Final Estimates 1988-93

Stocks of Grains, Oilseeds, and Hay: Revised estimates by States, 1988-93.
U.S. Department of Agriculture,
Agricultural Statistics Board, National Agricultural Statistics Service,
Statistical Bulletin No. 897.

Abstract

This publication presents final estimates of stocks of U.S. grains, oilseeds and hay during 1988-93. Some estimates have been revised slightly since they last appeared in Agricultural Statistics Board releases. Estimates contained in this publication provide a historic record and a benchmark for current estimates.

Stocks of Grain, Oilseeds and Hay Final Estimates by States, 1988-93

This bulletin presents final estimates of stocks of grains, oilseeds, and hay in the United States during the years 1988-93. Preliminary estimates were published currently during that period in quarterly and other periodic Agricultural Statistics Board releases.

The farm stocks revisions herein resulted primarily from production revisions for the crop years 1988-92. Farm stocks of the grain and oilseed crops are estimated using quantitative indications of farm held stocks. After making production revisions, stocks revisions were made by evaluating a balance sheet containing all relevant data concerning production, disappearance and stocks. Farm stocks of hay are estimated using both percentage of production indications which are converted to tons and quantitative indications.

Estimates of off-farm stocks, which are based on quarterly surveys of mills, elevators and warehouses are largely a re-issue of the latest quarterly tables, although a few revisions were made on the basis of data that became available since the previous issuance.

Stocks estimates for earlier years are available in Statistical Bulletin No. 794 for 1982-87, No. 707 for 1978-83, No. 649 for 1974-79, No. 592 for 1969-75, No. 508 for 1964-70, No. 395 for 1959-65, No. 304 for 1954-60, and No. 203 for 1949-55. Statistical Bulletin No. 203 also presents U.S. estimates back to October 1, 1935.
