1. The first part of the report is a general
description of the area. It includes a map
of the area and a description of the
geography, climate, and population.
2. The second part of the report is a
description of the economic activities in the
area. It includes a description of the
agriculture, industry, and commerce.
3. The third part of the report is a
description of the social conditions in the
area. It includes a description of the
education, health, and housing.

11

4. The fourth part of the report is a
description of the political conditions in the
area. It includes a description of the
government, the law, and the political
parties.
5. The fifth part of the report is a
description of the cultural conditions in the
area. It includes a description of the
religion, the arts, and the customs.
6. The sixth part of the report is a
description of the future of the area. It
includes a description of the plans for
development and the expected results.

DIGEST

U.S. Agricultural Exports Down (*see p. 2*). U.S. agricultural exports fell to \$12.1 billion in the first 5 months of fiscal year (FY) 1987, 5 percent below those of the same months of 1986. Grain shipments, especially corn to the USSR, for the October 1986-February 1987 period accounted for most of the decline. However, increases for cotton, fruits and vegetables, livestock products, and animal feeds offset much of the fall in grain exports.

U.S. Agricultural Imports Unchanged From Last Year (*see p. 70*). Reduced demand, the falling value of the dollar, and higher seasonal domestic supplies held U.S. agricultural imports in the first 5 months of FY 1987 at their year-earlier level of \$8.6 billion. Competitive imports rose slightly over those of the same period of 1986, while noncompetitive imports dropped 7 percent to \$2.9 billion.

Prices of International Significance (*see p. 114*). Sharply lower coffee values, following a year of record-high prices for short Brazilian supplies, dominated February's price changes. Now that the current ample crop is becoming available, coffee prices have fallen for 3 consecutive months.

California Still Top Agricultural Export State (*see p. 118*). California maintained its position as leading export State in FY 1986 because of continued declines in exports from the large grain-producing States and a stronger horticultural sector. Agricultural exports from California dropped less than those from Iowa, Texas, North Dakota, and Minnesota.

Ranking of Major Agricultural Exporters Changes (*see p. 130*). The United States, France, and The Netherlands remained the top three agricultural exporters during 1979-85. Brazil fell from fourth place in 1983-84 to fifth place (behind West Germany) in 1985. Argentina fell from 9th place in 1980-84 to 11th place in 1985. Although the United States has remained the top agricultural exporter, its world market share fell from 18 percent in 1983-84 to 14.8 percent in 1985.

Prepared by the International Economic Indicators Branch, International Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were C. Edward Overton, Thomas A. Warden, and Mary L. Fant. Denise Morton provided word processing and table formatting support. Editorial support was provided by Linda L. Hatcher, Research Information Branch, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

U.S. AGRICULTURAL EXPORTS DOWN

U.S. agricultural exports fell to \$12.1 billion in the first 5 months of fiscal year (FY) 1987, 5 percent below those of the same months of 1986. Volume for the October 1986-February 1987 period fell 5 percent to 52 million tons. Grain and feed exports, with the largest declines, fell \$1.3 billion and 4.5 million tons. Corn exports alone dropped \$1.1 billion. Exports rose, however, for cotton, horticultural goods, livestock products, and some grain products, including barley and corn gluten feed.

Export values by major destinations, except for those to the USSR, changed little in the 5-month period. While U.S. agricultural exports to Canada, the Middle East, and China rose slightly over those of the previous year, exports to the USSR fell 98 percent to \$13 million. More intensive use of technology, changes in procurement prices and specifications, and good weather led to a Soviet grain crop of 210 million tons last year, the best harvest since 1978/79. Furthermore, the pattern of Soviet grain purchases in the first part of the year shifted away from the United States to other suppliers. Although the Soviets bought 1 million tons of U.S. corn in February, none had been exported by February's end, and the Soviets bought no U.S. wheat between November 1985 and February 1987.

U.S. coarse grain exports fell from 22.5 million tons in the first 5 months of FY 1986 to 17.7 million tons in the same months of 1987, with shipments to the USSR falling from 5.8 million tons to zero. Coarse grain exports to Spain and Portugal fell from 2 million tons to 272,000 tons. Exports to the middle-income countries of East Asia rose, and increased barley sales to Saudi Arabia under the Export Enhancement Program (EEP) sharply boosted coarse grain sales to the Middle East.

U.S. wheat exports fell from 10 million tons in the first 5 months of FY 1986 to 9 million tons in the same months of 1987. However, wheat flour exports rose from 393,000 tons to 508,000 tons due to increased concessional shipments. Wheat and flour exports fell \$407 million below year-earlier values, primarily due to lower prices.

Corn Gluten Exports Strong

Exports of non-oilcake feeds and fodders in the first 5 months of FY 1987 rose \$150 million over those of the same months of 1986. Composed mostly of corn gluten, feed and fodder exports in the first 5 months of FY 1987 climbed 28 percent over those of the same months of 1986 compared with a 20-percent rise in FY 1986 over those of the same months in 1985.

Most feed and fodder exports go to the European Community (EC) where import levies increase grain costs, encouraging substitution with such products as corn gluten feed and citrus pulp pellets. Nongrain feed use in the EC has been growing in recent years, and feed and fodder exports to the EC rose to 3.3 million tons in the first 5 months of FY 1987. Exports to the EC were also boosted by the accession of Spain and Portugal and by concerns that the EC might impose prohibitive duties on imported corn gluten. Feed and fodder exports to Japan rose from 423,000 tons in the 5-month period of FY 1986 to 609,000 tons in the same months of 1987.

Oilseed Exports Steady

U.S. exports of oilseeds and products changed little in the first 5 months as falling prices offset higher volume. Exports of oilseeds and products remained at \$3.2 billion. Reduced availability in the Southern Hemisphere following a drought-affected crop in Brazil the previous year sustained export volume of soybeans and soybean meal. However, vegetable oil exports dropped 36 percent as foreign competition continued strong and vegetable oil prices fell more than \$100 per ton.

Horticultural product exports in the first 5 months gained 20 percent over the previous year's value to \$1.5 billion due to declining dollar exchange rates and shipments under the Targeted Export Assistance program (TEA). TEA helped boost exports of apples, grapefruit, walnuts, raisins, and frozen potatoes.

Export values for animals and products in the first 5 months advanced 12 percent over those of the same months of 1986 to more than \$2 billion, with gains in beef, poultry meat, eggs, cattle hides, fur pelts, and wool. Red meats and poultry products benefited from shipments under TEA, EEP, and the Dairy Termination Program. (*Stephen MacDonald, International Economic Indicators Branch*)

U.S. AGRICULTURAL IMPORTS UNCHANGED FROM LAST YEAR

Reduced demand, the falling value of the dollar, and higher seasonal domestic supplies held U.S. agricultural imports in the first 5 months of (FY) 1987 at their year-earlier level of \$8.6 billion. Competitive imports for the October 1986-February 1987 period rose slightly over those of the same period of 1986, while noncompetitive imports dropped 7 percent to \$2.9 billion due to lower imports of coffee, cocoa, and tea.

Competitive agricultural imports rose 4 percent to \$5.7 billion due to larger imports of cattle, beef, pork, grains, fruits, vegetables, tobacco, and malt beverages. U.S. agricultural imports from developing countries declined to \$4.8 billion in the 5-month period, 3 percent below those of the same months of 1986. Canada replaced Brazil as the leading U.S. agricultural supplier. Imports from Canada gained 8 percent to \$860 million, mainly because of higher values for pork, grain, and malt beverages. Imports from Brazil dropped 19 percent to \$749 million, mainly due to lower values for coffee, sugar, and orange juice. Imports from Mexico rose 14 percent to \$820 million because of increases in cattle, fresh fruits and vegetables, and malt beverages.

Competitive Import Values Increase Slightly

Beef imports in the first 5 months of FY 1987 increased 9 percent in value over those of the same months of 1986 to \$555 million as volume grew 4 percent and unit values gained. Australia and New Zealand shipped most of the beef. Pork imports, mostly from Canada and Denmark, gained 30 percent in value to \$478 million as U.S. supplies tightened and prices rose.

Due to substantial gains from Mexico, U.S. live cattle imports in the first 5 months of FY 1987 rose to 867,000 head valued at \$253 million from 658,000 head valued at \$216 million in the same period of 1986. Only 71,000 head of Canadian cattle entered U.S. markets in the 5-month period, down from 1986's 132,000 head.

U.S. dairy product imports in the first 5 months rose 4 percent over year-earlier levels to \$368 million due to larger casein imports and higher cheese prices. Cheese import values rose nearly 2 percent to \$183 million, and volume dropped 6 percent to 59,000 tons. Average import unit prices for cheese gained 10 percent to \$1.41 a pound. Western Europe provided 78 percent of the volume of U.S. cheese imports compared with 70 percent in the same period of 1986.

Imports of vegetables and preparations rose sharply in the first 5 months, with value up 7 percent over those of the same months of 1986 to \$650 million. Import unit prices fell about 17 percent, however. Lower prices for fresh tomatoes, cucumbers, peppers, and eggplant held the import value of vegetables from Mexico to \$255 million. Tomatoes, accounting for 35 percent of the volume of U.S. vegetable imports from Mexico, almost doubled to 210,000 tons valued at \$87 million. Fresh potato imports from Canada nearly doubled to 110,000 tons worth \$23 million.

U.S. fruit imports in the 5-month period gained 9 percent over year-earlier values to \$663 million, led by increases in fresh grapes from Chile and melons and strawberries from Mexico. Imports of concentrated orange juice from Brazil declined in value, while those of apple juice gained.

Grain and feed imports in the first 5 months of FY 1987 gained 9 percent over year-earlier levels to \$308 million, mainly because of increases in wheat and oats from Canada. Tobacco imports jumped 13 percent in value, chiefly due to larger inflows of oriental leaf from Turkey.

Continued strong demand boosted malt beverage imports 15 percent over year-earlier levels to \$293 million. Wine volume, however, dropped 28 percent as the U.S. dollar depreciated against Western European currencies and shipments from Italy declined. The Netherlands, Canada, and West Germany are the major suppliers of malt beverages, with France and Italy providing most of the wine.

Sugar imports in the first 5 months of FY 1987 dropped \$42 million from the year-earlier value to \$241 million, and volume dropped 13 percent to 697,000 tons. The decline stemmed from weak consumer demand, a larger U.S. sugar beet crop, increased use of corn sweeteners, and sharp cuts in import quotas. The Dominican Republic, the largest U.S. sugar supplier, provided 21 percent of the volume of U.S. sugar imports in the 5-month period compared with 10 percent in the same months of 1986. Volume dropped from most major suppliers, especially the Philippines, Brazil, Colombia, and Australia.

Vegetable oil imports fell to \$188 million in the first 5 months of FY 1987, 29 percent below year-earlier values, because of import cuts in coconut and palm kernel oils. Coconut oil imports dropped 55 percent in value to \$48 million. Volume also declined sharply to 196,000 tons, with import unit prices plunging almost 49 percent. The Philippines supplied most of the coconut oil, with Malaysia providing the bulk of the palm oil. Olive oil imports gained substantially in the first 5 months, with Italy providing 62 percent of U.S. import volume.

Noncompetitive Import Values Down Sharply

Noncompetitive imports in the first 5 months of FY 1987 fell to \$2.9 billion, 7 percent below those of the same months of 1986. Imports of coffee, cocoa, and tea declined. Coffee import values fell more than \$200 million to \$1.5 billion, and volume declined 20 percent to 428,000 tons. Average U.S. wholesale prices for Brazilian coffee declined from \$2.26 a pound in February 1986 to an average of \$1.20 a pound in February 1987. Sharp declines in world coffee prices resulted from lagging import demand, improved prospects for Brazil's 1987/88 coffee crop, and large roaster stocks. The major suppliers were Colombia, Brazil, Mexico, Guatemala, Ecuador, Indonesia, Costa Rica, and Peru.

Lower prices for cocoa beans and reduced shipments from Ecuador reduced U.S. imports of cocoa and products 14 percent in value to \$480 million. Volume dropped 4 percent to 217,000 tons, and import unit prices declined 10 percent to \$1 a pound. The New York cocoa futures price averaged 96 cents a pound in February 1986, but increased world supplies reduced the price to 85 cents a pound during February 1987. Principal cocoa suppliers were the Ivory Coast and Brazil.

U.S. banana import volume in the 5-month period changed little from the 1.3 million tons of a year earlier. Larger imports from Ecuador, Colombia, and Guatemala offset reduced shipments from Costa Rica and Panama. Value totaled \$319 million as import unit prices gained slightly to \$249 a ton.

Spice imports in the first 5 months jumped 20 percent in value over those of the same months of 1986 to \$138 million, due mainly to higher black pepper prices. Volume rose 12 percent to 42,000 tons. Indonesia, Brazil, and India shipped most of the spices. (*Charles E. Goode, International Economic Indicators Branch*)

PRICES OF INTERNATIONAL SIGNIFICANCE

Coffee prices have been falling for 3 months as prospects for a rebounding crop in Brazil, the world's largest coffee producer, have firmed. Brazil's production fell to 16 million bags in marketing year 1986/87 but are forecast to return to 33 million bags in 1987/88. A normal crop in Brazil assures adequate supplies and would normally signal the reintroduction of export quotas by the International Coffee Organization (ICO). However, producers disagree on whether to return to the predrought distribution of quotas or whether to redistribute the quotas based on more current shares of world production and stocks.

In February, member-nations of the ICO met to negotiate quota policy. However, confusion among producing nations and a growing reluctance by consuming nations to endorse potentially unworkable commodity agreements had a price-depressing effect.

Cocoa prices also fell as markets anticipated a third consecutive year of surplus production. Stagnant or falling consumption further aggravated the global supply-demand imbalance. For instance, purchases by the USSR are reportedly lower because of hard currency shortages in the wake of falling petroleum prices in Western Europe. The United Nations' Conference on Trade and Development introduced a new International Cocoa Agreement (ICA) in January, but support prices will not be set until members agree on buffer stock mechanisms. No agreement on buffer stocks had been finalized as of the end of February, although the ICA was accepted in July 1986.

World sugar prices, in contrast to those of coffee and cocoa, rose about 50 percent in calendar year (CY) 1986 and have continued rising in 1987. World sugar supply and demand have recently become much more closely matched after years of surplus. Poor crops and increased consumption may even lead to temporary imports by Brazil and Cuba, two important producers. However, U.S. prices were generally steady in 1986; U.S. prices are insulated from world prices by programs such as the sugar import quota. U.S. prices rose slightly at the end of CY 1986 when import quotas for 1987 were cut 40 percent. (Stephen MacDonald, *International Economic Indicators Branch*)

CALIFORNIA STILL TOP AGRICULTURAL EXPORT STATE

California was the largest agricultural exporting State for the second consecutive year in fiscal year (FY) 1986 (October 1985–September 1986). After replacing perennial leaders Illinois and Iowa for the first time in FY 1985, California again ranked number one in FY 1986 because of continued declines in exports from the large grain-producing States. U.S. farm exports fell 16 percent in FY 1986, from \$31.2 billion to \$26.3 billion, following an 18-percent decline in FY 1985.

California's agricultural exports fell from \$2.7 billion to \$2.4 billion in FY 1986. Fruits (\$739 million), nuts (\$466 million), and vegetables (\$416 million) accounted for 67 percent of the State's exports. Among California's other revenue earners were cotton (\$160 million), wheat (\$124 million), and rice (\$77 million).

Other top-10 exporters included Illinois (\$2.2 billion), Iowa (\$2.1 billion), Kansas (\$1.5 billion), Nebraska (\$1.5 billion), Texas (\$1.5 billion), Minnesota (\$1.3 billion), Indiana (\$1.1 billion), North Dakota (\$1.0 billion), and Ohio (\$1.0 billion). The only other time that Texas was lower than fourth was in 1975, when it was fifth.

Iowa, Texas Most Affected

The \$11.7-billion decline in U.S. agricultural exports between FY 1984 and FY 1986 was not evenly divided among States or commodities. Both feed grain and wheat exports fell 48 percent; cotton, 71 percent; soybeans and products, 26 percent; and rice, 28 percent. These five groups combined accounted for \$11.5 billion, or 99 percent, of the decline over the 2-year period. The States most seriously hurt by the drop were Iowa (–\$1.22 billion), Texas (–\$1.12 billion), North Dakota (–\$890 million), Minnesota (–\$816 million), and Illinois (–\$777 million). These States accounted for \$4.8 billion of the decline, or about 41 percent.

Methodology

Agricultural export estimates by State are based on the assumption that if a State contributes a certain percentage of U.S. production of a given commodity, it receives the same percentage in export revenues. Additional information, if it exists, such as estimated feed use by State, wheat shipments by type, and customs data by port of export, is incorporated into the estimating procedure when the benefits of improved accuracy outweigh the costs of increased computations. State export shares for FY 1984 and 1985 have been revised, primarily because of changes in production statistics. (Stephen R. Milmo, *International Economic Indicators Branch*)

RANKING OF MAJOR AGRICULTURAL EXPORTERS CHANGES

Although the ranking of the world's 10 leading agricultural exporters has remained stable since calendar years 1979-80, the relative importance of the major exporters has changed significantly. Supply and price changes in particular commodities and countries coupled with slowing world import demand have caused the change. Brazil, for example, fell from fourth largest exporter in 1983-84 to fifth place (behind West Germany) in 1985, primarily because of falling export values for coffee and soybean products. Argentina fell from 9th place (ahead of Belgium-Luxembourg and Italy) in 1980-84 to 11th place in 1985 because of falling values for grain and soybeans (table 21). Although the United States has retained its position as the world's leading agricultural exporter over the past 8 years, it has yielded some of its dominant world market share to the European Community (EC) countries of France, The Netherlands, West Germany, United Kingdom, Belgium-Luxembourg, and Italy. These countries increased their combined market share from an average of 28 percent in 1979-80 to 29.2 percent in 1985.

Export Shares of Major Exporters

The United States increased its market share from 18.1 percent in 1979-80 to 18.7 percent in 1981-82, primarily because of increased export volume in grain and soybeans. However, its market share of world agricultural exports fell to 18 percent in 1983-84 and 14.8 percent in 1985, the lowest market share since 1970-72, because of falling export volume and prices of grains and soybeans. The market shares of France, The Netherlands, and West Germany, the second, third, and fourth leading agricultural exporters, increased during this period. Their combined market share increased from 19.2 percent in 1979-80 to 20.1 percent in 1985.

The EC, excluding Spain and Portugal, as a trading block, was the world's largest agricultural exporter in 1985, with \$69.6 billion in exports. If trade within the EC (intra) is excluded, then the EC, with \$24.3 billion in exports, was the second largest agricultural exporting region in 1985. Agricultural export value for the EC decreased between 1980 and 1985, while its world market share increased. For example, in 1979-80, agricultural export value averaged \$71.1 billion and represented 32.5 percent of world agricultural exports. In 1985, the EC's agricultural exports were \$69.6 billion but represented 33.7 percent of world agricultural trade. The decline in EC export value was concentrated primarily in intra-EC trade because extra-EC trade (exports to non-EC countries) increased from \$23.8 billion in 1979-80 to \$24.3 billion in 1985. Intra-EC trade declined from \$47.4 billion in 1979-80 to \$45.3 billion in 1985.

Major Wheat and Wheat Flour Exporters

The 12 leading exporters of wheat and wheat flour (in wheat equivalents) accounted for about 95 percent of world export volume in 1979-85. The top five exporters (the United States, Canada, France, Australia, and Argentina) accounted for 85 percent of the volume in 1979-84 and 84 percent in 1985. The United States accounted for almost 40 percent of the volume in 1979-80, about 41 percent in 1981-82 (when U.S. exports increased to 45.1 million tons in 1981), and 37.2 percent in 1983-84 because of falling exports. U.S. exports fell from 43.6 million tons to 26.1 million tons between 1984 and 1985, drastically reducing the U.S. share of the world market by 12.4 percentage points to a 15-year low of 24.8 percent in 1985.

Major Corn Exporters

The 12 leading corn exporters in 1979-85 accounted for 97-98 percent of world export volume. The top five countries (the United States, Argentina, France, Thailand, and South Africa) accounted for 94.5 percent of volume in 1979-80 and 92 percent in 1981-82. The top five exporters changed in 1983-85 as drought in South Africa drastically cut back production and exports during this period.

Belgium-Luxembourg replaced South Africa as the fifth leading exporter in 1983-84, and China replaced Belgium-Luxembourg in 1985 with exports of nearly 6 million tons of corn, up from an annual average of 100,000 tons in 1980-83 and 900,000 tons in 1984. The rapid expansion in corn exports made China the third leading corn exporter in 1985, behind the United States and Argentina.

The United States accounted for 78 percent of world corn exports in 1979-80, about 70 percent in 1981-84, and 63.4 percent in 1985. The other top exporters in 1984 (Argentina, France, Thailand, and Belgium-Luxembourg) and 1985 (Argentina, China, France, and Thailand) increased their market shares during these periods of falling world demand.

Major Soybean Exporters

The five leading soybean exporters (the United States, Argentina, Brazil, China, and Paraguay) accounted for about 98-99 percent of world soybean exports in 1979-85. The United States, the world's leading soybean exporter, accounted for 81.5 percent of volume in 1979-80 and 86 percent in 1981-82. But the share fell to 80.5 percent in 1983-84 and 66.3 percent in 1985. Brazil, Paraguay, and China increased their market shares of world soybean exports in 1979-85, while Argentina, like the United States, had a declining market share, except in 1985 when its market share increased to 11.8 percent from 8.6 percent in 1983-84. (*Arthur B. Mackie, Office of the Director*)
