Farms and Land in Farms: Final Estimates by State, 1988-92. U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 895.

Abstract

This report presents final State and National estimates of total number of farms and land in farms for 1988-1992. In addition, it contains estimates of farms and land in farms by economic sales class. Some of these estimates have been revised since last published in Agricultural Statistics Board releases. The basis for these revisions are the Department of Commerce 1992 Census of Agriculture and any other new information available which might affect the level of the estimates. Estimates contained in this report provide a historical record and a benchmark for current estimates. The data series covering the 1993-95 period appears in the July FARMS AND LAND-IN FARMS report released July 28 at 3:00 p.m. EDT. These data are a continuation of a series which began in 1910.

The entire data series of estimates for farms and land in farms is contained in the following publications:

Statistical Bulletin No. 316 released in June 1962 covering number of farms estimates for 1910-59 and land in farms estimates for 1950-59.

Statistical Bulletin No. 507 released in January 1973 covering estimates for 1959-70.

Statistical Bulletin No. 594 released in December 1977 covering estimates for 1969-75.

SpSy3 released in December 1980 covering estimates for 1975-80, and

SpSy5 released in August 1989 covering estimates for 1979-87.
