PRICES RECEIVED BY FARMERS FOR HOGS,
UNITED STATES AND BY STATES, MONTHLY AND ANNUAL, 1909-58

This publication presents estimates of prices received by farmers for hogs, by States, and for the United States, by months and years, 1909-58. Regional prices are shown by years for 1909-58, and by months for 1924-58. Prices relate to all hogs sold by farmers at the point of first sale, and are based on reports of correspondents during the week centered on the 15th. They are reviewed at the end of each year and revised, if necessary, to reflect sales for the month. Monthly average prices are published currently in Agricultural Prices.

Annual average State prices were obtained by weighting monthly prices by the estimated proportion of annual sales each month. United States and regional monthly and annual average prices were obtained by weighting State prices by estimated annual sales.

Monthly and annual State price data for hogs were not collected prior to 1910. Average prices for 1909 were estimated in 1938 on the basis of price changes at nearby central markets and were primarily for use in computing farm income and index numbers. At the same time prices for a few minor hog producing States were interpolated for a few missing months subsequent to 1909 on the basis of price changes in nearby important hog producing States and at nearby central markets.

These estimates are designed to represent the average price received for all hog sales on an "as sold" basis, and not the price of a specific grade at a specific point of sale. They are used for computing value of production and income, for comparing price changes and price levels from month to month and from year to year, for measuring price trends, and for computing price index numbers and parity prices.

Prepared by Ronald E. Johnson, Agricultural Statistician, under the general supervision of B. R. Stauber, Chief, Agricultural Price Statistics Branch, Agricultural Estimates Division. Primary data were provided by the State Statisticians' offices.

Table 1.--HOGS: Average price per 100 pounds received by farmers, United States, monthly and annual, 1909-58
