CATTLE AND CALVES AND SHEEP AND LAMBS ON FEED,
SELECTED STATES, 1959-65, REVISED ESTIMATES

Cattle and Calves on Feed, 1959-65

Number on Feed, Classes, Weight, Time on Feed,
Marketings, and Placements

This report presents by States revised estimates of the number of cattle and calves on feed at various times for market for 1959-65. Detailed data showing number on feed by classes, by weight groups, by length of time on feed groups, and data on marketings and placements are also included. This report continues the official series of estimates of cattle and calves on feed as shown in "Cattle and Calves on Feed, 1950-55." 1/ and "Cattle and Calves on Feed, 1955-59." 2/

Estimates relate to cattle and calves being fattened for slaughter market on grain or other concentrates which are expected to produce a carcass that will grade Good or better.

Twenty-six States were included in the quarterly program in 1960. Two States, Georgia and Alabama, were added on October 1, 1961, bringing the total to 28 States. Beginning January 1, 1964, quarterly estimates were started in Florida, Kentucky, Tennessee and Mississippi.

Monthly estimates of cattle and calves on feed were started on July 1, 1959, in Arizona and California. Monthly estimates were started in July 1961 in Colorado. Nebraska and Texas were included in the monthly program beginning in January 1964. For 7 States, January 1 estimates only are issued.

The cattle on feed estimates for 1959-65 have been revised for some States in conjunction with the 5-year revision program for all cattle and calves. A question was included on the 1964 Census of Agriculture on the number of grain-fed cattle and calves marketed during 1964. In many instances, the number reported included animals that may have received some grain but not enough to meet the grade of Good or better. Some animals kept for dairy purposes and winter operations and later sold could have also been included. Items blank for certain States in the following tables mean that data are not available.

Sheep and Lambs on Feed, 1960-65

Number on Feed by Weight Groups, and Number Marketed,
and Placed on Feed

This report presents by States revised estimates of the number of sheep and lambs on feed on January 1, 1961-65, for slaughter market. Data showing number on feed on November 1, 1960-64, and March 1, 1961-65, are shown for 7 States. Also included for these 7 States are detailed data showing number on feed by weight groups, number placed on feed, and number marketed.

This report continues the official series of sheep and lambs on feed January 1 as shown previously with the January 1 inventory reports for livestock and poultry. (See footnotes 3-8.)

Estimates relate to sheep and lambs on feed for slaughter market that are being fed a ration of grain or other concentrates or are being run on succulent pastures and are expected to produce a carcass that will grade Good or better.
