NONCITRUS FRUITS AND NUTS: FINAL ESTIMATES 1987-92

(U.S.) NATIONAL AGRICULTURAL STATISTICS SERVICE, WASHINGTON, DC

MAY 95

U.S. DEPARTMENT OF COMMERCE
National Technical Information Service

Abstract

This publication presents final statistics on bearing area, yield, production, utilization, price, and value of all domestic noncitrus fruits and tree nuts for 1987-92. Some of these estimates were revised since they last appeared in previously issued Agricultural Statistics Board reports. Revisions were made after thoroughly reviewing marketing agreement records, recorded truck and rail movement, quantities inspected, quantities used by processors, data provided by the 1992 Census of Agriculture, and the latest available fruit inventory surveys. Estimates contained in this report provide a historic record and a benchmark for subsequent estimates.

This report continues the official series of historical reports. Estimates of noncitrus fruits and nuts for earlier years are available in the following Statistical Bulletins: CS-27 for 1889-1944; No.114 for 1944-1949; No.192 for 1949-55; No. 292 for 1954-1959; No. 473 for Tree Nuts 1909-65; No. 504 for Tree Nuts 1964-70; No. 505 for Noncitrus Fruits 1964-70; No. 593 for 1969-74; No. 647 for 1974-78; No. 718 for 1978-82; No. 809 for 1982-87.

For information call (202) 720-2127. Office hours are 8:00 a.m. to 4:30 P.M. ET.

Noncitrus Fruits and Nuts: Bearing Acreage and Yield per Acre by Type,
United States, 1987-89

Crop	Bearing Acreage 1/			Yield per Acre 2/		
	1987	1988	1989	1987	1988	1989
Noncitrus Fruits:	Acres			Tons		
Apples	452,290	447,900	450,410	11.90	10.20	11.00

Total	675,400	686,300	686,560	--	--	--

- 1/ Bearing acreage estimates are primarily based on periodic orchard and vineyard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.
- 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions, except bananas, guavas, strawberries, and nuts which are utilized production yields.
- 3/ In 1987, 15,000 acres of raisin grapes were enrolled in the CA Raisin Industry Diversion program (RID). These acres have been deducted from bearing acres for yield calculations. There were 25,000 acres in 1988 and none in 1989.
- 4/ Guava estimates began in 1988.
- 5/ Papaya yields not calculated after 1987 because only utilized production is estimated.
- 6/ Pineapple acreage is total acres in crop, not harvested acreage. Pineapple yields are not estimated.
- 7/ Pomegranate estimates discontinued after 1989 crop.
- 8/ Idaho, Michigan, Oregon, and Washington.
- 9/ Harvested acreage for strawberries. Yields based on utilized production.
- 10/ Nut yields are based on utilized production, not total production.
- 11/ Pecan bearing acreage and yield not estimated.

- 1/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end-of-year production surveys and other indications.
- 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions.
- 3/ Estimates began with the 1989 crop.

- 1/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end-of-year production surveys, and other indications.
- 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.
- 3/ Missing data not published to avoid disclosure of individual operations.
- 4/ Estimates began with the 1988-89 crop.

- 1/ Data not published for some States to avoid disclosure of individual operations.
- 2/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end-of-year production surveys, and other indications.
- 3/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.

- 1/ Data not published for some States to avoid disclosure of individual operations.
- 2/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end-of-year production surveys and other indications.
- 3/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions.
- 4/ No significant commercial production in 1989 due to freeze damage.

- 1/ Data not published for some States to avoid disclosure of individual operations.
- 2/ Bearing acreage estimates are primarily based on periodic orchard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.
- 3/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to market conditions.

- 1/ Bearing acreage estimates are primarily based on periodic vineyard surveys. In non-survey years, acreage is based on trends, county extension service data, end of year production surveys and other indications.
- 2/ Yield is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.
- 3/ In 1987, 15,000 acres of raisin grapes were enrolled in the CA Raisin Industry Diversion program (RID), 25,000 acres in 1988 and no acres in 1989. These acres have been deducted from bearing acres for yield calculations.
- 4/ Estimates began with 1988 crop.

Hawaii Crops: Acreage Harvested, Yield,
and Utilized Production, 1987-89

Crop and Year	Acreage Harvested	Yield per Acre	Utilized Production	Utilization	
				Fresh	Processed
	Acres		1,000 Pounds		
Bananas					
1987	1,070	10.7	11,400	11,400	
1988	1,070	12.3	13,200	13,200	
1989	1,000	11.9	11,900	11,900	
Guavas 1/					
1987					
1988	865	21.5	18,560		18,560
1989	965	21.3	20,600		20,600
Papayas 2/					
1987	2,350	44.7	67,000	56,000	11,000
1988	2,300		69,000	57,000	12,000
1989	2,500		74,000	64,000	10,000
Pineapples					
3/ 4/					
1987	36,100		692,000	134,000	558,000
1988	34,600		659,000	133,000	526,000
1989	32,700		580,000	145,000	435,000

1/ Guava estimates began with 1988 crop.

2/ The 1987 papaya crop yield is based on total production which includes unutilized quantities. Unutilized papaya quantities in 1987 totaled 38.0 million pounds. Only utilized production was estimated for papayas after 1987.

3/ Production and processed utilization on a fresh weight basis.

4/ Acreage is total acres in crop, not harvested acreage. Pineapple yields not estimated.

Hawaii Crops: Acreage Harvested, Yield,
and Utilized Production, 1990-92

Crop and Year	Acreage Harvested	Yield per Acre	Utilized Production	Utilization	
				Fresh	Processed

Definitions of Terms

Total Production - is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic or natural reasons.

Utilized Production - is the amount sold plus the quantities used at home or held in storage.

Unutilized Production - is the difference between total and utilized production which is fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized.

Utilization - refers to first utilization, not necessarily final utilization. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Apples, Commercial Crop - orchards of 100 or more bearing age trees.

Prices - are a marketing year average for all methods of sale. For a crop sold for both fresh market and processing, the **marketing year average price (MYAP)** is a weighted average of the fresh and processing price.

Prices for fresh fruit are the average prices producers receive at the point of first sale. This is commonly referred to as the **average price as sold**. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit is sold f.o.b. packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands, the fresh fruit **average price as sold** is a weighted average of the average price for each method of sale. The exception is fresh fruit sales in California, Washington, New York (apples only) and Oregon (except peaches) which are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices.

F.o.b. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the f.o.b. price. These costs include grading, packing, inspecting fees, selling, and other costs.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for cranberries and California olives and clingstone peaches which are priced at the first delivery point.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops which are on a calendar year.

The following procedure is used to compute State values for all commodity groups:

State Value Computation Procedure

Fresh Market Value = Fresh Market MYAP x Fresh Market Utilization
Process Market Value = Process Market MYAP x Process Market Utilization
"All" Sales Value = Fresh Market Value + Process Market Value
"All" Sales MYAP = "All" Sales Value Divided By
"All" Sales Utilization

For commodities with components not identified by market channel, substitute breakdown name for fresh/processing market and use the same procedure. The procedure used for computation of U.S. Marketing Year Average Prices follows:

U.S. MYAP Computation Procedure

Fresh Market MYAP = Fresh Market Value For All States Divided By
Fresh Market Utilization For All States
Process Market MYAP = Process Market Value For All States Divided By
Process Market Utilization For All States
"All" Sales MYAP = Sales Value For All States Divided By
Sales Utilization For All States

Fruits (Noncitrus): Marketing Seasons for Specified Crops ^{1/}

Apples:	All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California, June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 to July 31.
Apricots:	Fresh Fruit -- May 25 to August 20. Canning -- June 15 to August 15. Dried -- California, June 20 to August 20.
Avocados:	California -- November 1 to November 30 (following year). Florida -- June 20 to Feb 28.
Bananas:	January 1 to December 31.
Cherries:	Fresh Fruit -- Sweet varieties, May 1 to August 15; Tart varieties, June 15 to August 20.
Cranberries:	September 5 to December 20.
Dates:	August 15 to March 15.
Figs:	Fresh Fruit -- June 5 to October 15. Canning -- August 1 to October 15. Dried -- California, June 20 to October 31.
Grapes:	Fresh Fruit -- California, May 25 to April 30; Arizona, June 5 to July 15; All other States, July 10 to October 31. Crushed for Juice, Wine and Brandy -- August 1 to December 15. Dried for Raisins -- California, September 1 to May 30.
Kiwifruit:	November 1 to April 30.
Nectarines:	June 10 to August 31.
Olives:	September 25 to March 15.
Papayas:	January 1 to December 31. (Peak harvest May 15 to July 15 and September 15 to December 15).

^{1/} See footnote at end of table.

Fruits (Noncitrus): Marketing Seasons for Specified Crops--continued 1/

Peaches: **Fresh Fruit** -- Georgia and South Carolina, May 20 to August 31; Other South Atlantic States, South Central States, and California, June 1 to September 30; New England States, New York, Michigan, and Idaho, August 1 to September 30; all other States, July 1 to September 30.

Canning -- California, July 1 to September 10.
 Dried -- California, August 1 to October 10.

Pears: **Fresh Fruit** -- California, July 1 to April 30; Washington and Oregon, August 10 to May 31; Other States, July 1 to December 15.

Canning and Dried -- California, Washington and Oregon, August 1 to November 30.

Pineapples: January 1 to December 31. (Peak harvest March 1 to July 31).

Pomegranates: September 15 to November 10.

Plums: **Fresh Fruit** -- California, May 25 to September 30.
 Canning -- California, June 1 to September 30.

Prunes: **Dried** -- California, August 1 to April 31.

Prunes and Plums: **Fresh Fruit and Canning** -- Idaho, Michigan, Oregon and Washington, August 10 to October 20.

1/ See footnote at end of table.

Tree Nuts ^{1/}

Almonds:	August 5 to November 15.
Filberts: (Hazelnuts)	October 1 to September 30.
Macadamia Nuts:	January 1 to December 31 (Peak harvest August 1 to December 31).

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, USDA, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

Statistical Bulletins may be obtained in hard copy or on diskette by calling the ERS-NASS order desk toll free at, **1-800-999-6779** (weekdays 8:30 a.m.-5:00 p.m. ET) or by mail from ERS/NASS, 341 Victory Drive, Herndon VA 22070.

Bulletins cost \$10.00 each for paper products or diskettes. The bulletins will also be available on Internet through the Mann Library at Cornell University (gopher usda.mannlib.cornell.edu 70).
