## WOOL AND MOHAIR

### Production and Value, United States and by States, 1909-59

This publication presents a record of the estimates of the Crop Reporting Board, Statistical Reporting Service, relating to wool and mohair production on farms and ranches for the years 1909-59.

The annual estimates of numbers shorn or clipped and weight per fleece or clip are based primarily on survey returns from sheep and goat producers. The estimates of average price per pound are based on prices reported by farm and ranch operators and wool buyers. Prices since 1955 also take into account data obtained in connection with the Wool Incentive Program.

For wool, the average prices for the years 1909 through 1942 relate to the calendar year. Average prices for 1943 through 1959 are for the marketing season April through March.

For mohair, the average prices for the years 1909 through 1956 relate to the calendar year. Average prices for 1957 through 1959 are for the marketing season April through March.

In the case of estimates for regions and the United States, the total production and total value are the sums of the State estimates; weight per fleece is derived by dividing the total production by the total number shorn; price per pound is derived by dividing the total value by the total pounds produced.

The Statistical Reporting Service issues a preliminary report on wool production in July of each year and a final report in February the following year on production and value. A report on mohair production and value is issued each February for the past year.

Table 2. —Shorn wool production and value and pulled wool production, United States, 1909-59

Year	Sheep Shorn 1/	Weight per fleece	Shorn wool pro- duction	Price per pound 2/	Value	Pulled wool pro- duction	Total shorn and pulled wool production
	1,000 head	Pounds	1,000 pounds	Cents	1,000 dollars	1,000 pounds	1,000 pounds
1909	44,758	6.9	310,179	22.2	68,811	41,000	351,179

1958	38,001	8.3	316,101	26.4	83,500	43,000	359,101
1959	38,001	8.3	316,101	23.2	73,300	43,000	359,101

1/ Includes shearing at commercial feeding yards. 2/ For the years 1909 to 1942 the average price was computed by weighting State average prices for all wool sold during the calendar year by production of shorn wool. For 1943 to 1959 the average price was computed by weighting State average prices for all wool sold during the marketing year, April through March, by production of shorn wool. The U. S. average prices weighted by sales were 1955, 42.0 cents per pound; 1956, 41.3 cents; 1957, 53.7 cents; 1958, 36.4 cents; 1959, 43.3 cents.

1/ Includes Texas, Missouri, New Mexico, Arizona, Utah, Oregon and California.

2/ Where goats are clipped twice a year the number clipped is the sum of goats and kids clipped in the spring and kids clipped in the fall. 3/ For the years 1909 to 1956 the average price was computed by weighting State average prices for all mohair sold during the calendar year by production of mohair. For 1957 to 1959 the average price was computed by weighting State average prices for all mohair sold during the marketing year, April through March, by production of mohair. The seven State average price weighted by sales was 1958, 72.3 cents; 1959, 56.4 cents.

Growth Through Agricultural Progress
