- Recession
- Falling land values
- Rising debt loads

These are some of the problems which have buffeted the Nation's farms for the past few years. How have farmers adapted? *U.S. Farming in the Early 1980's: Production and Financial Structure* profiles the contemporary U.S. farm sector and outlines how it is expected to fare in the near future.

With the 50-year exodus from farming finally near an end, farms are now larger than ever. Many are more profitable than ever, while others are vulnerable to just 1 or 2 bad years. Ever higher capital requirements, debt and credit price instability, and declining worth of farm real estate have created opportunities for some farmers while forcing others to abandon their farm endeavors.

What does it all mean for tomorrow's farms? To find out, send for your copy of *U.S. Farming in the Early 1980's: Production and Financial Structure*. To order your copy, write to:
