NOTES

This supplement is designed for use with the Poultry and Egg Situation, a report issued periodically by USDA's Economic Research Service (ERS). A summary table containing data designed to keep statistics of this supplement up to date appears in the Poultry and Egg Situation, along with other special tables.

Most of these statistical series originate within USDA's Statistical Reporting Service. A number of series were developed by ERS and other USDA agencies including the Agricultural Marketing Service and Foreign Agricultural Service. Non-USDA agencies contributing series are the Bureau of Census and the Bureau of Labor Statistics.

Since this publication mainly features information for the entire United States, users of poultry and egg statistics may wish to supplement this information with Annual data by States from the following reports: (1) Chickens and Eggs--Disposition Production, Cash Receipts, and Gross Income, and (2) Turkeys--Number Raised, Production, and Gross Income. They are available from the Statistical Reporting Service, U.S. Department of Agriculture, Washington, D. C. 20250.

This publication was prepared in the Poultry Group, Commodity Economics Division, Economic Research Service, by Eunice O. Armstrong, assisted by Bessie J. Byrd and Rosezina West, under supervision of Gerald R. Rector.

1/Beginning in 1960, includes Alaska and Hawaii. 2/ Estimated farm output plus nonfarm production estimated at 10 percent of farm production in 1950-54. Beginning in 1955, this adjustment was reduced 1 percentage point per year to zero in 1964. 3/ Shell eggs and the approximate shell-egg equivalent of dried and frozen eggs. 4/ Storage stocks include shell eggs and the approximate shell-egg equivalent of frozen eggs. In 1950-58 commercial storage holdings also included the shell-egg equivalent of reported stocks of dried eggs solids. 5/ Beginning in 1955 exports under the Mutual Security Act of 1951 and USDA donations to Territories. 6/ Estimated on the basis of chickens hatched. 7/ Includes USDA donations to military and military feeding of civilians in occupied territories. 8/ Excludes storage losses of 1 million dozen in 1950. 9/ Preliminary.

1/ Includes chickens, other than commercial broilers, sold from and consumed on farms where produced, plus nonfarm production of these chickens estimated at 10 percent of farm output in 1950-54. Beginning in 1955, this percentage adjustment was reduced 1 point annually, reaching zero in 1964. The factor for converting from liveweight to ready-to-cook weight was increased gradually from 68.84 percent in 1950 to the current level of 72 percent in 1958. 2/ Includes exports of turkey through 1957, dressed weight or ready-to-cook equivalents. 3/ Beginning in 1955, exports under P. L. 480 and USDA donations to Territories. 4/ Includes USDA donations to military and military feeding of civilians in occupied territories. 5/ Preliminary.

1/ Includes turkey sold from and consumed on farms where produced. The factor for converting from liveweight to ready-to-cook weight was increased gradually from 75 percent in 1950-55 to the current level of 80 percent in 1961. 2/ Stock data in terms of product weight as reported. 3/ Exports prior to 1958 were negligible and data were not reported separately from chicken. 4/ Includes USDA donations to military and military feeding of civilians in occupied territories. 5/ Includes giblets. 6/ Preliminary.
