Sheep farms: Number of sheep farms, by States, 1965-69.....	26

SHEEP AND LAMBS, GOATS

Revised Estimates, 1965-70

This publication presents revised estimates of the Crop Reporting Board, Statistical Reporting Service, relating to:

- Number, value, and classes of sheep and lambs on farms January 1, 1966-70.
- Lamb crop, wool and mohair production 1965-69.
- Number and value of all goats, Texas, January 1, 1966-70.
- Number of sheep and lambs on feed for slaughter market January 1, 1966-70
- Number of sheep and lambs on feed, marketings and placements, seven selected States, November 1, 1965-69, January and March 1, 1966-70.
- Number of sheep farms 1965-70.

This report continues and combines the official series on January 1 inventory of sheep and lambs and goats, sheep and lambs on feed, and annual wool and mohair production previously shown in the following separate publications of USDA's Statistical Reporting Service:

Livestock and Poultry Inventory, January 1, Number, Value, and Classes, 1961-65, by States, Statistical Bulletin 389, February 1967. Calf Crop, Lamb Crop, Wool Production, Mohair Production, United States, by States, 1960-64, Statistical Bulletin 392, February 1967. Cattle and Calves and Sheep and Lambs on Feed, Selected States, 1959-65, Statistical Bulletin 387, January 1965.

The annual estimates of numbers on farms and ranches are based primarily on survey returns from sheep producers. The revised State and U. S. series are based on a thorough review of the original survey indications and estimates, taking into consideration the 1969 Census of Agriculture and other information such as year-to-year changes in numbers assessed for taxation. Consideration was also given to records relating to market receipts of sheep and lambs and estimates of commercial and farm slaughter. The inventory estimates relate to January 1 of each year.

In 1964, the U. S. Census of Agriculture was enumerated mostly during November and December, and farmers were asked to report inventories on the date of enumeration. In using Census data it was necessary to adjust from the average date of enumeration to January 1. In contrast to survey methods used for the 1964 and earlier Censuses, the 1969 Census of Agriculture was collected by mail with survey procedures modified by the level of the individual farm value of sales. The initial questionnaire mailing reached producers in early 1970 with the request to report inventories as of December 31, 1969. Several follow-up mailings were made to obtain as complete coverage as possible. The average date that census questionnaires were completed was during February. Therefore, different adjustments were necessary for the 1969 Census than for earlier census data.

The 1969 Census totals published for all sheep and lambs include "new crop lambs" or lambs born between October 1 and December 31, 1969. Since the inventory estimates published by the Statistical Reporting Service exclude "new crop" lambs, it was necessary to adjust for these lambs in order to make valid comparisons with census data. When revisions were made for the inventory numbers, corresponding adjustments were usually necessary in lamb crop, wool, or mohair estimates.

The estimates of average value per head are based on crop and livestock reporters' estimates of average price per head in their localities, about January 1, each year. These farm and ranch operators report the value per head by age and sex. Values per head, by classes for each State, are weighted together by the estimated number in each class. This weighted average is the basis for the estimated value per head. In the case of estimates for the United States, the total value is the sum of the State estimates; and value per head is derived by dividing the total value by the number of head for the United States.

Revised estimates by States of the number of sheep and lambs on feed January 1, 1966-70, for slaughter market are presented in this publication. Data showing number on feed on November 1, 1965-69, and March 1, 1966-70, are shown for seven States. Also included for these seven States are data for number on feed by weight groups, placements, and marketings. Estimates of sheep and lambs on feed pertain to animals being fattened for slaughter market on grain, other concentrates, or succulent pastures, and expected to produce a carcass that will grade Good or better.

The number of lambs saved is defined as the number of lambs docked or branded in the 13 Western sheep States (11 Western States, South Dakota, and Texas). In other States, the number of lambs saved is the number living on July 1 plus those sold before that date. The estimated lamb crop percentage is the number of lambs saved per 100 ewes 1 year old and older on farms and ranches at the beginning of the year.

Wool and mohair production estimates are based on survey returns from sheep producers and check data from Agricultural Stabilization and Conservation Service incentive payment programs. These estimates include shearing at commercial feeding yards. The 1969 Census of Agriculture did not collect data on the pounds of wool or mohair produced.

Table 1. Sheep and lambs: Number on farms, value per head, total value, and classes, United States, January 1, 1966-70

Year	All sheep & lambs		Sheep and lambs		Stock sheep & lambs							
	Number	Total value	Number	on feed	Farm value		Lambs		1 year and older			
					Per head	Total	Ewes	Wether and ram	Ewes	Rams	Wethers	
	1,000 head	1,000 dollars	1,000 head		Dollars	dollars			1,000 head			
1966	24,734	490,686	3,278	21,456	19.70	422,404	3,010	760	16,850	675	161	
1967	23,953	473,216	3,276	20,677	19.70	407,434	2,959	688	16,230	645	154	
1968	22,223	427,216	3,115	19,108	19.10	365,783	2,546	569	15,290	587	118

1970	20,423	512,737	2,990	17,433	24.80	432,505	2,422	475	13,923	522	91	

Table 2. Lamb crop: United States, 1965-69

Year	Breeding ewes 1 year old and older on January 1	Lambs saved per 100 ewes 1 + on January 1 1/	Lambs saved 1/
	1,000 head	Percent	1,000 head
1965	17,502	93	16,312
1966	16,850	94	15,881
1967	16,230	93	15,017
1968	15,290	94	14,444
1969	14,707	93	13,723

1/ Lambs saved defined as lambs living July 1, or sold before July 1 in the Native States and lambs docked or branded in the Western sheep States.

Table 3. Wool production: United States, 1965-69 1/

Year	Shorn wool				Pulled wool			Total shorn and pulled wool production
	Sheep shorn 2/	Weight per fleece	Production	Price per pound 3/	Value	Weight per skin	Production	
	1,000 head	Pounds	1,000 pounds	Cents	1,000 dollars	Pounds	1,000 pounds	
1965	23,756	8.48	201,463	47.1	94,999	3.37	23,300	224,763
1966	22,923	8.51	195,053	52.1	101,204	3.43	24,100	219,153
1967	22,056	8.57	188,984	39.8	75,177	3.44	22,400	211,384
1968	20,759	8.55	177,396	40.5	71,778	3.43	20,500	197,896
1969	19,584	8.46	165,749	41.8	69,516	3.46	17,100	182,849

1/ Data not available for Hawaii.

2/ Includes shearing at commercial feeding yards.

3/ Computed by weighting State average prices for all wool sold during the year by sales of shorn wool.

Table 4. All goats: Number on farms, value per head, and total value, Texas, January 1, 1966-70

Year	Number 1,000 head	Value	
		Per head Dollars	Total 1,000 dollars
1966	4,222	6.80	28,710
1967	3,969	5.20	20,639
1968	3,572	4.90	17,503
1969	3,030	6.90	20,907
1970	2,572	7.40	19,033

Table 5. Mohair production and value, 7 States, 1965-69 1/

Year	Goats clipped 2/	Average clip per goat	Production	Price per pound 3/	Value
1965	4,803	6.7	32,420	65.5	21,251
1966	4,659	6.3	29,576	53.7	15,896
1967	4,113	6.6	27,127	40.9	11,100
1968	3,966	6.6	26,022	45.2	11,754
1969	3,174	6.6	20,810	65.1	13,549

1/ Includes Missouri, Texas, New Mexico, Arizona, Utah, Oregon and California.

2/ In States where goats are clipped twice a year, the number clipped is the sum of goats and kids clipped in the spring and kids clipped in the fall.

3/ The 7-State average price is computed by weighting State calendar year prices by production of mohair.

Table 6. All sheep and lambs: Number on farms and total value, by States, January 1, 1966-70
