FARM INCOME STATISTICS

Introduction

This bulletin updates Farm Income Statistics, Statistical Bulletin No. 576, published in July 1977. Analysis and current estimates are available in the Agricultural Outlook, a monthly publication (except for a combined January-February issue) of the Economics, Statistics, and Cooperatives Service (ESCS).

The estimated series, while mainly based on information from the statistics unit of ESCS, and the censuses of agriculture, also utilizes information from other Government agencies and in some cases from private sources. As additional data become available, and special survey information is analyzed, revisions are ordinarily required in the income series for recent calendar years.

The series fall into three categories: (1) tables containing revised gross farm income estimates for 1975 and 1976, as well as the first detailed estimates for 1977, (2) historical tables on farm and personal income, and (3) tables showing distributions of farm numbers, farm income, and off-farm income of farm operator families by value of sales classes.

The third set of tables incorporates regular farm income revisions for 1975-76 and initial 1977 estimates. These tables also reflect a realignment of farm number distribution estimates beginning in 1970 based on data from the 1974 Census of Agriculture and information from Farm Production Expenditure Surveys. Distributions reported last July were based mainly on preliminary information from the 1974 Census of Agriculture. (See note following Table 10D.)

This bulletin was prepared by the staff of the Farm Income Research Project, National Economic Analysis Division of the Economics, Statistics, and Cooperatives Service. A State supplement, which will be available in September 1978, will update State Farm Income Statistics, published in September 1977.

FARM INCOME CONCEPTS: THEIR MEANING AND MEASUREMENT

Since the mid-1920's, U.S. Department of Agriculture has published a comprehensive set of income estimates relating to agriculture. Over the years the series developed and increased in coverage, with individual State estimates starting in 1949.

The estimates include two major concepts of farm income.

The first views agriculture as a business or industry. It measures gross farm income, farm production expenses, and finally the net return to farm operators for their labor (including that of their families), management, and capital invested in farms and equipment. With this issue, the terms used to identify two net farm income series have been changed. Net farm income before inventory adjustment was formerly termed "Realized Net" farm income. Net farm income after inventory adjustment has previously been called "Total Net" income. For many uses the preferred measure of the net return from farm production in a given year is Net Farm Income After Inventory Adjustment.

The second concept relates to the people who live on farms and the personal income they have available for the purchase of goods and services. This concept recognizes that some people living on farms, such as farm laborers and their families, are not farm-operator families, and also that many farm residents receive a significant part of their income from nonfarm sources. The series measuring this concept is Personal Income of the Farm Population From All Sources.

These two major series are derived from the various components or building blocks of the farm income estimates. Generally, the individual components are important series in their own right, providing insight into the major economic forces affecting the overall farm income situation. Most of these series are indirect estimations of the concept involved. The cash receipt estimates are on a commodity-by-commodity basis using detailed monthly price and marketing estimates by State. Expense estimates, which are by types of expense, are based on special surveys and estimates of prices paid by farmers. Expenses are estimated at the national level and allocated to individual States.

Major components used in calculating the net income from farming for 1977 are:

	<u>Billion dollars</u>
Cash receipts from farm marketings	96.1
Government payments to farmers	1.8
Other farm income	1.5
Nonmoney income	8.7
Gross income	108.1
Farm production expenses	88.0
Net farm income before inventory adjustment ...	20.1
Net change in farm inventories4
Net farm income after inventory adjustment	20.6

Gross farm income includes four principal components:

1. Cash receipts from farm marketings of farm products represent gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by the Commodity Credit Corporation and other purchases under price support programs.
2. Government payments to farmers are those made directly to farmers in connection with farm programs.
3. Nonmoney income includes the value of farm products consumed directly in farm households and the rental value of housing provided by farm dwellings. Expenses associated with these products and the dwellings are included in the production expense estimates, thus, the nonmoney imputations do not add on a dollar-for-dollar basis to the net.
4. Other farm income is cash income from sources such as recreation, machine hire, and custom work.

Farm production expenses are costs incurred in farm production. They include current farm operating expenses for such items as wages paid to hired labor (in cash and in kind), outlays for repairs of equipment and operation of the farm, as well as purchases of oil, feed, seed, and live-

stock. Overhead-type costs include charges for depreciation and other capital consumption, taxes on farm property, and interest on the farm mortgage debt.

Data users should be aware that the expense estimates in this bulletin differ from the results of an annual survey of Farm Production Expenditures published by ESCS. The survey is one source used in making expense estimates, but other sources and conceptual differences cause estimates for similar items to deviate from the survey results. For example, expenditures on new buildings, motor vehicles, and other capital equipment are not directly included as production costs. Production expenses include instead an allowance for annual depreciation and other capital consumption. In addition, certain expenditures are "netted out" in the farm income accounts, such that total production expenses in this bulletin are lower than total production expenditures found in the survey reports

Farm operators' net income before inventory adjustment represents what is left from gross farm income after deducting farm production expenses.

Net change in farm inventories is the estimated physical change in livestock and crops owned by farmers, valued at average prices prevailing during the year. To estimate the net value of production during a given calendar year, it is necessary to take into account net changes in farm inventories. Recognize that the inventories will frequently be sold at prices different from those used in the inventory change valuation.

Farm operators' net income after inventory adjustment is also computed as a residual. This represents gross income less production expenses, plus or minus the value of the physical change in inventories. After adjustment for corporate officers' salaries and corporate profits, this estimate of net income is included in the national income estimates of the U.S. Department of Commerce as farm proprietors' income.

Farm wages of laborers on farms represent the income received by farm laborers living on farms from wages paid by farm operators.

Personal income of the farm population from all sources is the sum of the personal income of the farm population from farm and nonfarm sources. Personal income from farm sources is the net income of farm operators, including government payments, less the net income of nonresident farm operators, plus wages and salaries and other labor income of farm resident workers, less contributions of farm resident operators and workers to social insurance. Personal income of the farm population from nonfarm sources consists of income received from nonfarm wages and salaries, business and professional income, interest, and transfer payments, such as unemployment compensation, social security, and veterans benefits. Also included is rental income from nonfarm sources and an estimate of income from items such as dividends and royalties.

Per capita personal income of the farm population is derived by dividing the appropriate totals by the number of people living on farms.

For further information on construction and use of the farm income series see Volume 3: Gross and Net Farm Income, Agriculture Handbook No. 365, September 1969.

Gross Income Revisions, 1975-77

Historical Series

<u>Table</u>	<u>Page</u>
1H - Gross and net farm income, before inventory adjustment, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	31
2H - Gross and net farm income, after inventory adjustment, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	32
3H - Number of farms and average farm income per farm, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	33
4H - Purchasing power of net farm income, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	34
5H - Personal income and disposable personal income of the farm population, 1934-77	35
6H - Total disposable personal income, disposable personal income of the farm and nonfarm population, and population by residence, 1934-77	36
7H - Per capita personal income of farm and nonfarm population, 1934-77	37
8H - National income: Farm and nonfarm, 1929-77	38
9H - Gross farm income, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	39
10H - Nonmoney and other farm income furnished by farms, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	40
11H - Cash receipts from farm marketings of livestock and products, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	41
12H - Cash receipts from farm marketings of crops, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	42
13H - Current farm operating expenses, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	43
14H - Farm production expenses, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	44
15H - Expenses for hired farm labor, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	45
16H - Repairs and operation of farm capital items, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	46
17H - Farm gross capital expenditures and net investment, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	47
18H - Farm depreciation and other capital consumption, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	48
19H - Cash receipts, cash expenditures, and net cash income of farm operators from farming, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77	49
20H - Reconciliation of farm operators' net cash income with net farm income of farm operators after inventory adjustment, averages 1910-14, 1915-19, 1920-24, 1925-29; annual 1935-77	50
21H - Index numbers of volume of farm marketings and home consumption, 1940-77	51
22H - Government payments, by programs, 1933-77	52

Distribution by Sales Class

<u>Table</u>		<u>Page</u>
1D	- Number of farms by value of sales classes, 1960-77.	53
2D	- Cash receipts from farming including government payments and other farm income, by value of sales classes, 1960-77.	54
3D	- Gross farm income before inventory adjustment, by value of sales classes, 1960-77.	55
4D	- Farm production expenses, by value of sales classes, 1960-77.	56
5D	- Net farm income before inventory adjustment, by value of sales classes, 1960-77.	57
6D	- Per farm cash receipts and gross income from farming, by value of sales classes, 1960-77.	58
7D	- Per farm production expenses and net income before inventory adjustment from farming, by value of sales classes, 1960-77.	59
8D	- Income per farm operator family by major source and by value of sales classes, 1960-77.	60
9D	- Direct government payments to farmers, by value of sales classes, 1960-77.	61
10D	- Per farm direct government payments, by value of sales classes, 1960-77.	62

Table 1--Summary of farm income estimates, 1975-77 1/

Item	1975	1976	1977
	<u>Billion dollars</u>		
Cash receipts from marketings	88.2	94.5	96.1
Livestock and products	43.0	46.2	47.6
Crops, includes net CCC loans	45.1	48.3	48.5
Nonmoney items, other cash income	7.9	8.9	10.2
Direct government payments	.8	.7	1.8
Gross income before inventory adjustment	96.9	104.1	108.1
Production expenses	75.9	83.0	88.0
Net income before inventory adjustment	21.1	21.1	20.1
Value of inventory change	3.4	-2.4	.4
Net income after inventory adjustment	24.5	18.8	20.6

1/ Updated information on underlying components of the farm income accounts has been incorporated into new income and expense estimates for the past 3 calendar years. For example, there have been changes in the production, disposition, and value estimates for nearly all farm commodities as a result of the 1974 Census of Agriculture. Totals may not add due to rounding.

Table 2—Major farm income components by quarter, seasonally adjusted at annual rates, 1973-77 1/

- 1/ Includes major commodity income estimates for which the Department published State value of production in 1977, plus minor States for which value of production was not published. Adjustment are also made in "Other" categories for other commodities.
- 2/ Cash receipts include value of home consumption.
- 3/ Bees, horses and mules, turkey hatching eggs, ducks, geese, guineas, other poultry, goats, goat-milk, mink pelts, other fur pelts, rabbits, other.
- 4/ Hawaii sugarcane is included.
- 5/ Not available for individual commodities.
- 6/ Includes only processing.
- 7/ Chinese cabbage, swiss chard, collards, dandelion greens, mustard greens, turnip greens, horseradish, kale, hohlrabi, okra, green onions, parsley, parsnips, field peas, pimentos, pumpkins, radishes, rhubarb, rutabagas, shallots, squash, turnips, watercress, and other miscellaneous vegetables.
- 8/ Buckwheat, mung beans, castor beans, chufas, cunner and spelt, dill for oil, lentils, provo millet, safflower, sorgo sirup, sugarcane syrup, velvetbeans, wormwood oil, wormseed, oil, tung nut, other grains, other field crops, major field crops in States for which the Department did not estimate value of production for 1977 and the following seed: Alsike clover, alyce clover, Austrian winter peas, birdsfoot trefoil, bluestem grass, bromegrass, Bermuda grass, canary grass, carpet grass, cowpeas, crotalaria, dallisgrass, grama grass, hairy indigo, Kentucky bluegrass, lupine, meadow foxtail, millet, mustard, rapeseed, redtop, rescue grass, sesame, sudangrass, sweet clover, sunflower, sweet corn, wild winter peas, wheatgrass, major seeds in States for which the Department did not estimate value of production for 1977.
- 9/ Loganberries, boysenberries, youngberries, gooseberries, olallieberries, dewberries, all other.
- 10/ Pineapples, mangos, marcotts, quinces, chestnuts, kumquats, guavas, passion fruit, lychee nuts, major fruits, berries, and nuts in States for which the Department did not estimate value of production for 1977.
- 11/ Excludes mushrooms, see above under field crops.

Table 1H--Gross and net farm income, before inventory adjustment, averages 1910-14, 1915-19, 1920-24, 1925-29, 1930-34; annual 1935-77

1/ The averages in this table are derived by dividing appropriate totals appearing in tables 5H and 6H by the population estimates in table 6H.

2/ Includes returns from farming operations to resident farm operators for their capital, labor and management, after deduction of farm production expenses (there is no allowance in the item farm production expenses for a return on investment in farm capital). Also includes farm wages and other labor income received by hired farm-resident workers.

3/ Includes all income received by farm residents from nonfarm sources such as wages and salaries from nonfarm employment, nonfarm business and professional income, rents from nonfarm real estate, dividends, unemployment compensation, and Social Security payments.

Table 8H--National income: Farm and nonfarm, 1929-77

1/ Includes other farm income beginning 1950. 2/ From table 13H. 3/ Total cash wages from table 15H plus Social Security taxes paid by employers. 4/ From table 17H. 5/ From table 14H. 6/ This series includes share rent as well as cash rent paid to nonfarm or nonoperator landlords because their share is included in cash receipts shown in the first column. Differences between this series and table 14H are explained in FIS-191, table 20H footnote 6. This series represents nonfarm landlords for 1910-1958 and nonoperator landlords for 1959 to date.

Table 20H--Reconciliation of farm operators' net cash income with net farm income of farm operators after inventory adjustment, averages 1910-14, 1915-19, 1920-24, 1925-29, annual 1935-77

Year	Net cash income 1/	Plus			Minus			Total	Equals net income after inventory adjustment 6/

1/ From table 19H; includes other farm income, 1950 to date. 2/ From table 10H, plus Social Security taxes paid by employers from 1951 to date, excludes other farm income (cash income). 3/ From table 17H. 4/ From table 15H. 5/ Represents the difference between expenditures and depreciation of farm buildings owned by nonfarm or nonoperator landlords. It is equal to the difference between the two series on net rent to nonfarm or nonoperator landlords discussed in footnote 6 to table 19H. 6/ From table 2H.

Data in Tables 1D to 10D are estimated using information from several sources. These sources include the Census of Agriculture, periodic surveys, and special studies that cast light on income from farming. Although the distributions are believed to be reasonable, data and procedures may not accurately reflect year-to-year changes. Because basic information is limited and is not immediately available, a number of assumptions and approximations of some variables are involved in the estimating process. The estimates are frequently subject to substantial revision as more complete data become available. Year-to-year changes in off-farm income components are based on personal income estimates for the whole population as developed by the U.S. Department of Commerce. The current distributions of off-farm income include significant revisions from last year, based on results from the 1975 Farm Production Expenditure Survey, the 1974 Census of Agriculture, and other information.
