Foreign Agricultural Trade
of the United States

NOTICE

The Economic Research Service will discontinue free general distribution of all publications, including Foreign Agricultural Trade of the United States. ERS must redirect its funds to maintain basic research and analytical programs. The May/June issue in this series will be available to most recipients only by subscription. Further details and ordering information are inside. You must subscribe promptly to assure continued service.

April 12, 1982

To the readers of Foreign Agricultural Trade of the United States:

The Economic Research Service is eliminating free distribution of this and all other agency publications. Faced with budget reductions, we must redirect the funds in order to continue the agency's basic research and analytical programs.

The March/April issue of Foreign Agricultural Trade of the United States is the last you will receive for free. To continue receiving the report you must purchase a subscription.

Order your subscription using the form inside the back cover. The annual subscription fee for six issues of FATUS plus the two statistical supplements (calendar year and fiscal year) is \$19.00 for domestic subscribers and \$23.75 for foreign subscribers.

Please subscribe promptly to assure uninterrupted service.

A limited number of free subscriptions will be reserved for members of the press and government agencies. If you qualify, send your request for a free subscription on letterhead stationery to:

Thomas Warden, room 342 GHI Building
Economic Research Service
U. S. Department of Agriculture
Washington, D.C. 20250.

Sincerely,

Patrick M. O'Brien,
Assistant Director for Situation and Outlook
International Economics Division

U.S. FOREIGN AGRICULTURAL TRADE STATISTICAL REPORT, FISCAL YEAR
1981: A SUPPLEMENT TO THE FOREIGN AGRICULTURAL TRADE OF THE
UNITED STATES. International Economics Division, Economic
Research Service, U.S. Department of Agriculture.

ABSTRACT

This statistical reference presents current and historic analytical data on U.S. foreign trade in agricultural products. Detailed tables cover commodity and country information for fiscal years 1980 and 1981. Statistics for fiscal year 1981 are preliminary.

SPECIAL NOTICE

This statistical reference presents analytical tables showing current and historical data on U.S. foreign trade in agricultural products. Detailed tables cover commodity and country information for the most recent 2-year period. Statistics for fiscal year 1981 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture, such as fibers, raw hides and skins, fats and oils, beer, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

Exports

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such by the U.S. Customs Bureau.

The export data in this report include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin which have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price including inland transportation, insurance, and other costs incurred in placing the merchandise alongside the carrier.

Agricultural exports under specified Government-financed programs (table 13) include shipments under Public Law 480 programs, authorized by Public Law 83-480 as amended; and AID programs, authorized by P.L. 82-165, 83-665, and 87-195 as amended. Commercial exports include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit guarantees for relatively short periods repayable in dollars plus interest by USDA's Commodity Credit Corporation, and (2) Export-Import Bank loans and medium-term loan guarantees. Apparent excesses of exports under specified Government programs over total exports, which result in negative values in the column "Agricultural exports outside specified Government programs," may be due to lags in reporting, differences in valuation procedures, or recording the export as destined for the country through which a transshipment occurred.

In commodity group-by-country data (table 15), 7-digit Schedule B commodity codes were summed to group totals. Each country listed under the groups accounted for 0.3 percent or more of the commodity group's export value with the following exceptions: Countries accounting for 0.1 percent or more of the wheat, rice, feed grains, grains and preparations, corn, wheat and wheat

products, grain sorghum, wheat and wheat flour, feed grains and products, and nonfat dry milk.

Commodity-by-country data (table 16) are printed at the 7-digit Schedule B commodity code level. Statistics on commodities valued under \$1 million are not shown, but are available for reference from machine tabulations in the World Analysis Branch, International Economics Division, Economic Research Service, U.S. Department of Agriculture. So-called "basket" classifications (28 commodities) were excluded because they consist of diverse items. Countries listed under commodity headings were selected on a percentage of commodity export values as follows: (1) commodities having an export value from \$1 million to \$5 million show countries accounting for 5 percent or more; (2) commodities with export values from \$5 million to \$20 million show countries accounting for 2 percent or more; (3) commodities with export values of \$20 million to \$50 million show countries accounting for 1 percent or more; and (4) commodities valued over \$50 million show countries accounting for 0.3 percent or more. Data on exports by selected commodity groups will be published as supplementary tables to this publication and made available on request.

Imports

Import data consist of "imports for consumption," representing entries for immediate consumption and withdrawals from bonded warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are termed supplementary or partly competitive. All other commodities are considered complementary or noncompetitive.

In commodity group-by-country data (table 25), 7-digit TSUSA commodity codes were summed to group totals. Countries listed under each group accounted for 0.3 percent or more of the commodity group's import value with the following exceptions: Bananas, green coffee, cocoa beans, crude rubber, pork, and raw sugar were listed if they accounted for 0.1 percent or more.

Commodity-by-country data (table 26) are printed at the 7-digit Schedule A commodity code level. Basket classifications (31 commodities) were excluded. Countries listed under commodity headings were selected as follows: (1) commodities having an import value from \$1 million to \$5 million show countries accounting for 5 percent or more; (2) commodities with import values from \$5 million to \$20 million show countries accounting for 2 percent or more; (3) commodities with import values of \$20 million to \$50 million show countries accounting for 1 percent or more; and (4) commodities valued over \$50 million show countries accounting for 0.3 percent or more. The value of imports from "other countries" represents the difference between the commodity total and the sum from individual designated sources.

Economic Research Service

The Economic Research Service carries out research on the production and marketing of major agricultural commodities; foreign agriculture and trade; economic use, conservation, and development of natural resources; trends in rural population, employment, and housing; rural economic adjustment problems; and performance of the U.S. agricultural industry. ERS provides objective and timely economic information to farmers, farm organization members, farm suppliers, marketers, processors, consumers, and others who make production, marketing, and purchasing decisions, and to legislators and other public officials at the Federal, State, and local government levels.
