DIGEST

Prices and Volume Strengthen for Bulk Exports (see p. 2). U.S. agricultural export value and volume rose 20 percent during the first 5 months of fiscal year (FY) 1988 (October 1987-February 1988), reaching \$14.5 billion and 63 million tons. Increased wheat exports, primarily through the Export Enhancement Program, larger corn exports, and higher prices helped boost exports \$2.4 billion above those of the same 5 months in FY 1987. High-value product exports rose about \$423 million, a small increase compared with an \$833-million gain for wheat and corn combined and a \$2-billion gain in total bulk product exports.

U.S. Agricultural Imports Increase Slightly (see p. 73). Agricultural import value during the first 5 months of FY 1988 totaled \$8.9 billion, 3 percent above that for the same period of FY 1987. Increased imports of competitive products, such as animal products, horticultural products, beverages, and vegetable oils, more than offset the substantial decline in coffee imports.

U.S. Agricultural Exports From Most States Gain in FY 1987 (see p. 120). Rebounding U.S. agricultural exports boosted the export level from more than 30 States during FY 1987. Increased shipments abroad of soybeans, cotton, livestock products, and fruits and vegetables benefited the States producing those commodities. Conversely, many wheat, feed grain, and tobacco growers received lower export revenues in FY 1987, including growers in Indiana, Illinois, Ohio, Georgia, North Carolina, and Kentucky.

U.S. Export Share of Production Rises to 15 Percent in FY 1987 (see p. 130). The exported share of U.S. agricultural production increased to 15 percent in FY 1987, up from 14 percent in FY 1986. Output fell for most commodities at the same time that exports increased. The farm-to-port price spread, used to derive the farm value of exports, increased from 12.5 percent to 20 percent.

Major Markets for U.S. Agricultural Exports (see p. 133). Japan was the top market for U.S. agricultural exports for the last 5 fiscal years, followed by the Netherlands, Canada, South Korea, the USSR, Mexico, Taiwan, and West Germany. Soybeans and products led U.S. exports, followed by feed grains and products, wheat and products, and cotton and linters.

Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were Thomas A. Warden and Mary L. Fant. Denise Morton provided word processing and table formatting support. Editorial support was provided by Teri L. Davis, Research Information Branch, Information Division, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economics Systems Branch, Data Services Center.

PRICES AND VOLUME STRENGTHEN FOR BULK EXPORTS

U.S. agricultural export value and volume rose 20 percent during the first 5 months of fiscal year (FY) 1988 (October 1987-February 1988), reaching \$14.5 billion and 63 million tons. Increased wheat exports, primarily through the Export Enhancement Program (EEP), larger corn exports, and higher prices for corn and other bulk commodities helped boost exports \$2.4 billion above those of the same 5 months in FY 1987. Export volume grew for most commodities; soybean meal, tobacco, and dried beans were significant exceptions. High-value product exports rose about \$423 million, a small increase compared with an \$833-million gain for wheat and corn combined and a \$2-billion gain in total bulk product exports.

U.S. wheat exports rose 72 percent during the first 5 months of FY 1988, a 6.5-million-ton increase that boosted export volume to 15.5 million tons. Shipments to the USSR rose the most, reaching 4 million tons compared with none in the first 5 months of FY 1987. In the USSR, a dry fall and harsh winter during 1986-87 reduced the quality and size of its crop. Adverse weather also reduced high-quality wheat production in the European Community (EC), leaving the wheat market open for the United States. The United States and the USSR negotiated wheat sales of 6.8 million tons between October 1987 and February 1988, all involving the EEP. The average bonus paid to U.S. exporters was \$35 per ton. The last U.S. wheat sale to the USSR without EEP bonuses occurred in 1985.

Wheat sales to China also rose from nothing during the first 5 months of FY 1987 to 1.6 million tons during the first 5 months of FY 1988. China's wheat purchases rose as it accumulated sufficient foreign exchange and received attractive U.S. EEP offers. China cut its merchandise trade deficit in 1987, increasing its purchasing ability, and grain supplies there became relatively tight. Population growth in China reached a 4-year high in 1987, and income growth remained strong, driving grain consumption higher while production remained below the record-high 407 million tons achieved in 1984.

The EEP also raised exports to Eastern Europe and North Africa. EEP offers accounted for virtually all of the increase in wheat exports in FY 1988 and about 60 percent of U.S. wheat exports. Sales to Western Europe, which do not involve EEP bonuses, fell 130,000 tons to less than 400,000 tons. Japan, Korea, and Taiwan, the major U.S. wheat customers outside the EEP, imported 2.5 million tons of U.S. wheat, about the same amount as during the first 5 months of FY 1987.

U.S. corn exports rose 2.8 million tons as the United States increased its share of world markets. Tighter competitor supplies and more competitive U.S. market prices boosted U.S. exports 20 percent to almost 17 million tons. The United States has not offered corn under the EEP to any customer, including the USSR.

Increased corn consumption in China reduced its exportable supplies in FY 1988; thus, the United States regained market share in Japan and Korea. U.S. sales to Japan rose 1.1 million tons, while sales to Korea rose 560,000 tons, a proportionally larger gain. Larger overall imports, and a greater U.S. share of these imports, boosted U.S. corn exports to Korea. Larger Korean livestock inventories and increased use of locally formulated compound feeds boosted import demand.

U.S. corn exports to the USSR rose 1.7 million tons during the first 5 months of FY 1988, as the timing of Soviet purchases returned to a more normal pattern. Purchases and shipments earlier in FY 1988 may not have reflected increased Soviet import demand because the Soviet 1987-88 coarse grain harvest was one of the largest ever. The USSR typically buys U.S. corn beginning in the fall, but the first FY 1987 purchase for shipment was delayed until January, with shipments beginning in February. Soviet purchases for FY 1988 shipment began in November.

Tighter World Supplies Raise Bulk Prices

Increased corn and wheat together added \$833 million to export value in the first 5 months of FY 1988 compared with the same period in FY 1987, mostly because of increased export volume. The value of most other bulk exports also rose, but volume gains were less notable and prices were significantly stronger. The combined volume of corn and wheat exports rose 40 percent, but average prices for the two grains fell 2 percent. In contrast, the combined volume of rice and soybean exports rose only 6 percent, while prices rose 27 percent and 13 percent. Cotton exports increased 17 percent in volume and 54 percent in price.

Soybean export value grew \$430 million during the first 5 months of FY 1988 as tight stocks in the Southern Hemisphere made the United States virtually the only soybean supplier to world markets during this period. While this condition sustained export volume, lower U.S. stocks drove prices higher.

Although substantially smaller than the year before, U.S. beginning soybean stocks in the first 5 months of FY 1988 still exceeded Argentina's and Brazil's combined total by 11 million tons. U.S. exports to Brazil, the largest U.S. export competitor, doubled compared with those of the same months of FY 1987, reaching 427,000 tons. Exports to the USSR rose from nothing to 568,000 tons. Shipments to Western Europe remained near 6.8 million tons, while shipments to Japan fell slightly to 1.8 million tons.

Rice export value climbed \$67 million as drought-reduced crops in Asia lowered competitor supplies and brought India back to world markets to supplement domestic supplies. In FY 1984, India imported about 850,000 tons of rice, following a 6-million-ton production decline. Production subsequently remained above 50 million tons (milled) in India, and imports never exceeded 10,000 tons during FY's 1985-87. A poor monsoon may have reduced Indian production to below 50 million tons in FY 1987 compared with more than 60 million tons in FY 1986. Drought also cut Thailand's harvest, reducing exportable supplies in the world's leading rice exporter. During January and February, the volume of Thailand's rice exports fell 35 percent compared with those of the same 2 months in 1987.

Tighter rice supplies are expected to reduce world consumption, but prices have risen nonetheless. By February, the average U.S. export price was \$156 per ton above its year-earlier level. Lower U.S. production and beginning stocks held U.S. export volume to a 16,000-ton increase.

U.S. vegetable oil exports also benefited from South Asia's poor monsoon, but most of the 117-percent increase in export volume stemmed from competitive U.S. offers under the EEP. Soybean oil exports to India more than doubled to 78,000 tons, and shipments to Pakistan rose 117,000 tons to 135,000 tons.

India boosted palm and rapeseed oil imports to cover shortfalls in supply, relying less on soybean oil because of local preferences for other oils.

Cotton export value surpassed \$1 billion during the first 5 months of FY 1988, rising \$578 million higher than export value during the same period in FY 1987. Substantially larger cotton consumption in the 1986/87 crop year reduced supplies available in the 1987/88 crop year. Consumption was virtually unchanged in crop year 1988, reducing the ratio of world stocks to world consumption for the first time in 3 years. U.S. export volume to Western Europe and Japan rose in FY 1988, while shipments to Other East Asia remained steady.

High Value Exports Rise \$423 Million

Record U.S. apple, pear, and almond crops and the delayed effects of the U.S. dollar's 3-year decline helped U.S. high-value product exports reach \$5.4 billion in FY 1988, a 9-percent gain from those of the same period in FY 1987. Animal product exports rose \$266 million, while horticultural exports rose \$166 million. (Stephen MacDonald, Commodity and Trade Analysis Branch)

U.S. AGRICULTURAL IMPORTS INCREASE SLIGHTLY

Agricultural import value during the first 5 months of fiscal year (FY) 1988 (October 1987–February 1988) totaled \$8.9 billion, 3 percent above that for the same period of FY 1987. Increased imports of competitive products, such as animal products, horticultural products, beverages, and vegetable oils, more than offset the substantial decline in coffee imports.

Competitive Product Imports Gain 7 Percent

Competitive farm product imports rose to \$6.1 billion, led by a \$123-million gain in fruits, nuts, and vegetables. Fruit juice imports, especially orange juice from Brazil, tapered off in volume, but prices escalated sharply because of production cutbacks and continued strong import demand for concentrates. Fresh vegetable inflows from Mexico and other sources accelerated 9 percent in value, especially for onions, peppers, and eggplants.

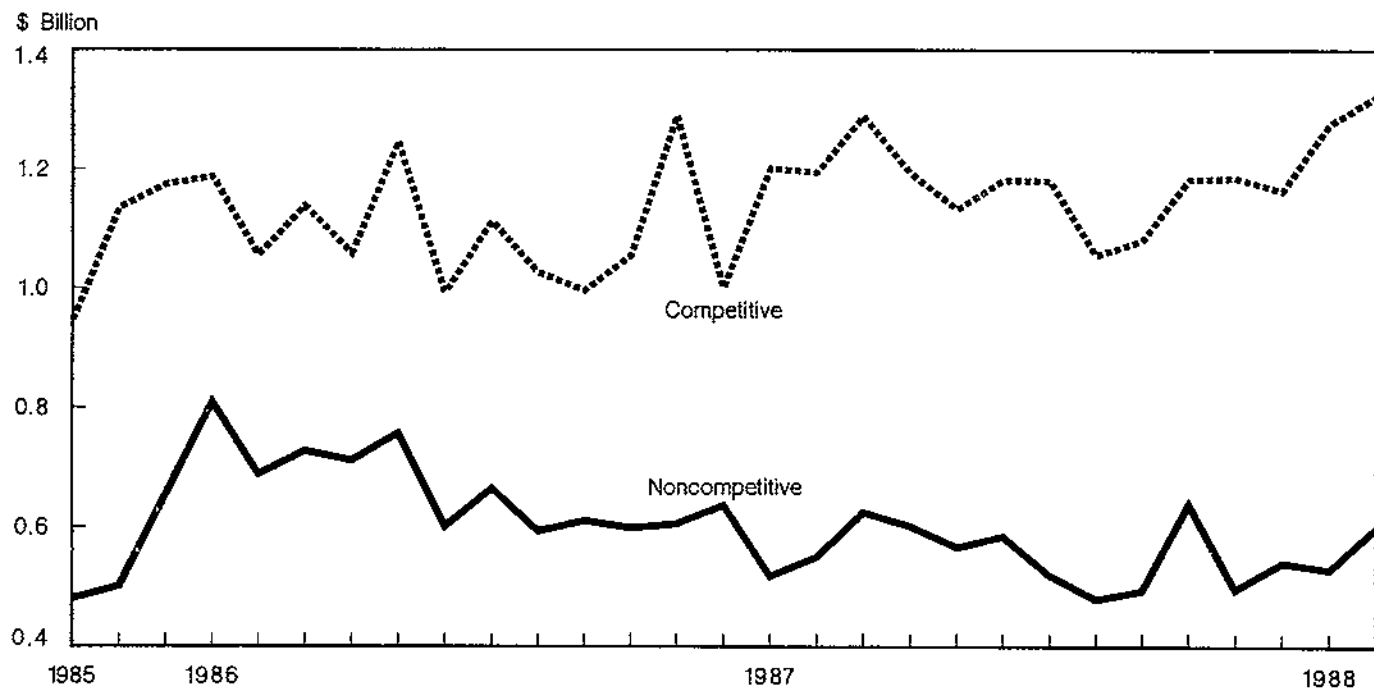

Wine import value escalated to \$460 million as prices rose 18 percent due to the declining dollar exchange against the French franc. Coconut oil prices and imports almost doubled, raising value to \$100 million.

Noncompetitive Product Imports Decline 4 Percent

Sharply lower coffee prices accounted for the 23-percent drop in coffee import value during the first 5 months of FY 1988. Import volume during this period rose 13 percent to 484,000 tons, while average import value fell about 32 percent to \$2,300 per ton. Drought damage to Brazilian coffee trees in 1986–87 reduced output and drove prices steeply upward. Prices returned to lower levels as 1987–88 production rebounded. In contrast, imports of cocoa, natural rubber, and most other noncompetitive products rose in the first 5 months of FY 1988. (Thomas Warden, Commodity and Trade Analysis Branch)

U.S. AGRICULTURAL EXPORTS FROM MOST STATES GAIN IN FY 1987

Rebounding U.S. agricultural exports boosted the export level from more than 30 States during fiscal year (FY) 1987 (October 1986-September 1987). Increased shipments abroad of soybeans, cotton, livestock products, and fruits and vegetables benefited the States producing those commodities. Conversely, many wheat, feed grain, and tobacco growers received lower export revenues in FY 1987, including growers in Indiana, Illinois, Ohio, Georgia, North Carolina, and Kentucky.

California maintained its export lead among the States for the third consecutive year because of brisk export demand for cotton, fruits, vegetables, tree nuts, and livestock products. Estimated FY 1987 value for California's exports reached \$2.8 billion, up about 19 percent from the FY 1986 level. California exported about 25 percent of its fruits and vegetables and an estimated 60 percent of its cotton in FY 1987.

Iowa moved ahead to second place behind California in State exports in FY 1987, with export value of nearly \$2.3 billion, as increased shipments of soybeans and livestock products offset the continued decline in corn exports. Illinois fell slightly behind Iowa with about \$2.1 billion in exports because Iowa received more revenue from livestock products. Nebraska exported an estimated \$1.6 billion, and Texas and Kansas each exported about \$1.5 billion in FY 1987.

State Wheat Revisions

We have substantially revised FY 1985 and FY 1986 data because of computation errors and changes in methods of calculating State shares to account for the difference in types of wheat exported. Since export data from the Census Bureau do not identify the type of wheat shipped, export distribution was changed by applying seasonal price factors to grain inspection data based on hard red winter, red spring, soft winter, soft white, and durum wheat, substantially changing the State shares. FY 1986 data revisions raised exports from Washington by \$212 million, Oregon by \$115 million, Idaho by \$89 million, and Michigan by \$71 million. However, exports from North Dakota fell by \$163 million, Kansas by \$108 million, Texas by \$47 million, Oklahoma by \$41 million, Minnesota by \$39 million, Colorado by \$30 million, California by \$29 million, Nebraska by \$22 million, and Arizona by \$11 million.

Methodology

We assume that State agricultural export estimates are the proportion of each State's production compared with total U.S. production of most identifiable farm commodities. Refining this procedure includes using sales data from the census of agriculture, Customs District shipments, feed-livestock balances, Agricultural Marketing Service reports, and commodity market information. (Thomas Warden and Steve Milmoe, Commodity and Trade Analysis Branch)

Figure 2

Major U.S. agricultural export States and commodities, FY 1987

U.S. EXPORT SHARE OF PRODUCTION RISES TO 15 PERCENT IN FY 1987

The exported share of U.S. agricultural production increased to 15 percent in fiscal year (FY) 1987 (October 1986-September 1987). Sixteen of the 19 commodities listed in table 23 increased in FY 1987. U.S. export share of production for only sunflowerseed, inedible tallow, and peanuts decreased or remained steady. After deducting 20 percent (up from 14 percent in FY 1986) for transportation and other costs between the farm and export points, exports generally equaled 15 percent of cash receipts.

Agricultural Production Falls

Production of nearly all crops, except dried beans, that were exported in FY 1987 declined in 1986. Weather conditions and prices were not as favorable for the 1986 crop as they were for the 1985 crop. Unfavorable weather, lower support prices, and reduced exports during 1985 influenced declines in the production of wheat (minus 14 percent), corn (minus 7 percent), soybeans (minus 8 percent), sorghum (minus 16 percent), and cotton (minus 28 percent).

Exports Higher In FY 1987

Exports of most commodities in FY 1987 returned to 1985 levels. Exports of wheat to the Soviet Union, corn to Japan and South Korea, and cotton to Japan, South Korea, and Taiwan were among the most notable gains.

Farm-To-Port Price Spread Rises

Each year, we apply an estimated farm-to-port price spread to U.S. agricultural exports to approximate the farm value of export prices. We previously assumed that farm value averaged approximately 87.5 percent of export prices. Further analysis indicates that value added is closer to 20 percent of the export price. Thus, multiplying the U.S. agricultural export value by 0.80 more accurately reflects the farm value of exports.

Ten commodities (corn, sorghum, barley, wheat, rice, soybeans, soybean meal, soybean oil, cotton, and tobacco), accounting for approximately 56 percent of FY 1987 U.S. export value, were used to compare export prices (export unit values) and farm prices (season average prices received by farmers). After weighing each commodity price (farm and export) by the quantity of exports, the farm-to-port value was 82 percent in FY 1987. The 10 commodities are primarily bulk commodities that require minimal processing. The remaining commodities are animal products, fruits, nuts, and vegetables--items with higher added value. (Stephen R. Milmo, Commodity and Trade Analysis Branch)

MAJOR MARKETS FOR U.S. AGRICULTURAL EXPORTS

Japan was the top market for U.S. agricultural exports during the last 5 fiscal years (FY's 1983-87), followed by the Netherlands, Canada, South Korea, the USSR, Mexico, Taiwan, and West Germany. More than 50 percent of U.S. agricultural export value went to these eight countries. Among U.S. commodity exports, soybeans and products were the value leaders, followed by feed grains and products, wheat and products, and cotton. This article compares annual averages of U.S. agricultural exports over the last 5 years with 1986 and 1987.

Japan Leads Country Markets

Japan purchased 20 percent of U.S. agricultural exports in FY 1987, up from 18 percent shipped during the last 5 years. Japan's 1987 purchases were more than twice the value shipped to the Netherlands, the second leading importer of U.S. goods. U.S. exports to Japan included feed grains, soybeans, live animals, wheat, cotton, tobacco, hides and skins, and fruits.

In FY 1987, Japan increased its purchases of U.S. agricultural exports by \$400 million above those of 1986. Japan was either the first- or second-ranked market for the commodity groups of which exports totaled \$500 million or more, except for rice. Japan substantially increased imports of U.S. dairy products from \$16 million in 1986 to \$23 million in 1987, and sunflowerseed and oil from \$5 million to \$8 million. However, sales of cottonseed oil slipped from \$18 million in 1986 to \$11 million in 1987.

The Netherlands took 7 percent of U.S. exports in 1987. Soybeans and products and feeds and fodders constituted 75 percent of U.S. exports to the Netherlands, the top market for those exports. However, much of these exports were forwarded to other destinations. The Netherlands was also the leading initial destination for U.S. peanut exports, both in 1987 and the past 5 years.

Canada, the third-ranked market for U.S. agricultural exports in 1987, was the top market for U.S. vegetable exports and the second-largest market for U.S. fruits and poultry products. Canada was also the second-largest market for U.S. peanuts in 1987, but for the 5-year period, the United Kingdom edged past Canada to rank second.

South Korea was the top market for U.S. exports of hides and skins and the second-ranked market for U.S. cotton. South Korea advanced from the seventh-ranked market for U.S. feed grains in 1986 to the third largest market in 1987. Imports of these three categories constituted about two-thirds of U.S. agricultural exports to South Korea, helping establish it as the fourth-ranked market for U.S. agricultural exports in both 1987 and the past 5 fiscal years.

Although the USSR did not place among the top 10 U.S. markets in FY 1987 (it ranked seventh in FY 1986), it was the second-largest market for U.S. wheat sales in 1987. During 1983-87, the USSR was the top market for U.S. wheat and ranked second for feed grains.

Mexico slipped from fifth place as a U.S. agricultural export market in 1986 to seventh place in 1987 but ranked sixth for the 5-year period. An important market for U.S. oilseeds and feed grains, Mexico was the top market for U.S. dairy product exports during the past 5 years.

Taiwan, an important market for U.S. soybeans, feed grains, hides and skins, and cotton, ranked fifth in U.S. agricultural exports in FY 1987, higher than its seventh-place position for the 5-year period.

West Germany ranked third for U.S. soybean and product exports, second for tobacco, and first for tree nuts, both in FY 1987 and during the past 5 years. West Germany advanced from the eighth largest market for U.S. agricultural exports in FY 1986 to become the sixth largest U.S. market in FY 1987.

Soybeans and Feed Grains Lead Commodity Exports

As a group, soybeans, feed grains, and wheat and products formed 54 percent of U.S. agricultural export value during the last 5 years and 45 percent in FY 1987. Soybeans and products, at 20 percent of agricultural export value, continued to lead the other U.S. commodity exports, with the Netherlands and Japan (the largest customers) each taking about 15 percent of U.S. soybean exports in FY 1987 and 16 percent during the 5-year period.

Feed grains and products maintained their second-ranked position with 18 percent of U.S. agricultural export value during the last 5 years. Japan, the largest market by far, took more than 27 percent of U.S. feed grain exports during the last 5 years and in FY 1987. During the past 5 years and in FY 1986, the USSR was the second-largest market, taking 14 percent and 18 percent of U.S. feed grain exports, while in FY 1987 Mexico took the second position and the USSR dropped to fifth place. Saudi Arabia advanced to the top 10 U.S. feed grain markets in FY 1987, edging Egypt out of sixth place.

Wheat and products consistently ranked third among U.S. commodity exports in the past 5 years and represented 15 percent of all U.S. agricultural export value. The USSR and Japan were the top markets for U.S. wheat, each taking 10 percent. Increased U.S. Government assistance in FY 1987 helped boost wheat exports, of which 60-70 percent involved the Export Enhancement Program (EEP), Public Law 480, or credit guarantees. EEP assisted about 45 percent of the FY 1987 wheat shipments.

Cotton ranked fourth among commodity exports for the 5-year period but ranked seventh in FY 1987 as U.S. cotton exports began to regain market share lost to lower priced competitors in FY 1986. Japan and South Korea were the leading markets for U.S. cotton in FY's 1986 and 1987 and during the past 5 years. Hides and skins ranked fourth in 1987 and 1986, with South Korea and Japan purchasing more than 50 percent of these U.S. exports.

Among commodity exports that changed significantly from 1986, cotton and linters gained 106 percent, rebounding from the FY 1986 low. Poultry and products grew 30 percent, tree nuts advanced 21 percent, and live animals and meat rose 20 percent from FY 1986 levels. However, cottonseed oil exports dropped 56 percent and sunflowerseed and oil fell 27 percent in FY 1987. (Cecil W. Davison, Crops Branch)
