World Oilseed and Products Trade, 1962-88. By Arthur B. Mackie and Samuel D. Calhoun. Agriculture and Trade Analysis Division, Economic Research Service, U.S. Department of Agriculture. Statistical Bulletin No. 819.

Abstract

World trade in oilseed, oils, and meal--including soybeans, groundnuts, copra, palm, linseed, cotton, castor beans, sunflower seed, rapeseed, olive oil, and other oilseed oils and meals--more than tripled during 1962-88, while the number of countries participating in world trade increased 85 percent. Oilseed and product consumption has increased faster than production in most countries, causing more countries to enter into world trade for their oilseed and product needs. The result has been increased volume and changing patterns of world trade in oilseed and their products.

Keywords: World trade, oilseed, oils, oilseed meal, oilseed imports, major exporters, and major markets.

World Oilseed and Products Trade, 1962-88

Arthur B. Mackie
Samuel D. Calhoun*

Introduction

The volume of world trade in oilseed, oils, and oilseed meal--including soybeans, groundnuts, copra, palm, linseed, cotton, castor beans, sunflower seed, rapeseed, olive oil, and other oilseeds, oils, and meals--more than tripled during 1962-88, while the number of countries participating in world trade increased 85 percent. Oilseed, oil, and meal consumption in most countries outpaced production during this period. Consequently, more countries have turned to world markets for a growing part of their oilseed and product needs. These developments not only increased the volume of world trade in oilseed and products between a larger group of countries, but also changed the pattern and direction of trade flows for these products. An analysis of these changes in trade flow of oilseed, oils, and meals between countries has not before been possible because of the lack of complete world trade data in oilseeds, oils, and meals.

This report presents historical data on the volume of world trade in oilseeds, oils, and meals for 1962-88. Import data for soybeans, groundnuts, copra, palmnuts, linseed, cotton, castor beans, sunflower seed, rapeseed, olive oil, and other oilseeds, oils, and meals not elsewhere specified (n.e.s.) were compiled covering 26 years for each country by source or country of origin, then summarized in regional trade matrices. Data for each commodity are presented in condensed 5-year average trade matrices for 17 major importing regions and 6 major exporters during 1962-88. World trade flows for oilseeds, oils, and oilseed meal prior to 1962 are in "World Trade in Selected Agricultural Commodities, 1951-65," Oilseed, Oilmuts, and Animals and Vegetable Oils, FAER-47, Vol. V, U.S. Department of Agriculture, Economic Research Service, 1968.

*Arthur B. Mackie is a senior economist and Samuel D. Calhoun is a mathematician at the Economic Research Service, U.S. Department of Agriculture.

Methodology and Data Sources 1/

The commodity trade statistics of the United Nations (U.N.) were the primary source of data for imports of soybeans, groundnuts, copra, palmnuts, linseed, cotton, castor beans, sunflower seed, rapeseed, olive oil, and other oilseeds, oils, and meals, n.e.s. These data are available on magnetic tape and in published documents. 2/ This source is limited to those countries reporting their trade statistics to the United Nations (about 100-110 countries in 1979-88). Where U.N. import data for countries were not available, the import data were obtained from the official trade yearbooks of those countries. Estimates for countries that did not report through either source were obtained from export data of their trading partners. Table 194 lists the trade data sources for each year and country for 1962-88.

Regional Groupings

We divided the world into 17 major regions based on geographic, economic, and political criteria. The countries included in the geographic regions are as follows:

<u>Region</u>	<u>Countries</u>
1. North America	Canada, Puerto Rico, St. Pierre and Miquelon, the United States, and the U.S. Virgin Islands.
2. European Community (EC-10)	Belgium-Luxembourg, Denmark, France, the Federal Republic of Germany, Greece, Ireland, Italy, the Netherlands, and the United Kingdom.
3. Other Western Europe (O.W.E.)	Andorra, Austria, the Faeroe Islands, Finland, Gibraltar, Greenland, Iceland, Malta, Norway, Portugal, Spain, Sweden, and Switzerland.

1/ For further information, see Methods of Reconciling World Trade Statistics, by Stephen W. Hiemstra and Arthur B. Mackie, FAER-217, U.S. Department of Agriculture, Economic Research Service, May 1986; and "Programs, Procedures, and Problems in Developing Edited United Nations Commodity Trade Data," by Stephen Hiemstra, unpublished manuscript, U.S. Department of Agriculture, Economic Research Service, 1985.

2/ United Nations, commodity trade statistics, various years.

4. Eastern Europe and USSR
Albania, Bulgaria,
Czechoslovakia, the German
Democratic Republic, Hungary,
Poland, Romania, USSR, and
Yugoslavia.
 5. Oceania
Australia and New Zealand.
 6. West Asia
Bahrain, Cyprus, Gaza Strip,
Iran, Iraq, Israel, Jordan,
Kuwait, Lebanon, Oman, Qatar,
Saudi Arabia, the Democratic
Republic of Yemen, Syria,
United Arab Emirates, Turkey,
and the Arab Republic of
Yemen.
 7. Central America
Belize, Costa Rica, El
Salvador, Guatemala, Honduras,
Mexico, Nicaragua, Panama
(excluding Canal Zone), and
Panama Canal Zone.
 8. East Africa
British Indian Ocean
Territory, Burundi, Ethiopia,
Djibouti (French Territory of
Afars, Issas), Kenya, Rwanda,
Seychelles, Somalia, Sudan,
Uganda, and Tanzania.
 9. West Africa
Benin, Burkina-Faso (formerly
Upper Volta), Cameroon, Cape
Verde, Central African
Republic, Chad, Congo, Gabon,
Gambia, Ghana, Guinea,
Equatorial Guinea, Guinea-
Bissau, Ivory Coast, Liberia,
Mali, Mauritania, Niger,
Nigeria, St. Helena, Sao Tome,
Senegal, Sierra Leone, Togo,
and Zaire.
 10. North Africa
Algeria, Libya, Morocco,
Spanish North Africa, Western
Sahara, Tunisia, and Egypt.
 11. Southern Africa
Angola, Botswana, Comoros,
Lesotho, Madagascar, Malawi,
Mauritius, Mozambique,
Namibia, Reunion, the Republic
of South Africa, Swaziland,
Zambia, and Zimbabwe.

The countries included in the economic and political regions are as follows:

<u>Region</u>	<u>Countries</u>
1. Developed	Japan, the Republic of South Africa, and countries in geographic regions 1, 2, 3, and 5.
2. Centrally planned	China (PRC) and all countries in geographic region 4.
3. Developing	All countries in geographic regions 6 through 17, except the Republic of South Africa, Japan, and China.

Trends in World Trade of Oilseed, Oilseed Meal, and Vegetable Oils

World trade in oilseed, oilseed meal, and vegetable oils has grown unevenly over the past 26 years, increasing from 23 million metric tons in 1962-66 to 80.3 million tons in 1982-86 (table 1). World trade in oilseeds has grown more slowly than has world trade in vegetable oils and oilseed cake and meal. These different rates of growth have altered the commodity composition of world trade in oilseeds and their products. For example, the commodity market share for oilseeds decreased from 51 percent in 1962-66 to 42.9 percent in 1982-86, while the market share for vegetable oils and oilseed meal increased from 15.3 percent to 18.1 percent and 33.7 percent to 39 percent, respectively, during this period (table 1 and fig. 1). Within the oilseed group, whose 5.4-percent growth rate per year was slower than those for oils and cake and meal, only soybeans, sunflower seed, and rapeseed registered significant import gains during the past two decades, while groundnut, copra, cottonseed, castor bean, linseed, and palmnut imports all registered declines or small gains (tables 2 and 3 and fig. 2).

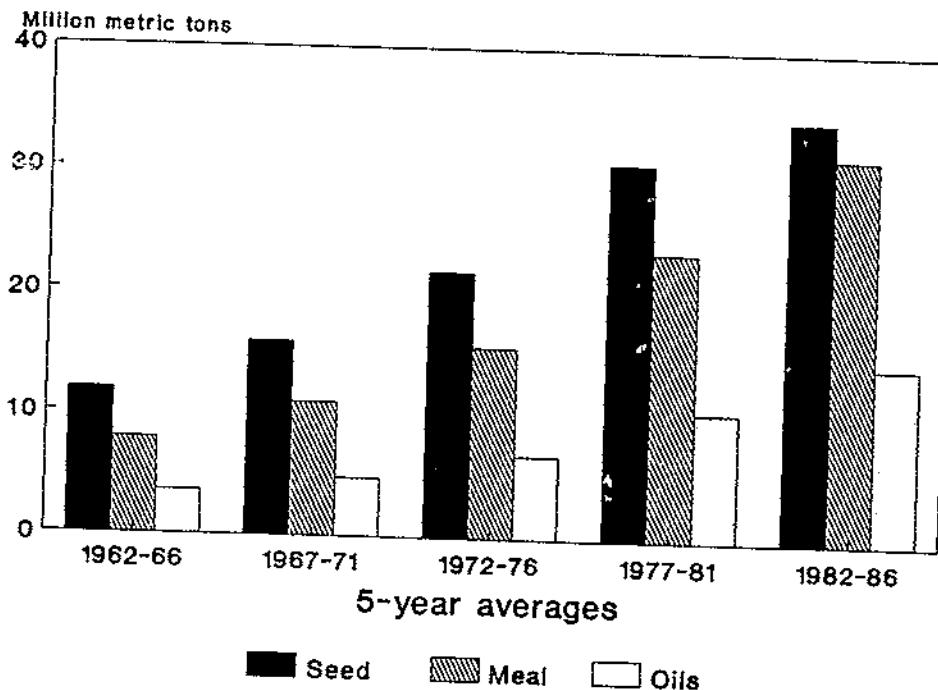

Within the more rapidly growing vegetable oils group (7.3 percent per year) and oilseed cake and meal group (7.2 percent per year), the number of rapid-growth commodities far outnumbered the slow- or no-growth commodities seven to three (tables 2, 4, and 5). The rapid-growth commodities in the vegetable oils and oilseed cake and meal group were the same as those in the seed group--soybeans, sunflower seed, and rapeseed--plus four additional commodities: copra, palm, palm kernel, and olive (figs. 3 and 4). The combined market share of the fastest growing oilseeds--sunflower, rape, and soybean--increased from about 30 percent in 1962-66 to almost 40 percent in 1982-86 (table 2). The market share for the fastest growing vegetable oils--rapeseed, palm, and palm kernel--increased from more than 3 percent in 1962-66 to

Figure 1
World trade in oilseed, meal, and oils

almost 8 percent in 1982-86. The most rapid growth in world imports of oilseed cake and meal was in soybeans (11.5 percent), sunflower seed (10.5 percent), rapeseed (10.1 percent), palm (6.6 percent), and copra (3.9 percent). Except for soybean meal, the volume of world imports in these rapid-growth commodities was small, increasing from 1.29 million metric tons in 1962-66 to 4.59 million metric tons in 1982-86.

World trade in the rapid-growth commodities--soybeans, sunflower seed, rapeseed, palmnuts and kernels, copra, and olive oil--has shown an increased dominance of these commodities in world trade of oilseeds and their products. For example, the combined commodity market share of these six growth commodities was 65 percent in 1962-66. By 1982-86, the combined market share increased to almost 90 percent. Growth in trade of soybeans and their products also loomed large during the past two decades,

Figure 4
World vegetable oil imports

increasing the combined commodity market share of oilseeds and their products from almost 40 percent in 1962-66 to 65 percent in 1982-86.

Soybeans

World trade in soybeans has grown at different rates than trade in soybean oil or cake and meal during the past 26 years. For example, world imports of soybeans in 1982-86 were four times the amount of world soybean imports in 1962-66, increasing from 6.1 million metric tons to 27 million metric tons. Meanwhile, world imports of soybean cake and meal in 1982-86 were almost nine times the amount of those in 1962-66, increasing from 2.6 million metric tons to 22.2 million metric tons (table 6 and fig. 5). World imports of soybean oil in 1982-86 were six times the amount in 1962-66, increasing from 553,000 metric tons to 3.5 million metric tons. These differences in commodity trade growth resulted from changing markets for those three commodities throughout the world, thereby shifting the pattern of trade between countries.

The European Community (EC-10) and Japan remain the major markets for soybeans, despite the recent rapid growth of these imports in the USSR, countries in Other Western Europe (O.W.E.), Eastern

Europe, Central America, and East Asia. The EC-10 and Japan accounted for 77 percent of world soybean imports in 1962-66, but only 56 percent in 1982-86. The EC-10 market accounted for 64 percent of the soybean cake and meal imports in 1962-66, but only 55 percent in 1982-86 (fig. 5). The decline in market shares for the EC-10 and Japan during this time was directly related to the rapid increase of soybean imports in O.W.E. (907 percent), Eastern Europe and the USSR (1,688 percent), Central America (54,535 percent), and East Asia (1,207 percent).

The major markets for soybean oil during the past 26 years, on the other hand, were primarily the developing countries. Imports by developing countries accounted for 53 percent of world trade in 1962-66 and 78 percent in 1982-86. However, vast changes occurred within the developing countries during the past 26 years that greatly altered the market composition of individual regions. For example, the countries in East and Southeast Asia accounted for about 7 percent of world soybean oil imports in 1962-66 but less than 3 percent in 1982-86, while the combined market share in countries of West and South Asia grew from 23 percent in 1962-66 to 38 percent in 1982-86. Moderately rapid growth in soybean oil imports in South America and North Africa contributed to the changing market composition by increasing their combined world market share from 17 percent to 19 percent during this period.

The three major exporters of soybeans in 1962-66 were the United States (89 percent), China (PRC) (7.5 percent), and Canada (1.5 percent). These three exporters accounted for 98 percent of all soybean exports in 1962-66 (fig. 5). By 1982-86, the top three exporters underwent a major revision. While the United States retained its dominance as the largest exporter, with 78.4 percent of world exports, Argentina (8.7 percent) and Brazil (5.9 percent) replaced China (PRC) and Canada. These top three exporters accounted for 93 percent of world soybean exports in 1982-86.

Groundnuts

World trade in groundnuts and their products declined during the past 26 years, with import demand for groundnuts decreasing 41 percent (577,000 metric tons) between 1962-66 and 1982-86 (table 7 and fig. 6). World import demand for groundnut cake and meal declined even more rapidly during this period, decreasing 61 percent from 1.5 million to 587,000 metric tons. The small increase in imports of groundnut oil (5 percent) during the past 26 years was not sufficient (only 21,000 metric tons) to offset the decrease in imports of groundnuts and groundnut meal. Thus, the total trade in groundnuts and their products decreased.

The major market for groundnuts and groundnut cake and meal was the EC-10 (68 percent in 1962-66 and 43 percent in 1982-86), despite the large decline in EC-10 imports of groundnuts (62 percent) and meal (75 percent). However, not all developed

regions experienced decreased import demand. There were small increases in import demand for groundnuts in North America (26,000 metric tons), Oceania (5,000 metric tons), Japan (38,000 metric tons), and the Republic of South Africa (12,000 metric tons). There were no increases in the developed markets for groundnut cake and meal during this period. Growth markets were present in some of the developing countries, as small gains were registered in Central and South America, West and Southern Africa, and East and Southeast Asia. Except for gains in imports of 8,600 metric tons of groundnut oil in the Republic of South Africa and China (PRC), all the growth markets for groundnut oil were in the developing countries of Central and South America, West Africa, and East Asia.

The major exporters for groundnuts changed completely during 1962-88. In 1962-66, the top three exporters were African countries: Nigeria, Senegal, and the Sudan. These three countries accounted for 66 percent of world exports of groundnuts at that time. By 1982-86, the United States and China (PRC), whose combined exports accounted for two-thirds of world groundnut exports, had displaced the three African countries as major groundnut exporters.

Figure 6
Countries trading groundnuts and their products

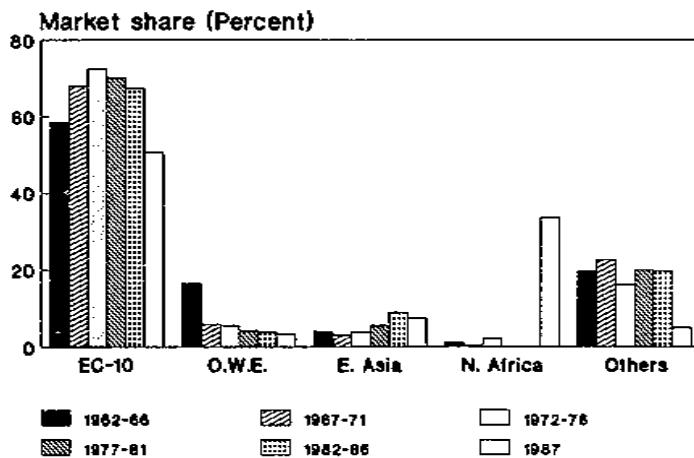

Major importers of groundnuts

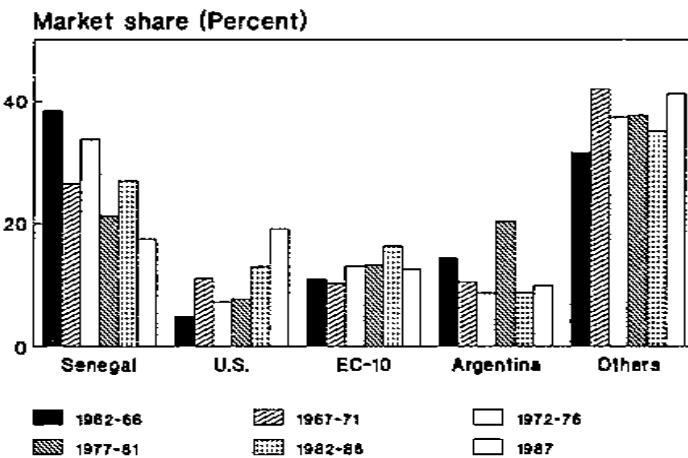

Major exporters of groundnuts

Major importers of groundnut oil

Major exporters of groundnut oil

The top three exporters for groundnut oil in 1962-66 were Senegal, Nigeria, and Argentina, accounting for 67 percent of world exports. By 1982-86, the top three major exporters had changed some, with Senegal maintaining its first place position, but the EC-10 and the United States displaced Nigeria and Argentina as the second- and third-leading groundnut oil exporters. During this time, the market share of world groundnut oil exports became more widely distributed among many countries, thus the leading exporters accounted for a declining share of world exports. For example, in 1962-66, the top three exporters accounted for 67 percent of world exports, but for only 56 percent in 1982-86. The leading exporters for groundnut cake and meal remained constant throughout the study period, with India and Senegal accounting for 59 percent of world exports in 1962-66 and 62 percent in 1982-86.

Copra

World trade in copra and copra products grew at different rates during the past 26 years. For example, world imports of copra decreased 75 percent between 1962-66 and 1982-86, while imports of copra oil and copra cake and meal increased 174 percent and 108 percent, respectively (table 8 and fig. 7). Imports of copra decreased in all regions except in East and Southeast Asia and the Pacific Islands.

Figure 7
Countries trading copra and its products

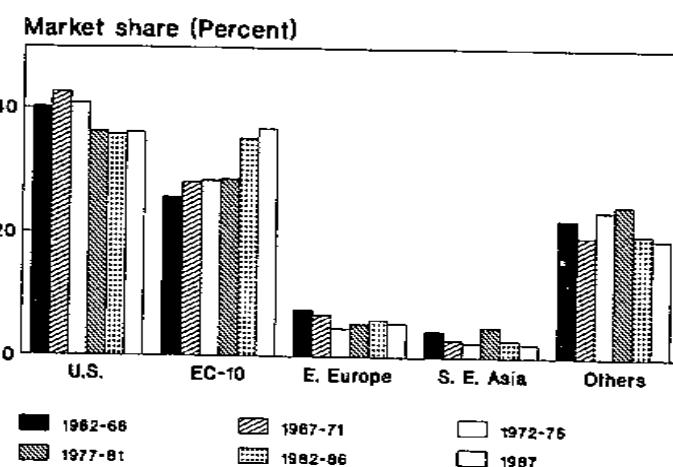

Major importers of copra

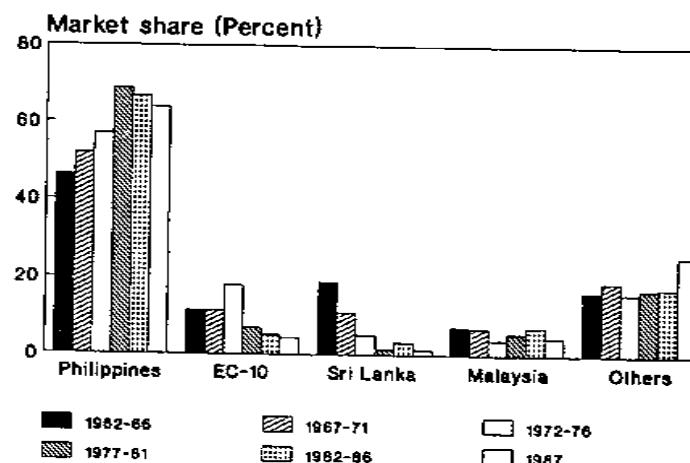

Major exporters of copra

Major importers of copra oil

Major exporters of copra oil

The major markets for copra in 1962-66 were North America and the EC-10, accounting for 64 percent of world imports. However, because demand for copra decreased in the developed countries of North America (100 percent), the EC-10 (84 percent), Oceania (96 percent), and O.W.E. (57 percent), the major markets for copra began to shift away from Western Europe to the developing countries of East and Southeast Asia.

The major markets for copra oil were the developed countries of North America and Europe, while the major market for copra cake and meal was primarily the EC-10. The EC-10 accounted for 84 percent of the world market for copra cake and meal in 1962-66, and 95 percent in 1982-86. The two major markets for copra oil in 1962-66 were the United States (40 percent) and the EC-10 (26 percent) and, again in 1982-86, the two assumed a combined 71 percent of the world copra market.

The Philippines and Indonesia were the major exporters of copra in 1962-66, with 72 percent of the world market (61 percent for the Philippines and 11 percent for Indonesia), but with only 26 percent in 1982-86. While exports in the Philippines declined to 25 percent of the world market in 1982-86, Indonesia's exports decreased rapidly over the 26 years, ending with only 1-percent market share in 1982-86. Papua New Guinea had replaced Indonesia as the second largest exporter in the 1980's, with 25 percent of the world market.

Linseed

World trade in linseed and linseed products grew very slowly during the past 26 years. World imports of linseed grew 7 percent between 1962-66 and 1982-86, while imports of linseed oil and linseed cake and meal decreased about 10 percent and 12 percent (table 9 and fig. 8).

Growth in linseed imports declined in the major markets of the EC-10 (minus 2 percent) and O.W.E. (minus 73 percent) between 1962-66 and 1982-86, but some growth occurred in small-volume markets of North America (80,000 metric tons) and Central America (10,000 metric tons). Growth in linseed oil imports declined in the EC-10, the major market, which had 61 percent of the market for linseed oil in 1962-66 but only 25 percent in 1982-86. The EC-10 had 94 percent of the linseed cake and meal market in both time periods. The major growth markets for linseed oil and meal were found only in Eastern Europe.

The major exporters of linseed in 1962-66 were Canada (with 61 percent of the market) and the United States (with 21 percent of the market). The major exporters in 1982-86 were Canada and the EC-10, when they accounted for 95 percent of the market. During the past 26 years, Argentina was the major exporter for linseed oil, with 67 percent of the world market in 1962-66 and 56

percent in 1982-86. Argentina was also the major exporter for linseed cake and meal in 1962-66 (69 percent) and in 1982-86 (58 percent).

Cottonseed

World trade of cottonseed and cake and meal declined over the past 26 years, while world trade in cottonseed oil, on the other hand, increased slightly (27 percent). Imports of cottonseed and cake and meal declined in all developed countries except those of North America and the Republic of South Africa (table 10). However, despite these declines, the developed countries remain the largest market for cottonseed (81 percent in 1962-66 and 68 percent in 1982-86) and for cottonseed cake and meal (93 percent in 1962-66 and in 1982-86) (fig. 9).

Growth in cottonseed imports was registered primarily in the developing countries of Central America, South America, West Africa, and East Asia. Same gains were registered in North America and the Republic of South Africa. Growth in cottonseed meal imports were registered in Eastern Europe, Latin America (Central and South America and the Caribbean), North Africa, West Asia, and East Asia. Growth in imports of cottonseed oil were registered only in the developing countries of Latin America (Central and South America and the Caribbean), North and Southern Africa, and East Asia. The major market for cottonseed oil in 1982-86 was in North Africa, which accounted for 39 percent of world imports.

The major exporters for cottonseed changed during the past 26 years. The three major exporters in 1962-66 were the Sudan, Nicaragua, and Nigeria, who combined to account for 61 percent of world cottonseed exports at that time. By 1982-86, China (PRC), the United States, and Thailand had replaced the previous three major exporters. The recent top three exporting countries accounted for 69 percent of world cottonseed exports in 1982-86.

The major exporters of cottonseed oil to world markets in 1962-66 were the United States (78 percent) and China (6 percent). In 1982-86, the United States remained in first place, with 64 percent of world cottonseed oil exports. The EC-10's market share increased during the past 26 years to 16 percent, thereby becoming the second-leading exporter of cottonseed oil in 1982-86.

The major exporters for cottonseed cake and meal changed completely between 1962-66 and 1982-86. In the earlier period, the major exporters were Turkey (14 percent), the Sudan (10 percent), and Syria (10 percent). These countries accounted for 34 percent of world exports at that time. By 1982-86, China (PRC) (29 percent), Brazil (16 percent), and India (12 percent), whose combined exports accounted for 57 percent of the world market, had become the top three exporters of cottonseed cake and meal.

Palmnut Kernels and Palm Oil

World trade in palmnut kernels and palm products grew at different rates over the past 26 years. World imports of palmnut kernels decreased 79 percent, while palmnut kernel cake and meal imports increased 262 percent and palmnut kernel oil imports increased 534 percent from 1962-66 to 1982-86. The major source of decreases in world trade of palmnut kernels has been a rapid decline in the demand for imports in the EC-10. In 1962-66, the EC-10 imported 575,000 metric tons, or 87 percent of world palmnut kernel imports (table 11). By 1982-86, the EC-10 imported only 80,000 metric tons, but still accounted for 57 percent of world palmnut kernel trade (fig. 10). Although the EC-10 accounted for the largest share of the import market and for the decrease in total world imports for palmnut kernels, these countries accounted for the largest share of growth in world imports of palmnut kernel meal during the study period. The EC-10 accounted for the largest share of the world import market in 1962-66 (99.5 percent) and in 1982-86 (94.5 percent).

Figure 10
Countries trading palmnut kernels and their products

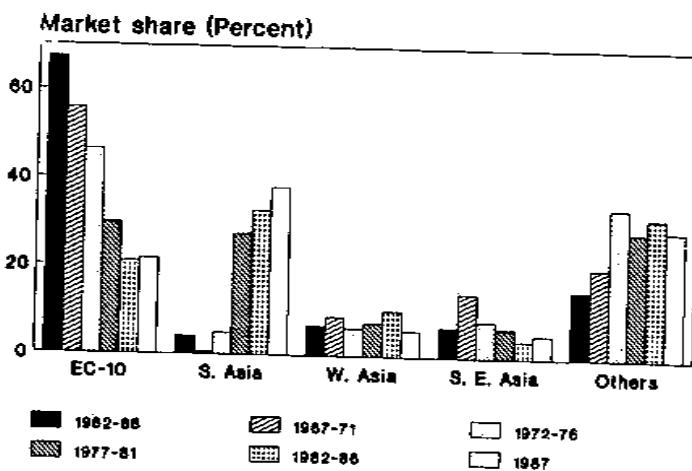

Major importers of palmnut kernels

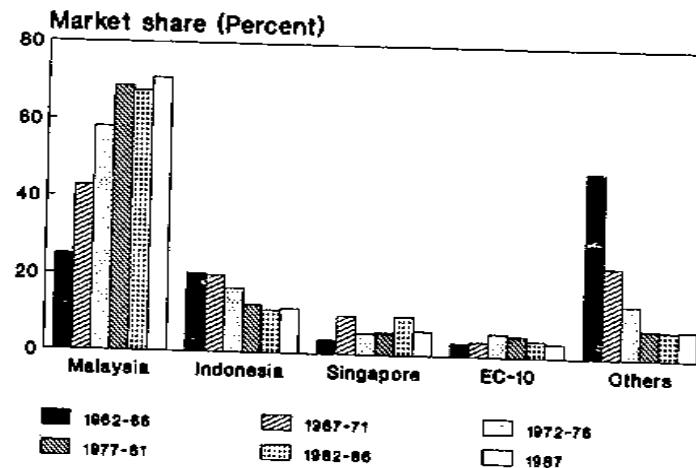

Major exporters of palmnut kernels

Major importers of palm oil

Major exporters of palm oil

The major markets for palm oil in 1962-66 were the EC-10 (67 percent), Southeast Asia, (7 percent), and West Asia (7 percent). Regional differences in market growth over the past 26 years were very dramatic, and had changed the composition of major markets for palm oil by 1982-86. For example, rapid growth in the South Asia market from 24,100 metric tons to 1.2 million metric tons propelled this region's market share from 4 percent in 1962-66 to 33 percent in 1982-86, while moderately rapid growth in Eastern Europe and the USSR increased their market share from 1 percent in 1962-66 to 7.5 percent in 1982-86. Moderate growth of imports in North America and the EC-10 reduced the market shares in the EC-10 from 67 percent to 21 percent, and in North America from 10 percent to 8 percent, to rank as the second- and fifth-largest markets. West Asia and Eastern Europe and the USSR were the third- and fourth-largest markets in 1982-86.

The major exporter of palmnut kernels throughout this study period was Nigeria, with 59 percent of world exports in 1962-66 and 30 percent in 1982-86. The major exporters for palmnut kernel meal were the EC-10 (55 percent) and Zaire (20 percent) in 1962-66, but Malaysia (71 percent) in 1982-86.

Malaysia was the major exporter for both palm and palmnut kernel oils, accounting for 25 percent of world exports in 1962-66, and for 67 percent in 1982-86. Nigeria was the second-largest exporter in 1962-66, with 21 percent. Indonesia and Singapore replaced Nigeria to become the second-largest exporters in 1982-86, each with about 10 percent of world palm and palmnut kernel oil imports.

Sunflower Seed

World trade of sunflower seed and their products increased rapidly during the past 26 years, with world import demand increasing 766 percent for seed, 324 percent for sunflower oil, and 250 percent for sunflower cake and meal (table 12). These differences in commodity trade growth are the result of changes in markets in Western Europe (primarily the EC-10) for seed and cake and meal and in all regions for sunflower oil.

The major markets for sunflower seed were the EC-10 and Eastern Europe in 1962-66 and the EC-10 and Central America in 1982-86 (fig. 11). The EC-10 and Central America (primarily Mexico) accounted for 82 percent of the total trade growth for sunflower seed and their products. The EC-10 and Eastern Europe accounted for 91 percent of the growth in world imports of sunflower seed, cake, and meal.

The major markets for sunflower oil were Eastern Europe (34 percent), the EC-10 (25 percent), and O.W.E. (14 percent) in 1962-66 (fig. 11). These three regions accounted for only 54 percent of the world market for sunflower oil in 1982-86 because of rapid growth in the developing countries in Central and South

America, the Caribbean, North Africa, and West Asia, where almost 40 percent of the growth in the world sunflower seed and products market occurred between 1962-66 and 1982-86.

The major exporters of sunflower seed in 1962-66 were the USSR (38 percent), Bulgaria (35 percent), and Romania (9 percent). During the past 26 years, exports from these countries decreased rapidly, so that by 1982-86, the United States, with 47 percent of the market, and France (in the EC-10), with 28 percent of the market, replaced these major exporters (fig. 11).

The major exporters of sunflower oil, like those of sunflower seed, changed completely. In 1962-66, the USSR and Romania accounted for 80 percent of world exports of sunflower oil. In 1982-86, the major exporters were Argentina (38 percent), the EC-10 (25 percent), and the United States (12 percent).

The major exporter of sunflower meal remained unchanged, as Argentina held a market share of 57 percent in 1962-66 and 66 percent in 1982-86.

Rapeseed

World trade in rapeseed and its products in 1982-86 was more than five times the amount of that in 1962-66, increasing 2,510,000 metric tons during the 20-year period. But, world imports of rapeseed oil in 1982-86 were almost 15 times the amount of 1962-66, and cake and meal imports in 1982-86 were 7 times the amount of 1962-66, both growing much faster than imports of seeds.

The major markets for rapeseed were in the developed countries, where 68 percent of world trade occurred in 1962-66 and 96 percent in 1982-86. Imports by the centrally planned countries increased only 33 percent during the 26-year period, and imports by the developing countries declined 37 percent. The major markets for rapeseed were primarily the EC-10 (44 percent) and Japan (20 percent) in 1962-66, and, almost totally the EC-10 (50 percent) and Japan (43 percent) in 1982-86 (fig. 12).

The major market for rapeseed cake and meal, like that for rapeseed, continued to be the developed countries of Western Europe, primarily the EC-10. In 1962-66, the EC-10 accounted for 89 percent of the world rapeseed meal import market and for 67 percent in 1982-86. Other Western European (O.W.E.) countries and Japan combined for 11 percent of the world rapeseed cake and meal import market in 1962-66 and 15 percent in 1982-86.

The major markets for rapeseed oil were equally divided between the developed and developing countries (table 13 and fig. 12). The developed countries, primarily the EC-10, accounted for 54 percent, with the developing countries accounting for 43 percent in 1962-66. By 1982-86, a more rapid growth of imports in the developing countries pushed their market share to 50 percent, while market share for the developed countries fell to 44 percent. The centrally planned countries accounted for the remaining 6 percent of the world imports of rapeseed oil in 1982-86.

The major exporters of rapeseed in 1962-66 were Canada (46 percent) and France (19 percent). By 1982-86, combined market share for these two exporters fell to 55 percent, but they remained the top exporters. The EC-10 was the major exporter of rapeseed oil, with 52 percent in 1962-66 and 66 percent in 1982-86. The EC-10 was the major exporter of rapeseed cake and meal, also with 58 percent of world exports of these products in 1962-66. China (with 27 percent) and Canada (with 19 percent) forged ahead of the EC-10 to become the two leading exporters of rapeseed meal in 1982-86.

Castor Beans

World trade in castor beans decreased 22 percent between 1962-66 and 1982-86. The decrease in castor bean trade was most systematic and most significant in the developed countries, where

the largest declines (100 percent) were registered in North America, Oceania, and South Africa (table 14). Less drastic declines were registered in the EC-10 (52 percent) and Japan (16 percent), which together accounted for 94 percent of the market in 1962-66 and 70 percent in 1982-86. In contrast, import gains were registered in some developing countries in South America (5,480 percent), West Asia (135 percent), and East Asia (286 percent). While these three regions accounted for only 1 percent of the world market in 1962-66, their rapid growth in imports in recent years had increased their combined market share to 28 percent by 1982-86 (fig. 13).

World trade in castor oil grew very slowly over the 26-year study period, increasing only 11 percent. The largest market for castor oil remained the developed countries of the EC-10 (33 percent), North America (35 percent), and Eastern Europe and the USSR (15 percent) in 1962-66. Together, these markets accounted for 90 percent of world castor oil imports in 1982-86. The North American market actually declined 30 percent during this period, while the EC-10 countries registered a 36-percent gain in castor oil imports. The largest growth markets were in Central America (250 percent), East Asia (200 percent), and in Eastern Europe and the USSR, which registered a 104-percent gain in imports between 1962-66 and 1982-86. There was no trade in castor cake and meal during 1962-88.

The major exporters of castor beans in 1962-66 were Thailand (28.1 percent), China (PRC) (12.2 percent), and Paraguay (8.1 percent). By 1982-86, China (PRC) (50.6 percent) had replaced Thailand as the number one exporter, while Paraguay moved up to second place with 18.3 percent of world exports of castor beans.

The major exporters of castor oil were Brazil and India throughout the 26-year period. Brazil was the dominant exporter, with 62.8 percent of the world export market in 1962-66 and 38.5 percent in 1982-86. India increased its market share from 13.7 percent in 1962-66 to 23.1 percent in 1982-86.

World Trade Matrices for Oilseed Commodities

The following tables summarize world trade in soybeans, groundnuts, copra, palmnut kernels, linseed, cottonseed, castor beans, and other oilseeds n.e.s., such as rape, sunflower, and sesame, for 5-year periods during 1962-1986, by importing regions and the top six countries of origin. Similar data are presented for each of the above oilseeds for 1987 and 1988. Tables summarizing world trade in oils of soybeans, cotton, groundnuts, olives, rapeseed, sunflower seed, linseed, palm, coconuts (copra), palm kernels, castor beans, and maize for 1962-86 follow. As with world trade in oilseeds, trade in vegetable oils is presented for 1987 and 1988. World trade in oilseed meal is not presented for individual oilseeds because of the inability to disaggregate the United Nations data into individual commodities, except for soybean meal, which is presented for 5-year periods during 1962-82 and annually for 1983 through 1988.
