Table 43.	Average retail food prices for selected products, U.S. city average, 1980	55

DAIRY MARKET STATISTICS - 1980 ANNUAL SUMMARY

This is an annual summary of market statistics on dairy products collected and compiled by the Dairy Division of USDA's Agricultural Marketing Service, and published in "Dairy Market News," a weekly report.

Dairy market news service is provided by the U.S. Department of Agriculture and cooperating State agencies. The purpose is to provide dairy farmers and their cooperatives, processors, buyers and sellers of dairy products, and others with information which will help in making buying and selling decisions and future planning.

Dairy market news covers markets for dairy products of commercial significance. The kinds of market data gathered are determined by industry needs and by the willingness of industry members to voluntarily provide the necessary information. The information is gathered by reporters by telephone, teletype, and mail. They use the telephone most extensively in reaching buyers and sellers who are widely scattered.

Prices for most products are issued once a week. Unless otherwise noted, monthly averages are based on weekly prices and calculated according to the number of workdays in a month (Saturdays, Sundays, and holidays excluded). This procedure is called time weighting. It is important for months having a split week because it gives the proper weight to the days in each month. No monthly average price is computed if one or more weekly prices are missing. Monthly averages for prices reported more than once a week are simple averages of all prices reported during the month. Yearly averages are simple averages of the monthly average prices. No yearly average is computed if one or more monthly average prices are missing.

1/ East includes the States of: Pennsylvania, West Virginia, Virginia, and all States northeast of these three States.
 West includes the States of: New Mexico, Colorado, Wyoming, Montana, and all States west of these States.
 Midwest includes all other States not mentioned above.

Note: Leading States in CCC purchases by commodity (in thousand pounds), 1980:

Butter: California, 63,357; Wisconsin, 50,530; Minnesota, 26,745; New York, 23,846; and Illinois, 22,667.

Cheese: Minnesota, 128,014; Wisconsin, 105,341; Pennsylvania, 31,500; California, 24,839; and Missouri, 18,332

Nonfat dry milk: California, 185,462; Minnesota, 75,548; Wisconsin, 57,220; Washington, 56,861; and Iowa, 43,416.

Footnotes for Table 10.

1/ LST = Last Significant Transaction. (S = Sale. B = Bid--willingness to buy at a stated price. O = Offer--willingness to sell at a stated price). For this market, a general understanding exists as to how the trading is interpreted. The last sale is considered to represent the market for the coming week except that a subsequent bid higher than the last sale, or a subsequent offer lower than the last sale, is considered indicative of the market. In the absence of sales, the last bid higher than the previous week's market, or the last offer lower than the previous week's market, is considered indicative of the market. In the absence of any sales, offers, or bids, the market is considered to be unchanged.

2/ Last significant transaction = November 9, 1979.

NC = No Change

* = Monthly averages represent a simple average of prices reported during the month.

1/ LST - Last Significant Transaction. (S = Sale. B = Bid--willingness to buy at a stated price. O = Offer--willingness to sell at a stated price.) For this market, a general understanding exists as to how the trading is interpreted. The last sale is considered to represent the market for the coming week except that a subsequent bid higher than the last sale, or a subsequent offer lower than the last sale, is considered indicative of the market. In the absence of sales, the last bid higher than the previous week's market, or the last offer lower than the previous week's market, is considered indicative of the market. In the absence of any sales, offers, or bids, the market is considered to be unchanged. 2/ Last significant transaction - December 14, 1979.

3/ Last significant transaction - November 9, 1979. 4/ Last significant transaction - August 17, 1979.

NC = No Change

* = Monthly averages represent a simple average of prices reported during the month.

NOTE: Prices do not include an assembling charge of 2 1/4 cents per pound or other permissible allowances for transportation, freight differential, adjustments for moisture content, clearing charge, barrel deposit, etc.

Total 1979 <u>4/</u>	14,473.9	16,037.7	8,780.6	39,292.2

1/ In-area sales represent total sales in each of the regions by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated. Combined sales in all Federal milk order marketing areas represent approximately 75 percent of total U.S. sales.

2/ Total fluid milk includes plain and flavored whole milk; plain, solids added, and flavored skim and lowfat milk; buttermilk; and small amounts of miscellaneous whole milk, and lowfat and skim milk products.

3/ The 47 Federal milk order marketing areas in effect in 1980 were grouped into three regions. The specific marketing areas in each region do not include all of the land area in the region, nor all of the fluid milk products sold in the region. (See the last sentence in footnote 1 above.)

4/ Based on markets where orders were effective entire period, 1979-80, and which had no significant marketing area changes. Represents all Federal milk order markets in effect as of December 31, 1980.

Table 36--Packaged sales of individual whole milk products, and lowfat and skim milk products in marketing areas defined by Federal milk orders, 1979-80 1/ 2/

Product	1980	
	Total sales Mil. lbs.	Butterfat content Percent

1/ Volumes include 29-day totals for February 1980. The percentage changes are based on adjusted 28-day totals for February 1980 to make them comparable to 1979. 2/ Totals may not add due to rounding. 3/ The data for Central Arkansas and Fort Smith have been combined in order to mask the data for Ft. Smith which were restricted. 4/ Based on markets where orders were effective entire period, 1979-80, and which had no significant marketing area changes.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. All averages are weighted.

2/ Names in parentheses are principal cities and pricing points of markets. 3/ Prices exclude direct differentials of:
 15 cents in New York City; 6 cents in Philadelphia; and 10 cents in Detroit. 4/ Based on markets where orders were effective entire period, 1979-80, and which had no significant marketing area changes. Excludes Fort Smith. Fewer than three handlers.

1/ This table contains such information as can be readily obtained as to over-order Class I prices announced for the beginning of the month by cooperative associations in various markets. Announced prices may be changed during the month. The information relates to the major cooperative in each of the major markets and does not represent all of the Class I sales in these city markets. These data are common market knowledge in the sense that the information represents basic Class I price announcements by the cooperatives sent to all handlers who buy milk from them. These announced prices may not include handling or service charges applicable to milk from supply plants. These prices have not been verified as having been actually paid by the handlers.

In some instances the announced over-order prices are not uniform in that:

- Competitive credits or adjustments are sometimes made when a handler reports to the cooperative that competing handlers, purchasing milk from other sources, are paying a lower price.
- Competitive credits may be allowed on military and school contracts.
- Announced over-order prices may represent charges for various services performed by the cooperative.

2/ Annual figures represent simple averages of monthly prices.

* = Salt Lake City, Utah.

1/ SOURCE: "CPI Detailed Report," BLS, U.S. Department of Labor. The Consumer Price Index for All Urban Consumers (CPI-U) covers approximately 80 percent of the total noninstitutional civilian population of the United States and is based on data for 85 urban areas.

2/ The standard reference base period for these indexes is 1967=100.

3/ The standard reference base period for these indexes is 1977=100.

1/ Source: "Consumer Prices: Food," BLS, U.S. Department of Labor. Regions are defined as the four Census regions. According to BLS, average prices are best used to measure the price level in a particular month, not to measure price change over time. To measure change over time, the Consumer Price Index and its component indexes for individual items are more appropriate. The average food prices included in this table reflect variations in brand, quality, and size among geographic areas. BLS suggests that users of average food prices should be aware that these differences exist.

2/ Prices are per 1/2 gallon.

3/ Prices are per pound for Grade AA, salted, stick butter.

4/ Prices are per 1/2 gallon for prepackaged, bulk, regular.

5/ Prices are per 1/2 pint for natural, fruit flavored.

END
