Digest

Increased Export Volume Offsets Lower Prices In Fiscal Year 1990 (see p. 2). The value of U.S. agricultural exports rose \$1 billion to \$32 billion during the first 9 months of FY 1990 as larger cotton, corn, and vegetable exports offset lower wheat and soybean meal shipments and lower prices for grains and oilseeds. Corn and cotton exports increased as the U.S. share of world trade rose. Vegetable exports were higher, largely because of shipments to Canada. On the other hand, improved U.S. wheat and soybean production reduced world prices, while abundant overseas supplies cut U.S. export volume for wheat and soybean meal.

Fiscal Year 1990 Import Forecast Raised to \$22.5 Billion (see p. 6). The U.S. agricultural import forecast for FY 1990 was raised to \$22.5 billion in August, exceeding the FY 1989 record of \$21.5 billion. Import prospects for cattle, beef, fruits, vegetables, and sugar have increased since last year. Agricultural imports in the first 9 months of FY 1990 reached \$17.3 billion, about \$855 million above last year's pace.

Increased Export Volume Offsets Lower Prices In Fiscal Year 1990

The value of U.S. agricultural exports rose \$1 billion to \$32 billion during the first 9 months of FY 1990 as larger cotton, corn, and vegetable exports offset lower wheat and soybean meal shipments and lower prices for grains and oilseeds. Corn and cotton exports increased as the U.S. share of world trade rose. Vegetable exports were higher, largely because of shipments to Canada. On the other hand, improved U.S. wheat and soybean production reduced world prices, while abundant overseas supplies cut U.S. export volume for wheat and soybean meal.

With both prices and volume lower, the value of wheat and soybean meal exports fell substantially. The value of wheat exports fell \$1 billion as volume dropped 6 million tons, a 22-percent decline. Volume fell as improved crop output in consuming and competing countries simultaneously cut world trade and reduced the U.S. share of trade. The largest decline came in exports to China, which had been the largest market for U.S. wheat. Exports to China fell nearly 3 million tons as economic growth there slowed and Australia and Canada gained market share. Improved production in South Asia reduced U.S. wheat sales, and exports to the Soviet Union declined as relative prices favored corn at the expense of wheat during October-June.

U.S. exports of oilseeds and oilseed products fell more than \$650 million during the first 9 months of FY 1990, chiefly because soybean meal exports fell. The volume of soybean meal exports declined 12 percent and the average export price fell 22 percent, leading to a \$389-million decline in value. Soybean prices also fell by 22 percent, but volume gained as world demand rebounded, and export value dipped by only 7 percent.

Cotton and Corn Climb by \$1.4 Billion

A 56-percent increase in the value of cotton exports more than offset the decline in oilseed exports during the first 9 months of FY 1990. Reduced crop output and lower stocks overseas gave a substantial boost to the U.S. share of world trade and U.S. export volume. In addition to a 32-percent increase in the volume of shipments, lower stocks of cotton in the United States and overseas enabled prices to climb 18 percent. With both volume and prices higher, export value rose \$791 million.

Cotton exports to Western Europe showed the largest gain, up 91 percent to \$436 million. Shipments to Southeast Asia more than doubled, a \$175-million gain, while slower growth was recorded in the largest U.S. markets, Japan and Other East Asia. The gain in corn export value rivaled cotton's during the first 9 months of FY 1990: a \$600-million increase despite lower prices. A 19-percent gain in volume more than offset a 6-percent decline in price. Corn export volume rose from 42 million tons to 50 million tons with gains to most major customers. Sales to the Soviet Union, the largest single customer for U.S. corn in 1990, rose 1.5 million tons to a near-record 16 million tons. Exports to Japan were 400,000 tons higher at 10 million tons, and shipments to Other East Asia and Latin America were each nearly 2 million tons higher.

Exports to Canada Offset Declines to Other Customers

The largest gain geographically came in exports to Canada, which rose \$1 billion from the same period in FY 1989, a 64-percent gain. Exports of U.S. animal products to Canada rose \$250 million; grains and products \$100 million; fruit \$150 million; and vegetables \$270 million. Exports of very few products declined. Wheat and hops exports fell, but neither is an important export item to Canada.

Two factors accounted for these gains. The lesser of the two was a stronger Canadian dollar, which lowered the cost of U.S. goods in Canada. However, revised methods of reporting U.S. exports made up much of the gain. If exports had been reported during FY 1989 under the same system begun in January 1990, then U.S. exports to Canada would probably have increased very little.

Before January 1990, published export figures understated the actual level of exports. Correction of this consistent understatement has increased the reported level of exports to Canada. With this gain due to revised reporting, the total value of U.S. agricultural exports rose 3 percent. If trade with Canada is excluded from the total value of U.S. agricultural exports, export value is 1 percent (\$210 million) lower than during the same period of the previous year.

The second largest gain came in exports to Other East Asia, with a \$400-million increase, and exports to the European Community were \$270 million higher. However, exports to most other countries averaged lower. While there was no change in exports to Japan, the

largest single-country customer for U.S. exports, sales to the second largest, the Soviet Union, fell \$200 million due to reduced wheat sales. A decline in wheat also accounted for much of the \$300-million decline in

exports to China. Exports to Venezuela fell \$300 million, and shipments to Iraq were \$100 million lower. (Stephen MacDonald, Commodity and Trade Analysis Branch)

Fiscal Year 1990 Import Forecast Raised to \$22.5 Billion

The U.S. agricultural import forecast for FY 1990 was raised to \$22.5 billion in August, exceeding the FY 1989 record of \$21.5 billion. The initial forecast made in November was \$21 billion. Since then, however, import prospects for cattle, beef, fruits, vegetables, and sugar have steadily improved. These commodities accounted for nearly all of the \$1.5-billion increase in the forecast since November.

To reach the current forecast of \$22.5 billion, imports would need to be \$5.3 billion during the last quarter. Such an estimate fits the pattern in 3 of the past 4 years (table 5). Imports during the last quarter generally fell \$400-\$500 million from the previous quarter.

¹ Estimate.

October-June Imports 5 Percent Ahead of Last Year's Pace

Agricultural imports in the first 9 months of FY 1990 reached \$17.3 billion, about \$855 million above last year's record pace. Imports of noncompetitive products during October-June were \$393 million (8 percent) below a year ago. Lower imports of rubber (down \$302 million) and coffee (down \$187 million) more than offset gains in bananas (\$59 million) and cocoa (\$36 million).

Coffee import volume is projected to reach 1.4 million tons in FY 1990, the highest level since FY 1973. During October-June, the average import unit value for coffee fell 59 percent from a year ago, prompting a 42-percent increase in demand. The net result in the current year has been a 10-percent drop in the value of coffee imports through June. Coffee spot prices increased 12 percent during July and August, so import volume will likely fall for the remainder of the fiscal year.

There have been shifts in FY 1990 among coffee suppliers. The countries that fared well were Mexico (up \$91 million) and Guatemala (up \$90 million). On the other hand, the world's two largest suppliers of coffee, Brazil and Colombia, lost \$169 million and \$47 million, respectively, in the U.S. market. The Philippines (down \$34 million) and the Ivory Coast (down \$28 million) also lost substantial amounts.

The value of cocoa product imports during October-June rose because, unlike coffee, the increase in volume (26 percent) exceeded the drop in average unit value (19 percent). The volume increase was primarily in bean imports, and the October-June figure already exceeds last year's total. Import volume of cocoa beans and products will surpass the previous record set in the 1960's. An important reason for a second consecutive year of large imports has been the extraordinarily low price of cocoa. The estimated New York spot price for FY 1990 is about 50 cents a pound. Not long ago, \$1 a pound was considered low. In nominal terms, this is the lowest figure in 18 years. The nearby futures price for cocoa beans increased in July, then fell in August. Although cocoa imports are seasonally low in the summer, the price decrease could keep cocoa imports higher than usual.

Rubber imports are down 11 percent in volume and 36 percent in value through June. Record imports in FY 1989 of 927,000 tons meant stocks were available entering 1990. The 17-percent drop in average import unit value thus far in FY 1990 has been offset by a greater percentage drop in demand.

Competitive Imports Set Another Record

Competitive farm product imports of \$13 billion during the first 9 months of the fiscal year were \$1.2 billion above a year ago. They are projected to exceed FY 1989's record level of \$15.2 billion by \$1.5 billion for a seventh consecutive record year for competitive imports.

Cattle imports of 1.6 million head already exceeded the previous record of 1.5 million head in 1972. Domestic cattle prices of \$5-\$10 per hundredweight above a year ago have already drawn record Canadian shipments and near-record Mexican shipments.

Imports under the Meat Import law are currently running 12 percent ahead of a year ago. Australia has increased its shipments by 76,000 tons over a year ago, more than offsetting the 35,000-ton drop from New Zealand.

Import values for fresh fruit, fresh vegetables, and orange juice are running well ahead of a year ago.

For fruit and juice, an increase in quantity was primarily responsible. For vegetables, particularly tomatoes and peppers, sharply higher prices have not triggered a decline in demand.

Sugar imports under quota climbed 18 percent from last year. Several factors contributed to this third consecutive increase in domestic consumption. Global sugar stocks were the tightest in 15 years, putting pressure on the domestic price. This pressure was alleviated by increasing the quota level.
(Stephen R. Milmoe, Commodity and Trade Analysis Branch)

EC 1992

Implications for World Food and Agricultural Trade

The European Community's plans to establish a single internal market by the end of 1992 and other recent political and economic events in Europe have momentous implications for international food and agricultural markets.

The Economic Research Service of the U.S. Department of Agriculture and the International Commodity Markets Division of the World Bank have monitored the progress of the EC's 1992 program for the past 2 years. This joint ERS-World Bank conference will provide a current view of the EC's progress toward its 1992 goals and assess the overall effects of a completed 1992 program on world food and agricultural trade.

Distinguished European and American experts in regional trade, bulk commodities, food industries, and national and international policy issues will discuss their views and research results. Sessions will include ample time for participants to discuss the EC 1992 program and the linkages to German unification, GATT negotiations, and other events.

Abstracts of the presentations will be available upon registration with a monograph to follow.

All sessions except luncheons are at the World Bank's Building J, southeast corner of 18th Street and Pennsylvania Avenue, NW. Luncheons are at the Mayflower Hotel, 1127 Connecticut Avenue, NW.

Monday, November 19

Welcome and Introduction

John E. Lee, Jr.
*Administrator, Economic Research Service,
U.S. Department of Agriculture*
David Kelch
Agriculture and Trade Analysis Division, ERS, USDA

The Effects of Reforming Fiscal Barriers

The Agrimonetary Dilemma...Tax Harmonization Effects on Food Consumption and Production

Reports you can use . . . from ERS

U.S. Agricultural Trade Update gives you up-to-the-minute information.

Each month the *U.S. Agricultural Trade Update* brings you ERS' most up-to-the-minute data on the farm trade sector. This useful 6-page update brings you the most current figures, *delivered by first-class mail to ensure timely delivery*.

The *U.S. Agricultural Trade Update* covers the monthly farm trade balance, U.S. farm imports and exports by quantity and value, and leading exports and exporters.

A 1-year subscription to the *U.S. Agricultural Trade Update* costs just \$15. Or save by ordering a 2-year subscription (that's 24 issues) for \$29, or a 3-year subscription for \$42.

Situation and Outlook Agricultural Trade Reports give you the facts . . . and the forecasts!

These reports provide both current intelligence and historical data on international food and agricultural developments. They also forecast how changes in conditions and policies around the world will affect both U.S. and international agriculture.

Outlook for U.S. Agricultural Exports offers the latest value and volume of U.S. farm exports, by commodity and region, as well as the agricultural trade balance, import commodities, and export outlook. *World Agriculture* offers production and use data and analyses by commodity and country, along with a review of recent economic conditions and changes in food and trade policies. *Agriculture and Trade* reports summarize the year's developments affecting U.S. agriculture and trade in five key regions, and look to the future with articles on market trends, trade, and policy (regional reports include USSR, China, Western Europe, Pacific Rim, and Developing Economies).

The cost is just \$12 for a 1-year subscription per title. Or save by ordering a 2-year subscription for \$23, or a 3-year subscription for \$33.
