Table 30. Fluid milk: Volume shipped from Wisconsin shipping points, by weeks, 1976.....	36

DAIRY MARKET STATISTICS - 1976 ANNUAL SUMMARY

This is an annual summary of market statistics on dairy products collected and compiled by the Market Information Branch, and published in a weekly report entitled "Dairy Market News."

Dairy market news service is provided by the U.S. Department of Agriculture and cooperating State agencies. The purpose is to provide dairy farmers and their cooperatives, processors, buyers and sellers of dairy products, and others with information which will help in making buying and selling decisions and future planning.

Dairy market news covers markets for dairy products of commercial significance. The kinds of market data gathered are determined by industry needs and by the willingness of industry members to voluntarily provide the necessary information. The information is gathered by reporters by telephone, teletype, and mail. They use the telephone most extensively in reaching buyers and sellers who are widely scattered.

Prices for most products are issued once a week. An average price for the year is the mean of the 12 monthly prices. A yearly average price is not computed when a price is not reported for one or more months.

The addresses and telephone numbers of Market Information offices are:

HEADQUARTERS

Market Information Branch
Dairy Division
Agricultural Marketing Service
U.S. Department of Agriculture
Washington, DC 20250
PHONE: 202/447-7461

1/ LST = Last Significant Transaction. (S = Sale. B = Bid--willingness to buy at a stated price. O = Offer--willingness to sell at a stated price.) For these markets, a general understanding exists as to how the trading is interpreted. The last sale is considered to represent the market for the coming week except that a subsequent bid higher than the last sale, or a subsequent offer lower than the last sale, is considered indicative of the market. In the absence of sales, the last bid higher than the previous week's market, or the last offer lower than the previous week's market, is considered indicative of the market. In the absence of any sales, offers, or bids, the market is considered to be unchanged.

NC = No Change
