SPECIAL NOTICE

This statistical report presents tables showing current and historical data on U.S. foreign trade in agricultural products. Commodity and country information is for the most recent 2-year period. Statistics for fiscal year 1986 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture, such as fibers, raw hides and skins, fats and oils, beer, and wine, that have not passed through complex processes of manufacture. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

Trade statistics on selected nonagricultural product totals are presented at the end of the commodities groups tables, including fertilizer, fish, agricultural chemicals, farm machinery, and manufactured tobacco.

Exports

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Bureau.

Export data include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price including inland transportation, insurance, and other costs. Agricultural exports have been adjusted for transshipments through Canada based on information provided by the Federal Grain Inspection Service.

Agricultural exports under Government-financed programs (table 13) include shipments under Public Law (P.L.) 480 programs, authorized by P.L. 83-480 as amended, Agency for International Development (AID) programs, authorized by P.L. 82-165, 83-665, and 87-195 as amended, and Section 416 of the Agricultural Adjustment Act of 1949, as amended by the Agricultural Programs Adjustment Act of 1984. Commercial exports include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of extension of credit guarantees for relatively short periods repayable in dollars plus interest. Apparent excesses of exports under Government programs over total exports, which result in negative values in the column "Agricultural exports outside Government programs," represent lags in reporting, differences in valuation procedures, or recording the export as destined for the country through which a transshipment occurred.

Imports

Import data are "imports for consumption," which include entries for immediate consumption and withdrawals from Customs warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.

^{1/} Preliminary.

^{2/} Negative values in the "commercial" column indicate an excess of Government programs over total exports attributed to reporting lags, classification differences, or transshipments through other countries.
