Crops, Livestock, and Livestock Products,  
Monthly and Annual or Season Average Prices

This publication presents monthly prices received by farmers for the United States for important agricultural commodities, together with season average prices for crops and annual average prices for livestock and livestock products for the period 1908-55. The monthly price series contained in this publication do not all begin on a common date, and the season or annual average prices for a particular commodity in some cases antedate monthly prices for that commodity. Prices for the various commodities are expressed in the units which are most commonly employed throughout the United States.

Prices received by farmers as collected by the Department of Agriculture relate to the average prices farmers receive for their products at the point of first sale. Points of first sale by farmers may range all the way from sales at retail or from sales on a graded, packed, and delivered basis to bulk sales at the farm. The average price concept is that of a price which, if multiplied by the total quantity of the commodity sold, would equal the total sum received by all farmers for that commodity. Since in general these estimates are

designed to represent the average prices received for all sales on an "as sold" basis, they do not measure the price of a specific grade, kind, or variety at a common point of sale.

Composite average price estimates of this type are useful in connection with computing value of production and income from sales of farm products, for comparing price changes and price levels from month to month and from year to year, for measuring price trends, for other types of economic analyses, and for use in computing price index numbers and parity prices. They are not designed, however, to take the place of market quotations by grades for specific markets for use in connection with day-to-day marketing operations.

Monthly prices. In general, prices for most commodities are collected over a period of a week centered on the 15th of the month, and these prices are used to represent the average price for the commodity received for the month. For some commodities, these monthly prices as published currently are reviewed at the end of the season and revised, if necessary, to take into account sales for the entire month, notable among this group being citrus fruits. Prices for milk sold at wholesale to plants and dealers apply to all milk sold during the month.

For most commodities, the United States monthly prices are obtained by weighting State monthly prices either by crop-year production, crop-year sales, or calendar-year sales. For citrus fruits, cotton and cottonseed, tobacco, chickens, and turkeys, State monthly prices are weighted by estimated monthly sales to obtain United States averages.

Season and annual average prices. United States season and annual average prices in this publication are obtained by weighting State season or annual average prices by quantities sold. Marketing seasons for each crop are shown in appropriate footnotes in the following tables.

Index of Prices Received by Farmers. The chart on the preceding page summarizes the changes in prices received by farmers for crops, for livestock and livestock products, and for all commodities from 1910-55.

<sup>1</sup> Refers to crop of designated year, computed by weighting State season average prices by quantities sold. Marketing season begins in June in most Southern and Southwestern States, Mo., and Kans., and in July in other States. Twelve-month period of heaviest marketing is June-May. Includes allowance for unredeemed loan and purchase agreement deliveries by States 1938-45 and 1947-55.

<sup>2</sup> Excludes payment of 30 cents per bushel for deliveries under Government purchase program.

<sup>1</sup>Refers to crop of designated year, computed by weighting State season average prices by quantities sold. Marketing season begins in June in most Southern States, Kans., Mo., N.Mex., and Calif., and in July in other States. Twelve-month period of heaviest marketing is July-June. Includes allowance for unredeemed loan and purchase agreement deliveries by States 1939-42 and 1948-55.

<sup>2</sup>Preliminary.

<sup>1</sup> Refers to crop of designated year, computed by weighting State season average prices by quantities sold. Marketing season begins in June in most of the Southern and Southwestern States, Mo., and Kans., and in July in other States. Twelve-month period of heaviest marketing is July-June. Includes allowance for unredeemed loan and purchase agreement deliveries by States 1948-55.

<sup>1</sup>Refers to crop of designated year, computed by weighting State season average prices by quantities produced from 1919-28 and by quantities sold from 1929-55. Marketing season begins in July in Texas; Sept. in N. Car., La., and Okla.; and Oct. in all other States. Twelve-month period of heaviest marketing is July-June. Includes allowance for unredeemed loan and purchase agreement deliveries by States 1944 and 1948-55.

Series of monthly estimates discontinued

<sup>1</sup>Refers to crop of designated year, computed by weighting State season average prices by estimated production from 1915-23 and by quantities sold from 1924-55. Marketing season begins in July in Texas and September in all other States. Twelve-month period of heaviest marketing is August-July.

<sup>1</sup>Refers to crop of designated year, computed by weighting State season average prices by quantities produced from 1933-40 and by quantities sold from 1941-55. Marketing season begins in August in Minn. and N. D., and in July in all other States. Twelve-month period of heaviest marketing is July-June. Includes allowance for unredeemed loan and purchase agreement deliveries by States 1943 and 1948-49.

<sup>2</sup>Preliminary.

<sup>1</sup>Loose hay, monthly prices May 1914-April 1948 and season averages 1914-47; baled hay thereafter.<sup>2</sup>Refers to crop of designated year, computed by weighting U.S. monthly prices by monthly marketings of all hay 1914-49 and by monthly marketings of wild hay 1950-55. The marketing season used was June-May.<sup>3</sup>Preliminary.

<sup>1</sup>Equivalent packing-house door returns. Monthly returns computed by weighting State returns by estimated sales for the month regardless of crop from which harvested.

<sup>2</sup>Refers to crop of designated year, computed by weighting State season average returns by quantities sold. Marketing season usually begins in Sept. in Fla., Oct. in Texas, and Nov. in Ariz. and Calif. Twelve-month period of heaviest marketing is Oct.-Sept.

<sup>3</sup>Season average returns 1954 and 1955 and monthly returns Sept. 1954-Dec. 1955 are preliminary.

<sup>1</sup>Equivalent packing-house door returns. Monthly returns computed by weighting State returns by estimated sales for the month regardless of crop from which harvested.

<sup>2</sup>Refers to crop of designated year, computed by weighting State season average returns by quantities sold. Marketing season usually begins in October in Fla. and Texas and in November in Ariz. and Calif. Twelve-month period of heaviest marketing is November-October.

<sup>3</sup>Season average returns 1954 and 1955 and monthly returns Oct. 1954-Dec. 1955 are preliminary.

<sup>1</sup> Prices prior to crop year 1939 include some processing.

<sup>2</sup> Refers to crop of designated year, computed by weighting State season average prices by quantities produced. Marketing season begins in December preceding the year shown.

<sup>1</sup>Computed by weighting State season average prices by production of shorn wool. From 1943 to date April-March has been used as the marketing season; prior to 1943 the calendar year was used.

<sup>2</sup>Includes an allowance for unredeemed loans.

<sup>3</sup>April-December preliminary. Average local market price for wool sold; does not include incentive payment to bring season average return for 1955 to 62 cents per pound.

<sup>4</sup>Weighted average price for wool sold April 1955 through January 1956.

<sup>1</sup>From 1909 to 1911 computed by weighting U.S. monthly prices by quantities sold; 1912 to 1955 by weighting State weighted averages by quantities sold.

<sup>2</sup>Monthly prices computed by weighting State prices by estimated sales for the month. 1955 prices are preliminary.

## EGGS

## Prices received by farmers, United States
