply and distribution, 1912-50	86
Casein: Production, imports, domestic disappearance, and prices, 1919-50	87

DAIRY STATISTICS

Prepared in the Bureau of Agricultural Economics

Background data on dairy products and related statistics have been published separately heretofore in regular issues of The Dairy Situation or collectively as an appendix to a regularly scheduled number of that series of reports. The present edition includes all the tables carried in the May 1950 issue of The Dairy Situation, except those pertaining to Bureau of Census data on numbers and sizes of dairy herds. Data from the 1950 Census will not be available until late in 1951. The present form of publication is an effort to give, under one cover, selected key series in a form more convenient for all users. It is planned to expand this compilation in future years. This publication represents a further step in the statistical program of the Bureau of Agricultural Economics to provide comprehensive data as background for making analyses of the different segments of American agriculture. The publication, Feed Statistics, has been issued in this form for several years. Similar compendiums are planned for several other products, including cotton and fats and oils.

The data in this bulletin are designed to help farmers, agricultural agents and other workers, and the dairy trade generally, in interpreting current changes and in appraising future prospects in the light of past experiences for the several aspects of the dairy industry. Abstracts of many of the monthly series are carried regularly on page 2 of The Dairy Situation. Sources for comparable current data are indicated in connection with most of the tables in this present bulletin. These tables in many cases are subject to revision, but they represented the latest data available to the Bureau of Agricultural Economics at the time of preparation.

Table 1.- Production of milk on farms, sales of milk, cream and butter by farmers, and cash receipts from farm marketings, United States, 1924-50

Year	Milk cows on farms 1/	Production of milk		Milk and cream sold by farmers at retail			Farm butter sold		
		Per cow	Total 2/	Quantity, milk equivalent	Price per quart	Cash receipts: from farms marketings 3/	Quantity	Price per pounds	Cash receipts from farms marketings 3/

1/ Average number on farms during year, heifers that have not freshened excluded.
 2/ Excludes milk sucked by calves and milk produced by cows not on farms.
 3/ Excludes production payments to producers.
 4/ Preliminary.
 5/ Milk and milk equivalent of cream and farm butter consumed, valued at the average returns for milk utilized in dairy products sold.
 6/ Cash receipts from combined sales plus value of home consumption. Cash receipts exclude production payments to producers.
 Compiled from Farm Production, Disposition, and Income from Milk, 1949-60, which also shows similar data by States for recent years.

Table 2. - Milk production and milk utilized by farmers for sale to plants and dealers as cream and as whole milk, with percentage comparisons, by States, 1940 and 1950

10

^{1/} Average is centered on each year by including half of January 1 figure in that year and half of January 1 figure in the following year.

Data available currently in Crop Production issued about the 10th of each month.

Table 6.- Milk cattle for breeding and replacement purposes on farms, United States, January 1, 1920-51

Year	Cows and heifers 2 years old and over kept for milk		Heifers 1-2 years kept for milk cows		Heifer calves under 1 year kept for milk cows		Value of milk cattle for breeding and replacement purposes 1/	Cows and heifers eliminated during year 2/	
	Number on farms	Per 100 cows	Number on farms	Per 100 cows	Number on farms	Per 100 cows		Million dollars	Number on farms

1/ Includes an allowance for breeding and replacement bulls for which numbers are not shown.

2/ Cows and heifers 1 year old and over at beginning of year less cows 2 years old and over at end of year. Includes mainly animals culled out, death losses, and farm slaughter.

^{1/} Based on periodic replies from a total of about 6,000 dairy reporters to the question, "How many pounds of grain (including mill feeds and concentrates) were fed yesterday to all milk cows on your farm?" Since December 1933 the series is based on quarterly reports (February 1, May 1, August 1, and November 1) from all States, with intervening months interpolated using monthly reports from 10 or more States where dairying is relatively important.

Data compiled from Rations Fed to Milk Cows, released in January each year.

Table 10 .- Grain and concentrates fed per milk cow per day in herds kept by crop reporters, United States, specified dates 1932-51 ^{1/}

1951	6.15	6.28	---	---	---	---	---

^{1/} Based on replies from about 15,000 crop reporters. Data from the crop reporters differ from that from dairy reporters shown in table 9 in that they represent farmers reporting a variety of crop and livestock operations rather than dairying alone, whose herds are smaller in size, and who usually give less specialized attention to the dairy enterprise.

Data published currently in Crop Production, issued about the 10th of each month.

1951 ^{4/}	33,410	31,825											

^{1/} Production reported for 1937 and later years not strictly comparable with production for earlier years because of inclusion of production of counter freezers and other small retail places not previously included.
^{2/} Includes 5,339 counter freezers and small retailers producing 18,442,000 gallons, part of which was not reported in 1937 and very little in earlier years.
^{3/} Includes 8,528 counter freezers and small retailers producing 25,990,000 gallons of ice cream.
^{4/} Preliminary.

Data available currently in Ice Cream Production issued about the 20th of each month.

^{1/} Preliminary.

^{2/} From October 1, 1943 through June 30, 1946, production payments were made to farmers for dairy products at rates which varied among seasons and among regions. A small percentage of farmers did not call for their production payments. The allowances for these payments, for use in this table, were made by prorating the total payments over the total quantities sold.

Data available currently in Agricultural Prices issued at the end of each month.

^{1/} Seasonally adjusted actual prices as percentages of parity prices computed using formula specified in Agricultural Act of 1949 and revised index numbers. This formula became effective January 1, 1950; data for earlier years are shown only for comparative purposes.

^{2/} Twelve-month simple averages of butterfat prices as percentages of annual parity prices.

^{3/} From October 1, 1943 through June 30, 1946, production payments were made to farmers for dairy products at rates which varied among seasons and among regions. A small percentage of farmers did not call for their production payments. The allowances for these payments, for use in this table, were made by prorating the total payments over the total quantities sold.

Data available currently in Agricultural Prices issued at end of each month.

1/ Compiled from Milk Prices Paid at Creameries and Cheese Factories. 2/ Compiled from Evaporated, Condensed, and Dry Milk Report. 3/ Compiled from Statistical Supplement to Monthly Domestic Dairy Markets Review, Production and Marketing Administration. 4/ Compiled from Agricultural Prices. 5/ Compiled from Evaporated, Condensed and Dry Milk Report, for the period August 1947 to date. For the previous months, the monthly price data have been estimated from the related series on 3.5 percent condenser milk and published in Agricultural Prices, February 1949. 6/ Monthly prices for milk used in manufacturing butter-powder, American cheese, and evaporated milk are weighted by quantities of milk used for each purpose. Published monthly in Agricultural Prices.

51

1/ Beginning July 1949, price quoted for processed rather than for natural cheese.

2/ January-June average was 60.2; May-December average, including two-month overlap, was 51.8.

3/ Beginning December 1950, revised series.

Data available currently in Consumers' Price Index and Retail Food Prices issued the latter part of each month by the Bureau of Labor Statistics.

1/ Includes some sales outside marketing area except where otherwise noted. Milk sold by handlers subject to another Federal order is not always included in data for market in which distributed.

2/ No significant quantities of outside sales included.

3/ Does not include bulk sales outside marketing area.

4/ Does not include sales made in this market by handlers subject to the Chicago order.

5/ Represents total fluid whole milk sales.

6/ Represents all sales within 100 miles.

7/ Represents all whole milk shipped into marketing area from plants located outside the area. Milk sold from plants within marketing area and own farm milk not included.

8/ Monthly data for individual marketing areas published in The Dairy Situation, July-August, 1949.

Compiled by the Research Division, Dairy Branch, Production and Marketing Administration.

1/ Includes some sales outside marketing areas except where otherwise noted. Milk sold by handlers subject to another Federal order is not always included in data for market in which distributed.

2/ No significant quantities of outside sales included.

3/ Does not include bulk sales outside marketing area.

4/ Does not include sales made in this market by handlers subject to the Chicago order.

5/ Represents total fluid whole milk sales.

6/ Represents all sales within 100 miles.

7/ Beginning with September, no significant quantities of outside sales included. Outside sales of approximately 20,000 pounds daily were included in reported sales prior to September 1949.

8/ Represents all whole milk shipped into marketing area from plants located outside the area. Milk sold from plants within marketing area and own farm milk not included.

1/ Represents sales of skim milk, buttermilk, and flavored milk and milk drinks, including some sales outside the marketing area, except where otherwise noted. Items sold by handlers subject to another Federal order are not always included in data for market in which distributed. (Does not include chocolate syrup in flavored products.)

2/ No significant quantities of outside sales included.

3/ Does not include sales made in this market by handlers subject to Chicago order.

4/ Includes all outside sales of buttermilk.

5/ Represents total sales of fluid skim milk items.

6/ Does not include plain skim milk.

7/ Includes all skim milk items shipped into marketing area; flavored milk drinks made from concentrated dairy products or from whole milk separated in city plants are not included.

8/ Corrected to include Duluth-Superior and eliminate plain skim from Columbus.

9/ Monthly data for individual marketing areas published in The Dairy Situation, July-August, 1949.

Compiled by Research Division, Dairy Branch, Production and Marketing Administration.

1/ Represents sales of skim milk, buttermilk, and flavored milk and milk drinks, including some sales outside the marketing area, except where otherwise noted. Items sold by handlers subject to another Federal order are not always included in data for market in which distributed. (Does not include chocolate syrup in flavored products.)
 2/ No significant quantities of outside sales included.
 3/ Does not include sales made in this market by handlers subject to Chicago order.
 4/ Includes all outside sales of buttermilk.
 5/ Represents total sales of fluid skim milk items.
 6/ Does not include plain skim milk.
 7/ Includes all skim milk items shipped into marketing area; flavored milk drinks made from concentrated dairy products or from whole milk separated in city plants are not included.

Table 10.- Fluid skim milk items: Daily average sales by handlers in marketing areas under Federal orders, by months, 1950 (preliminary) ^{1/}

^{1/} Represents sales of skim milk, buttermilk, and flavored milk and milk drinks, including some sales outside the marketing area, except where otherwise noted. Items sold by handlers outside to another Federal order are not always included in data for market in which distributed. (Does not include chocolate syrup in flavored products.) ^{2/} No significant quantities of outside sales included. ^{3/} Does not include sales made in this market by handlers subject to Chicago order. ^{4/} Includes all outside sales of buttermilk. ^{5/} Represents total sales of fluid skim milk items. ^{6/} Does not include plain skim milk. ^{7/} Includes all skim milk items shipped into marketing area; flavored milk drinks made from concentrated dairy products or from whole milk separated in city plants are not included. ^{8/} Sales of fluid skim milk items for Springfield and Worcester are included with whole milk sales. ^{9/} January - July, 30 markets; August, 32 markets; September-December, 33 markets. ^{10/} Excludes markets for months when not operating in 1949 and includes outside sales for St. Louis. ^{11/} Includes outside sales for Duluth-Superior.

Compiled by Research Division, Dairy Branch, Production and Marketing Administration.

1/ Represents sales of sweet and sour cream and milk and cream mixtures containing 6% or more butterfat, including some sales outside the marketing area, except where otherwise noted. Items sold by handlers subject to another Federal order are not always included in data for market in which distributed.

2/ No significant quantities of outside sales included.

3/ Does not include sales made in this market by handlers subject to Chicago order.

4/ Represents total sales of cream.

5/ Does not include storage cream sold for fluid use.

6/ Corrected to add Duluth-Superior.

7/ Monthly data for individual marketing areas published in The Dairy Situation, July-August, 1949.

Compiled by the Research Division, Dairy Branch, Production and Marketing Administration.

1/ Represents sales of sweet and sour cream and milk and cream mixtures containing 6% or more butterfat, including some sales outside the marketing area, except where otherwise noted. Items sold by handlers subject to another Federal order are not always included in data for market in which distributed.

2/ No significant quantities of outside sales included.

3/ Does not include sales made in this market by handlers subject to Chicago order.

4/ Represents total sales of cream.

5/ Does not include storage cream sold for fluid use.

6/ Excludes outside sales for Philadelphia.

Compiled by the Research Division, Dairy Branch, Production and Marketing Administration.

1/ Represents sales of sweet and sour cream and milk and cream mixtures containing 6% or more butterfat, including some sales outside the marketing area, except where otherwise noted. Items sold by handlers subject to another Federal order are not always included in data for market in which distributed.

2/ Does not include sales made in this market by handlers subject to Chicago order.

3/ No significant quantities of outside sales included.

4/ Represents total sales of cream.

5/ Does not include storage cream sold for fluid use.

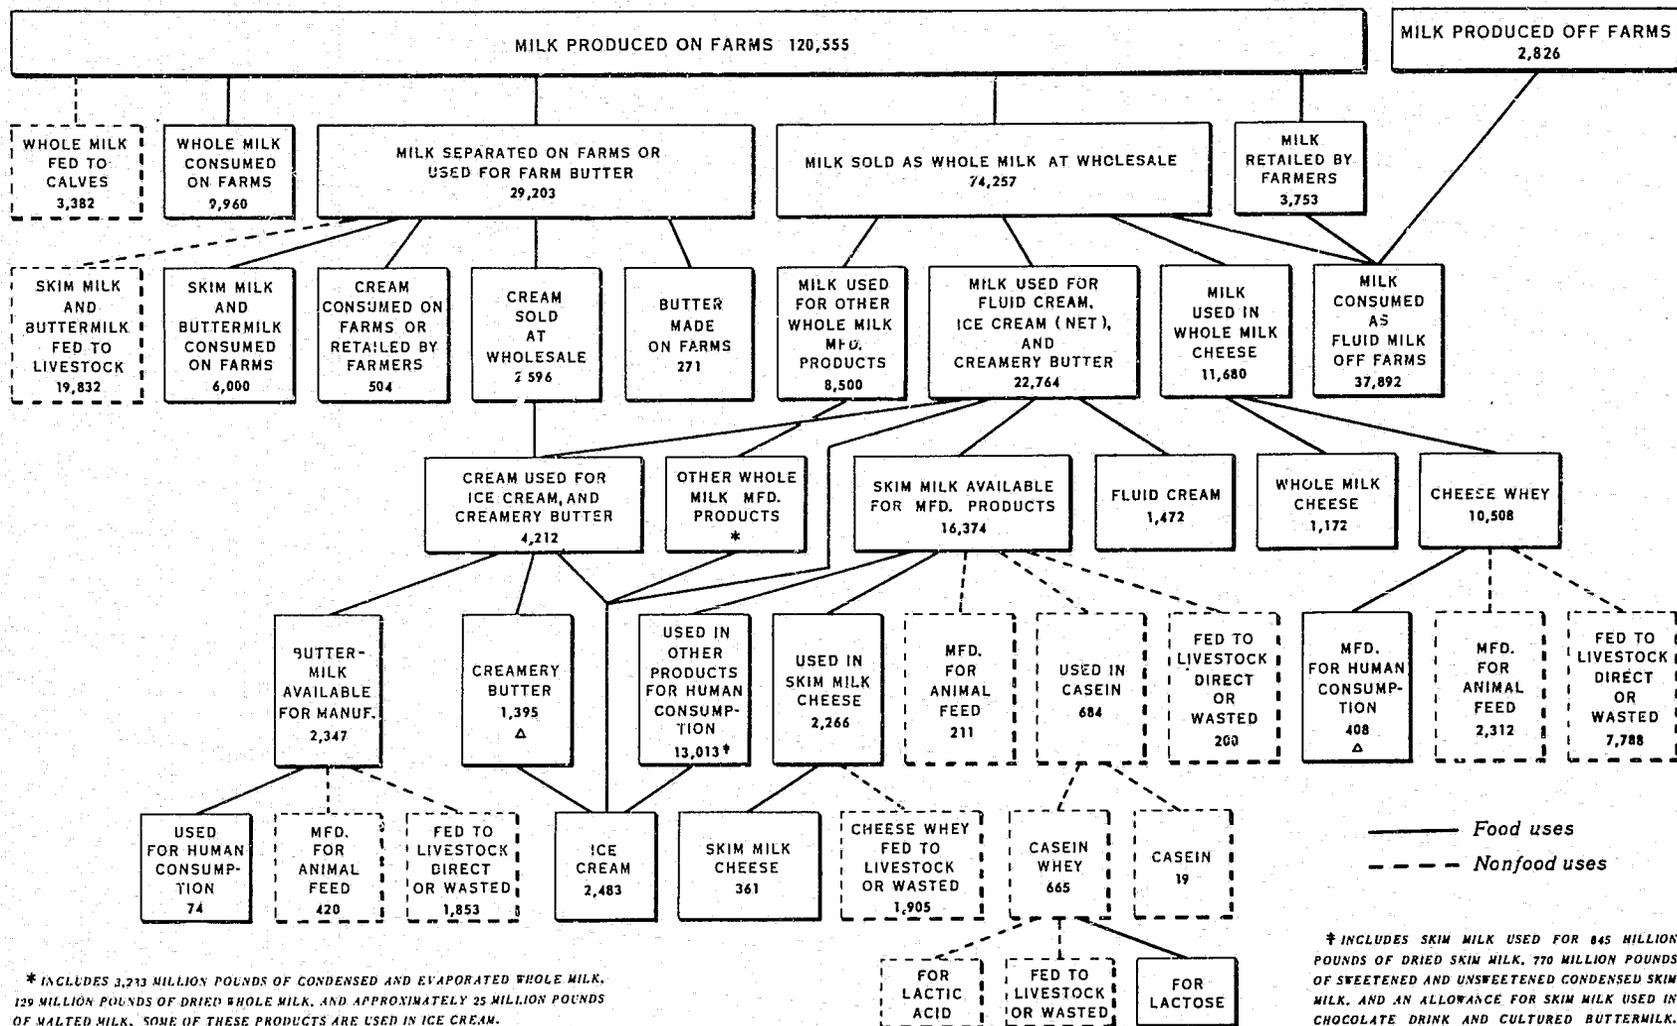

6/ January-July, 27 markets; August, 29 markets; September-December, 30 markets.

7/ Excludes markets for months when not operating in 1949 and includes outside sales for St. Louis.

8/ Includes outside sales for Duluth-Superior and excludes Boston, Fall River, and Lowell-Lawrence.

STATISTICAL FLOW CHART FOR MILK AND DAIRY PRODUCTS, 1950

(FIGURES IN MILLIONS OF POUNDS)

—— Food uses
 - - - - Nonfood uses

* INCLUDES 3,213 MILLION POUNDS OF CONDENSED AND EVAPORATED WHOLE MILK, 129 MILLION POUNDS OF DRIED WHOLE MILK, AND APPROXIMATELY 25 MILLION POUNDS OF MALTED MILK. SOME OF THESE PRODUCTS ARE USED IN ICE CREAM.

Δ ABOUT 41 MILLION POUNDS OF BUTTER WAS MADE FROM WHEY CREAM.

† INCLUDES SKIM MILK USED FOR 845 MILLION POUNDS OF DRIED SKIM MILK, 770 MILLION POUNDS OF SWEETENED AND UNSWEETENED CONDENSED SKIM MILK, AND AN ALLOWANCE FOR SKIM MILK USED IN CHOCOLATE DRINK AND CULTURED BUTTERMILK. SOME OF THESE PRODUCTS ARE USED IN ICE CREAM.

1/ Preliminary.

2/ Includes allowance for milk produced by cows not on farms.

3/ For 1945 and earlier years include: dry cream, salted milk, dry part-skim milk and dry ice cream mix; for 1946 and later years, whole milk equivalent of the fat in cottage cheese.

4/ Includes milk sherberts and ice milk, not computed prior to 1943.

5/ Milk equivalent of butter and condensed milk used in ice cream.

6/ Includes net milk equivalents on butter and frozen dairy products to avoid double counting of milk from which fat was reused in making a second dairy product.

7/ Residual, including miscellaneous minor uses; net imports, exports and year-end carry-over of milk and cream, as well as any inaccuracies of independently determined use estimates.

Current data for this table published annually in Farm Production, Disposition and Income from Milk issued in April of each year.

71

1/ Quantities produced and fed to calves determined by applying annual fat test to reported quantities of milk. Data in other columns calculated by applying fat test to quantities of dairy products concerned.

2/ Less than 500,000 pounds.

3/ Cold-storage holdings of condensed milk (bulk) included beginning January 1, 1949.

4/ Preliminary.

^{1/} Production determined by applying percentage of solids-not-fat in whole milk to quantity of milk produced. Total consumption by civilians obtained by multiplying per capita consumption by the civilian population. The per capita figure, in turn, was obtained by applying the percentage of solids-not-fat in all dairy products to the quantities involved. Quantities in remaining columns except "fed to animals or wasted" were determined by applying percentages of solids-not-fat in each product to the total amount of products. The quantity "fed to animals or wasted" is the difference between total supply and total distribution among consumption, exports and ending stocks.

^{2/} Includes quantities used by military in civilian feeding programs abroad.

^{3/} Preliminary.

1/ 1909-23, estimates of total butter production were based on data of Census of Manufactures, Census of Agriculture and market receipts. 1924-28, factory production based on data from Census of Manufactures and reports by creameries to Bureau of Agricultural Economics. For creamery butter, 1929 to date and for farm butter, 1924 to date, data are as published by BAE. Data prior to 1929 available in U. S. Department of Agriculture Technical Bulletin No. 722, "Production and Consumption of Manufactured Dairy Products in the United States."

2/ Stock data cover quantities in commercial storage warehouses, reported beginning 1916 in Cold Storage Report, Production and Marketing Administration.

3/ Imports, exports, and shipments are those published by the Department of Commerce, except for the period during World War II when this information was supplemented and partially replaced by data from Department of Agriculture records. Imports prior to 1934 were "general imports," while for 1934 and following years they are "imports for consumption."

4/ Use of butter in margarine, prior to 1914 estimated; 1914-16 and beginning 1920 from Bureau of Internal Revenue; 1917-19 (fiscal year data), from Institute of Margarine Manufacturers.

5/ Less than 500,000 pounds.

6/ Cold-storage stocks of 25 million pounds include about 1 million pounds owned by Department of Agriculture and the armed forces.

7/ Total of 35 million pounds includes approximately 30 million pounds in cold-storage and 5 million pounds, outside cold-storage. Cold-storage figure of 155 million pounds includes about 125 million pounds of Department of Agriculture and military stocks.

8/ Cold-storage total of 60.5 million pounds includes approximately 39.6 million pounds of Department of Agriculture and military stocks.

9/ Includes 3 million pounds in process of transfer as of January 1 from military holdings to civilian channels via Production and Marketing Administration.

10/ Includes butter equivalent of butter spread and butter oil.

11/ In process of transfer from the military as of January 1.

12/ Includes 10 million pounds for distribution to School Lunch Program in 1950.

13/ Preliminary.

14/ Government stocks as reported in Cold Storage Report.

1/ Items covered: All types of cheese except full-skin American cheese and cottage, pot and baker's cheese. Includes production by factories and quantities made on farms until 1927 when farm cheese ceased to be a significant factor. Data for 1909 and 1919 are as reported by Census of Manufactures; estimates of total production for the years 1919-29 and 1919 were derived by interpolation on the basis of market receipts data; for the intercensal years 1919-29, annual estimates were interpolated on the basis of data compiled by the Bureau of Agricultural Economics for part of the factories producing in that period; for 1930 to date, the data are as published by the Bureau of Agricultural Economics in Production of Manufactured Dairy Products; output of cheese on farms through 1926 was determined by interpolation between census years.

2/ Stock data cover quantities in commercial storage warehouses, reported beginning 1916 in Cold Storage Report, Production and Marketing Administration.

3/ Data on imports, exports, and shipments are those published by the Department of Commerce, except for the period during World War II when this information was supplemented and partially replaced by data from Department of Agriculture records. Imports prior to 1934 were "general imports," while for 1934 and following years they are "imports for consumption."

4/ Cold-storage stocks of 131 million pounds include approximately 12 million pounds held by USDA and military.

5/ The total stocks of 20 million pounds include about 8 million pounds held outside commercial cold storage.

6/ Cold-storage stocks of 176 million pounds include about 102 million pounds held by Department of Agriculture and military. USDA holdings outside of commercial cold storage estimated at 40 million pounds and commercial holdings at 5.5 million pounds.

7/ Cold-storage total of 145 million pounds includes 75 million pounds held by USDA and military. USDA holdings outside commercial cold storage totaled approximately 11 million pounds and commercial holdings were about 5 million pounds.

8/ Includes 23 million pounds transferred from military stocks.

9/ Excludes 5.5 million pounds for civilian feeding abroad; included in military.

10/ Preliminary.

11/ Government stocks as reported in Cold Storage Report.

1/ 1919-29, total production of cheese in the United States was divided between American and other cheese in accordance with the ratio of production between those two items as published monthly by the Bureau of Agricultural Economics; 1930-50, includes production of whole milk and part skim American cheese; prior to 1919, estimated total production was distributed between American and other cheese on the basis of the 1919-29 average proportions.

2/ Stock data cover quantities in commercial storage warehouses, reported beginning 1916 in Cold Storage Report, Production and Marketing Administration.

3/ Data on imports, exports, and shipments are those published by the Department of Commerce, except for the period during World War II when this information was supplemented and partially replaced by data from Department of Agriculture records. Imports prior to 1934 were "general imports" while for 1934 and following years they are "imports for consumption." 1909-44, exports are for total cheese; beginning 1945, exports classified as American cheese and other cheese processed and not processed. All of these items used for American cheese except "Other, not processed."

4/ Less than 500,000 pounds.

5/ Cold-storage stocks include approximately 12 million pounds held by USDA and military.

6/ The total stocks of 20 million pounds include about 8 million pounds held outside commercial cold storage.

7/ Cold-storage holdings of 151 million pounds include about 102 million pounds held by USDA and military. USDA holdings outside of commercial cold storage estimated at 40 million pounds and commercial holdings at 5.5 million pounds.

8/ Cold-storage holdings of 131 million pounds include 75 million pounds held by USDA and military. USDA holdings outside commercial cold-storage totaled approximately 11 million pounds and commercial holdings were about 5 million pounds.

9/ Includes 23 million pounds transferred from military stocks.

10/ Excludes 5.5 million pounds for civilian feeding abroad; included in military.

11/ Preliminary.

12/ Government stocks as reported in Cold Storage Report.

1/ Per capita production computed on basis of total population; per capita disappearance, civilian population.

2/ Imports include Emmentaler and Gruyere.

3/ Stocks included in "All other varieties" beginning July 1, 1947.

4/ Preliminary.

5/ Imports include Romano or Pecorino, Reggiano or Parmesan, Provoloni and Provolette.

6/ Production includes Neufchatel from 1930-35 and 1943-50; 1936-42, cream cheese only.

7/ 1930 included in "All other varieties".

8/ Stocks included in "All other varieties" beginning July 1, 1944.

9/ Production includes Blue Mold; imports include Roquefort, Edam or Gouda, Blue Mold, Bryndza, Sbrinz, Goya and all other varieties not reported separately.

10/ Includes small quantity of part skim American cheese.

1/ 1909-18 annual production estimates were interpolated on the basis of Census of Manufactures data for 1909 and 1914. For 1919-50 the total output is as published by the Bureau of Agricultural Economics in Production of Manufactured Dairy Products.

2/ Manufacturers' stocks as published by Bureau of Agricultural Economics in Evaporated, Condensed, and Dry Milk Report. Beginning January 1, 1949, cold-storage stocks (bulk) from Cold Storage Report, Production and Marketing Administration were included.

3/ 1909-41, based on data reported by the Department of Commerce; 1942-46 from records of the Department of Agriculture and Department of Commerce; beginning 1947, as reported by the Department of Commerce.

4/ Less than 500,000 pounds.

5/ Preliminary.

1/ 1910-17, approximated on basis of Census of Manufactures data for 1914 and the Bureau of Agricultural Economics estimate for 1918; 1918 to date, as reported by the Bureau of Agricultural Economics in Production of Manufactured Dairy Products.

2/ Manufacturers' stocks as published by Bureau of Agricultural Economics in Evaporated, Condensed, and Dry Milk Report.

3/ 1920-31, the Department of Commerce reported a composite figure on milk and cream, powdered or dried. For this period, exports of dry whole milk were assumed to be 57 percent of the reported composite, the ratio which dry whole represented of the total of dry whole and dry skim in 1932-34. Likewise, shipments of dry whole for 1928-31 were assumed to be 39 percent of the combined shipments of dried whole and skim milk, the relationship which prevailed when the items were reported separately in 1932-34. Imports are "imports for consumption."

4/ Exports and change in stocks exceed production by 1 million pounds.

5/ Less than 500,000 pounds.

6/ Includes 36 million pounds transferred to U. S. Department of Agriculture from military stocks.

7/ Preliminary.

1/ Production for food uses, prior to 1936, based on proportion produced for food in 1936-40 applied to data on total output as reported by BAE for 1920-35. Beginning with 1935, data are as published by the Bureau of Agricultural Economics in Production of Manufactured Dairy Products.

2/ Manufacturers' stocks as reported by BAE in Evaporated, Condensed, and Dry Milk Report.

3/ For the years 1920-31 the Department of Commerce reported a composite figure on milk and cream, powdered or dried. In this period, exports of dry skim milk were assumed to be 43 percent of the reported composite, the portion which dry skim represented of the total of dry whole and dry skim in 1932-34. Likewise, shipments of dry whole for the period 1928-31 were assumed to be 61 percent of the combined shipments of dried whole and dried skim milk, the relationship which prevailed when the items were reported separately in 1932-34. Imports were reported beginning in 1922 and have been "imports for consumption" for the entire period.

4/ Includes 12 million pounds transferred to UNRRA and FMA from military stocks in 1946.

5/ Includes 4.7 million pounds purchased by Dairy Products Marketing Association during 1947 and transferred to FMA during 1948.

6/ Preliminary.

7/ Excludes 6 million pounds sold domestically by USDA for animal feed.

1/ The net amount of milk (equivalent) used in making ice cream (fat solids basis) has been estimated annually beginning with 1924 by Bureau of Agricultural Economics on the basis of total quantity of milk fat used in ice cream and approximate quantities supplied in form of butter and condensed whole milk. (These quantities are included in the tables on butter and evaporated and condensed whole milk.) Approximate allowance for this duplication was made for years prior to 1924 on basis of the magnitude of duplication in 1924-29, and the estimated gallonage of ice cream produced 1909-23.

2/ Output 1909-18 approximated on basis of Census of Manufactures for 1914 and BAE estimates for 1919 and subsequent years. For 1919-29 the production estimates as originally reported by BAE in Production of Manufactured Dairy Products were revised upward to allow for incomplete enumeration; 1930 to date as published in the same report by BAE. Production reported in gallons, converted to pounds assuming a gallon of ice cream weighed 4.7 pounds through 1943, 4.5 pounds in 1944 and 1945, and 4.6 pounds beginning 1946.

3/ Preliminary.

1/ Milk equivalent of milk and cream and manufactured dairy products, including butter, computed on basis of fat content.
 2/ Production on farms plus allowance for milk produced by cows not on farms.
 3/ Milk equivalent of butter used in making margarine.
 4/ Tentative approximations to the per capita consumption levels for total milk from 1909-23 are as follows:

1909	763 pounds	1915	745 pounds	1921	761 pounds
1910	752 pounds	1916	741 pounds	1922	775 pounds
1911	743 pounds	1917	723 pounds	1923	780 pounds
1912	757 pounds	1918	717 pounds			
1913	748 pounds	1919	727 pounds			
1914	740 pounds	1920	729 pounds			

5/ Tentative approximations to the per capita consumption levels for fluid milk and cream from 1909-23 are as follows:

1909	351 pounds	1915	326 pounds	1921	354 pounds
1910	323 pounds	1916	323 pounds	1922	350 pounds
1911	309 pounds	1917	336 pounds	1923	336 pounds
1912	363 pounds	1918	369 pounds			
1913	350 pounds	1919	343 pounds			
1914	329 pounds	1920	356 pounds			

6/ Cold-storage holdings of condensed milk (bulk) included beginning January 1, 1949.
 7/ Preliminary.

^{1/2} Preliminary.

Disappearance computed from factory production, foreign trade and shipments, commercial and USDA stocks, and military takings for own use and for civilian feeding abroad. Data in this table include quantities distributed by Government agencies for relief before the war and for school lunches both before and since World War II. Yearly totals were computed from annual rounded data and are the same as carried in the regular supply and distribution tables; the sum of the months in this table will not necessarily equal annual totals shown. Besides factory production there was some farm-made cheese through 1926 and farm-made butter throughout the period. This series carried regularly on page 2 of The Dairy Situation.

Table 84. - Oleomargarine, actual weight: Supply and distribution, 1912-50

1/ Less than 50,000 pounds.

2/ Includes American Red Cross procurement for prisoner-of-war packages, as follows: 1943, 8.0 million pounds; 1944, 13.0 million pounds; 1945, 3.9 million pounds.

3/ Includes an estimated 7.3 million pounds exported in food packages through CARE and other nongovernmental relief agencies in 1947; 9.5 million pounds in 1948; 2.0 million pounds January-March 1949; does not include quantities mailed abroad by individuals.

4 4/ Does not include shipments to Alaska and Hawaii after March 1948. No data available.

5/ Preliminary.

Compiled as follows: Production, Bureau of Internal Revenue. Apparent change in stocks, residual balancing item. Exports, 1912-40, tax-free withdrawals for export, Bureau of Internal Revenue, minus shipments to Puerto Rico and the Virgin Islands; 1941-50, Bureau of the Census. Shipments, Bureau of the Census. In addition, quantities shipped under special USDA programs, 1942-June 1945, are included here; not reported by Bureau of the Census. Military, USDA civilian disappearance, 1912-47, tax-paid withdrawals for use in the United States and Territories, plus tax-free withdrawals for use in Government institutions, minus commercial shipments to Alaska and Hawaii; 1948-50, computed from data on production, trade, and military procurement. Totals and per capita estimates computed from unrounded numbers.

^{1/} Beginning April 1943, prices quoted for "domestic acid-precipitate casein, 100 bags or more f.o.b. shipping point". Prior to April 1943, price quoted is for casein, domestic, 80 - 100 mesh, carlots, New York.

^{2/} Imported, fine ground, carlots, New York. Beginning January 1936 through March 1944, described as "Argentine, 80 - 100 mesh". Argentine duty paid from May 1934 through September 1941. From October 1941 through July 1942, prices quoted as c.i.f. Beginning April 1944, prices quoted for "imported acid-precipitate casein, 100 bag lots or more".

^{3/} Animal and human combined.

^{4/} Not available.

^{5/} Average for January - September only.

^{6/} Average for April - December only.

^{7/} Preliminary.

Production, stocks, and price of nonfat dry milk solids from Bureau of Agricultural Economics; imports, Bureau of the Census; prices of casein from Oil, Paint and Drug Reporter.
