DAIRY STATISTICS, 1960-67

Economic and Statistical Analysis Division
Economic Research Service

INTRODUCTION

This publication is a successor to Statistical Bulletin 303 released in February 1962, which contained comprehensive dairy data through 1959 and preliminary 1960 data. It brings up to date most of the significant series published in Statistical Bulletin 303, Dairy Statistics Through 1960, and adds new tables containing important data developed since 1962. The tables include final data for 1960-65, preliminary information for 1966, and the available data for 1967. For some of the basic series for the United States as a whole, the tables start with 1950 rather than with 1960. Some of the new tables also contain data for years prior to 1960.

Together, Statistical Bulletin 303 and this publication bring together a wide collection of economic information relating to the dairy industry, and include a majority of the statistical series in most frequent use. Most of the data originate in the Department of Agriculture. Retail prices are from the Bureau of Labor Statistics and foreign trade statistics from the Department of Commerce.

Current monthly and weekly estimates of selected dairy items are published regularly by the Statistical Reporting Service, Consumer and Marketing Service, and Agricultural Stabilization and Conservation Service. Many of the monthly series are carried as a regular feature on page 2 of the Dairy Situation issued five times a year by the Economic Research Service. The Dairy Situation, which analyzes current and prospective dairy conditions, also carries a number of tables that are based on data published by other agencies.

This report was compiled by Barbara H. Crayton and Christal McGowan, Dairy Section, Economic and Statistical Analysis Division, Economic Research Service, under the general direction of Anthony G. Mathis, Head, Dairy Section. Several agencies in the U.S. Department of Agriculture assisted in its preparation. Major contributions were made by the Dairy Statistics Branch of the Agricultural Estimates Division, Statistical Reporting Service; the Dairy Division, Consumer and Marketing Service; and the Policy and Program Appraisal Division, Agricultural Stabilization and Conservation Service.

1/ Average number on farms during year excluding heifers not yet fresh. 2/ Excludes milk sucked by calves and milk produced by cows not on farms. 3/ Milk used on farms where produced, valued at average returns per 100 pounds of milk in combined marketings of milk and cream. 4/ Cash receipts from marketings of milk and cream plus value of milk, cream, and farm-churned butter used on farms where produced. 5/ Gross farm income plus value of milk fed to calves. 6/ Includes Alaska and Hawaii. 7/ Preliminary.

Data published annually in Milk Production, Disposition, and Income.

1/ The method used to estimate the quantity of solids-not-fat in this table was based upon the following equation: $N = 7.01 + .434 F$, where N equals the percentage of solids-not-fat in milk and F equals the percentage of fat. The equation is from "Estimating the Solids-Not-Fat Content of Milk", Marketing Research Report No. 65, USDA, AMS, 1954. Using the fat test for all milk produced on farms in the United States in the equation, a corresponding set of percentages were derived for solids-not-fat. These percentages were then applied to the total quantity of milk produced to arrive at the quantity of solids-not-fat. In previous estimates milk was assumed to have contained 9 percent nonfat solids in all years, regardless of fat test, a figure somewhat higher than those derived by means of the above equation.

2/ Preliminary.

Computed from data published annually in Milk Production, Disposition, and Income.

1967	1.42	1.11	1.02	1.69	1.58	1.03	1.23

1/ Computed based on value per 100 pounds and on grain and other concentrates fed per 100 pounds of milk produced.

Data published annually in Milk Production.

Table 14.--Kind of hay and kind of silage as percentage of total fed to milk cows in herds kept by dairy reporters, winter feeding period ending in May, United States, 1960-67 1/

Winter feeding period ending	Hay			Silage			
	Alfalfa or mixed alfalfa	Clover or mixed clover, lespedza	Other	Corn	Grass	Sorghum 2/	Other 2/
May	Percent	Percent	Percent	Percent	Percent	Percent	Percent
1960	70	19	11	77	15	---	8
1961	69	20	11	76	15	---	9
1962	69	21	10	77	14	---	9
1963	70	18	12	80	10	7	3
1964	72	15	13	83	9	5	3
1965	74	3/15	4/11	83	10	5	2
1966	75	3/13	5/12	83	9	5	3
1967	75	3/14	5/11	83	10	4	3

1/ Based on tonnage fed and to be fed during the October-May feeding period as reported on May 1.

2/ Prior to 1963, sorghum silage included in other.

3/ Includes following amounts of lespedza: 2 percent in 1964-66 and 1 percent in 1967.

4/ Includes coastal bermuda of 1 percent for 1964-67.

Data published annually in Milk Production.

1/ Based on tonnages fed during the October-May feeding period as reported on May 1, and numbers of milk cows in herd on that date. 2/ In computing hay equivalent, 3 tons of silage are considered equal to 1 ton of hay. 3/ Data not shown where reports are insufficient to establish a stable average.

^{1/} Current feed supply for grazing relative to that expected under very favorable weather conditions. U. S. averages may differ from those published in Crop Production in that States are combined with milk cow weights rather than all livestock weights.

^{2/} Weighted averages of available data during the period milk cows are on pasture.

Data currently published in Milk Production.

^{1/} Current supply of feed for grazing relative to that expected from existing stands under very favorable weather conditions. U.S. averages may differ from those published in *Crop Production* in that States are combined with milk cow weights rather than all livestock weights. ^{2/} Season figures are weighted averages of reports on the first of each month during the period milk cows are on pasture. ^{3/} 1963-65 average; not reported for 1966 and 1967. ^{4/} Data not reported for 1963-1967. ^{5/} 1963-66 average; not reported for 1967.

Data published in *Milk Production*.

Table 20 --Milk production, cows milked, costs and returns,
typical dairy farms, 1960-66

^{1/} Based on preliminary estimates. ^{2/} Assumes additional production requires adding a cow and necessary physical facilities (i.e. an added charge for capital).

Based on data published annually in Costs and Returns, Commercial Dairy Farms.

Table 21.--Number of dairy farms, United States, selected years, 1920-64

Item	Unit	Census year								
		1920	1930	1940	1945	1950	1954	1959	1964	
		1/	1/	1/	1/	1/	2/	2/	2/	
Date of census		(Jan. 1)	(Apr. 1)	(Apr. 1)	(Jan. 1)	(Apr. 1)	(Oct.- Nov.)	(Oct.- Dec.)	(Nov.- Dec.)	
Farms reporting milk cows	1,000	4,461	4,453	4,644	---	3,648	2,936	1,792	1,134	
Number of milk cows reported	1,000 head	19,680	20,510	24,087	---	21,233	20,183	16,522	14,623	
Average number of cows per farm	Number	4.4	4.6	5.2	---	5.8	6.9	9.2	12.9	
Farms selling milk and/or cream 3/	1,000	4/	4/	2,648	2,473	2,007	1,475	1,018	641	
Farms selling whole milk	1,000	711	894	954	1,163	1,097	934	770	545	
Average sales per farm	1,000 lb.	30.6	42.9	48.5	56.1	62.5	87.6	126.7	197.2	
Farms selling cream	1,000	4/	1,624	1,460	1,176	862	541	262	103	
Average sales per farm	Lb. of fat	4/	750	747	684	676	851	967	1,241	
Commercial dairy farms 5/	1,000	---	---	---	---	602	549	428	367	
With over \$10,000 in sales	1,000	---	---	---	---	71	88	155	186	

1/ Sales during preceding year. 2/ Sales during year of census. 3/ In 1939, 1944, and 1949, farms with any dairy products sold, in 1954, farms with milk sold plus farms with cream sold, and in 1959 and 1964, any milk or cream sold. 4/ Not available on comparable basis. 5/ Commercial farms are those with an annual value of sales amounting to \$2,500 or more. Farms with a value of sales of \$50 to \$2,499 were classified as commercial if the farm operator was under 65 years of age and (1) he did not work off the farm 100 or more days during the year and (2) the income received by the operator and members of his family from nonfarm sources was less than the value of all farm products. For commercial dairy farms, dairy products accounted for 50 percent or more of total sales.

Table 22.--Farms reporting milk cows, commercial dairy farms, farms selling milk and cream, and average sales per farm, 1959 and 1964

1/ Percent of infection in States conducting Brucellosis Ring Tests calculated on basis of total blood tests and 1/2 of total BRT negative tests.

2/ Beginning 1961, percent of herd and cattle infection calculated on the basis of total blood test and actual number of individual BRT negative herds in each State, and the number of cattle in these herds.

3/ Includes only complete herd tests conducted at farm or ranch.

Compiled from reports of the Animal Disease Eradication Branch, Agricultural Research Service.

Table 32--Supply and utilization of milk, United States, 1960-67

1/ Preliminary. 2/ Whole milk equivalent (milkfat basis) of net imports of dairy manufacturing ingredients such as frozen cream and butterfat-sugar mixtures. A negative figure represents net exports of ingredients. 3/ Whole milk equivalent of net out-of-storage movement of fluid and plastic cream during the year. A negative figure represents a net movement of cream into storage. 4/ Whole milk equivalent of dry cream, malted milk powder, part-skim dry milk, dry or concentrated ice cream mix, dehydrated butterfat and other miscellaneous products using milkfat. 5/ Sales directly to consumers by producers who sell only milk from their own herds. Also includes milk produced by institutional herds. 6/ Residual, including minor miscellaneous uses and any inaccuracies in production and utilization estimates. *Without adjustment for imported butterfat-sugar mixtures. **Includes some milk used for other purposes on farms or not utilized.

Data published annually in Milk Production, Disposition, and Income.

1/ Includes Alaska and Hawaii. Total whole milk equivalent of factory dairy products calculated from production in each State, and pounds of fat received at plants per pound of product made and test of milk used currently for each purpose. No adjustment has been made for shipments of milk and cream between States differing in the test of milk produced. Because of interstate shipments the milk equivalent of products manufactured in each State does not necessarily show utilization of milk output in the State. In order to avoid duplication in calculating the milk equivalent of all products, deductions were made for the amount of fat recovered in whey cream and used for making butter, and for the amount of fat from butter and condensed milk used in making ice cream, based on information obtained from plants.

2/ Includes milk equivalents of dry cream, milked milk powder, part-skin dry milk, dry or concentrated ice cream mix, partially and full creamed cottage cheese, dehydrated milkfat, and other special milk products.

3/ Less than 50,000 pounds.

4/ Preliminary.

1/ Quantity milkfat fed to calves determined by applying annual fat test of milk to reported quantities of milk. Quantities in remaining columns except civilian disappearance were determined by applying percentage of milkfat or solids-not-fat in each product to the amount of product. Civilian disappearance computed from data on production, stocks, trade, military purchases, quantities fed to calves, and other uses.

2/ For solids-not-fat, the quantity "fed to calves" is the difference between total supply and total distribution among consumption, exports, and ending stocks

3/ Includes any quantities used by the military in civilian feeding programs abroad.

4/ Based on total July 1 population.

5/ Less than 500,000 pounds

6/ Preliminary.

1. Production includes farm butter. Imports and government stocks include butter equivalent of butteroil and anhydrous milkfat.

2. Preliminary.

3. Includes all types of cheese except full skin American and cottage cheese.

4. Less than 500,000 pounds.

5. Includes estimate of 39 million pounds of American process cheese, held by USDA.

6. Includes Cheddar, Limby, washed curd, high and low moisture jack, Monterey, granular, and part skin cheese.

7. Case and bulk goods.

Compiled from various reports of the Statistical Reporting Service and the Department of Commerce.

1/ Estimated on the basis of total milkfat used in frozen dairy products, less approximate quantities supplied in the form of butter and condensed whole milk. (These quantities are included in tables on butter and condensed whole milk.)

2/ Reported in gallons in Production of Manufactured Dairy Products, converted to pounds on the basis of 4.8 pounds per gallon.

3/ Preliminary.

1/ Includes estimated quantities exported in food packages through CARE and other non-government agencies; does not include quantities mailed abroad by individuals.

2/ Computed from unrounded data.

3/ Preliminary.

As published in Fats and Oils Situation.

1/ Preliminary. 2/ Excludes full-skin American and cottage cheese. 3/ Includes part-skin American, blue-mold, and "all other varieties". 4/ Used for processing into full or partially creamed cottage cheese or for sale to consumers in dry form. Curd and full or partially creamed cottage cheese should not be added together to obtain consumption. Although a small quantity of cottage cheese curd is sold directly for consumption in dry form, most of it is creamed within the plant or shipped to another plant where a creaming mixture is added prior to sale. 5/ Not less than 4 percent milkfat content. 6/ Less than 4 percent milkfat content. This product is not legal in interstate commerce and in many States. 7/ Sweetened and unsweetened. 8/ Freezer-made milkshake included beginning 1957. 9/ Computed from unrounded data.

Data available annually in Production of Manufactured Dairy Products. Monthly data from various reports published by the Crop Reporting Board, Department of Agriculture. Margarine data from Margarine Statistics Report, National Association of Margarine Manufacturers.

Footnotes for table 4, page 64--

1/ Preliminary. 2/ Includes Colby, wicker curd, long and low moisture jack, Monterey, and granular. 3/ Used for processing into full or partially creamed cottage cheese or for sale to consumers in dry form. 4/ Includes Alaska and Hawaii. 5/ Milkfat content not less than 4 percent. 6/ Includes freezer-made milkshake.

Data published annually in Production of Manufactured Dairy Products.

1/ Production for individual States and Regions is not reported when volume is less than 10,000 pounds, or when less than 2 plants were in operation. Regional and U. S. totals include such unreported data.
 2/ Milkfat content less than 4.0 percent. This product is not sold in its retail commerce and in many States.

Data published annually in Production of Manufactured Dairy Products.

1/ Excludes milk used on farms where produced; includes consumption of Armed Forces stationed in the United States. 2/ Includes skim milk, buttermilk, and flavored milk drinks. 3/ Includes milk and cream mixtures. 4/ Beginning 1958, includes estimated solids used in fortifying skim milk items, based on annual sales data of skim milk with added solids in Federal order markets. 5/ Based on estimated population using fluid products from purchased sources. 6/ Preliminary.

Based on data published in Milk Production, Disposition, and Income, and Federal Milk Order Market Statistics.

1/ Prices for bulk containers--butter, 64 and 68 pound packages; nonfat dry milk, nonfortified in 100 pound bags; and natural cheese, mostly in 40 and 60 pound blocks. In 1950/51 a purchase price was set for evaporated milk of \$3.95 per case. 2/ Beginning 1954/55, San Francisco and Seattle prices 0.75 cent lower than in New York. Grade B price 2 cents below Grade A price. 3/ Effective August 19, 1967. 4/ Beginning October 1967, prices in 50-pound bags 0.25 cent higher.

1968	4.33	3.42	79.0	1.73	350	6.06	4.79

1/ Based on data for the 10 calendar years immediately preceding.

2/ Prior to November 1962 the "3-product" (milk bought for use in production of American cheese, evaporated milk, and the butter-nonfat dry milk) price series was used. Factor of 88.5 percent used from early 1949 through March 1954.

3/ Adjusted base price 1910-14 derived from 120-month average of prices received by farmers for all wholesale milk divided by 120-month average of the Index of Prices Received by Farmers (both series adjusted for supplemental payments, when applicable), ending with December of the previous year.

4/ Data as published in March issues of Agricultural Prices.

5/ April-December 1954.

6/ November-December 1962.

Data available in Agricultural Prices.

^{1/} Delivery basis, after unrestricted domestic sales.

^{2/} Includes butter equivalent of anhydrous milkfat, PIK, and purchases under Sec. 709.

^{3/} Includes purchases under Sec. 709.

^{4/} Includes PIK certificates issued.

^{5/} Domestic sales exceeded purchases.

^{6/} Less than 0.05 percent.

^{7/} Preliminary.

^{8/} Fifteen months (January 1950-March 1951).

Basic data compiled from reports of Agricultural Stabilization and Conservation Service.

1/ U. S. production is small and not reported. Therefore, imports comprise practically the entire supply and are an approximation of consumption. 2/ Total casein January 1960-June 1963. 3/ Mixtures of casein with more than half the value coming from casein; includes caseinates. 4/ Included in casein prior to July 1963. 5/ Computed from FR-246, Official Records, Bureau of Census. 6/ Argentine, fine ground, f.o.b., New York.
