October 1957

DAIRY AND POULTRY MARKET STATISTICS

1956

Annual Summary of Market Statistics Collected and Compiled by Dairy and Poultry Market News Offices

PREFACE

Receipts totals shown in tables 1 through 154, inclusive, are compiled from current information supplied voluntarily by railroads (rail) and by principal wholesalers, jobbers, chain store companies, and other first-hand receivers (truck). These figures include intermarket shipments which are not of necessity produced in the State to which origin is credited, as movement from cities with storage and storage-in-transit facilities is a factor.

Receipts totals of butter, with the exception of Portland, Oreg., do not include butter manufactured locally.

Receipts totals of processed poultry at Cincinnati, Los Angeles, and San Francisco include processed turkeys.

Receipts totals of milk, cream and condensed milk are compiled from current information supplied voluntarily by railroads (rail) and by milk distributors and other first-hand receivers (truck).

Receipts of cream included in tables 25, 26, 90, 91 and 107 are reported on the basis of 40-percent butterfat.

Receipts of condensed milk included in tables, 27, 28, 92, 93 and 108 are for fresh, unsweetened condensed milk.

Average prices for a month are computed by determining the arithmetic mean of the mid-points of each day's price range. An average is not computed for a month when a price is not reported for five or more consecutive trading days.

An average price for a year is the mean of the twelve month's averages. An average for the year is computed only if there are average prices for all months.

¹These averages are calculated by a formula designed to serve the needs of Administrators of Federal milk marketing orders. They are averages of prices at which Cheddars sold on a given date weighted by the number of cars sold. When there are no sales, the highest bid is used, if higher than the average computed for the previous week; if no sales or bids, the lowest offering price is used. When there are neither sales, bids or offers, the average of the previous week is used by Milk Administrators as the prevailing price for the week.
