WESTERN RANGE AND LIVESTOCK

17 Western States, 1922-1962

Numerical rating of condition, by months, Range feed, cattle, sheep, goats

This publication presents a historical series of the condition of range feed and cattle for 17 Western States, sheep for 14 Western States, by months for 1922-62; and goats for Texas by months for 1923-62.

Monthly range and livestock reports were started in October 1922 for the 17 Western States. These reports were released from the Western Livestock Office at Denver, Colo. until June 1, 1962; since then the report has been prepared in the Livestock and Poultry Statistics Branch, Statistical Reporting Service, Washington, D. C.

The monthly report is made up from answers on questionnaires mailed to stockmen by the State Statistician's office in each State. The respondents give their judgement of the current condition of range feed and livestock by a rating system, as well as comments on general livestock matters.

The State report is prepared in the State Statistician's office and forwarded to Washington, D. C.

The following guide is used by the respondents in reporting conditions in their localities.

Numerical equivalent of condition

49 or below is very bad; 50-59 bad; 60-69 poor; 70-79 fair; 80-89 good; 90-99 very good; 100 and over is excellent.

Table 1.--RANGE FRED: Condition, North Dakota, by months, 1922-62 1/
