## Digest

**Exports Steady in 1991** (see p. 2). There was little change in the value of U.S. agricultural exports in CY 1991. At \$39.2 billion, exports were \$200 million lower than in 1990. Exports rose for most products, but a 14-percent decline in grain shipments more than offset other gains. Grain exports fell \$1.6 billion as wheat prices and corn volume declined. Exports increased for most high-value products (HVP), and total HVP shipments rose \$1.5 billion to a record \$21.2 billion.

**Calendar Year 1991 Imports Total \$22.7 Billion** (see p. 5). Agricultural imports for 1991, at \$22.7 billion, were the same as 1990. Meats, fruit, vegetables, coffee, and cocoa were the top five imported commodities. Meat products, fruit, and vegetables were the leading imports, as they have been since 1985.

**U.S. Agricultural Exports to Major Markets Recede in FY 1991** (see p. 6). U.S. agricultural exports to major markets totaled \$37.6 billion in FY 1991, down from \$40.2 billion. Japan was the top market again, followed by Canada, Mexico, South Korea, the former Soviet Union, Taiwan, the Netherlands, and Germany. Sixty-two percent of U.S. agricultural exports went to these eight countries in 1991. Feed grains and products led in export value, followed by soybeans and products, live animals and meat, and wheat and products.

### Correction

Please note the following changes to the November/December 1991 segment of the Foreign Agricultural Trade of the United States. On page 1, in "Exports Stall in FY 1990 After 3-Year Climb," the last sentence should be: Exports under these programs represented about 10 percent of the \$40.3 billion in total U.S. agricultural exports.

On page 7, the second sentence in the first paragraph should be: Exports under these programs, valued at \$4.07 billion, represented about 10 percent of the \$40.3 billion in total agricultural exports.

## Exports Steady in 1991

There was little change in the value of U.S. agricultural exports in 1991. At \$39.2 billion, exports were \$200 million lower than in 1990. Exports rose for most products, but a 14-percent decline in grain shipments more than offset other gains. Grain exports fell \$1.6 billion as wheat prices and corn volume declined. Cotton exports also fell, down \$303 million.

Exports increased for most high-value products (HVP), and total HVP exports rose \$1.5 billion to a record \$21.2 billion. HVP export gains were led by meat's \$296-million jump. Although Japan remained by far the largest market for the United States, Mexico and Canada accounted for much of the increase. In contrast to previous years, meat exports to Japan fell slightly in 1991. Exports to Japan fell in the months following its April 1991 transition from quotas to tariffs. Under a 1988 U.S.-Japanese agreement, Japan progressively raised its beef import quotas and then replaced them with progressively falling tariffs. Before April 1991, Japanese buyers increased stocks in anticipation of the first year's 70-percent tariff, and stocks remained high for much of the year after April. In April 1992, Japan is scheduled to reduce its tariff on beef imports to 60 percent, and a decline to 50 percent is scheduled the following year.

Meat exports to Mexico rose from \$227 million to \$415 million in 1991, an 83-percent gain. To encourage foreign investment and the repatriation of domestic capital, Mexico has liberalized its import regime in recent years. This, combined with strong economic growth, has boosted sales of U.S. HVP.

Exports to Canada rose due in part to the strength of the Canadian dollar on foreign exchange markets. Canada maintained real interest rates above those in the United States during much of 1991, sustaining its currency on foreign exchange markets. Favorable exchange rates encouraged U.S. exports of meat and other HVP to Canada.

## Grains Drive Bulk Exports Lower

Bulk exports fell despite a large increase in shipments of soybeans. A substantial decline in Brazil's 1990/91 soybean crop reduced the availability of competing soybeans and soybean meal. The volume of U.S. exports rose more than 2 million tons and export value climbed \$406 million. This was the largest increase of any U.S. agricultural export during 1991. However, there was little change in shipments to the European Community (EC), the largest market for U.S. soybeans. Instead, shipments to Mexico rose \$140 million, shipments to the former USSR climbed more than \$100 million, and shipments to Taiwan and South Korea together rose more than \$200 million.

Grain exports fell as prices weakened for wheat and volume declined for corn. Record foreign production of wheat helped reduce the average price of U.S. wheat exports from \$140 per ton to \$106 per ton in 1991. Lower prices more than offset a 3.5-million-ton increase in volume, and the value of wheat exports fell \$466 million.

Lower corn prices also contributed to lower export value for U.S. corn in 1991, but a decline in export volume accounted for most of the reported \$1.1-billion drop. Shipments declined from 52 million tons to 44.4 million tons. Exports to the former USSR rose from 9 million to 11 million tons, and shipments to Japan, the largest market for U.S. corn, fell only 344,000 tons to 13.7 million tons.

However, shipments to Mexico declined more than 2 million tons, and shipments to Korea fell nearly 3.5 million tons. The United States exported only 572,000 tons of corn to Eastern Europe compared with 2.6 million tons in 1990. Improved harvests in Mexico and Eastern Europe accounted for much of the decline there, and increased competition from feeding-quality wheat and Chinese corn accounted for much of the decline in shipments to Korea. ## Calendar Year 1991 Imports Total \$22.7 Billion

Agricultural imports for 1991, at \$22.7 billion, were the same as 1990. Meats, fruit, vegetables, coffee, and cocoa were the top five imported commodities. Meat products, fruit, and vegetables were the leading imports, as they have been since 1985. Meat imports, nonetheless, fell 2 percent. Beef and veal, the largest imported commodities in this category, rose 5 percent, but pork fell 15 percent.

Banana and plantain imports, which constituted 43 percent of all fruit imported in 1991, rose 7 percent. The greatest increase, however, occurred among citrus fruits. While they made up just 3 percent of all fruit imported, citrus imports rose 176 percent to make up for losses caused by a freeze in California. Melon imports also increased, while grapes, the second largest fruit import, fell 10 percent.

Orange juice imports declined to \$295 million after having reached \$641 million in 1990. The rebound of the Florida processing-orange crop from the 1989 freeze reduced the demand for orange juice imports and brought down its unit value. Imports of other fruit juices rose both in volume and value. The value of vegetable imports declined in 1991, mostly due to a fall in unit value of some of the major commodities. While the quantity of tomatoes, the highest value vegetable import, remained the same at 361,000 metric tons, value dropped 31 percent from \$378 million to \$260 million. Peppers, eggplants, and olives also had lower unit values in 1991, but lettuce and cucumbers showed increases.

Tobacco imports rose to their highest value in 5 years. At \$736 million, tobacco imports were 26 percent higher than in 1990 and at least 17 percent higher than in any year since 1986. (Susan Pollack, Commodity and Trade Analysis Branch, 202-219-0822)

## **U.S. Agricultural Exports to Major Markets Recede in FY 1991**

U.S. agricultural exports totaled \$37.6 billion in FY 1991, down from \$40.2 billion. Japan was the top market again, followed by Canada, Mexico, South Korea, the former Soviet Union, Taiwan, the Netherlands, and Germany. Sixty-two percent of U.S. agricultural exports went to these eight countries in 1991. Feed grains and products led in export value, followed by soybeans and products, live animals and meat, and wheat and products.

Japan, which bought 20 percent of total U.S. agricultural exports in FY 1991, the same share as the 1987-90 average, qualifies easily as the leading customer for U.S. farm exports. Japan's 1991 purchases were 175 percent of the value shipped to Canada, the second leading importer of U.S. farm products. U.S. exports to Japan reached or exceeded \$1.5 billion for feed grains and for live animals and meat; \$500 million each for soybeans, fruit, and cotton; and \$250 million each for wheat, feeds and fodders, vegetables, tobacco, and hides and skins.

Japan's 1991 purchases of U.S. agricultural products totaled over \$7.7 billion, down from \$8.2 billion, but still above the 1987-90 average of \$7.3 billion. Japan was either the first- or second-ranked market for each major commodity group (exports totaling \$1 billion or more). Japan increased its imports of U.S. fruit and preparations from \$526 million in 1990 to \$597 million, and U.S. vegetables and preparations from \$328 million to \$362 million. However, Japan's imports of U.S. feed grains declined from \$2 billion to \$1.7 billion, and imports of U.S. soybeans slipped from \$849 million to \$809 million, reflecting both lower prices and reduced volume in 1991.

Canada took 12 percent of U.S. exports in 1991, up from an average 7 percent during 1987-90. Canada's purchases of U.S. agricultural products (as revised) increased by nearly \$700 million to \$4.4 billion. The rise largely reflects implementation in January 1990 of a new export-reporting method with

Canada, which corrects a longstanding under-reporting problem. Canada is the top market for U.S. vegetable, fruit, and peanut exports and the second-ranked market for feeds, fodders, and poultry.

Mexico advanced from the fifth largest market for U.S. exports in 1990 to third in 1991, with \$2.9 billion in value, mainly because of increased imports of U.S. soybeans and live animals and meat. Cattle and meat imports were boosted to compensate for production and marketing problems in southern Mexico. Also, ranchers in northern Mexico had sold to U.S. feedlots instead of Mexican feedlots, which cut the Mexican beef supply. Mexico remained the top market for U.S. exports of fats, oils, greases, and dairy products and became the second largest market for U.S. live animals and meat.

South Korea purchased \$2.2 billion in U.S. agricultural exports, a drop from \$2.7 billion and below the \$2.3-billion average for 1987-90. However, South Korea remained the top market for U.S. hides and skins and the second largest market for U.S. raw cotton exports. South Korea was the third largest market for exports of U.S. fats, oils, and greases for 1987-90.

The former Soviet Union's purchases of U.S. agricultural exports declined by 42 percent (from \$3 billion to \$1.8 billion). As a result, that country slipped from third to fifth place in 1991 as its imports of U.S. grains declined. The former Soviet Union, however, was still the second largest market for U.S. feed grain exports. U.S. feed grains, wheat, and soybeans constituted over 90 percent of U.S. exports to the Soviet Union in 1991 as well as during 1987-90.

Taiwan, at \$1.7 billion, down from \$1.8 billion, was the fourth largest market for U.S. feed grains, soybeans, and hides and skins, and the fifth-ranked market for U.S. fruit and vegetables. Taiwan was the third largest U.S. market for hides and skins for 1987-90.

The Netherlands, the initial destination for \$1.6 billion of U.S. exports in 1991, was the second largest market for U.S. soybeans, the

third largest for tobacco, and the fifth largest for feed grains. Many of these exports were forwarded to other destinations. The Netherlands was the leading initial destination for U.S. peanut exports during 1987-90.

Germany took \$1.1 billion of U.S. exports, maintaining its position as the top market for U.S. tree nut exports and the second largest market for unmanufactured tobacco in 1991. It is also a major market for exports of U.S. soybeans, cotton, fruit, vegetables, and hides and skins.

Feed grains, soybeans, and live animals and meat led U.S. commodity exports in 1991, followed by wheat, cotton, vegetables, fruit, tobacco, hides and skins, feeds and fodders, and poultry and products. Feed grains, soybeans, and wheat made up 39 percent of U.S. agricultural export value in 1991 and 49 percent during 1987-90. Feed grains and products accounted for 18 percent (\$6.8 billion) of the value in 1991 and 20 percent during 1987-90. Japan, traditionally the largest market, took 25 percent of U.S. feed grain exports during 1991 and 1987-90. The former Soviet Union was the second largest market in 1991 and during 1987-90.

Soybeans and products made up 12 percent (\$4.7 billion) of total U.S. agricultural export value in 1991 and averaged 17 percent during 1987-90. Japan and the Netherlands (the largest customers) received 17 and 10 percent, respectively, of U.S. soybean exports in 1991. The Soviet Union increased its purchases of U.S. soybeans and products by 19 percent, moving into third place and pushing Taiwan back to fourth.

Japan took 45 percent of the \$3.3 billion of live animals and meat the United States exported during 1991 and 52 percent in 1987-90. Mexico and Canada led the other customers with 16 percent each in 1991. Both boosted their imports of U.S. live animals and meat more than \$150 million.

Wheat and wheat products made up 8 percent (\$3.1 billion) of all U.S. agricultural commodity exports during 1991 and, in 1987-90, furnished 13 percent of total export value. In 1991, Japan reduced purchases of

U.S. wheat, but became the leading U.S. wheat market because the Soviet Union, China, and Egypt all cut back purchases substantially. During 1987-90, the Soviet Union and China were the top markets for U.S. wheat, taking 14 and 13 percent, respectively.

Cotton constituted 7 percent (\$2.6 billion) of U.S. commodity exports in 1991 and 6 percent during 1987-90. Japan and South Korea remained the leading markets, together taking 36 percent of U.S. cotton exports while trimming their purchases 8 percent from 1990. Although U.S. cotton exports were down from 1990, they exceeded the \$2.1-billion average for 1987-90.

Exports of vegetables and preparations rose to more than \$2.5 billion in 1991 after averaging \$1.5 billion per year during 1987-90. Canada remained the leading customer in 1991, purchasing 39 percent. Japan maintained its traditional second place in this market. South Korea rose from 12th in 1990 to 8th in 1991 by increasing its imports by \$21 million to \$44 million. Rising per capita incomes and less restrictive import policies contributed to the growth in South Korea's imports.

Exports of fruit and preparations increased \$236 million to \$2.4 billion. Fruit makes up 6 percent of U.S. commodity exports, rising from 5 percent during 1987-90. Canada took 34 percent of these U.S. exports in 1991, followed by Japan, Hong Kong, the United Kingdom, and Taiwan.

Around 20 percent of the \$1.5 billion of U.S. unmanufactured tobacco exports went to Japan and 16 percent to Germany, comparable to their shares during 1987-90. Turkey advanced from the 14th largest U.S. market in 1990 to 7th in 1991 by more than doubling its value of U.S. tobacco exports from \$30 million to \$62 million. Turkey expanded its tobacco-processing facilities and boosted its manufactured tobacco exports, thus increasing its demand for tobacco imports.

Pacific rim markets of South Korea, Japan, and Taiwan together purchased 75 percent of

the \$1.5 billion of U.S. exports of hides and skins in 1991 and 71 percent during 1987-90. South Korea bought over 40 percent of these U.S. exports in 1991, followed by Japan, Mexico, Taiwan, and Canada. Switzerland increased its imports of U.S. hides and skins by \$2.5 million and advanced from the 15th largest market in 1990 to 10th.

Among commodity exports that changed significantly from 1990, vegetables gained 25 percent and live animals and meat rose 18

percent. Export increases among these commodities mirrored a 40-percent rise in sales to Canada, mainly because of the new reporting method. Live animal and meat exports were also aided by a \$232-million increase in sales to Mexico. Exports of U.S. feed grains fell 25 percent, led by a 47-percent cut in exports to the Soviet Union. Exports of U.S. wheat dropped 30 percent, also led by declines in Soviet purchases that shrank 64 percent. (Cecil W. Davison, Crops Branch, 202-219-0840)

## Reports you can use . . . from ERS

### ***U.S. Agricultural Trade Update***

gives you up-to-the-minute information.

Each month the *U.S. Agricultural Trade Update* brings you ERS' most up-to-the-minute data on the farm trade sector. This useful 6-page update brings you the most current figures, *delivered by first-class mail to ensure timely delivery.*

The *U.S. Agricultural Trade Update* covers the monthly farm trade balance, U.S. farm imports and exports by quantity and value, and leading exports and exporters.

A 1-year subscription to the *U.S. Agricultural Trade Update* costs just \$15. Or save by ordering a 2-year subscription (that's 24 issues) for \$29, or a 3-year subscription for \$42.

### ***Situation and Outlook Agricultural Trade Reports***

give you the facts . . . and the forecasts!

These reports provide both current intelligence and historical data on international food and agricultural developments. They also forecast how changes in conditions and policies around the world will affect both U.S. and international agriculture.

***Outlook for U.S. Agricultural Exports*** offers the latest value and volume of U.S. farm exports, by commodity and region, as well as the agricultural trade balance, import commodities, and export outlook. Subscription includes 4 issues. ***Agriculture and Trade*** reports summarize the year's developments affecting U.S. agriculture and trade in five key regions, and look to the future with articles on market trends, trade, and policy (subscription includes 5 regional reports: USSR, China, Western Europe, Pacific Rim, and Developing Economies).

The cost is just \$12 for a 1-year subscription per title. Or save by ordering a 2-year subscription for \$23, or a 3-year subscription for \$33.
