POTATOES AND SWEETPOTATOES

By States and Seasonal Groups - Crops of 1959-1964
Acreage, Yield, Production, Price, Value, Farm Disposition,
Utilization, Stocks
Revised Estimates

The following tables present revised estimates for acreage, yield per acre, production, farm disposition, utilization, season average price received by growers, and value for the crops of 1959 through 1964. Also included are monthly estimates of total stocks of potatoes in the fall States for the periods of December 1 through the following March 1 for each of the crop years 1959-1964.

The revised estimates are based primarily on information furnished currently by crop reporters, State statisticians, and cooperating State agencies. This includes annual State Farm Census data in some States, check data--such as rail and truck shipments and unloads and Federal-State inspections--and information available through marketing officials and programs. The revised estimates also reflect trends indicated by the 1964, and earlier, Federal Censuses of Agriculture.

Season average prices in this report are estimated average returns to growers for all uses and all methods of sale. These prices are applied to production having value in order to compute value of production and to the quantity sold in order to compute value of sales. The season average price shown for the United States is obtained by weighting State prices by quantities sold. A U. S. price weighted by production can be derived by dividing the U. S. value of production by the U. S. production having value.

Data for Alaska are presented in Table 24, page 37, which gives the acreage, yield, production, farm disposition, price, value, and stocks estimates for the crops of 1960 through 1964.

The value estimates in this report cover the marketing season and should not be confused with cash receipts from these crops for a calendar year.

Data on potatoes for earlier years are published as follows: Statistical Bulletin No. 122 for 1866-1948; Statistical Bulletin No. 190 for 1949-1953; and Statistical Bulletin No. 291 for 1954-1958. Similar data for sweetpotatoes may be located in Statistical Bulletin No. 237 for 1868-1953; Statistical Bulletin No. 190 for 1949-1953; and Statistical Bulletin No. 291 for 1954-1958.

Table 1.--Potatoes: Acreage, yield, production, farm disposition, season average price received by farmers, and value, United States, 1935-1964

NOTES: Current estimates for 1935 to 1958 not revised. Estimates of yield per acre, production, farm disposition and price for 1935-48 were converted to a hundredweight basis, using 60 pounds per bushel. Estimates for 1959-64 revised.

1/ Potatoes sold for all purposes, including food, seed, processing, livestock feed, and in 1949 and 1950 purchases by the Government under price support programs. 2/ Production includes the following quantities not harvested or not marketed because of low prices and excluded in computing value (thousand hundredweight): 1937, Mississippi 43; 1939, California 744; 1950, Nebraska 39; California 702; 1951, New Jersey 656; 1953, Florida 218; North Carolina 60; Alabama 773; Texas 296; California 1,721; 1955, North Carolina 135; Kansas 4; Virginia 67; Kentucky 18; Texas 215; Idaho 84; Washington 494; Oregon 130; 1957, Florida 534; 1958, Florida 395; Virginia 136; Washington 403; 1959, Florida 248; 1961, North Carolina, 8 N.E. Cos. 48; 1963, Florida 13; Alabama 320. 3/ Production includes the following quantities left in the ground because of low prices and excluded in the estimates of farm disposition and value (thousand hundredweight): 1943, Oregon 264.

* Estimates started in 1960.

^{1/} Includes seed purchased and seed used on farms where grown.

^{2/} Consists of potatoes sold for all purposes including food, seed, processing and livestock feed.

^{3/} Includes the following quantities not harvested or not marketed because of low prices and excluded in computing value of production (thousand hundredweight): 1960, 18.4; 1961, 22.0.

37

Table --Potatoes, Alaska: Total stocks held by growers and local dealers on Dec. 1, Jan. 1, Feb. 1, March 1, April 1, May 1, and June 1, crops of 1960-64 ^{1/}
