Digest

U.S. Exports Second Highest Ever (see p. 2). Increased shipments of high-value products, wheat, soybeans, and soybean products led to a \$4.8-billion increase in U.S. exports in fiscal year 1992. At \$42.4 billion, exports reached their second highest value ever, surpassed only by the \$43.8-billion value of fiscal year 1981.

Imports Reach Record \$24.3 Billion (see p. 6). The United States imported a record \$24.3 billion in agricultural commodities in fiscal year 1992. A sharp rise in tobacco imports and smaller gains in cattle, grains and feeds, fruit juice, wine, and vegetable oil imports contributed to the increase. Canada was again the leading source of U.S. agricultural imports, followed by Mexico, Brazil, and Australia, the same as last year.

Government Program Shipments Totaled \$1.5 Billion in FY 1990 (see p. 9). Agricultural exports under concessional U.S. Government programs declined 1 percent in value in fiscal year 1990 (October 1989-September 1990) to slightly less than \$1.5 billion, while volume increased 11 percent to nearly 8.1 million tons. Program shipments accounted for about 4 percent of total U.S. agricultural export value in fiscal year 1990. Wheat, corn, soybean oil, rice, and wheat flour were the chief commodities exported under the programs, and Egypt, Bangladesh, and India were the top recipients. Most of the concessional exports were shipped under P.L. 480, but significant quantities were also shipped under Section 416(b) of the Agricultural Act of 1949, as amended.

U.S. Exports Second Highest Ever

Increased shipments of high-value products, wheat, soybeans, and soybean products led to a \$4.8-billion increase in U.S. exports in FY 1992. At \$42.4 billion, exports reached their second highest value ever, surpassed only by the \$43.8-billion value of FY 1981.

Export volume also rose in FY 1992, from 127.8 million tons to 141.8 million tons. This was the biggest increase in export volume since 1988, but well below the record 163.5 million tons in FY 1980. Volume gains were widespread among commodities in 1992. Wheat exports rose 28 percent and soybean shipments rose 27 percent. Together, these two commodities contributed 12 million tons in additional exports in FY 1992. The most important exception to generally increased export volume was corn, with a 4-million-ton, 9-percent decline. Cotton, rice, wheat flour, and pulse export volumes were also lower. However, in addition to wheat and soybeans, most products had increases in export volume in 1992.

By destination, the biggest U.S. export gain came in shipments to the former Soviet Union (FSU). U.S. farm product exports to the FSU rose \$933 million to \$2.7 billion. The second and third largest increases came from Mexico, whose imports of U.S. farm products rose \$791 million, and Japan, up by \$647 million. Exports were higher to virtually every destination, with gains of about \$400 million each reported for shipments to the European Community (EC), Canada, Other East Asia, and Sub-Saharan Africa.

Exports to Sub-Saharan Africa rose \$396 million as drought reduced corn production in South Africa and other countries in the region. Shipments to South Africa were largely commercial purchases, while large food aid shipments were made to Mozambique, Zambia, and Zimbabwe. While not the largest gain for any major destination in absolute terms, the 80-percent rise in shipments to Sub-Saharan Africa was proportionally the largest.

The FSU, with the largest absolute gain of any destination, played an important role in determining the direction of change for U.S. exports by commodity. Gains in shipments to the FSU came largely in wheat, but were also reported for soybeans, soybean meal, and vegetable oil. Exports of feed grains to the FSU slipped, however.

Wheat shipments were lower to much of South America, and to Jordan and Tunisia. Shipments rose to virtually every other customer, especially the FSU. Of the total increase of \$1.5 billion, increased exports to the FSU accounted for \$828 million. The second largest gain came in sales to Egypt, a \$161-million increase.

Coarse grain exports were lower to Europe, the FSU, North Africa, and Korea. The largest decline came in shipments to the FSU, which fell \$233 million. Next largest was the \$154-million decline in shipments to the EC. However, increased sales to Sub-Saharan Africa and Latin America more than offset these losses.

Oilseed and product exports were higher to most destinations, led by a \$563-million increase in sales to the EC. Exports rose with total world trade, and the United States achieved its highest share of the world market in 4 years. Lower supplies in South America resulted in sales opportunities for the United States.

In contrast with grains and oilseeds, cotton exports experienced a fairly sizable decline in export value in 1992. With both losses in export volume and prices, cotton exports sagged \$422 million, a 16-percent decline from a year earlier. Exports to most destinations declined, with the EC and Japan registering the largest drops.

Exports Sluggish in Real Terms

Although agricultural exports were the second highest ever in nominal terms, they looked substantially less robust after adjusting for inflation. After adjustment, FY 1992 exports surpassed only 5 of the

preceding 20 years. If FY 1981's \$43.8-billion export level is restated in 1992 dollars, it balloons to \$67.9 billion. The gap between 1981 and 1992 exports widens, therefore, from \$1.4 billion in nominal dollars to \$25.4 billion in inflation-adjusted dollars.

This gap is entirely attributable to weakness in bulk exports. While exports of high-value products (HVP's) reached a nominal record of \$23.2 billion in FY 1992, bulk exports were more than \$10 billion below their 1981 record of \$29.7 billion. Even after adjusting for inflation, HVP exports were a record high in 1992, leaving bulk exports responsible for

the entire decline in real terms since 1981. Nonagricultural exports outperformed even HVP agricultural exports. The value of nonagricultural exports, although rising only 6 percent in FY 1992, totaled \$377 billion, a record high for the sixth consecutive year. Even when adjusted for inflation, the value was still a record high for the fifth consecutive year. Nonagricultural exports have been a major source of the U.S. economy's strength in recent years, in marked contrast to its role during the mid-1980's. (*Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0820*)

Imports Reach Record \$24.3 Billion

The United States imported a record \$24.3 billion in agricultural commodities in FY 1992. A sharp rise in tobacco imports and smaller gains in cattle, grains and feeds, fruit juice, wine, and vegetable oil imports contributed to the increase. Canada was again the leading source of U.S. agricultural imports, followed by Mexico, Brazil, and Australia, the same as last year.

Competitive Imports Continue Increase

Competitive imports rose 8 percent to \$18.5 billion, the highest level ever. Much of the year's gain was attributed to unmanufactured oriental leaf tobacco imports, which nearly doubled (\$1.3 billion vs. under \$700 million in FY 1991, and volume was nearly 150,000 tons greater. The elimination of duties on oriental leaf tobacco under the Generalized System of Preferences (GSP) helped the rise in imports.

Imports of grains and feeds rose 21 percent to \$1.5 billion. Imports of biscuits and pasta totaled nearly \$560 million, up 10 percent, and feeds and fodders amounted to \$275 million, up 6 percent. Wheat and corn were only a small portion of the grains and feeds total, but their import growth was exceptionally strong. Wheat imports more than doubled to \$166 million, and corn imports quadrupled, to \$46 million.

Wine imports increased by 16 percent to almost \$1.1 billion, and volume rose for the first time since 1985. Import volume jumped in June 1992 after the announcement that EC wines were targeted for prohibitive tariffs if a settlement was not reached in the oilseeds dispute.

Several other import commodity groups had strong growth in 1992. Cattle imports rose by 18 percent to \$1.1 billion, although volume declined by nearly 50,000 head. Vegetable oils, primarily olive, rapeseed, coconut, and palm kernel, rose 21 percent to over \$900 million. Fruit juice imports were up 18

percent to \$870 million, but fruit juice volume declined by 7 percent.

Two large import groups, meats and fresh vegetables, declined in 1992. Meat imports declined by 11 percent to \$2.7 billion after strong increases the past 2 years. Beef imports were down slightly, but pork imports dropped by over 25 percent as higher domestic supplies and lower prices dampened demand. Fresh vegetables declined by 9 percent to just under \$1 billion on lower shipments of tomatoes from Mexico.

Noncompetitive Imports Rise for First Time in 6 Years

Noncompetitive imports rose 6 percent to \$5.8 billion, the first year-to-year increase since 1986. Weak commodity prices had lowered the value of noncompetitive imports over the past several years, but in 1992, strong volume increases offset continued weak prices. Banana import volume was up 7 percent, coffee 19 percent, and cocoa 10 percent. Bananas, cocoa, and coffee accounted for \$4 billion of total noncompetitive imports, with coffee being the largest at \$1.8 billion, although down slightly from the previous year. Both bananas and cocoa increased by 10 percent. Rubber imports increased by 14 percent to over \$750 million.

Major Import Sources

Ten countries accounted for 56 percent of U.S. imports of all agricultural commodities and nearly all imports of certain commodities such as meat, fresh vegetables, and wine. Those 10 countries were the same as last year, with some repositioning after the fourth spot (see table 5).

The United States imported \$3.9 billion worth of commodities from Canada, an increase of 22 percent over the previous year. In FY 1992, the animals and products group, primarily cattle, beef, and pork, was the largest import group at \$1.8 billion, grains and feeds followed at \$740 million, and oilseeds and products were third at \$312 million.

Imports from Mexico totaled \$2.3 billion, a 10-percent drop, but still about \$1 billion more than Brazil. Vegetables were the major imports from Mexico, valued at nearly \$775 million, a decline of 13 percent, primarily due to a sharp drop in fresh tomato imports. Other major imports were fruits (\$321 million), cattle (\$296 million), and coffee (\$262 million).

U.S. imports from Brazil were steady at \$1.4 billion. Coffee was the leading import at \$356 million, followed by orange juice at \$268 million, and unmanufactured tobacco at \$192 million. Tobacco imports from Brazil rose 40 percent, pushing cocoa, normally one of the top three Brazilian imports, into the fourth position at \$182 million.

U.S. imports from Australia totaled \$1.1 billion, a 12-percent decline. Beef and unmanufactured wool account for nearly all Australian imports, and in 1992, beef dropped 13 percent to \$768 million, and wool fell 10 percent to \$118 million.

Imports from Colombia and Italy grew by 14 percent and 16 percent, respectively, and moved these two countries into the fifth and sixth positions. Imports of Colombian coffee grew by 30 percent to \$415 million and coffee volume increased 63 percent. Cut flower imports grew by 10 percent to \$225 million, increasing the value of U.S. imports from Colombia to over \$870 million. Imports

of Italian wine rose by 19 percent to \$326 million, olive oil imports were up 9 percent to \$189 million, and cheese imports rose 12 percent to \$104 million.

Imports from New Zealand decreased 1 percent. Beef imports were up 2 percent to \$540 million, but dairy imports (cheese and casein) fell 11 percent. Fruit imports from New Zealand declined. Kiwi fruit imports totaled only \$8 million, compared with nearly \$40 million in 1991. But, the drop in kiwi fruit imports was partially offset by increased imports of New Zealand apples, which climbed by over \$10 million from last year.

French wine imports increased by 13 percent to over \$512 million, accounting for most of France's gain. The next largest group of French imports was dairy, mainly cheese and casein, at \$83 million. The major import from the Netherlands was malt beverages, which were down 4 percent to \$312 million. Imports of nursery products rose to \$114 million.

Imports from Indonesia, mainly rubber and cocoa, gained 20 percent. The value of rubber imports was \$452 million, more than half the value of total Indonesian imports to the United States. Cocoa imports were up 80 percent to \$104 million. (*Joel Greene, Commodity and Trade Analysis Branch, 202-219-0820*)

1/ Countries ranked by 1992 value; numbers in parentheses are 1991 position.

Government Program Shipments Totalled \$1.5 Billion in FY 1990

Agricultural exports under concessional U.S. Government programs declined 1 percent in value in FY 1990 (October 1989-September 1990) to slightly less than \$1.5 billion, while volume increased 11 percent to nearly 8.1 million tons. Program shipments accounted for about 4 percent of total U.S. agricultural export value in FY 1990. Wheat, corn, soybean oil, rice, and wheat flour were the chief commodities exported under the programs, and Egypt, Bangladesh, and India were the top recipients. Most of the concessional exports were shipped under P.L. 480, but significant quantities were also shipped under Section 416(b) of the Agricultural Act of 1949, as amended.

The Food, Agriculture, Conservation, and Trade Act (FACT) of 1990 authorized major changes in P.L. 480's program structure and operation. These changes became effective January 1, 1991, and therefore are not reflected in the 1990 total of agricultural exports under concessional U.S. export programs. Title I continues as a concessional loan program for countries experiencing difficulties in meeting their food needs through commercial channels, but the repayment period was shortened from 40 to 30 years. The 1990 FACT Act reauthorizes the Title II emergency and private assistance donations program. Under this title, the Agency for International Development (AID) made available food commodities for distribution overseas by recipient-country governments in response to emergency conditions, or by private voluntary agencies (such as CARE and Catholic Relief Services) and international organizations, including the World Food Program (WFP). The new Title III allows AID to provide food assistance to the world's least developed countries to help promote economic development. In addition to these titles of the Food for Peace Program, the United States provides food aid abroad through two other channels: Section 416(b) of the Agricultural Act of 1949, as amended, and the Food for Progress Program. The Section 416(b) foreign donations program

provides a mechanism for donating excess commodities in the inventories of USDA's Commodity Credit Corporation to help meet urgent food needs in other countries. The Food for Progress Program allows USDA to donate food to support countries that are trying to introduce or expand free enterprise in their agricultural economies. Also, AID administers mutual security assistance programs, such as the Commodity Import Program, which provides a small amount of agricultural commodities overseas.

As a result of changes in the P.L. 480 legislation by the 1990 FACT Act, data on agricultural exports under concessional U.S. Government programs for FY 1991 are not yet available. It is expected, however, that both volume and value exceeded the 1990 level.

Exports under P.L. 480 declined 8 percent in value to approximately \$1.1 billion and rose 2 percent in volume to about 5.4 million tons in FY 1990. Wheat, soybean oil, and rice accounted for about 70 percent of the P.L. 480 export value, while Egypt, Bangladesh, and India, the top three recipients, received about 32 percent of P.L. 480 export value. Egypt, Bangladesh, and Sri Lanka received more than half of P.L. 480 wheat exports, while about 57 percent of soybean oil exports under P.L. 480 were shipped to Pakistan, Morocco, and the Dominican Republic. Bangladesh, the Ivory Coast, Jamaica, and Liberia accounted for about 40 percent of P.L. 480 rice exports.

Titles I and III shipments, valued at about \$650 million, were 10 percent below such shipments for FY 1989, as there were declines in wheat and wheat flour, rice, and soybean oil sales. Shipments under these titles accounted for about 65 percent of P.L. 480 exports. Most of the Title I exports were shipped under concessional credit terms. Jamaica and Tunisia, however, received corn and wheat under local currency cash agreements. Fourteen commodities were shipped under Titles I and III, with wheat, wheat flour, corn, and soybean oil making up the majority of these shipments. In FY 1990, the

quantity of wheat exported under Titles I and III increased by 2 percent, but because of a considerable price drop, the value fell by 16 percent from the previous October-September period and 20 percent from the FY 1988 level. Egypt, Bangladesh, and Sri Lanka received more than 50 percent of the wheat shipments under Titles I and III, and Egypt was the sole recipient of the wheat flour shipped under these titles. Rice shipped fell by 20 percent in both quantity and value from the 1989 levels. In FY 1990, there were large gains in Title I corn shipments, mainly to Jamaica and Tunisia.

Donations under Title II rose 2 percent in volume to 1.9 million tons, while the value fell 4 percent to about \$451 million. More than half of the donations was distributed through voluntary relief agencies. Slightly less than 25 percent was distributed through government-to-government channels, and another 23 percent was shipped through the WFP. Wheat, corn, and corn-soya milk were the principal donated commodities. Nearly 70 percent of the wheat was shipped to the main three recipients, Ethiopia, India, and Peru, while Mozambique took 50 percent of the corn. India, Ethiopia, and the Philippines received 81 percent of the corn-soya milk donated under Title II.

In FY 1990, the United States provided under Section 416(b) about 1.7 million tons of corn, sorghum, and salted butter valued at \$216.1 million. This is the second largest amount under Section 416(b) since the United States started the program in 1984. Section 416(b)

assistance accounted for only 2 percent of total shipments in 1984. It grew considerably afterwards, however, accounting for about 12 percent during FY 1985-90. The East European region received about 42 percent of the export volume of commodities shipped under this program, followed by the Middle East with 23 percent, and Latin America with 21 percent. Africa received about 14 percent. The largest volumes for individual countries were provided for programs in Poland (25 percent), Jordan (22 percent), and Romania (19 percent).

Under the Food for Progress Program, the United States provided about 200,000 tons of commodities valued at \$44 million to five countries in FY 1990. The commodities provided under this program were corn, edible tallow, pork bellies, soybean oil, soybean meal, and wheat. Poland was the major recipient, followed by Nicaragua, Kenya, Uruguay, and Madagascar.

In FY 1990, the export value under the programs administered by AID fell 37 percent to about \$118 million, and 30 percent in volume to about 776,000 tons. These exports included corn, edible tallow, rice, soybeans, soybean meal, and wheat. Egypt received all of the corn, edible tallow, rice, and soybeans, and 97 percent of the soybean meal, while Pakistan received all of the wheat. (*Nydia R. Suarez and Linda Beeler, Commodity and Trade Analysis Branch, 202-219-0821*)

1/ Preliminary.

2/ Negative values in the "commercial" column indicate an excess of Government programs over total exports attributed to reporting lags, classification differences, or transshipments through other countries.

3/ Totals may not add due to rounding.

INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-September 1990/91 and 1991/92, and September 1992	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-September 1990/91 and 1991/92	A-68
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-September 1990/91 and 1991/92	A-69
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-September 1990/91 and 1991/92	A-70
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-September 1990/91 and 1991/92	A-71
Imports		
B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-September 1990/91 and 1991/92, and September 1991 and 1992	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-September 1990/91 and 1991/92, and September 1992	B-5
Prices		
C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

Food Consumption Up, Price Increases Slowed in 1990

Number 5, January 1993

Contact: Judith Jones Putnam, 202-219-0870

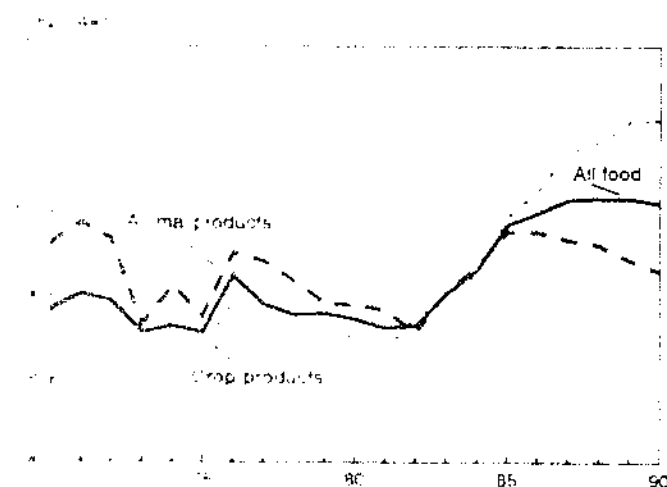

The 1990 per capita food supply increased 6 percent from 1970, as consumption of crop-derived foods outpaced consumption of foods from animal products. Retail food prices rose 2.9 percent in 1991, half the 1990 price increase (5.8 percent) and the lowest since 1985. Americans spent \$570 billion for food in 1991, and another \$85 billion for alcoholic beverages. Away from home meals and snacks captured 45 percent of the U.S. food dollar in 1991, up from 39 percent in 1987 and 34 percent in 1970.

Food Consumption Trends

A trend having significant nutrition implications is the increasing importance of crop-derived foods compared with foods from animal products. Between 1970 and 1990, consumption of crop-derived foods increased 17 percent while animal-based foods declined 1 percent on a per capita basis.

Per capita food consumption index

Crop-based foods are outpacing foods from animal products.

Based on a retail price-weighted quantity index

Consumption of foods in most crop categories has risen steadily in the last 20 years, especially frozen potatoes, flour and cereal products, fresh and frozen vegetables, peanuts and tree nuts, fresh and processed fruits, vegetable fats and oils, and sweeteners. Crop products whose consumption declined between 1970 and 1990 are fresh potatoes, coffee, sweet potatoes, dry beans and peas, and vegetables for canning.

Americans used less whole milk, animal fats, eggs, and red meat. Increased consumption of lowfat milk, cheese, poultry, cream products, and fish and shellfish moderated the decrease in animal product consumption.

The U.S. Department of Agriculture's Economic Research Service annually calculates the amount of food available for human consumption in the United States. The U.S. food supply historical series measures national aggregate consumption of several hundred foods. It is the only source of time series data on food and nutrient availability in this country.

SUMMARY OF REPORT

U.S. Farm Sector Continues Financial Recovery

Report A-106-1

March 1981

In the past 2 years, the U.S. farm sector has made significant progress in recovering from the severe financial losses suffered in the early 1970s. The farm sector's financial position has improved in a number of key areas, including net worth, income, and debt.

The farm sector's net worth has increased significantly since 1970. In 1970, the net worth of the farm sector was \$100 billion. By 1979, it had increased to \$150 billion. This increase was due to a combination of factors, including a rise in the value of farm real estate and a decline in farm debt.

Number of Vulnerable Farms Down

The number of farms in the U.S. that are considered "vulnerable" has declined significantly in the past 10 years. In 1970, there were 1.5 million vulnerable farms. By 1979, this number had declined to 1.2 million. This decline was due to a number of factors, including a rise in the average size of farms and a decline in the number of small, marginal farms.

The decline in the number of vulnerable farms is a positive sign for the farm sector. It indicates that the farm sector is becoming more financially sound and is better able to withstand economic shocks.

The decline in the number of vulnerable farms is also a reflection of the fact that the farm sector has become more diversified. In the past, many farms relied solely on the production of a single commodity. Today, many farms produce a variety of commodities, which helps to reduce their risk.

The decline in the number of vulnerable farms is also a reflection of the fact that the farm sector has become more efficient. In the past, many farms were inefficient and lost money. Today, many farms are more efficient and profitable.

Incomes Vary by Region and Commodity

Farm incomes vary significantly by region and commodity. In the Midwest, where corn and soybeans are the major crops, incomes are generally higher than in the South, where cotton and sugarcane are the major crops. In the West, where ranching is the major activity, incomes are generally lower than in the Midwest.

To Order This Report

This report is available for purchase from the U.S. Government Printing Office. The price is \$1.50 per copy. To order this report, contact your local GPO office or write to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20540.

For more information on the farm sector, contact the U.S. Department of Agriculture, Economic Research Service, Washington, D.C. 20250.

The U.S. Department of Agriculture, Economic Research Service, is a research organization that provides information on the U.S. farm sector. The ERS is part of the U.S. Department of Agriculture, which is responsible for the nation's food and fiber supply.

The ERS is a nonpartisan organization that provides objective information on the farm sector. The ERS is not involved in policy-making or advocacy.

U.S. GOVERNMENT PRINTING OFFICE

Now it's easy to order from ERS!

Order ERS monographs and periodicals with one toll-free phone call. Our courteous staff can take and fill your order quickly and efficiently. Your items will be sent by first class mail.

Call 1-800-999-6779

(in the U.S. and Canada; other areas please call 703-834-0125)

When you call, also ask to be put on our **free** mailing list to receive **Reports**, a quarterly catalog describing the latest ERS research reports, electronic databases, and video products. It will help you keep up to date on the economics of food, farms, the rural economy, foreign trade, and the environment.

Japanese and EC Investment in U.S. Agriculture Grow in 1980's

Japanese and EC Investment in U.S. Agriculture Grow in 1980's

Japanese and European Community investment in U.S. agriculture has grown rapidly in the 1980's, according to a new report from the U.S. Department of Agriculture's Economic Research Service. The report, "Foreign Investment in U.S. Agriculture: A Review of the 1980's," shows that Japanese investment in U.S. agriculture grew from \$1.1 billion in 1980 to \$2.1 billion in 1989, while EC investment grew from \$1.1 billion in 1980 to \$2.1 billion in 1989. The report also shows that Japanese investment in U.S. agriculture has grown faster than EC investment in U.S. agriculture in the 1980's. The report is the first to provide a comprehensive review of foreign investment in U.S. agriculture in the 1980's. It is based on data from the U.S. Department of Commerce's Office of Economic Research and the U.S. Department of Agriculture's Economic Research Service. The report is available in English and Japanese.

The European Community

The European Community (EC) has been a major source of investment in U.S. agriculture since the 1960's. In the 1980's, EC investment in U.S. agriculture grew from \$1.1 billion in 1980 to \$2.1 billion in 1989. The report shows that EC investment in U.S. agriculture has grown faster than Japanese investment in U.S. agriculture in the 1980's. The report also shows that EC investment in U.S. agriculture has grown faster than U.S. investment in U.S. agriculture in the 1980's. The report is the first to provide a comprehensive review of foreign investment in U.S. agriculture in the 1980's. It is based on data from the U.S. Department of Commerce's Office of Economic Research and the U.S. Department of Agriculture's Economic Research Service. The report is available in English and Japanese.

Are the Holdings Concentrated and Does the United States Benefit?

The report also examines the concentration of foreign investment in U.S. agriculture. It shows that foreign investment in U.S. agriculture is concentrated in a few large holdings. The report also examines the benefits of foreign investment in U.S. agriculture. It shows that foreign investment in U.S. agriculture has brought in new technology and management practices. The report also shows that foreign investment in U.S. agriculture has helped to increase the productivity of U.S. agriculture. The report is the first to provide a comprehensive review of foreign investment in U.S. agriculture in the 1980's. It is based on data from the U.S. Department of Commerce's Office of Economic Research and the U.S. Department of Agriculture's Economic Research Service. The report is available in English and Japanese.

Japanese investment in U.S. agriculture has grown rapidly in the 1980's, according to a new report from the U.S. Department of Agriculture's Economic Research Service. The report, "Foreign Investment in U.S. Agriculture: A Review of the 1980's," shows that Japanese investment in U.S. agriculture grew from \$1.1 billion in 1980 to \$2.1 billion in 1989. The report also shows that Japanese investment in U.S. agriculture has grown faster than EC investment in U.S. agriculture in the 1980's. The report is the first to provide a comprehensive review of foreign investment in U.S. agriculture in the 1980's. It is based on data from the U.S. Department of Commerce's Office of Economic Research and the U.S. Department of Agriculture's Economic Research Service. The report is available in English and Japanese.

1. Over These Reports

The report is the first to provide a comprehensive review of foreign investment in U.S. agriculture in the 1980's. It is based on data from the U.S. Department of Commerce's Office of Economic Research and the U.S. Department of Agriculture's Economic Research Service. The report is available in English and Japanese. The report also examines the concentration of foreign investment in U.S. agriculture.
