COMMODITY FUTURES STATISTICS  
July 1965 - June 1966

INTRODUCTION

Commodity Futures Statistics is published annually by the Commodity Exchange Authority. This edition covers the fiscal year 1966 (July 1965-June 1966) and presents the more important data on futures trading in each commodity covered by the Commodity Exchange Act. The statistics are compiled from reports required of exchange clearing members and large traders by regulations under the act, and from official price records of contract markets.

Contract Markets and Commodities

A contract market is one which has been licensed by the Secretary of Agriculture pursuant to the Commodity Exchange Act to conduct trading in one or more commodities for future delivery. Listed below are the 17 commodity exchanges designated as contract markets, and the 15 commodities, in which futures trading was conducted in the 1966 fiscal year, subject to regulation under the Commodity Exchange Act:

Chicago Board of Trade . . . . .	Wheat, corn, oats, rye, soybeans, soybean oil, soybean meal
Chicago Mercantile Exchange . . . . .	Butter, eggs (shell and frozen)
Chicago Open Board of Trade . . . . .	Wheat, corn, oats, rye, soybeans
Duluth Board of Trade . . . . .	(No trading in 1965-66)
Kansas City Board of Trade . . . . .	Wheat, soybeans
Memphis Board of Trade Clearing Association . . . . .	(No trading in 1965-66)
Milwaukee Grain Exchange . . . . .	Wheat, corn, oats, rye
Minneapolis Grain Exchange . . . . .	Wheat, flaxseed
New Orleans Cotton Exchange . . . . .	(No trading in 1965-66)
New York Cotton Exchange . . . . .	Cotton
New York Mercantile Exchange . . . . .	Butter, potatoes
New York Produce Exchange . . . . .	Cottonseed oil
Portland Grain Exchange . . . . .	(No trading in 1965-66)
St. Louis Merchants' Exchange . . . . .	(No trading in 1965-66)
Northern California Grain Exchange . . . . .	(No trading in 1965-66)
Seattle Grain Exchange . . . . .	(No trading in 1965-66)
Wool Associates of the New York Cotton Exchange . . . . .	Wool, wool tops

After a long period of inactivity, trading in butter futures was resumed on the Chicago Mercantile Exchange and New York Mercantile Exchange during the fiscal year 1966. Trading in grain futures was suspended on the Milwaukee Grain Exchange on January 17, 1966. The Chicago Board of Trade suspended futures trading in grain sorghums on June 28, 1966. Futures trading for the cotton no. 2 contract was suspended November 12, 1965, by the New York Cotton Exchange.

### Nature of Statistics

The commodity futures statistics presented in this bulletin fall into five principal classes: volume of trading, open contracts, futures prices, contracts settled by delivery, and commitments of reporting (large) traders. Reporting traders are those with positions of specified size. Such traders report daily to the Commodity Exchange Authority the size and character of their trades and positions. Data derived from such statistics include commitments of reporting traders as a percentage of open contracts, commitments of nonreporting traders, and commitments of nonreporting traders as a percentage of open contracts.

In some of the markets to which the tables pertain there are two units of trading, the round lot (for example, 5,000 bushels) and the job lot (for example, 1,000 bushels). In all such cases the trading in both lots is combined. In instances in which a market conducts trading in more than one type of contract in a commodity, the data combine all types of contracts in the commodity on that market. In footnotes to tables giving dates of suspension of trading, the time of suspension was after the close of the market on the date shown.

### Volume of Trading

The volume of trading is the total of all purchases or of all sales -- not of purchases and sales combined. Since there are two parties to every futures contract -- the seller and the buyer -- the aggregate of all purchases is equal to the aggregate of all sales.

The volume of trading in a commodity is compiled by the Commodity Exchange Authority from data in required daily reports from exchange clearing members. Each clearing member of each contract market makes a daily report of all purchases and sales of commodity futures which it clears. A compilation of these reports gives the volume of trading in each commodity for each market for each day.

The following tabulation shows the volume of trading, by commodities, on all contract markets combined, for the 1964-65 and 1965-66 fiscal years:

<u>Commodity</u>	<u>Unit</u>	<u>1964-65</u>	<u>1965-66</u>	<u>Percentage of increase or decrease</u>

#### Number of Futures Transactions and Value of Trading

Since the volume of trading is expressed in units of the physical commodity, i.e., wheat futures contracts in bushels, cotton in bales, potatoes in carlots, and so on, a common denominator is used in compiling volume of trading in several dissimilar commodities or in making inter-commodity comparisons. Such a common measure is provided by giving the same weight to a contract unit in wheat (5,000 bushels), as to a contract unit in cotton (100 bales). Thus in terms of contract units, the number of transactions in several dissimilar commodities may be combined, and futures activity in one commodity compared with that in another. Since the size and value of futures contracts in various commodities differ widely, the number of transactions is of limited value in making comparisons of activity among commodities over short periods, but does provide a useful gauge of overall market activity, particularly changes from year to year or for relatively long-term periods.

Another common measure for presenting an overall view of market activity, or for making intercommodity comparisons, is afforded by data on the dollar value of futures trading. The value of trading in a commodity is estimated by multiplying the monthly volume of trading on all contract markets by the monthly average of the futures closing price on the principal market for the commodity. Since the dollar value measurement of futures activity reflects changes in price level as well as in volume of trading, the figures tend to show greater variations from year to year than data on number of transactions.

The following tabulation gives the estimated number of futures transactions, and the dollar value of trading, by commodities, all contract markets combined, for the 1964-65 and 1965-66 fiscal years:

<u>Commodity</u>	<u>Thousands of transactions<sup>1/</sup></u>		<u>Value of trading (Millions of dollars)</u>

<sup>2/</sup> Less than 500 transactions.

### Open Contracts

A futures contract is said to be "open" when it has been entered into and not yet liquidated by an offsetting transaction nor fulfilled by delivery.

The amount of open contracts for each commodity and contract market is obtained each business day by a tabulation of reports made by exchange clearing members. The aggregate of all long open contracts reported by clearing members equals the aggregate of all short open contracts reported. The open contract figures shown are for one side only, not the long and short sides combined. Where there are open contracts in both round and job lots, the totals of open contracts include both types.

The open contracts in a commodity reflect the positions of hedgers and longer-term speculative holdings, and thus provide more of a measure of market utilization for merchandising and processing than is afforded by data on the volume of trading.

The following tabulation shows average month-end open contracts, by commodities, on all contract markets combined, for the 1964-65 and 1965-66 fiscal years:

<u>Commodity</u>	<u>Unit</u>	<u>1964-65</u>	<u>1965-66</u>	<u>Percentage of increase or decrease</u>

### Contracts Settled by Delivery

While most futures contracts are settled by offset prior to delivery, a "long" may choose to stand for delivery of the physical commodity and a "short" may elect to make delivery. The delivery procedure includes the issuance of a delivery notice which is a document prepared by the seller notifying the buyer that he intends to deliver on a stated day the commodity specified in the contract. The original or a copy of each delivery notice tendered by a clearing member of a contract market is furnished to the Commodity Exchange Authority. From the delivery notices and from reports of deliveries made by clearing members, data on deliveries are compiled.

### Futures Prices

Official records of contract markets are the source of the price information in this bulletin. Closing prices are shown by future for the fifteenth and last day of each calendar month. Where no trades took place during the "close," generally the closing seconds of trading, bid, asked, nominal, or settlement prices have been used, and are so indicated. For dates on which closing ranges were recorded, the closing price shown is the average of the closing range.

### Commitments of Reporting Traders

Any trader whose position in one future of any commodity reaches an amount specified by the Secretary of Agriculture is required to report daily to the Commodity Exchange Authority all his trades and positions in that commodity. In making this report, the trader also classifies his position as speculative or hedging.

The minimum amounts specified for reporting during the fiscal year 1965-66 were as follows:

Wheat, corn, oats, rye, barley, flaxseed, soybeans	200,000 bushels
Grain sorghums	11,200,000 pounds
Cotton	5,000 bales
Wool	150,000 pounds
Wool tops	125,000 pounds
Butter, eggs (shell), potatoes	25 carlots
Eggs (frozen)	25 contract units
Cottonseed oil, soybean oil	1,500,000 pounds
Lard, tallow	1,000,000 pounds
Millfeeds	1,000 tons
Cottonseed meal, soybean meal	2,500 tons

Data on commitments of large traders are obtained from these traders' reports. Commitments of nonreporting traders are derived by subtracting reporting traders' positions from the total of all positions. Commitments of nonreporting traders, being a residual item, include both speculative and hedging commitments.

Other Statistical Reports of the  
Commodity Exchange Authority

Most of the data presented in this annual bulletin were initially released by the Commodity Exchange Authority on a daily or monthly basis. Daily reports giving the volume of trading and open contracts in the various commodities and markets are issued regularly by the agency's field offices located in Chicago, Minneapolis, Kansas City and New York.

Weekly reports are issued showing stocks of grain in deliverable position in Federally licensed warehouses at Chicago, Kansas City and Minneapolis.

Commitments of Traders is issued monthly publishing data showing the aggregate speculative and hedging commitments of large traders and the derived positions of small traders for principal commodities.

<sup>1/</sup> In computing annual averages of month-end open contracts, yearly totals were divided by 12, although in some markets there were no contracts open at the end of one or more months. An exception was made for commodities which came under regulation during a fiscal year and for commodities in which trading was suspended. In such cases, averages were computed on the basis of the number of months during which reporting requirements were in effect and there was trading.

<sup>2/</sup> Less than 30,000 bushels.

<sup>3/</sup> Trading suspended January 17, 1966; 6-month average.

<sup>4/</sup> Trading began September 18, 1956; 10-month average.

<sup>5/</sup> Less than 200,000 pounds.

<sup>6/</sup> Trading suspended April 10, 1962.

<sup>7/</sup> Trading resumed October 17, 1963; 9-month average.

<sup>8/</sup> Trading suspended June 28, 1966.

<sup>9/</sup> Trading suspended July 9, 1964.

<sup>10/</sup> Less than 500 bushels.

<sup>11/</sup> Less than one carlot.

<sup>12/</sup> Contracts settled by action of the exchange November 10, 1959.

<sup>13/</sup> Trading suspended September 26, 1958.

<sup>14/</sup> Trading suspended June 7, 1960.

<sup>15/</sup> Trading resumed December 9, 1963; 7-month average.

<sup>16/</sup> Less than one contract.

<sup>17/</sup> On February 26, 1963, trading was ordered to be discontinued with the expiration of the 1963 May future; 10-month average.

<sup>18/</sup> Trading resumed August 1, 1956; 11-month average. (Discontinued June 5, 1941.)

<sup>19/</sup> Trading suspended July 30, 1959.

<sup>20/</sup> Open contracts in bran, shorts, and middlings are combined. For data on each of these commodities, see Commodity Futures Statistics for July 1960-June 1961.

NOTE: See table 9 for dates of inauguration, suspension, and resumption of trading during the years 1960-61 through 1965-66. Omission of a year in the period 1960-61 to 1965-66 indicates there were no contracts open on the month-end dates.

<sup>1/</sup> Derived by subtracting reporting traders' commitments from total open contracts.

<sup>2/</sup> Traders not subject to reporting requirements prior to March 27, 1961.

NOTE: Effective July 1, 1963, reporting traders began classifying their positions as speculative or hedging; long and short (spreading) positions are derived on a mechanical basis from equal long and short positions reported as speculative.

<sup>1/</sup> Derived by subtracting reporting traders' commitments from total open contracts.  
<sup>2/</sup> Long and short (spreading) positions are derived on a mechanical basis from equal long and short positions reported as speculative.

Table 21.--Annual average of midmonth and month-end long and short commitments of reporting and nonreporting traders, expressed as percentage of total open contracts, principal markets, 1956-57 to 1965-66

<sup>1/</sup> Derived by subtracting reporting traders' commitments from total open contracts.  
<sup>2/</sup> Less than 0.05 percent.

NOTE: Effective July 1, 1963, reporting traders began classifying their positions as speculative or hedging; long and short (spreading) positions are derived on a mechanical basis from equal long and short positions reported as speculative.
