WORLD FEED GRAIN TRADE, 1962-85: BARLEY, CORN, RYE, OATS, AND OTHER CEREALS, by Arthur B. Mackie, Stephen W. Hiemstra, and Janet E. Sayre, Agriculture and Trade Analysis Division, Economic Research Service, U.S. Department of Agriculture. Statistical Bulletin No. 755.

ABSTRACT

World trade in feed grains (barley, corn, rye, oats, and other cereals, n.e.s.) more than tripled from 1962-85, while the number of countries participating in world trade increased 85 percent. Feed grain consumption has increased faster than production in most countries, so more countries entered world trade for their feed needs, thereby increasing the volume and changing the patterns of world trade in feed grains. This report is based primarily on world trade data of the United Nations and foreign trade statistics of countries not reporting to the United Nations.

Keywords: World trade, feed grains, barley, corn, rye, oats, other cereal n.e.s., grain imports, food grains

SALES INFORMATION

Additional copies of this report can be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Ask for World Feed Grain Trade, 1962-85: Barley, Corn, Rye, Oats, and Other Cereals (SB-755). Write to the above address for price and ordering instructions. For faster service, call the GPO order desk at (202) 783-3238, and charge your purchase to your VISA, MasterCard, Choice, or GPO Deposit Account.

Microfiche copies (\$6.50 each) can be purchased from the Identification Section, National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Ask for World Food Grain Trade, 1962-85: Barley, Corn, Rye, Oats, and Other Cereals (SB-755). Enclose check or money order, payable to NTIS. World Feed Grain Trade, 1962-85

Barley, Corn, Rye, Oats, and Other Cereals

Arthur B. Mackie
Stephen W. Hiemstra
Janet E. Sayre

INTRODUCTION

The volume of world trade in feed grain (barley, corn, rye, oats, and other cereals, n.e.s.) grew rapidly during 1962-85. It more than tripled while the number of countries participating in world trade increased 85 percent. Feed grain consumption in most countries outpaced production during this period. Consequently, more countries have turned to world markets for a growing part of their feed needs. These developments not only increased the volume of world trade in feed grains between a larger group of countries but also changed the pattern and direction of trade flows.

An analysis of these changes in trade flow of feed grain between countries has not been possible until now because of the lack of a complete world trade system giving the origin and destination of agricultural products between countries. This study provides such data for a complete world trade system in feed grains.

This report presents historical data on the volume of world trade in feed grains for 1962-85. Barley, corn, rye, oats, and other cereals not elsewhere specified (n.e.s.) import data were compiled covering 24 years for each country by source or country of origin, then summarized in regional trade matrices. Data for each commodity are presented in condensed trade matrices for 17 major importing regions and 6 major exporters during 1962-85. World trade flows for feed grains prior to 1962 are in World Trade in Selected Agricultural Commodities, 1951-65, Volume II, Food and Feed Grains, U.S. Department of Agriculture, Economic Research Service, FAER-45, 1968.

METHODOLOGY AND DATA SOURCE ^{1/}

The primary source of data for imports of barley, corn, rye, oats, and other cereals (n.e.s.) was the commodity trade statistics of the United Nations (UN). These data are available on magnetic tape and in published documents. ^{2/} This

^{1/} For further information, see: Methods of Reconciling World Trade Statistics, by Stephen W. Hiemstra and Arthur B. Mackie, U.S. Department of Agriculture, Economic Research Service, FAER-217, May 1986, and Programs, Procedures, and Problems in Developing Edited United Nations Commodity Trade Data, by Stephen W. Hiemstra, U.S. Department of Agriculture, Economic Research Service, unpublished manuscript, 1985.

^{2/} United Nations, Commodity Trade Statistics. Various years.

source is limited to those countries reporting their trade statistics to the UN (about 100-110 countries in 1979-85). Where UN import data for countries were not available, the import data were obtained from the official trade yearbook of those countries. Estimates for countries that did not report to either source were obtained from export data of their trading partners. See the appendix for the trade data sources for each year and country for 1962-83.

TRENDS IN WORLD FEED GRAIN TRADE

World trade in feed grains has increased unevenly over the past 24 years, from 35.2 million metric tons in 1961-65 to 106.5 million tons in 1981-85. World feed grain imports grew 6.7 percent per year, or by 24.5 million metric tons

Regional Groupings

We divided the world into 17 major regions based on geographic, economic, and political criteria. The countries included in the geographic regions are:

<u>Region</u>	<u>Countries</u>
1. North America	Canada, Puerto Rico, St. Pierre and Miquelon, United States, and U.S. Virgin Islands
2. European Community (EC-10)	Belgium-Luxembourg, Denmark, France, West Germany, Greece, Ireland, Italy, Netherlands, and United Kingdom
3. Other Western Europe (O.W.E.)	Andorra, Austria, Faeroe Islands, Finland, Gibraltar, Greenland, Iceland, Malta, Norway, Portugal, Spain, Sweden, and Switzerland
4. Eastern Europe and USSR	Albania, Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Romania, USSR, and Yugoslavia
5. Oceania	Australia and New Zealand
6. West Asia	Bahrain, Cyprus, Gaza Strip, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Democratic Republic of Yemen, Syria, United Arab Emirates, Turkey, and Arab Republic of Yemen
7. Central America	Belize, Costa Rica, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Panama, and Panama Canal Zone

during the first decade (1961-71), and accelerated to a growth of 8.5 percent per year or by 65.5 million metric tons during the 1970's (1972-81). World trade in feed grains has declined about 6 percent since 1981 when it peaked at 115 million metric tons.

Growth in world trade in the five feed grains--barley, corn, rye, oats, and other cereals, n.e.s. (primarily sorghums)--has varied rather markedly over the study period. World trade in corn and other cereals, n.e.s. (primarily sorghums) has grown the fastest, increasing about 6 percent per year compared with 5 percent for barley and 0.1 percent for oats. World trade in rye declined rather unevenly throughout the study period. As the growth rates for the five feed grains differed, the market share of world feed grain imports held by the faster growing corn and grain sorghums increased from about 70

8. East Africa
British Indian Ocean Territory, Burundi, Ethiopia, Djibouti (French Territory of Afars, Issas), Kenya, Rwanda, Seychelles, Somalia, Sudan, Uganda, and Tanzania
9. West Africa
Benin, Burkina-Faso (formerly Upper Volta), Cameroon, Cape Verde, Central African Republic, Chad, Congo, Gabon, Gambia, Ghana, Guinea, Equatorial Guinea, Guinea-Bissau, Ivory Coast, Liberia, Mali, Mauritania, Niger, Nigeria, St. Helena, Sao Tome, Senegal, Sierra Leone, Togo, and Zaire
10. North Africa
Algeria, Libya, Morocco, Spanish North Africa, Western Sahara, Tunisia, and Egypt
11. Southern Africa
Angola, Botswana, Comoros, Lesotho, Madagascar, Malawi, Mauritius, Mozambique, Namibia, Reunion, Republic of South Africa, Swaziland, Zambia, and Zimbabwe
12. South Asia
Afghanistan, Bangladesh, Bhutan, India, Sri Lanka, Maldives, Nepal, Pakistan, and Sikkim
13. East Asia
China, Taiwan, Hong Kong, Japan, Democratic Republic of Korea, Republic of Korea, Macao, and Mongolia
14. Southeast Asia
Brunei, Burma, Democratic Republic of Kampuchea, Indonesia, Laos, Malaysia, Philippines, East Timor, Singapore, Thailand, and Vietnam
15. Caribbean
Antigua, Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands,

percent (60 percent for corn and 11 percent for grain sorghums) in the early 1960's to about 80 percent (68 percent for corn and 12 percent for grain sorghum) in the early 1980's (table 1). In contrast, the market share for barley declined slightly from 21 percent in the early 1960's to about 18 percent in the early 1980's. The combined market share for the more slowly growing oats and rye trade declined from 8 to 2 percent during the past two decades (fig. 1). Because of the more rapid growth in corn trade, imports of corn accounted for 70 percent of the increase in world trade in feed grains from 1961-65 to 1981-85. Barley (17 percent) and other cereals (primarily grain sorghum with 13 percent) accounted for the remaining 30 percent. World trade in the other feed grains (oats and rye) declined during the past two decades.

Cuba, Dominica, Dominican Republic, Grenada, Guadeloupe, Haiti, Jamaica, Martinique, Montserrat, Netherlands-Antilles, St. Kitts, St. Lucia, St. Vincent, Trinidad and Tobago, and Turks and Caicos Islands

16. Pacific Islands

American Samoa, British Antarctic Territory, Solomon Islands, Christmas Islands, Cocos Islands, Cook Islands, Fiji, French Polynesia, French Antarctic Territory, Kiribati, Guam, Johnston Island, Midway Islands, Nauru, New Caledonia, Papua New Guinea, Vanuatu, Niue, Norfolk Island, Pacific Islands, Ryukyu Islands, Tokelau, Tonga, Tuvalu, Wake Island, Wallis Futuna, and West Samoa

17. South America

Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Falkland Islands, French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, and Venezuela

The countries included in the economic and political regions are:

Region

Countries

1. Developed

Japan, Republic of South Africa, and countries in geographic regions 1, 2, 3, and 5

2. Centrally planned

China and all countries in geographic region 4

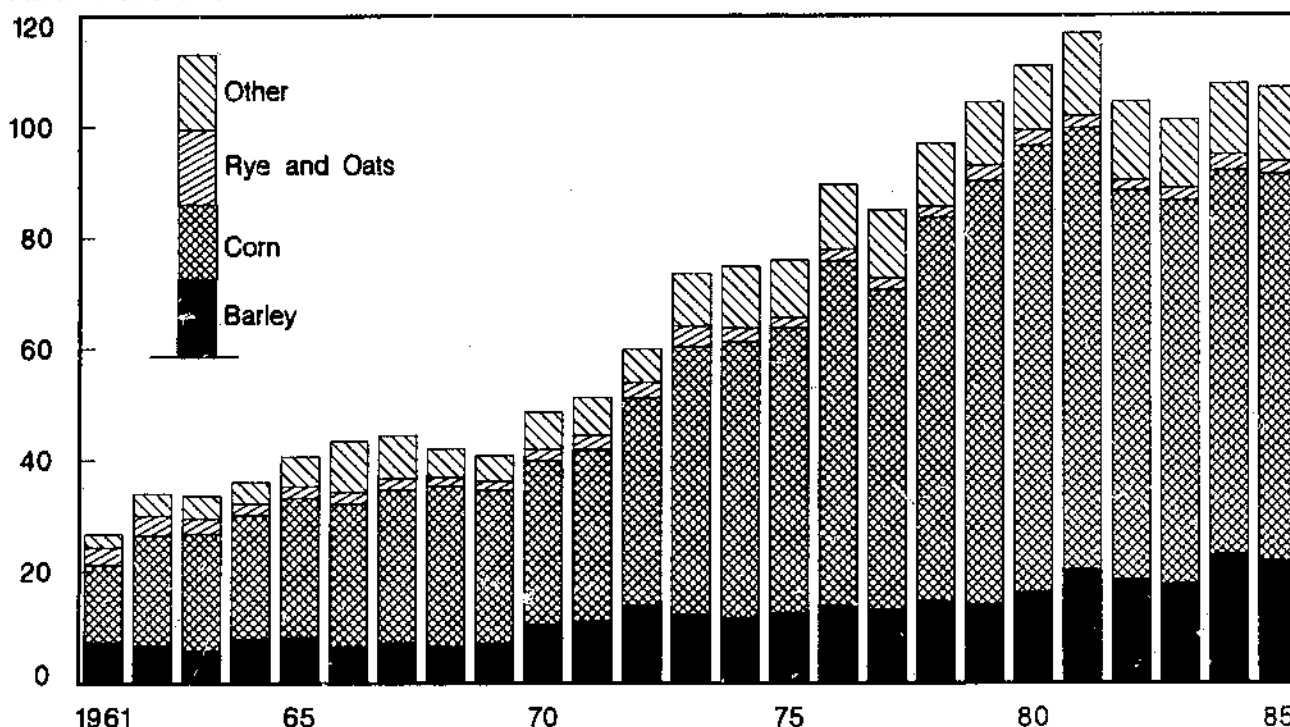

3. Less developed

All countries in geographic regions 6, 7, 8, 9, 10, 11 (except Republic of South Africa), 12, 13, 14 (except Japan and China), 15, 16, and 17

Figure 1

World feed grain exports, by commodity

Million metric tons

World trade in feed grains has grown faster than total grain trade over the past two decades. The commodity composition of world grain trade has changed to favor feed rather than food grains (wheat, rice, and wheat flour) as a result. Feed grain imports represented less than 40 percent (37 percent in 1961-65) of world grain trade during the 1950's and 1960's (table 2), but increased to almost 50 percent by the 1970's (51 percent in 1976-80). Feed grains' share then fell to less than 50 percent (47 percent in 1981-85) during the world economic recession that curtailed the demand for feed grains more sharply than for food grains, primarily in developed countries (table 3).

World Barley Trade

Growth rate of world barley trade varied significantly between the 1960's and 1970's and between the different regions. During the rapid growth period (6.5 percent per year in 1962-73), annual growth in regional barley imports increased in all regions except O.W.E. (-0.7), the Caribbean (-2.8 percent), Central America (-3.7 percent), and West Africa (-6.6 percent) (table 3). Annual growth in barley imports were the largest in Southern Africa (18.1 percent), Pacific Islands (15.7 percent), West Asia (13.3 percent), and East Asia (8.6 percent), primarily because of the rapid growth in the Japanese market (17.3 percent). Very large growth rates were registered in the markets of South and Southeast Asia, the USSR, and China, contrasting with low volume of trade in the early 1960's.

During the slower growth period (4.4 percent for 1974-85) in world barley trade, annual growth in regional barley imports fell in North America (-5.4

percent), EC-10 (-1.7 percent), the Caribbean (-3.0 percent), Central America (-4.1 percent), Southern Africa (-3.6 percent), East Africa (-2.0 percent), and East Asia (-0.7 percent), and increased in O.W.E (1.9 percent), Eastern Europe and USSR (7.9 percent), South America (13.6 percent), and West Asia (25.3 percent). Growth rates were very large in West Africa, South Asia, Southeast Asia, the Pacific Islands, and China because of the low volume of trade.

These differences in regional growth rates in barley imports dramatically shifted the market shares from developed countries to less developed countries (primarily West Asia) and centrally planned countries (primarily USSR). For example, the 69-percent market share of the developed countries in 1962-73 fell to only 47 percent in 1974-85, primarily because of the large decline (47.9 to 30.6 percent) in the market shares for the EC-10 between 1962-73 and 1974-85 (table 4). Between 1962-73 and 1974-85, the market share for the less developed countries increased from 10.4 to 28.8 percent. This increase was due primarily to the growth of barley imports in West Asia and North Africa which together increased their market share 18.2 percentage points and accounted for 40 percent of the increase in world barley trade during the past two decades. The growth in barley imports in the USSR accounted for 19 percent of the increase in world barley trade between 1962-73 and 1984-85 and increased its market share 6.7 percentage points. The remaining 41-percent increase in world barley trade was accounted for by Japan (12 percent), EC-10 (11 percent), Eastern Europe (10 percent), Southeast Asia (4 percent), East Asia (2 percent), and South America (2 percent).

World Maize (Corn) Trade

Growth in the volume of world corn trade (like barley) was most rapid during the 1960's and much slower during the 1970's. World imports of corn (like barley) increased by 6.5 percent per year during 1962-73 but unlike barley, grew very slowly (only 1.6 percent per year) during 1974-85 (table 3). During 1962-73, annual regional imports increased most rapidly in Eastern Europe and USSR (16.6 percent), East Asia (10.6 percent), South America (9.7 percent), West Africa (9.5 percent), Southeast Asia (8.8 percent), O.W.E. (8.3 percent), Central America (8.2 percent), and in the Caribbean (7.8 percent). They increased more slowly in Southern and East Africa (5.5 percent), West Asia (4.9 percent), EC-10 (3.5 percent), and the Pacific Islands (1.8 percent). Corn imports declined rapidly in South Asia (-15.7 percent) and North Africa (-7.6 percent) during 1962-73 and less rapidly in North America (-2.9 percent) and Oceania (-2.7 percent).

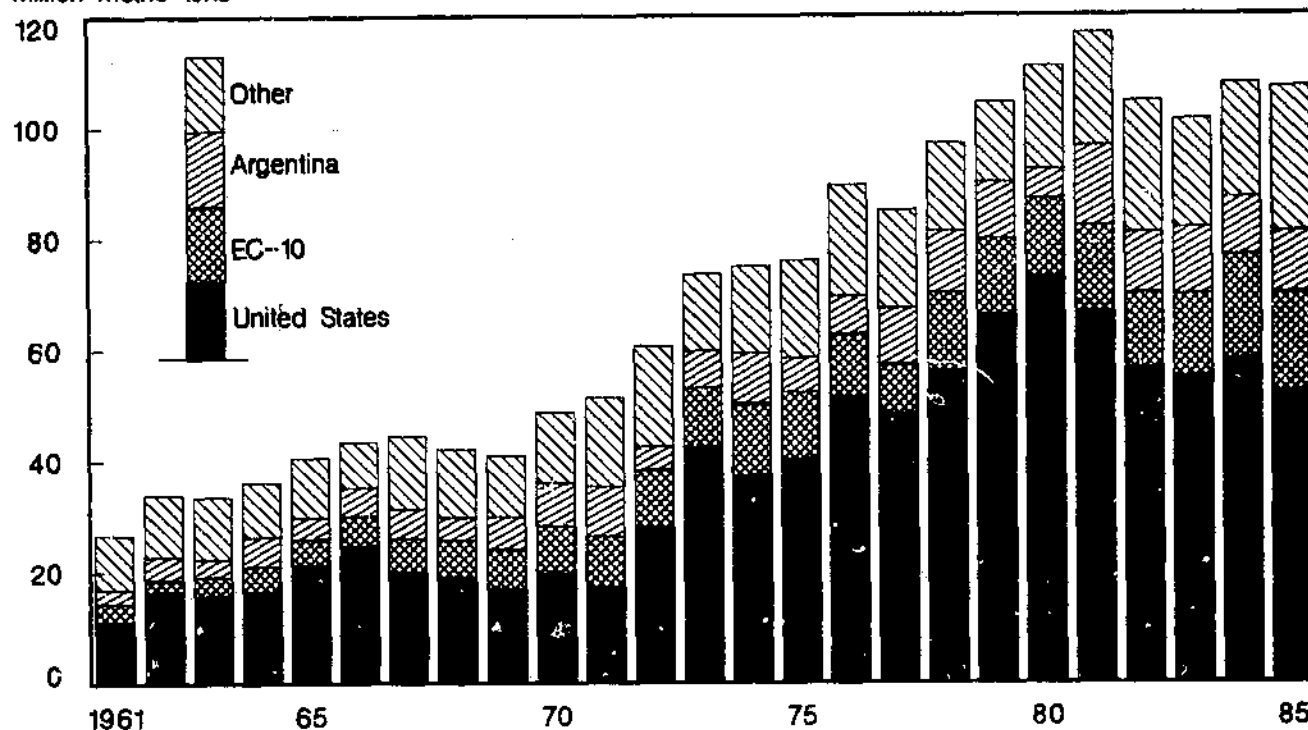

During the more slowly growing period (1.6 percent during 1974-85) in world corn trade, annual growth in regional corn imports continued to decline in North America (-6.5 percent) and South Asia (-4.2 percent), started to decline in the EC-10 (7.4 percent) and in O.W.E. (-0.9 percent), and increased in all other regions. The major growth markets were East Asia (7.0 percent), North Africa (16.5 percent), West Asia (13.1 percent), Southern Africa (35.5 percent), Pacific Islands (27.7 percent), and Oceania (23.7 percent). The share of trade in the latter two regions was very small, accounting for 16,000 metric tons in 1974-81.

These differences in regional growth rates in corn imports dramatically shifted market shares from developed countries to less developed countries and centrally planned countries of Eastern Europe and the USSR. For example, the 80.7-percent market share of the developed countries in 1962-73 fell to only

Figure 2

Relative share of major world feed grain exporters

Million metric tons

53.1 percent in 1974-85, primarily because of the large decline (51.9-23.8 percent) in market shares for the EC-10 between 1962-73 and 1974-85 (table 5). Between 1962-73 and 1974-85, the market share for the less developed countries increased from 10.0 to 23.0 percent, while the market share for the centrally planned countries increased from 9.3 to 23.9 percent during this time. These increases in market shares were due primarily to the rapid growth in corn imports in East Asia, West Asia, North Africa, and Central and South America, which collectively increased their market share 11 percentage points and accounted for 27.6 percent of the increase in world corn trade during the past two decades. The growth in corn imports in Eastern Europe and the USSR accounted for 33.3 percent of the increase in world corn trade, while Japan and O.W.E. accounted for most of the remaining 39-percent increase in world corn trade over the past two decades. Growth in the combined market shares of these two regions increased from 26.3 percent in 1962-73 to 27.5 percent in 1974-85, and accounted for 28.5 percent of the increase in world corn trade over the past two decades (table 5).

World Rye and Oats Trade

The volume of world trade in rye and oats grew very slowly during the past two decades. World imports of rye and oats combined increased only 1.2 percent per year during 1962-73 and decreased slightly (-0.3 percent) during 1974-85. As a result of the low growth in world imports of rye and oats since the 1950's, these grains' market share of world feed grain trade has dropped drastically from 22.8 percent in 1956-60 to only 1.9 percent in 1981-85 (table 1). The volume of world trade in rye and oats dropped more than 3

million metric tons during this period (from 5.34 million metric tons in 1956-60 to 2.02 million metric tons in 1981-85) (table 1).

The major markets for rye and oats have been developed countries. These countries imported 53.4 percent of the world's rye exports and 81.4 percent of the world's oat exports during 1962-73. These market shares had fallen to 46.2 percent of the world's rye imports and 69.2 percent of the world's oat imports by 1974-85 (tables 6 and 7). The decline in import demand for rye and oats has been most significant in the EC-10 and the countries of O.W.E. Demand for rye imports in both the EC-10 and O.W.E. declined by 37 percent between 1962-73 and 1974-85 and 44 percent for oat imports during this period. The major growth markets for rye have been the USSR, Japan, West Asia, and Latin America, and Japan, Eastern Europe, the USSR, North Africa and South and West Asia for oats. South America registered some growth during 1962-73 to 1974-85 when the market share for oats held by South America increased from 3.0 to 4.8 percent (table 7).

World Trade in Other Cereals (n.e.s.)--Sorghum, Millet and Others

Growth rates in trade of other cereals (n.e.s.)--primarily sorghum--varied significantly between the 1960's and 1970's and between the different regions. During the rapid growth period (7.0 percent per year in 1962-73), annual growth in regional imports of other cereals, n.e.s. (primarily sorghum) increased 17.6 percent in Japan, the major market (41.5 percent), and decreased in the EC-10 (8.5 percent), the second largest (27.9 percent) market during the 1960's (tables 3 and 8). Rapid growth in imports of other cereals (n.e.s.) were registered in North Africa (25.7 percent), West Africa (15.5 percent), and West Asia (12.4 percent) during 1962-73, but these were relatively small markets, collectively accounting for only 8.2 percent of total world trade (table 8).

During the slower growth period (0.7 percent in 1974-85) in world trade of other cereals, n.e.s., annual growth in regional imports fell in the two major markets: Japan (-0.1 percent) and the EC-10 (-17.4 percent). As a result of the large decline in EC-10 imports of other cereals, their market share of world trade fell 20.0 percentage points from 27.9 to 7.9 percent between 1962-73 and 1974-85 (table 8). The Japanese market share of world trade in other cereals, n.e.s., fell less rapidly but still declined from 41.5 to 36.7 percent on the basis of slow growth during 1974-85.

The major growth markets for other cereals during the past decade have been in Eastern Europe and the USSR (12.0 percent), Central America (17.9 percent), East Africa (24.1 percent), Southeast Asia (23.5 percent), and the Pacific Islands (table 3). The latter three growth regions have been rather small markets (less than 60,000 metric tons) and did not significantly influence the regional distribution of world imports during the 1970's.

Major Exporters of Feed Grains

The United States, the EC-10, and Argentina are the largest exporters of feed grains, accounting for about 78 percent of the feed grain exports in 1981-85. Canada, Australia, and Thailand were the next three largest exporters of feed grain in 1981-85, collectively accounting for about 12 percent of the world's feed grain exports.

The United States has been the major exporter of feed grains for the past 25 years, averaging a 45-percent market share during the 1960's. During the early 1970's, this share averaged about 50 percent, increased sharply to 60 percent during 1976-80, then fell during the early 1980's to about 52 percent. The U.S. market share for corn increased from 55 percent in 1967-73 to 70 percent in 1974-85, but declined for barley (from 14.0 to 7.6 percent), rye and oats (from 17.9 to 6.9 percent), and other cereals (from 65.8 to 51.7 percent) during this period (fig. 2).

The United States and Argentina have been the leading exporters of maize (corn) every year since 1962. Together these two exporters accounted for over 66 percent of world corn exports during the 1960's and over 75 percent since 1976. Corn exports have been the leading feed grain export during the study period, accounting for 60 percent during 1962-73 and over 68 percent during 1976-85.

The following tables summarize world trade in barley, corn, rye, oats, and other cereals, n.e.s. for 1962-85 by importing regions and countries of origin (top six exporters).

Table 1--World feed grain imports

Time period	Import volume					Import value					Quantity market share			
	Feed grains	Barley	Maize (corn)	Rye and oats	Other cereals ^{1/}	Feed grains	Barley	Maize (Corn)	Rye and oats	Other cereal ^{1/}	Barley	Maize (corn)	Rye and oats	Other cereal ^{1/}
