# Farm Real Estate: Historical Series Data, 1950-85

FARM REAL ESTATE: HISTORICAL SERIES DATA, 1950-85. By John Jones and Charles H. Barnard, Natural Resource Economics Division, Economic Research Service, U.S. Department of Agriculture, Statistical Bulletin No. 738.

#### ABSTRACT

Historical data on farm numbers, land in farms, and average dollar value of land and buildings (by acre, farm, and total value) are presented as well as building value, farm real estate debt, and farm real estate taxes per \$100 value. All series are reported by State and by 48-State totals for 1950-85.

Keywords: Farm numbers, land in farms, farmland values, farm building values, farm real estate debt, farm real estate taxes.

Additional copies of this report...

can be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Ask for Farm Real Estate: Historical Series Data, 1950-85 (SB-738). Write to the above address for price and ordering instructions. For faster service, call the GPO order desk at (202) 783-3238 and charge your purchase to your VISA, Choice, MasterCard, or GPO Deposit Account. A 25-percent bulk discount is available on orders of 100 or more copies shipped to a single address. Please add 25 percent extra for postage for shipments to foreign addresses.

Microfiche copies (\$5.95 each) can be purchased from the Identification Section, National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Ask for Farm Real Estate: Historical Series Data, 1950-85 (SB-738). Enclose check or money order, payable to NTIS. For faster service, call NTIS at (703) 487-4650 and charge your purchase to your VISA, MasterCard, American Express, or NTIS Deposit Account.

The Economic Research Service has no copies for free mailing.

# Farm Real Estate: Historical Series Data, 1950-85

John Jones

Charles H. Barnard

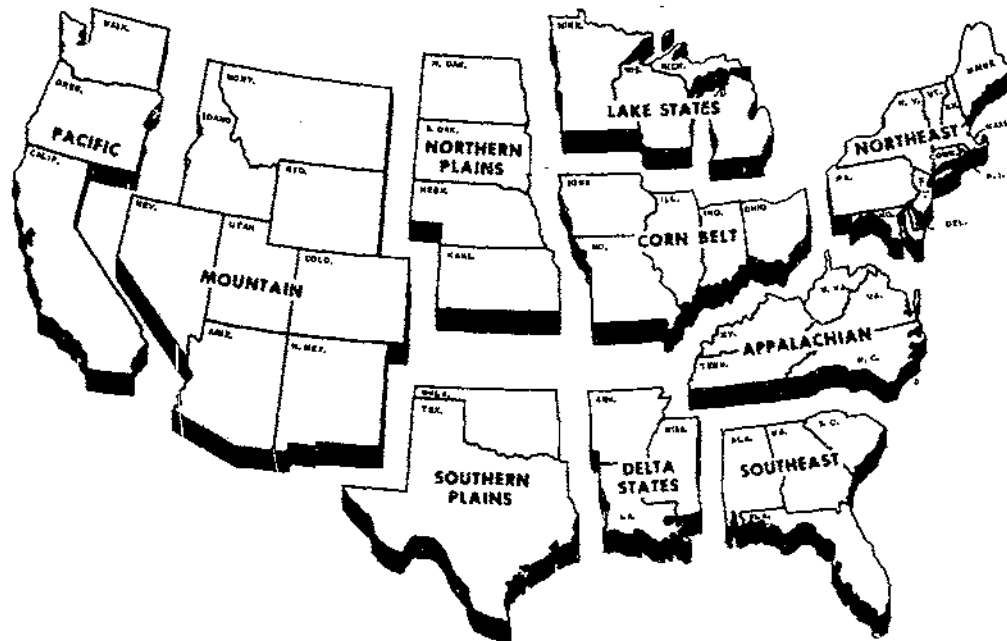

This report updates data published in "Farm Real Estate Historical Series Data: 1850-1970," ERS-520, June 1973. The data in this report are not strictly comparable with the data in ERS-520 because information on the number of farms and land in farms was drawn from different sources. The number of farms and land in farms reported in ERS-520 were from the census of agriculture, with interpolation of numbers for years between 5-year reporting periods on a straight line basis. The data on number of farms and land in farms in this report are from annual data prepared by the Statistical Reporting Service (SRS), U.S. Department of Agriculture (USDA), beginning in 1950.

Land in farms data are then used to construct the four series on value of land and buildings and building value. The annual SRS land in farms data have been used in construction of the farm real estate value series beginning with 1977. This is the first report with the revised farm real estate value data for 1950-76, using the SRS series on land in farms.

The definition of a farm was changed in 1975. Data for 1950-74 include places of 10 or more acres that had annual sales of \$50 or more of agricultural products, or any place of less than 10 acres that had annual sales of \$250 or more. The current farm definition eliminated some farms that were previously included. Farms are now defined as a place from which \$1,000 or more of agricultural products were sold annually, or normally would have been sold.

The number of farms, land in farms, and farm real estate values are final for 1950 through 1983. The 1984 and 1985 data will be revised after the 1987 Census of Agriculture.
