INFORMATION SERVICE
U.S. DEPARTMENT OF COMMERCE
SPRINGFIELD, VA. 22161

IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

Foreign Agricultural Trade of the United States is published six times a year with two supplements. Subscription prices are $19 a year domestic and $23.75 foreign (prices subject to change). Send check or money order payable to "Superintendent of Documents" to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. For faster service, call (202) 783-3238 and charge your subscription to your VISA, MasterCard, or GPO Deposit Account.

IS IT TIME TO RENEW?

Your subscription to this publication may be due to expire soon. If so, you will get a renewal notice in the mail from GPO about 90 days ahead of time. Only one notice is sent. You must return it promptly to ensure uninterrupted service. If you have misplaced your renewal notice, use the form on the back of this report. Be sure to attach mailing label.

15. Supplementary Notes

16. Abstract (Limit: 200 words)

Values for farm product exports during the first 5 months of fiscal year 1984 (October 1983-February 1984) rose to $17.1 billion from the $15 billion shipped during the same months the previous year. Values for imported farm products increased to $7.5 billion during the first 5 months of fiscal year 1984 from $6.7 billion a year earlier. Price forecasts for U.S. corn and soybeans in fiscal year 1984 remain substantially above last year's price but below predictions made last fall. The value of the U.S. dollar declined sharply during January and February, especially against European currencies. Values for U.S. agricultural exports to Canada in 1983 totaled $1.9 billion, making Canada the United States' fifth largest customer. The value of farm product exports assisted by U.S. Government programs totaled $1.14 billion in 1983, down 10 percent from the $1.27 billion shipped the previous year.

Digest

U.S. Agricultural Exports Up 14 Percent (see p. 2). Values for farm product exports during the first 5 months of fiscal year 1984 (October 1983-February 1984) rose to $17.1 billion from the $15 billion shipped during the same months the previous year. Higher corn and soybean prices boosted the value of exports, while total volume declined primarily because of lower soybean shipments. February exports dropped below those of the first 4 months and may continue this downtrend as Southern Hemisphere crops reach world markets.

U.S. Agricultural Imports Up 12 Percent (see p. 59). Values for imported farm products increased to $7.5 billion during the first 5 months of fiscal year 1984 from $6.7 billion a year earlier. Contributing factors included lower exchange rate values for most foreign currencies, the U.S. economic recovery, and production shortfalls for some commodities.

Commodity Prices Higher (see p. 99). Price forecasts for U.S. corn and soybeans in fiscal year 1984 remain substantially above last year's prices but below predictions made last fall. Average annual prices may nonetheless set new records.

Dollar's Foreign Exchange Value Declines (see p. 103). The value of the U.S. dollar declined sharply during January and February, especially against European currencies. Expected higher returns on investments in Europe, declining U.S. stock prices, and an upward trend in gold prices have depressed recent dollar exchange rates.

Canada Remains An Important U.S. Customer (see p. 106). Values for U.S. agricultural exports to Canada in 1983 totaled $1.9 billion, making Canada the United States' fifth largest customer. For fiscal year 1984, U.S. exports are forecast to increase about 2 percent based on higher prices for many commodities, a moderately expanding Canadian economy, and a steady or slightly depreciating U.S. dollar.

U.S. Agricultural Exports Under Government-Financed Programs Declined (see p. 110). The value of farm product exports assisted by U.S. Government programs totaled $1.14 billion in 1983, down 10 percent from the $1.27 billion shipped the previous year. Volume also fell 10 percent to 5.6 million tons. Public Law 480 Title I sales were up slightly to $756 million, primarily because of increased rice and corn shipments, but Title II donations dropped 25 percent to $286 million.

U.S. Agricultural Exports Up 14 Percent

During the first 5 months of fiscal year 1984 (October 1983-February 1984), values for U.S. farm product exports totaled $17.1 billion, 14 percent above the $15 billion shipped during the same months last year. However, total export volume declined slightly to about 64 million tons, largely because of lower soybean shipments. Export increases included rice (up 32 percent), cotton (up 34 percent), and corn byproducts (up 22 percent).

Export Forecast Totals $37.5 Billion

The export forecast for fiscal year 1984 stands at $37.5 billion compared with $34.8 billion in fiscal year 1983. However, volume could decline 3 percent to about 140 million tons. Relatively strong export movements during the first 5 months, running at an annual rate of over $40 billion, declined to $3.4 billion in February and may trend downward in succeeding months as Southern Hemisphere crops reach world markets.

Wheat Exports Remain at Last Year's Pace

Increased wheat exports to the USSR, China, and Brazil offset reduced shipments to India, Egypt, Bangladesh, and the European Community (EC). Volume to all countries totaled 15.7 million tons during the first 5 months of fiscal year 1984.

The USSR has purchased over 4 million tons of U.S. wheat this fiscal year under a new 5-year long-term grain agreement, and will likely continue taking sizeable monthly amounts because Argentina is shipping more of its wheat to other countries this year.

China has also bought substantial amounts of U.S. wheat in recent months, including 1.9 million tons shipped between October 1 and February 29. The grain agreement with China is based on January-December periods, and part of the recent purchases includes amounts which were not shipped in 1983 (only 2.5 million tons were shipped to China in calendar year 1983).

Despite large supplies, wheat export prices during the October-February period have remained about the same as those of the previous year.

Coarse Grain Values Up Sharply

Coarse grain exports in the first 5 months were more than 1 million tons higher than those in the same months last year, totaling 25.6 million tons. Values, however, surged to $3.8 billion, a 43-percent gain over last year's level. Higher prices caused by sharply reduced supplies raised average export prices to $147 per ton from $107 during the same period last year. Significant increases in exports to Mexico, South Africa, Japan, and Venezuela were largely offset by reduced shipments to China, Eastern Europe, and the USSR.

Soybean Shipments Down

Because of the 1983 drought, U.S. soybean supplies are short and prices are high. Soybean export volume plunged 18 percent in the first 5 months to 10 million tons from 12 million during the same period of the previous year. Export prices at nearly $300 per ton averaged 31 percent above those of last year. Except for Mexico, Korea and the USSR, export tonnages to most major markets were markedly lower.

Soybean meal export volumes were down 15 percent in the October-February period, but revenues declined only 2 percent to $714 million due to higher prices. Reduced tonnages to the EC overrode increases to Eastern Europe and Southeast Asia. Export tonnages dropped 23 percent, including shipments to Yugoslavia, Pakistan, Mexico, Colombia, and Venezuela.

Cotton Exports Boom

Raw cotton exports in the first 5 months showed strong growth, expanding 46 percent to 621,000 tons. Crop production declines caused by adverse weather in a number of countries, including Pakistan and the USSR, boosted foreign demand for U.S. cotton. Shipments to the EC jumped 83 percent to 93,000 tons. Exports were also up to Japan, Taiwan, Indonesia, Hong Kong, and Thailand, primarily because of increased U.S. market shares and improved demand for textile products on world markets. (Thomas A. Warden, World Analysis Branch)

U.S. Agricultural Imports Up 12 Percent

U.S. import values of agricultural commodities rose 12 percent to $7.5 billion in the first 5 months of fiscal year 1984 (October 1983-February 1984) from $6.7 billion during the same period a year earlier. Value increases for sugar, rubber, coconut oil, eggs, vegetables, bananas, tobacco, wine, and malt beverages more than offset declines for cocoa, beef, cheeses, and fruit. U.S. farm product imports from developing countries, accounting for 58 percent of imports from all areas, totaled $4.4 billion compared with $2.9 billion from the developed countries. Brazil is the single largest source of U.S. farm imports, followed by Canada and Mexico.

Noncompetitive Imports Up 5 Percent

Values for noncompetitive imports, accounting for nearly 34 percent of all farm imports, rose 5 percent from the first 5 months of fiscal year 1983 to $2.6 billion. Values for coffee imports, representing half of all noncompetitive products, totaled $1.3 billion, slightly less than those last year. The quantity imported fell 8 percent to 450,000 tons, as unit import prices increased from $1.21 per pound in the first 5 months of fiscal year 1983 to $1.29 per pound in fiscal year 1984. Average monthly wholesale prices for Brazilian coffee in the United States increased from $1.42 per pound in October 1983 to $1.52 per pound on February 21, 1984. Brazil and Mexico provided 20 percent and 10 percent, respectively, with Colombia, Guatemala, El Salvador, Indonesia, Uganda, Ecuador, and the Ivory Coast, together shipping 43 percent.

Cocoa beans and products, ranking third in noncompetitive imports, totaled $341 million in value, 15 percent lower than year-earlier levels. The volume dropped 34 percent to 156,000 tons as import unit prices jumped by 28 percent to $2,189 per ton. The price increase was mainly due to the late West African cocoa bean harvest, and uncertain production levels. The New York cocoa futures price averaged 91 cents per pound in October 1983, before increasing to $1.15 per pound in January 1984, but is expected to decline to about an average of $1.10 per pound in March 1984. U.S. imports of cocoa butter, powder, and chocolate gained. Brazil provided 25 percent of cocoa volume, followed by the Ivory Coast. U.S. cocoa processors in the last 5 years or more have developed facilities in Latin America, reducing U.S. cocoa bean imports.

Values for rubber and allied gums, the second major noncompetitive import, totaled $362 million, up 59 percent from the first 5 months of fiscal year 1983. The volume increased by 24 percent to 346,000 tons as low stock levels were replenished. However, unit import prices for rubber jumped 29 percent above year-earlier levels. With relatively moderate interest rates and the recovering automobile industry

the rubber import volume is expected to continue at current rates during the remainder of the year.

For other noncompetitive imports, values increased for bananas, spices, tea, and essential oils during October-February. U.S. imports of bananas and plantains, which enter the country duty-free, accounted for nearly 56 percent of all imported horticultural products, totaling $278 million, up 11 percent from the same months a year earlier. Bananas and plantains as a group are the fourth largest noncompetitive import. Most of these imports originate in Latin America.

Competitive Imports Up 15 Percent

Competitive import values of $5 billion rose 15 percent in the first 5 months of fiscal year 1984 over imports in the same months of fiscal year 1983. Sugar, vegetables, live animals, coconut oil, cashew nuts, wine, and malt beverages accounted for most of the increase in competitive imports. Beef and veal, accounting for 63 percent of all meat imports, declined 12 percent in value to $464 million, and volume dropped 16 percent to 216,000 tons due to plentiful U.S. red meat supplies. Australia supplied 56 percent of the fresh and frozen beef and veal, with New Zealand, Canada, and Central America together shipping over 40 percent.

The increased sugar quota and strong re-exports pushed up U.S. sugar import values by 36 percent to $552 million, while the volume rose 28 percent to 1.4 million tons. Import unit prices for sugar gained about 7 percent in the first 5 months of fiscal year 1984, averaging about $396 per ton compared with $372 in 1982/83. The wholesale price for sugar in the U.S. market was 22 cents per pound in February 1984, unchanged from October 14, 1983. Per capita U.S. consumption of refined sugar in fiscal year 1984 is forecast at 68 pounds, 3 pounds below the estimate for 1983 and about 16 pounds below that of 1980. Principal sugar suppliers were Brazil, the Dominican Republic, Australia, Panama, and the Philippines.

Tobacco Imports Up

The 1983 U.S. tobacco crop of 640,000 tons, the smallest output since 1943, resulted in increased imports of unmanufactured tobacco. Tobacco imports, valued at $240 million, rose 14 percent to 81,000 tons during the first 5 months of fiscal year 1984. Turkey, Brazil, and Greece were the major suppliers. While oriental leaf tobacco remains a large proportion of imports, machine-threshed scrap leaf tobacco has become more important in the last 3 years because of the tariff reclassification.

Coconut Oil Imports Higher

The value of oilseeds and products jumped 80 percent to $352 million, due mainly to gains in coconut oil, palm oil, and castor oil. Coconut oil, accounting for over half of all vegetable oil imported into the United States, surged 143 percent in value to $148 million; the volume increased 40 percent to 215,000 tons. The Philippines supplied the bulk of the coconut oil.

Values of vegetable imports also went up, partly because of freeze damage to U.S. crops. Vegetables and preparations rose 24 percent to $536 million. The volume of fresh vegetables such as tomatoes from Mexico increased sharply.

Wine and malt beverage imports rose 12 percent in value and totaled $610 million in the first 5 months of fiscal year 1984. Italy, France, and West Germany are the major suppliers of wine, with the Netherlands, Canada, and West Germany providing most of the malt beverages.

Farm Trade Balance To Improve

U.S. agricultural imports are expected to rise this year. Import values are forecast at $17 billion, 4 percent higher than in fiscal year 1983. The agricultural trade surplus is currently estimated at $20.5 billion in fiscal year 1984, an increase of almost $2 billion from last year. The increase in imports is mainly the result of the appreciation of the dollar and shortfalls in production for certain commodities. The U.S. economic recovery has also encouraged imports of high-value commodities to replenish inventories, such as rubber which was up 54 percent from the first quarter of 1983.

Production shortfalls abroad have resulted in higher import values for palm oil and cocoa during the first 5 months of fiscal year 1984. Palm oil imports are not expected to increase significantly later in 1984 because of the price, currently selling at a premium to domestic soybean oil.

Fruit and vegetable imports are forecast to remain strong this year because of December weather-damaged crops in Texas and Florida. Exports of concentrated orange juice from Brazil are expected to almost deplete that country's stocks. Meat and meat product imports, down 11 percent from the first quarter of 1983, are forecast to increase later this year. However, imports will probably remain below year-earlier levels because of lower trigger levels. (Charles E. Goode and Patricia M. Haslach, World Analysis Branch)

Commodity Prices Higher

Price forecasts for U.S. grains and oilseeds in fiscal year 1984 have dropped in recent months, with corn and soybean prices lagging most. Developments keeping prices below earlier forecasts include weaker than expected demand in domestic and export markets and larger than anticipated crop supplies in the United States and abroad. Even so, yearly average prices for corn and soybeans will likely set records, topping the marks of a few years ago when supplies were also short.

Wheat Prices Unchanged

Wheat prices in fiscal year 1984 are expected to remain unchanged from last year. The price-boosting impact of lower ending stocks expected for 1984 is offset by prospects for another large wheat crop and by a lower loan rate for next year's crop. Fiscal year 1984 pricing patterns are different from last year. Throughout fiscal year 1983, prices rose, reaching a year-end peak in anticipation of a smaller crop. Prices peaked in the summer, fell during the autumn to below the 1984 loan rate of $134 a ton ($3.65 a bushel), and are approaching the 1984/85 $121-a-ton loan rate ($3.30 a bushel). Last year's farm and export prices averaged $130 per ton ($3.53 a bushel) and $160 ($4.35 a bushel), respectively, and forecasts for fiscal year 1984 remain about the same.

Corn Prices To Hit Record

Last fall, USDA forecast the average farm price for 1984 corn between $138 and $145 a ton ($3.50-$3.70 a bushel), but that forecast has been lowered to $126-$134 ($3.20-$3.40 a bushel) in response to recently declining prices. Since the high of $132 a ton ($3.35 a bushel) in August, prices have fallen more than $10 (26 cents a bushel). The extent of the price decline caught many by surprise, but in retrospect, the earlier forecast was overly optimistic. Some market developments adding to recent price weakness include increased use of wheat as feed and the continual strength of the dollar, which has limited foreign demand. Nonetheless, average corn prices in 1984 are forecast at record levels because of the extremely short supplies. To reach the forecast, corn prices will have to rise from the current level to over $130 a ton ($3.35 a bushel) sometime this year and could reach the September 1975 record of $136 ($3.45 a bushel).

Soybean Prices Also To Set a Record

Although soybean farm prices in fiscal year 1984 are expected to average between $275 and $300 a ton ($7.50-$8.20 a bushel), they were forecast last September to average $330 ($9 a bushel). Again, an overly optimistic forecast was lowered. Market developments, such as increases in the size of the U.S. crop, prospects for larger Southern Hemisphere exports, and weakened foreign import demand also played a role. Price prospects for soybean meal and oil have mirrored that for soybeans. U.S. soybean prices still have to increase during

the year to reach the forecast, emphasizing the likelihood of price rationing later in the year.

Domestic Use Reacts to Prices

Relatively low domestic wheat prices and high corn and soybean prices will cause wheat feeding to set a post-World War II record high and will reduce the domestic use of corn and soybeans. Record wheat feeding has been significant in moderating corn and sorghum feed demand and price prospects. Other feed grains are also being substituted for corn to a greater extent than anticipated. Wheat is also higher in protein than corn, thereby reducing the need for protein supplements in feeds and helping cut soybean meal demand.

Foreign Use and U.S. Exports Affected

Movements in U.S. export prices are responsible for many changes in foreign use. At the export terminal, the price premium of wheat over corn is expected to average about half that of last year. The soybean price premium over corn will increase sharply, by about 40 percent. Increased use of wheat abroad is anticipated this year because of its attractive price. In the European Community (EC), for example, wheat feeding will increase about one-third. Soybean and soybean meal imports into the EC will fall precipitously because of high prices. Some countries, such as South Korea and Spain, may import feed wheat rather than coarse grains. (Bradley Karmen, World Analysis Branch)

Dollar's Foreign Exchange Value Declines

The value of the U.S. dollar has declined dramatically in the first 2 months of 1984. European currencies are the primary beneficiaries, most notably the German mark. The dollar's value relative to the Japanese yen or Canadian dollar has changed very little, continuing the trend established in 1983.

Currency Preference Shifts

The disappointing performance of the U.S. stock market started the tentative movement out of the dollar and into the German mark. This pattern is now recognizable as a clear shift in currency preferences. Wary investors forsook U.S. investments for German alternatives because of rapidly advancing prices on the Bonn bourse. As a result, demand significantly increased for German marks.

German Mark Stronger

The functioning of the European Monetary System (EMS) guaranteed that other continental currencies would follow the lead of the German mark. The EMS is a joint float of Common Market monies (excluding the British pound and Greek drachma). When one currency exhibits considerable strength, the rest are carried along in its wake. This is most noticeable whenever the most frequently traded currency, the German mark, moves sharply either up or down.

Relative interest movements also point to the strength accorded the mark in foreign exchange markets. Its appreciation has been all the more impressive given the sharp increase in the interest rate advantage accorded the U.S. dollar, from 3.6 percent at the end of January to 3.9 at mid-February. Had the same jump occurred at the end of 1983, the dollar would probably be sitting above 3 marks. There will be considerable volatility in the dollar/mark ratio throughout remainder of the spring.

Currency Traders Expect Rise in Inflation Rate

The above activity in currency markets also points to expectations of higher inflation in the United States. As price rises accelerate, the real rate of return on dollar assets declines and demand for dollars decreases. Inflation rates fell from 1981 through 1983, and the increasing real rate of return on dollar-denominated instruments became the most important reason for those wishing to acquire U.S. currency. The dollar also became a haven for those wishing to maintain liquidity; the real return on deposits made U.S. assets much more desirable than gold. However, the recent upward trend in the value of gold also adds fuel to the belief that an inflation hedge will be needed soon and reinforces the same notion held in currency markets.

Declining U.S. Stock Market Price

The psychological impact of lackluster U.S. stock prices has also played an important role in leading to the dollar's demise. First, many view the drop in stock market averages as

a precursor of slower economic growth. Second, falling stocks during what is normally a period of advance (the start of the year) have added to the notion that rates of return are declining sharply. If potential real income falls, the appeal of U.S. currency will also diminish.

A further sign of the eroding confidence in the U.S. dollar is the indifference of traders to normally heady economic news. There was no enthusiasm for reports of strong economic growth in the fourth quarter of 1983, narrowing current account deficits in December 1983, and improvements in retail sales. (David Stallings, World Analysis Branch)

Canada Remains An Important U.S. Customer

Canada and the United States are not only major competitors in international grain and oilseed markets but are also major customers for each other's agricultural products. U.S. agricultural exports to Canada in 1983 were valued at $1.9 billion, making Canada the United States' fifth largest customer. The United States provides about 60 percent of Canada's total agricultural imports. On the other hand, values for U.S. agricultural imports from Canada in 1983 equaled $1.5 billion, 9 percent of total U.S. agricultural imports. The United States is Canada's third largest market and takes about 20 percent of Canada's agricultural exports.

U.S. agricultural export values to Canada in 1983 were almost 2 percent greater than in 1982, but remained below the $2.1 billion record achieved in 1981. For fiscal year 1984, U.S. exports are forecast to increase about 2 percent based on higher prices for many commodities, a moderately expanding Canadian economy, and a steady or slightly depreciating U.S. dollar.

U.S. Fruit and Vegetable Exports Continue Large

Canada imports significant quantities of fruits, vegetables, and nuts, products the country cannot grow or produce in sufficient quantities. The United States is the principal supplier, providing over 60 percent of fruit and nut imports and 75 percent of vegetable imports. U.S. exports of these items to Canada were valued at over $800 million in 1983, or 44 percent of total U.S. agricultural exports to Canada.

Canadian production affects U.S. exports; record U.S. fruit shipments in 1981 and 1982 followed poor 1981 Canadian crops. Canadian fruit production in 1983 was slightly above that of 1982, but vegetable production fell below the 1982 record. U.S. exports of these products are expected to increase about 3 percent in fiscal year 1984, reflecting both improved Canadian incomes and higher prices resulting from the severe December freeze.

U.S. Cotton Exports Gain

U.S. cotton exports to Canada increased sharply in 1983 after falling off in 1982. Exports were stimulated by the expanding Canadian economy and government measures to limit textile imports that encouraged greater imports of raw cotton for manufacturing. Cotton exports are forecast to decline slightly in 1984 as the rate of sales and shipments has slowed from last year. U.S. supplies are expected to tighten later in 1984, and Canada could increase imports from other countries. (The United States has supplied over 90 percent of Canada's cotton recently.) Nevertheless, the value of U.S. exports could increase about 10 percent due to higher prices.

Canada Dominates Animal Products Trade

Total trade in animal products between the two countries in 1983 surpassed $1 billion in value; Canada dominated this exchange with exports of $712 million in 1983. Even though Canada's pork exports were down in 1983, they remained substantially above historical levels. Live hog exports to the United States were up almost 75 percent because of price differentials and large supplies in Western Canada. Canada's exports of beef and pork to the United States have grown steadily in recent years, aided by large supplies and the price advantage afforded by the depreciated Canadian currency.

U.S. export values of animal products totaled $288 million in 1983, and little change is forecast for fiscal year 1984. Pork exports were up sharply the first quarter of 1984 due to large U.S. supplies and lower prices, but exports will taper off as the situation reverses itself later in the year. The volume of U.S. poultry exports is expected to decline in 1984, but the value will increase about 10 percent due to higher prices. Canada has banned imports of certain poultry products from four States in response to the outbreak of avian flu.

Canadian Self-Sufficiency Grows in Corn and Soybeans

Although the United States exported $360 million worth of grains and oilseeds to Canada in 1983, Canada continues its trend toward self-sufficiency, especially in coarse grains and soybeans in the East (see figure). Eastern Canadian production of corn and soybeans has increased significantly over the past decade, displacing some U.S. exports.

Canada's feed grain policy affects U.S. corn exports. U.S. corn, Ontario corn, and Western Canadian barley compete for the Eastern feed grain market where much of Canada's pork and dairy industry is located. The share accounted for by each fluctuates in response to market conditions. Although coarse grain prices in Canada and the United States tend to move together, discounts or premiums among the various grains appear, depending on supplies and export prospects.

The value of U.S. coarse grain exports is forecast to decline 40 percent in fiscal year 1984. U.S. exports have been falling since the summer of 1983, reflecting large shipments of low-priced Western barley into Eastern Canada and adequate supplies of Ontario corn. However, Canadian coarse grain production fell 20 percent in 1983, and the pace of U.S. exports--down 92 percent the first quarter of fiscal year 1984--is expected to pick up during the year. Higher prices due to increased Canadian exports will make Western barley less attractive in Eastern Canada. Ontario corn exports are higher than anticipated, so feed grain supplies will become tighter as the year progresses.

The value of U.S. soybean exports also declined sharply the first quarter of fiscal year 1984 and is forecast to fall over 10 percent from that of 1983. Higher prices and a significant increase in rapeseed crush have reduced the demand for soybeans. Both vegetable oil and meal exports to Canada are expected to drop in volume but increase in value for 1984.

Overall, total value of U.S. exports of oilseeds and products is forecast to remain unchanged in 1984.

Canadian Agricultural Exports Increasing to the United States

While U.S. agricultural exports to Canada have increased 13 percent in the last 5 years, Canadian agricultural exports to the United States have more than doubled. Much of Canada's exports are of a regional nature--fresh vegetables, potatoes, and pork to the Northeast and grain and oilseed products to the Northwest. The largest single value item is live animals, mostly feeder and slaughter cattle and feeder calves.

Some of the growth in Canadian exports can be explained by the exchange rate differential, which has widened in Canada's favor since 1976. This factor gives Canada a significant price advantage and has contributed to a shift in the flow of some products, such as pork.

The volume of Canadian potato exports to the United States has doubled since 1980, causing much concern among Northeastern potato producers. However, in late 1983, the U.S. International Trade Commission found that Canadian exports of round, white potatoes were not hurting the Northeastern potato industry. Canadian exports may be limited this year because of a reduced crop, but prices are significantly above those of a year ago. (Carol A. Goodloe, North America and Oceania Branch)

U.S. Agricultural Exports Under Government-Financed Programs Declined

For the second consecutive year, U.S. agricultural exports under concessional Government-financed programs declined. The total value for calendar year 1983 fell 10 percent to $1.14 billion and a volume of 5.6 million metric tons. Exports of Public Law (P.L.) 480 Title II donations declined. Egypt, Pakistan, India, Bangladesh, and Sudan were the leading recipients for concessional shipments. Major commodities exported were wheat ($478 million), rice ($147 million), soybean oil ($128 million), wheat flour ($126 million), and corn ($103 million). Government programs accounted for 4 percent of all U.S. agricultural shipments.

P.L. 480 Title I long-term credit sales rose slightly in value to $756 million in 1983, but volume dropped 6 percent below those in 1982. Title I sales accounted for 66 percent of concessional Government-financed programs in 1983. Wheat accounted for half of the Title I sales in 1983 and went to 19 countries, including Egypt, Sudan, Morocco, Bolivia, Sri Lanka, and El Salvador.

Rice, the second leading commodity under Title I sales, rose 39 percent to $132 million. Export volume of 382,000 metric tons represented a 22-percent increase over 1982 due mainly to delays in shipments under P.L. 480. Rice shipments under Title I went primarily to Indonesia, Somalia, Peru, Liberia, and Bangladesh.

Shipments under Title II donations totaled $286 million and 1.4 million metric tons in calendar year 1983, down 25 percent from the previous year. Half of Title II donations were distributed through voluntary relief agencies, one-third through the World Food Program, and the remainder under government-to-government arrangements.

India, Poland, and Peru received over half the voluntary relief donations. Wheat and wheat products, soybean oil, and nonfat dry milk were major commodities distributed to these countries under relief donations. Pakistan and India received 50 percent of the World Food Program donations. Bangladesh, the largest recipient of government-to-government wheat shipments, received over half of the total value.

Agency for International Development (AID) disbursements totaled $98 million, 10 percent of concessional sales. About 89 percent of AID disbursements went to Egypt, with corn the major commodity. (Fannye Lockley, World Analysis Branch)

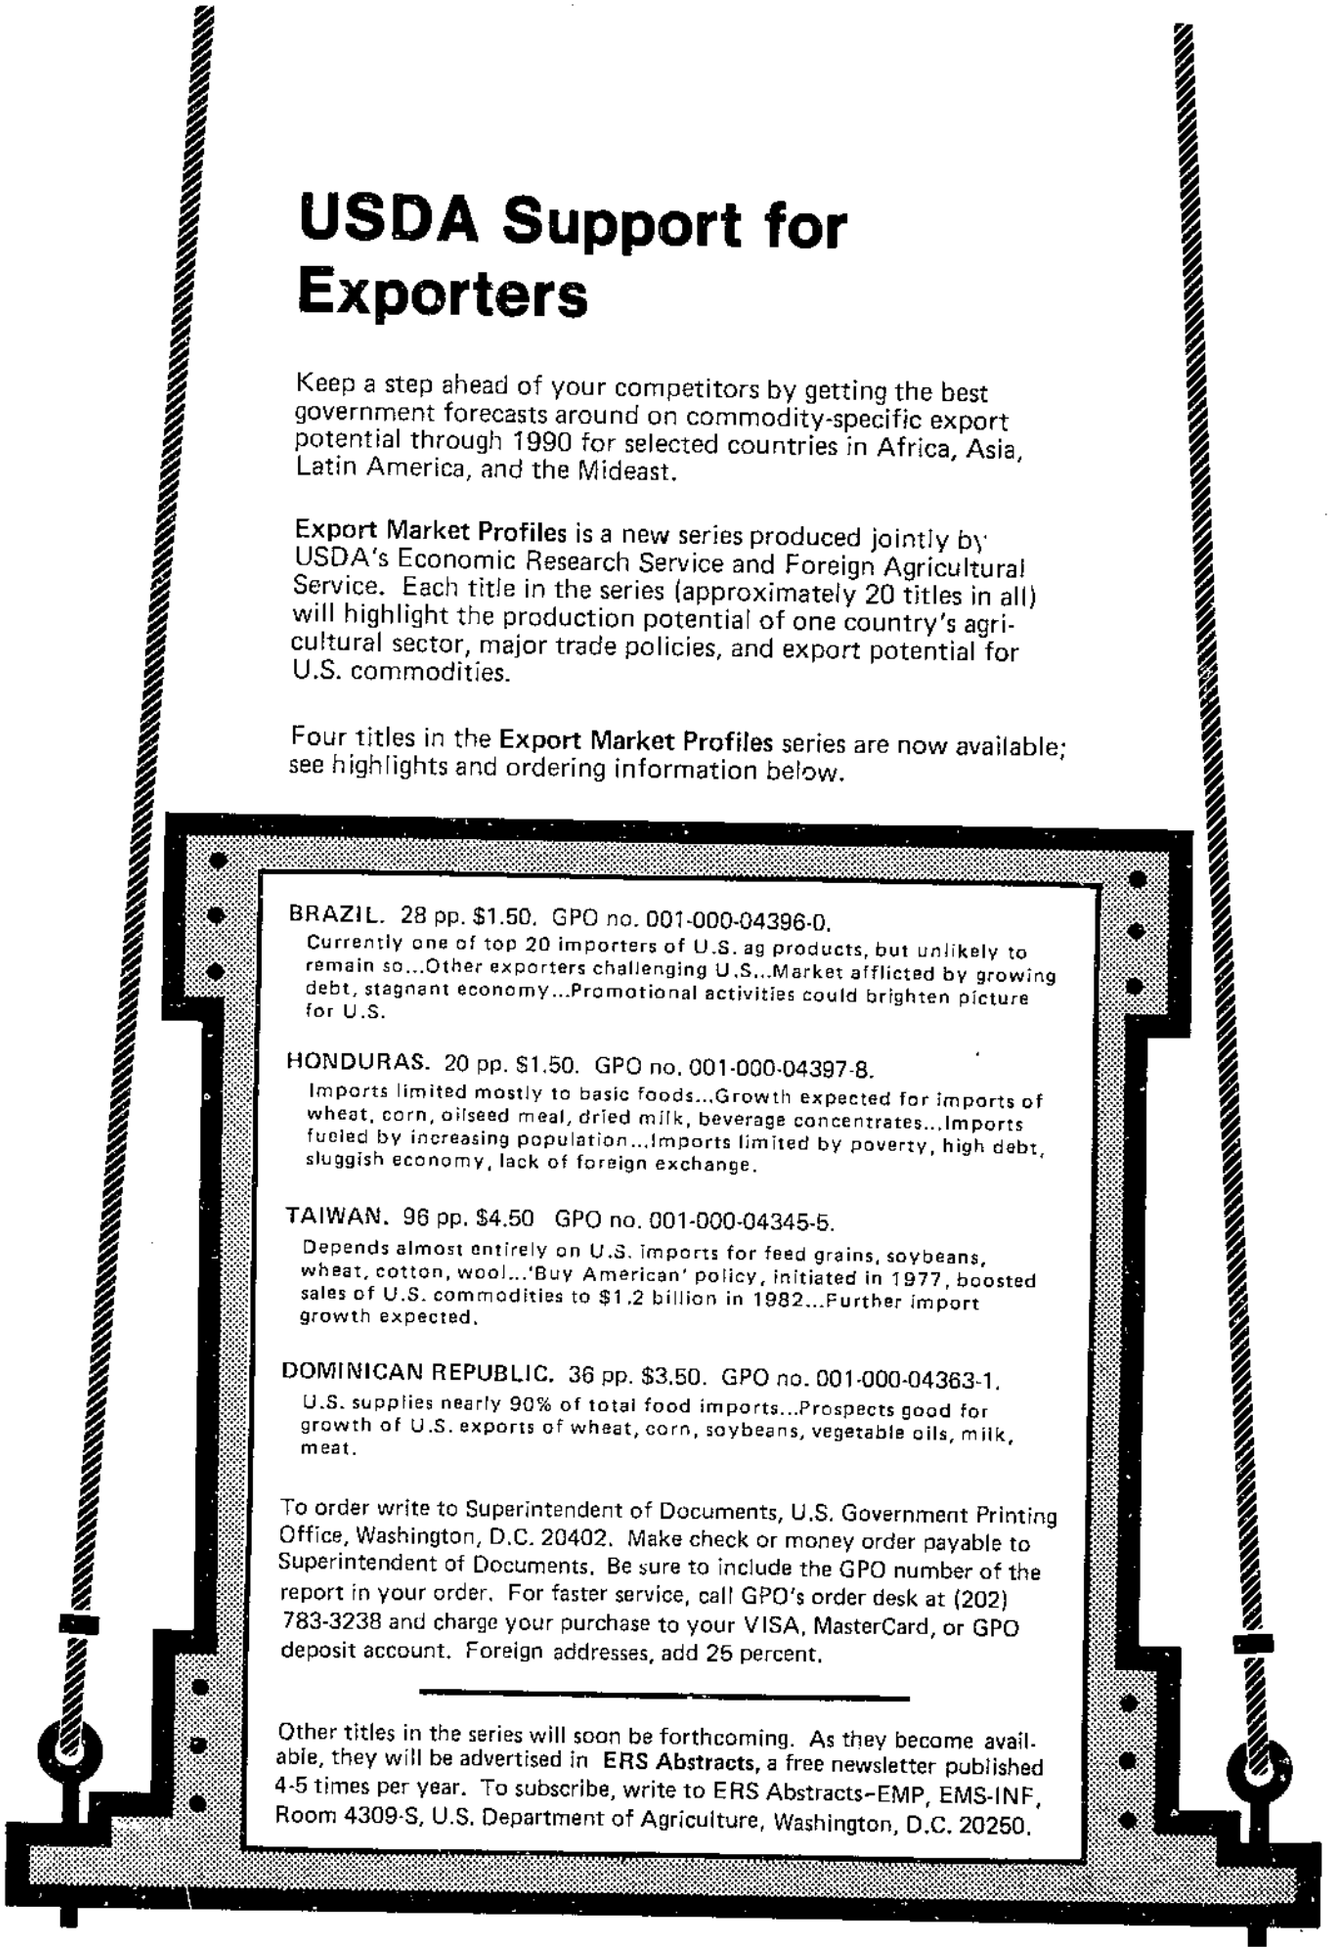
USDA Support for Exporters

Keep a step ahead of your competitors by getting the best government forecasts around on commodity-specific export potential through 1990 for selected countries in Africa, Asia, Latin America, and the Mideast.

Export Market Profiles is a new series produced jointly by USDA's Economic Research Service and Foreign Agricultural Service. Each title in the series (approximately 20 titles in all) will highlight the production potential of one country's agricultural sector, major trade policies, and export potential for U.S. commodities.

Four titles in the **Export Market Profiles** series are now available; see highlights and ordering information below.



BRAZIL. 28 pp. $1.50. GPO no. 001-000-04396-0.
Currently one of top 20 importers of U.S. ag products, but unlikely to remain so...Other exporters challenging U.S...Market afflicted by growing debt, stagnant economy...Promotional activities could brighten picture for U.S.

HONDURAS. 20 pp. $1.50. GPO no. 001-000-04397-8.
Imports limited mostly to basic foods...Growth expected for imports of wheat, corn, oilseed meal, dried milk, beverage concentrates...Imports fueled by increasing population...Imports limited by poverty, high debt, sluggish economy, lack of foreign exchange.

TAIWAN. 96 pp. $4.50 GPO no. 001-000-04345-5.
Depends almost entirely on U.S. imports for feed grains, soybeans, wheat, cotton, wool...'Buy American' policy, initiated in 1977, boosted sales of U.S. commodities to $1.2 billion in 1982...Further import growth expected.

DOMINICAN REPUBLIC. 36 pp. $3.50. GPO no. 001-000-04363-1.
U.S. supplies nearly 90% of total food imports...Prospects good for growth of U.S. exports of wheat, corn, soybeans, vegetable oils, milk, meat.

To order write to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Make check or money order payable to Superintendent of Documents. Be sure to include the GPO number of the report in your order. For faster service, call GPO's order desk at (202) 783-3238 and charge your purchase to your VISA, MasterCard, or GPO deposit account. Foreign addresses, add 25 percent.

Other titles in the series will soon be forthcoming. As they become available, they will be advertised in **ERS Abstracts,** a free newsletter published 4-5 times per year. To subscribe, write to ERS Abstracts-EMP, EMS-INF, Room 4309-S, U.S. Department of Agriculture, Washington, D.C. 20250.

More aggressive U.S. marketing and a redirection of trade programs already in place would help to close the gap with the European Community in the world market for high-value agricultural products (HVP's).

The potential payoff in closing that gap is impressive: If by 1990 the U.S. expanded its HVP exports by half again as much as the present level, it would gain an additional $50 billion in GNP and an additional 1 million U.S. jobs.

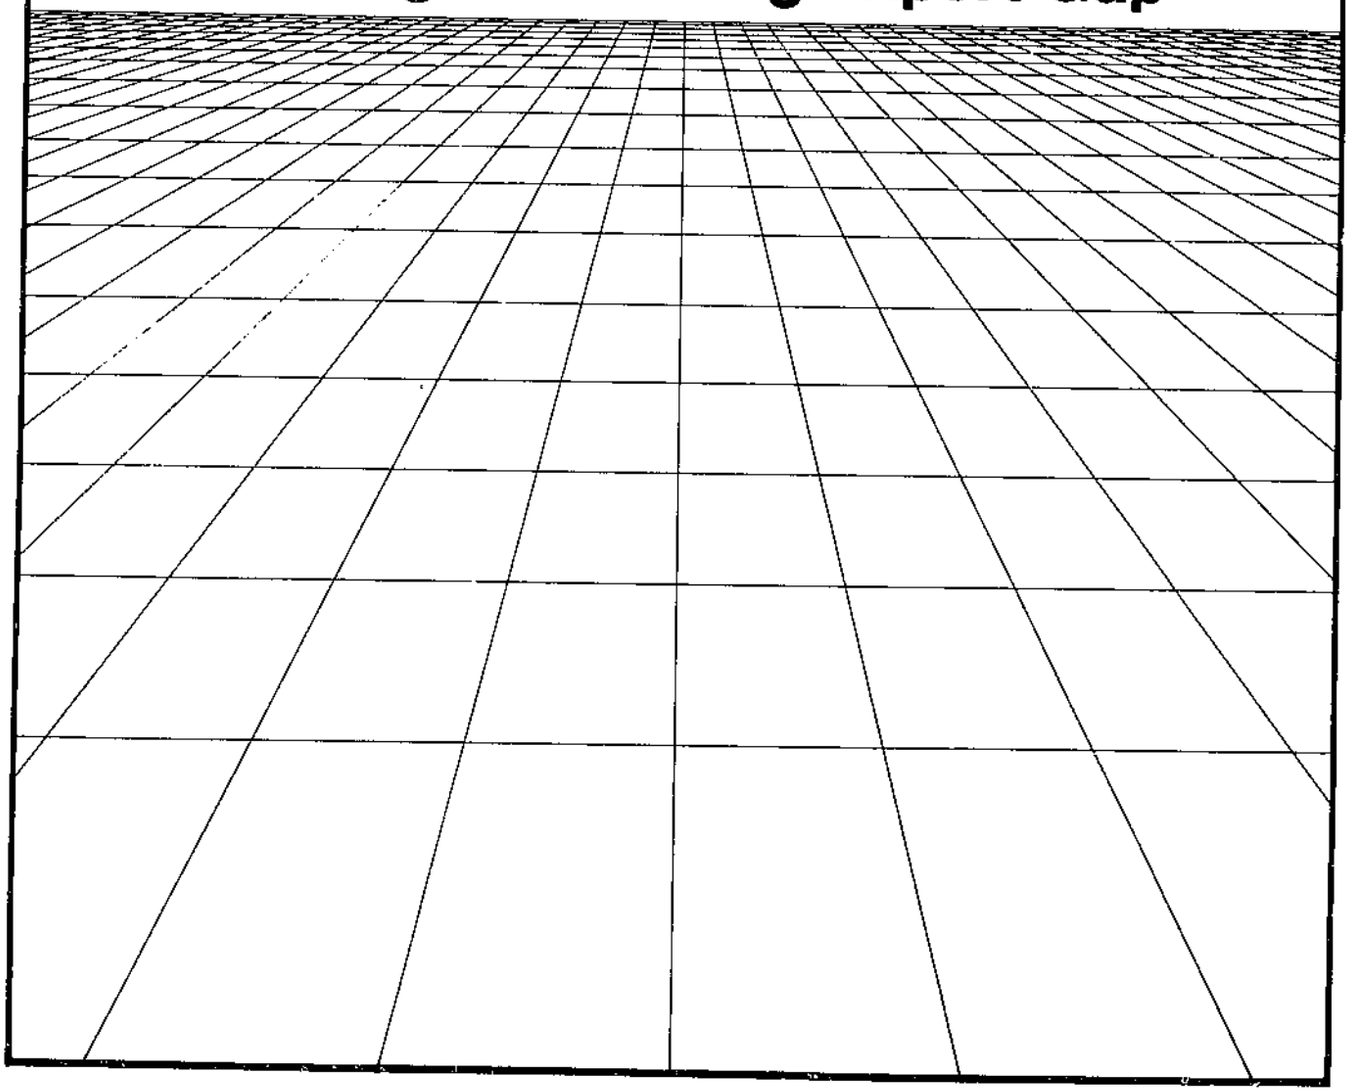
The U.S. share of world trade in HVP's, chiefly processed and semiprocessed food products, stagnated at about 10 percent from 1970-80, while the EC share, with its exports growing by 20 percent per year in that decade, stood at five times the U.S. level.

For more information on the growing market in HVP exports and the not always friendly U.S.-EC competition, be sure to get "High-Value Agricultural Exports: U.S. Opportunities in the 1980's." See box for ordering information.

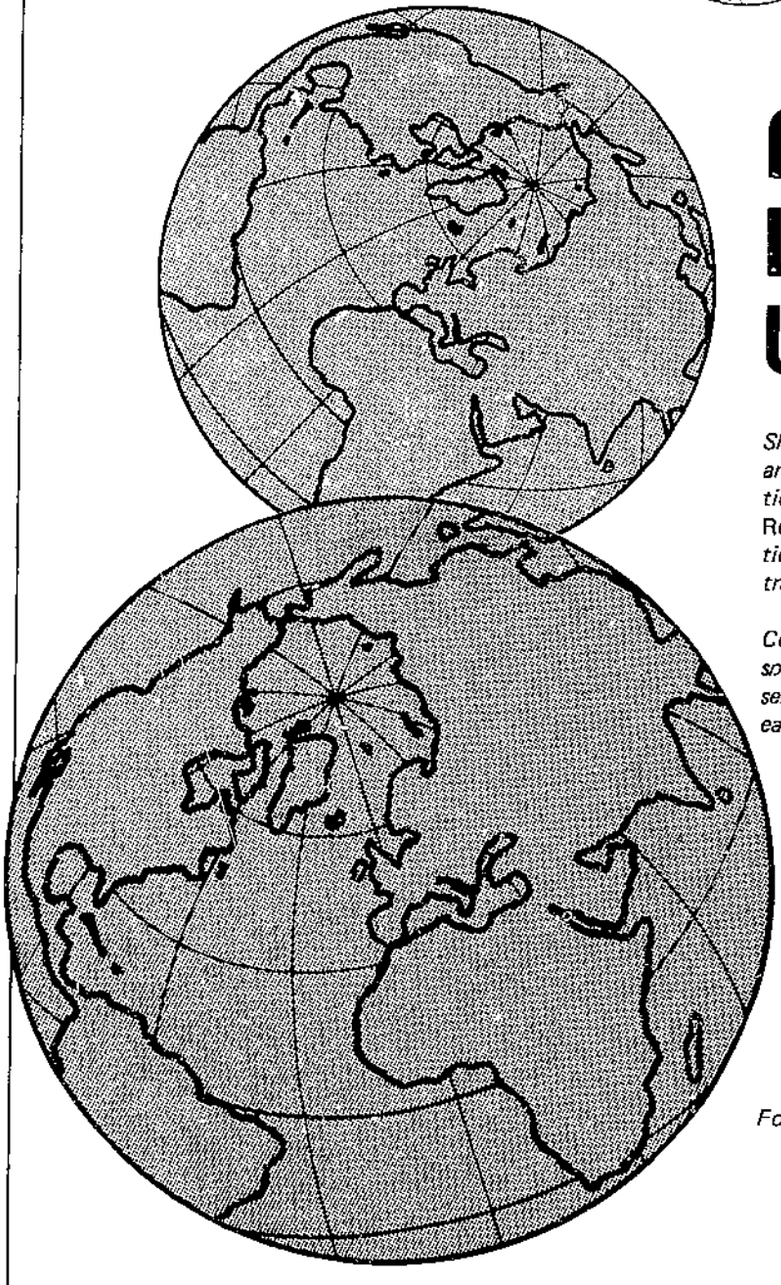
HOW TO ORDER

For your copy of "High-Value Agricultural Exports: U.S. Opportunities in the 1980's" (GPO no. 001-000-04371-4), send $4.50 in check or money order to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Make check or money order payable to Superintendent of Documents. Be sure to include the GPO number in your order. For faster service, call GPO's order desk at (202) 783-3238 and charge your purchase to your VISA, MasterCard, or GPO deposit account. Foreign addresses, add additional 25 percent.

Closing the U.S. Ag Export Gap



*U.S. GOVERNMENT PRINTING OFFICE : 1984 0-420-932/ERS-2099



A CLOSER LOOK AT THE WORLD

Slow economic growth, tightening export markets, and aggressive trade practices make detailed information on world agriculture a must. World Agriculture Regional Supplements *are ready with the information, wrapping up regional agricultural production, trade, and policy.*

Comprehensive tables and thought-provoking special articles are also included. Issued yearly, the series has been expanded to 11 reports, 32 pages each. Reports may be ordered individually or as a set.

- North America & Oceania
- East Asia
- Middle East & North Africa
- USSR
- Eastern Europe
- Southeast Asia
- Western Europe
- Latin America
- China
- South Asia
- Sub-Saharan Africa
