INTRODUCTION

The Annual Report on Tobacco Statistics is a compilation of the most frequently used statistics relating to tobacco. Most of the data in this issue covers only the last 5 years; averages are included for earlier periods in some instances. Data covering longer periods may be found in the Annual Report on Tobacco Statistics for 1947.

Tobacco is a commodity that is important to agriculture and business and as a source of revenue for Federal, State, and local governments. Growers received \$936 million for the 1957 crop, and, in cash receipts to farmers, tobacco ranked fourth among the field crops. Total revenue derived from direct Federal and State tobacco taxes during the 1957-58 fiscal year was nearly \$2,350 million.

In 1958 leaf tobacco exports were valued at \$354 million and ranked third in value among agricultural export classifications. Cigarette consumption, as indicated by tax-paid removals, totaled 436 billion cigarettes in 1958. Estimated consumer expenditures for all tobacco products in the United States were about \$6.5 billion.

BRIEF CLASSIFICATION OF LEAF TOBACCO

(Covering classes, types, and groups)

CLASS 1, FLUE-CURED TYPES

- Type 11: Old Belt flue-cured; produced in the Piedmont sections of Virginia and North Carolina.

¹ This table is on a crop-year basis for 12 months beginning as follows: Types 11-14 and 61-62, July 1; all other types, October 1. These crop years begin before any of the new crop for the current year has entered stocks. Disappearance for any crop year is the sum of the stocks at the beginning of the year plus the current crop minus stocks remaining at the end of the crop year. Exports are on a farm-sales-weight basis. Domestic disappearance is total disappearance minus exports, and includes leaf used by manufacturers in the United States, losses or wastage, and differences which may result from errors in estimates and conversions of weights. ² Preliminary. ³ Includes type 24 production through 1949; disappearance through 1951. ⁴ Includes type 45 production through 1939; disappearance through 1940. ⁵ Puerto Rican type 46 production is that which is planted in the fall of the crop year shown and harvested the following spring. Stocks consist of holdings in the United States and on the Island of Puerto Rico. Stocks on the Island estimated prior to 1936. ⁶ Less than a 5-year average. ⁷ Includes type 56 production from 1936 through 1948; disappearance through 1951. ⁸ Includes type 61 for 1929.

Production and price statistics (except Puerto Rican) compiled from reports of the Agricultural Estimates Division, AMS (Puerto Rican from reports of the Bureau of Agricultural Economics of Puerto Rico); stocks from reports of the Tobacco Division, AMS; and exports from reports of the Bureau of the Census, U. S. Department of Commerce.

¹ A two-thirds majority of farmers voting is required to place marketing quotas in effect. Legislation approved in August 1955 required that voting be for a 3-year period only. ² Redetermined quota for Burley for the 1955 crop. ³ Fire-cured (21-24) and dark air-cured (35-36): Referendums for both kinds combined for the crops of 1938 and 1939; quotas for the 1943 crop terminated August 14, 1943; and quotas were not in effect for the crops of 1944 and 1945.

¹ Information in this table taken from U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937.

² Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating, and storage.

³ The general instructions for filing the tobacco stocks reports require dealers and manufacturers to indicate the weight basis on which stocks of unstemmed cigar leaf of the domestic types are reported, namely, farm-sales-weight, market weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amounts reported in these three categories.

⁴ Foreign-grown stocks not converted to farm-sales-weight equivalent.

¹ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consisted of cuttings, clippings, and trimmings. This is the result in most instances of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong. Also, includes stocks formerly reported as Type 71.

Compiled from quarterly Tobacco Stocks Reports, Tobacco Division, AMS. Consult the reports for further detailed information.

¹ Stocks of foreign-grown tobacco are not converted to farm-sales weight but are shown on an import-weight basis. However, for comparability, stemmed stocks have been converted to an unstemmed equivalent, and for this purpose a tentative factor of 1.205 has been used.

² Does not include stocks of Sumatra and Java Leaf held in the Free Trade Zone.

Compiled from quarterly Tobacco Stocks Reports, Tobacco Division, AMS.

¹ The number of days on which sales were held. The regular auction sales week is Monday through Friday and is generally observed on the majority of markets.

² This market sells more than one type of tobacco and is listed under each type sold.

³ Same buyers used for two or more markets as follows: Type 31 - Bowling Green, Franklin, and Russellville, Ky., one set in the 1956-57 season and two sets in the 1957-58 season (in addition to one full set at Bowling Green in both seasons); Louisville, Ky., and New Albany, Ind., two sets; Mayfield and Paducah, Ky., one set; Athens and Sweetwater, Tenn., one set; Columbia and Mt. Pleasant, Tenn., one set; Type 35 - Franklin, Mayfield, Murray, Russellville, Ky., and Springfield and Westmoreland, Tenn., two sets.

⁴ Same buyers used as for dark air-cured (Type 30), at Henderson, Ky.

⁵ Sales of Southern Maryland occur in the year following production.

¹ Includes all disposals through November 30, 1958.

² Includes 70,187 thousand pounds, net packed weight (78,416 thousand pounds green weight), representing quantities purchased for British manufacturers, which they have since bought and shipped.

³ Total does not include quantity of 1958 crop of flue-cured tobacco.

⁴ Not available on a green-weight basis.

⁵ Price support not in effect for 1951, 1952, 1954, and 1955 crops because growers disapproved market quotas.

⁶ Includes Puerto Rican filler, type 4b. Percentages are calculated on total cigar-leaf production basis.

Note: Cumulative totals for the various groups do not in each case include quantities for all intervening years.

Compiled from official records with respect to Commodity Credit Corporation operations and Tobacco Division, CSS.

¹ Loan levels as shown indicate availability of loans, whether a program was in operation or not. Loan levels are based on 90 percent of the parity price, with the following exceptions: Fire-cured and dark air-cured classes, set at 75 percent and 66-2/3 percent respectively of the Burley loan rate, but beginning in 1958, not to exceed the 1957 levels, unless 90 percent of their respective parities exceeds such levels; types comprising the filler and binder group, which are adjusted-type differentials based on the parity price for the group; Maryland and the cigar filler and binder types in 1950, which were 86 percent of parity; loan rates as shown for the 1952 to 1955 crops (excepting Puerto Rican) are minimum levels as announced in March, which were higher than 90 percent of parity as of the beginning of the marketing year (according to legislation, loan levels shall be the higher of the two); Puerto Rican 88 percent of parity in 1955, and 89 percent in 1956.

² The marketing year begins as of July 1 for flue-cured and cigar wrapper, and October 1 for all other types.

³ Announced "no support." Growers disapproved quotas.

⁴ Includes type 46 through 1950.

⁵ Beginning in 1951 type 46 is a separate kind of tobacco.

⁶ Mandatory loans not applicable.

¹ As imposed by the Internal Revenue Act of February 26, 1926.

² Rates under the Internal Revenue Act of 1951, effective November 1, 1951, remain unchanged from those imposed by the Internal Revenue Act effective November 1, 1942, except as follows: Cigarettes weighing not more than 3 pounds per 1,000, increased to \$4.00 per thousand from \$3.50 per thousand (under the Internal Revenue Act of 1951 the 8-cent-per-pack rate (\$4.00 per thousand) for small cigarettes will continue in effect until April 1, 1959, and then will revert to 7 cents (\$3.50 per thousand)); smoking and chewing tobacco and snuff lowered to 10 cents per pound from 18 cents per pound.

³ Cigarettes weighing more than 3 pounds per 1,000 which are more than 6 1/2 inches in length are taxable at the rate imposed on cigarettes weighing less than 3 pounds per 1,000, counting each 2 3/4 inches or fraction thereof of the length of each as one cigarette. This provision was first imposed by the Revenue Act of May 10, 1934, amending the Revenue Act of February 26, 1926.

⁴ Rate effective July 1, 1940, changed tax on large cigarettes from \$7.20 to \$7.80, and on small cigarettes from \$3.00 to \$3.25.

Notes:

About half the States listed under Cigarettes impose varying tax rates for cigarettes of other quantities, sizes, weights, etc.

Some States having general sales taxes, but no specific tax on tobacco, include tobacco in the base of sales tax. Some cities also levy taxes on cigarettes; for example, the New York City tax rate is 1 cent per package, effective May 26, 1952. The Chicago tax of 1 cent per package, effective October 1, 1953, was abated on August 1, 1955, upon the adoption of a municipal retailers' occupation tax.

Compiled principally from Tax Systems, Commerce Clearing House, Inc., and brought up to date from records of the National Tobacco Tax Association.

¹ Does not include locally imposed and collected tax receipts, or locally imposed tax amounts collected by the State and returned to local governments. Totals for several of the States include related license taxes.

² Preliminary.

³ Fiscal year for Alabama ending September 30, and for Texas ending August 31 (1957-58 data are for the 12-month period ending June 30, 1958, and will be revised to fiscal years in a later report).

⁴ Advance collections from new cigarette tax, effective July 1, 1958.

⁵ Fiscal year for New York ending March 31.

⁶ Fiscal year for Pennsylvania ending May 31.

⁷ The total revenue derived from taxes on tobacco products by States and local governments amounted to 508 million dollars during fiscal year 1954-55 (the first year this information was compiled), 556 million dollars during fiscal year 1955-56, and 604 million dollars during fiscal year 1956-57. The figure including local governments is not yet available for fiscal year 1957-58.

Compiled from reports of the Bureau of the Census, U. S. Department of Commerce; data for the District of Columbia from the Office of the Collector of Taxes.

¹ The Philippine Trade Agreement Revision Act of 1955, Public Law 196, 84th Congress, approved August 1, 1955, eliminates the absolute quotas of 200 million cigars and 6-1/2 million pounds of scrap and filler tobacco. For duty purposes, an amount equivalent to 90 percent of the former absolute quotas in each case may be admitted duty free during the calendar years 1959-61, with quantities in excess of 90 percent of the base figure dutiable at the Cuban rate.

² Rates shown are those which were in effect as of November 1958. Rates for imports from countries or areas under Communist domination or control are those as listed under the Tariff Act of 1930, effective varying dates by countries from Sept. 1, 1951, to Jan. 5, 1952, under Section 5 of the Trade Agreement Extension Act of 1951.
