DAIRY MARKET STATISTICS - 1979 ANNUAL SUMMARY

This is an annual summary of market statistics on dairy products collected and compiled by the Dairy Division of USDA's Agricultural Marketing Service, and published in "Dairy Market News," a weekly report.

Dairy market news service is provided by the U.S. Department of Agriculture and cooperating State agencies. The purpose is to provide dairy farmers and their cooperatives, processors, buyers and sellers of dairy products, and others with information which will help in making buying and selling decisions and future planning.

Dairy market news covers markets for dairy products of commercial significance. The kinds of market data gathered are determined by industry needs and by the willingness of industry members to voluntarily provide the necessary information. Market reporters gather information by telephone, teletype, and mail. They use the telephone most extensively in reaching buyers and sellers who are widely scattered.

Prices for most products are issued once a week. Unless otherwise noted, monthly averages are based on weekly prices and calculated according to the number of workdays in a month (Saturdays, Sundays, and holidays excluded). This procedure is called time weighting. It is important for months having a split week because it gives the proper weight to the days in each month. No monthly average price is computed if one or more weekly prices are missing. Monthly averages for prices reported more than once a week are simple averages of all prices reported during the month. Yearly averages are simple averages of the monthly average prices. No yearly average is computed if one or more monthly average prices are missing.

The addresses and telephone numbers of Market Information Branch offices are:

Discontinued

After 107 years of existence,
trading in spot butter on the
New York Mercantile Exchange
was discontinued as of
September 1, 1979. The last
day of trading was Friday,
August 31, 1979.

1/ LST = Last Significant Transaction. (S = Sale. B = Bid--willingness to buy at a stated price. O = Offer--willingness to sell at a stated price). For these markets, a general understanding exists as to how the trading is interpreted. The last sale is considered to represent the market for the coming week except that a subsequent bid higher than the last sale, or a subsequent offer lower than the last sale, is considered indicative of the market. In the absence of sales, the last bid higher than the previous week's market, or the last offer lower than the previous week's market, is considered indicative of the market. In the absence of any sales, offers, or bids, the market is considered to be unchanged.

NC = No Change

* = Monthly averages represent a simple average of prices reported during the month.

1/ LST - Last Significant Transaction. (S = Sale. B = Bid--willingness to buy at a stated price. O = Offer--willingness to sell at a stated price.) For this market, a general understanding exists as to how the trading is interpreted. The last sale is considered to represent the market for the coming week except that a subsequent bid higher than the last sale, or a subsequent offer lower than the last sale, is considered indicative of the market. In the absence of sales, the last bid higher than the previous week's market, or the last offer lower than the previous week's market, is considered indicative of the market. In the absence of any sales, offers, or bids, the market is considered to be unchanged.

2/ Last significant transaction - October 6, 1978.

3/ Last significant transaction - October 13, 1978.

4/ Last significant transaction - December 1, 1978.

NC = No Change

* = Monthly averages represent a simple average of prices reported during the month.

NOV	1,259.8	1,381.0	759.4	3,400.2
DEC	1,239.7	1,334.6	724.6	3,298.9
Total 1979	14,770.3	16,037.7	8,780.5	39,588.5
Total 1978	14,926.9	16,196.9	8,609.9	39,733.7

^{1/} In-area sales represent total sales in each of the regions by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated. Combined sales in all Federal milk order marketing areas represent approximately 75 percent of total U.S. sales.

^{2/} Total fluid milk includes plain and flavored whole milk; plain, solids added, and flavored skim and lowfat milk; buttermilk; and small amounts of miscellaneous whole milk, and lowfat and skim milk products.

^{3/} The 47 Federal milk order marketing areas in effect in 1979 were grouped into three regions. The specific marketing areas in each region do not include all of the land area in the region, nor all of the fluid milk products sold in the region. (See the last sentence in footnote 1 above.)

^{1/} This table contains such information as can be readily obtained as to over-order Class I prices announced for the beginning of the month by cooperative associations in various markets. Announced prices may be changed during the month. The information relates to the major cooperative in each of the major markets and does not represent all of the Class I sales in these city markets. These data are common market knowledge in the sense that the information represents basic Class I price announcements by the cooperatives sent to all handlers who buy milk from them. These announced prices may not include handling or service charges applicable to milk from supply plants. These prices have not been verified as having been actually paid by the handlers.

In some instances the announced over-order prices are not uniform in that:

- Competitive credits or adjustments are sometimes made when a handler reports to the cooperative that competing handlers, purchasing milk from other sources, are paying a lower price.
- Competitive credits may be allowed on military and school contracts.
- Announced over-order prices may represent charges for various services performed by the cooperative.

^{2/} Annual figures represent simple averages of monthly prices.

* - Salt Lake City, Utah.
