Digest

U.S. Exports of Feed Grains Rose to a Peak Level in 1965/66, Then Declined for the Third Year in 1968/69 (see page 6). Last fiscal year, our exports of feed grains totaled 15.9 million tons, the lowest level since 1963/64. World exports in 1968/69 were 10 percent below the 1965/66 high. Reversals in U.S. and world feed grain trade the past 3 years were largely due to stiff competition among world exporters for the world's shrinking grain markets. The European Community played a major role in this trade by reducing its import requirements and expanding its feed grain exports. Unlike wheat exports, of which a large proportion moved under P.L. 480 and Mutual Security programs, shipments of feed grains under programs have ranged from 27 percent of the total in 1959/60 to only 5 percent in 1968/69.

* * * * *

U.S. Agricultural Imports by Origin, Calendar Year 1969 (see page 43). U.S. imports of agricultural products declined 1 percent in 1969. Latin American suppliers sent nearly 8 percent less and their share of total U.S. imports fell 2 points to 39 percent. Reduced imports from LAFTA (except Mexico) and Caribbean locations were not offset by larger purchases from Mexico and CACM members. From Europe, the EC and EFTA countries shipped more agricultural products to the United States, but Turkey, Greece, and Spain sent less. As a group, Asian countries increased their share of U.S. agricultural imports. Malaysia, Singapore, and Indonesia accounted for much of this gain. Australia, New Zealand, and Canada exported more agricultural products to the United States. U.S. imports from African countries were generally smaller. Tables in this article include U.S. purchases from 50 major suppliers by commodity grouping.

* * * * *

Selected Price Series of International Significance (see page 62). During March, the export price of Thai rice averaged \$143.04 a metric ton, its lowest level in over 4 years. Feed grains, soybeans, and cotton showed moderate strength. Most wheat prices were stable.

* * * * *

Commercial and Government Program Export Highlights (see page 65). A rise of \$221 million in dollar sales brought U.S. agricultural exports in July-December 1969 to \$3,303 million, or 6 percent higher than a year earlier. Feed grains and oilseeds and products recorded

the largest gains. Smaller increases were noted for animals and meat products, fruits and preparations, tobacco, rice, and vegetables and preparations. Exports of wheat, cotton, and dairy products were considerably lower. Deliveries under Government-financed programs dropped \$27 million to \$437 million. Most of the decline was in sales for foreign currency and in Government-level donations. Program shipments of wheat and dairy products were substantially smaller, but more feed grains, rice, and cotton moved under food aid programs than during the 1968 period.

* * * * *

World Trade Highlights (see page 72). Agricultural imports to Pakistan and the Philippines increased significantly during 1967, while those to Ceylon and Iran declined 17 percent and 4 percent, respectively. The United States remained the leading supplier for Iran, Pakistan, and the Philippines but ranked only seventh for Ceylon. However, the U.S. share of Ceylon's farm imports increased steadily from 2 percent in 1964 to nearly 7 percent in 1967.

Of the \$704 million worth of agricultural products imported in 1967 by these four Asian nations, rice and wheat and flour accounted for half, fats and oils for nearly 11 percent, and dairy products and eggs for 8 percent.

* * * * *

U.S. Agricultural Exports, July-March 1969/70 (see page 82). Agricultural exports in March 1970 totaled \$563 million, up 9 percent from a year earlier. Exports of wheat, cotton, rice, inedible tallow, almonds, hides and skins, and vegetable oils rose substantially. In July-March, agricultural exports of \$4.9 billion were over one-fifth above those for the same months in 1968/69. Expanded exports of grains, cotton, fruits, vegetables, nuts, soybeans, vegetable oils, protein meal, and tobacco contributed most to the gain in July-March.

The European Community took 10 percent more agricultural products from the United States in July-March. The increase was for nonvariable-levy commodities, mostly soybeans and soybean products. Exports of variable-levy items were down 13 percent because of reduced EC takings of wheat and feed grains.

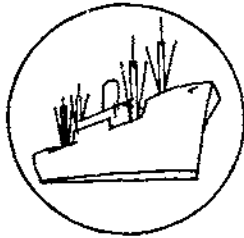

* * * * *

U.S. Agricultural Imports, July-March 1969/70 (see page 87). Entries of foreign agricultural products into the United States during July-March rose 13 percent above similar months a year earlier. Gains in both supplementary and complementary values were recorded. Cattle, meat, cheese, eggs, grain preparations, sugar, fresh vegetables, beverages, and animal feeds accounted for the rise in supplementary imports. Increased values for coffee, cocoa, crude rubber, and pepper were mainly the result of higher prices.

Table 1.--U.S. exports: Value of total and agricultural exports, including specified Government-financed programs and commercial (dollar) sales by selected commodities and commodity groups, averages 1955-59, 1960-64, and 1965-69; annual 1968-69 and July-March 1969/70 ^{1/ 2/}

^{1/} Government-financed programs include exports under Public Law 480 programs (sales for foreign currency, long-term dollar and convertible local currency credit sales, barter for strategic materials, and donations) and under AID programs. ^{2/} Commercial sales (exports outside Government-financed programs) include in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter shipments for overseas procurement for U.S. agencies, which benefit the U.S. balance of payments and rely primarily upon authority other than P.L. 480; (2) extension of credit and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices; and (4) export payments in cash or in kind. ^{3/} Commodity group totals for feed grains, oilseeds and products, and animals and products include for years noted, in addition to the value reported by the Bureau of the Census, the estimated value of certain commodities donated through voluntary relief agencies, which are included by Census in "Other food for relief and charity." ^{4/} Preliminary data. ^{5/} Less than \$500,000. ^{6/} Commodities may not add to total, due to rounding.

SPECIAL in this issue

U.S. EXPORTS OF FEED GRAINS ROSE TO A PEAK LEVEL IN 1965/66,
THEN DECLINED FOR THE THIRD YEAR IN 1968/69

by
Eleanor N. DeBlois ^{1/}

Population growth and improved living standards, especially in the developed countries, stimulated a strong demand in the 1960 decade for high-protein foods, including meats, eggs, and dairy products. This rise was reflected in larger feed grain requirements. U.S. exports of feed grains rose from 11.1 million tons in fiscal 1960 (year ending June 30) to 25.4 million tons in 1965/66. ^{2/} During that span, world exports of feed grains climbed from 22.3 million tons to a peak of 43.8 million.

In recent years, more countries began to increase their domestic production of grains and to reduce their purchases of feed grains from abroad. The volume of U.S. exports dropped 18 percent in 1966/67 and 6 percent in 1967/68. In 1968/69, U.S. exports fell to 15.9 million tons -- the lowest since 1963/64. World exports in 1968/69 declined to an estimated 39.4 million tons, 10 percent below the 1965/66 high.

This report shows exports of corn and all feed grains for 1967/68 and 1968/69 in quantity and value by country and geographic area (tables 2 through 9). Shipments under supply-type barter and credit sales programs are shown in tables 10 through 14. Transshipments through Canadian ports on the St. Lawrence and through the Netherlands are presented in tables 15 and 16. ^{3/}

Major explanations for the reversal of U.S. and world feed grain trade in the past 3 years have been rapid growth in competition among world exporters and shrinkage in world markets. The European Community (EC) played a large part in both of these changes. The EC countries as a group have been the largest feed grain market in the world for many years. As a result of the Common Agricultural Policy, the EC is now supplying feed grains to third-country markets, as well as meeting more of its own needs. ^{4/}

The United States faces strong competition from other major exporters. The United States and eight other countries -- Argentina, France, South Africa, Brazil, Canada, Mexico, Thailand, and Australia -- accounted for 80 to 88 percent of world feed grain exports during the 1960's. The U.S. share was 50 percent in 1959/60. It rose to over 55 percent

^{1/} International Economist, Trade Statistics and Analysis Branch, Foreign Development and Trade Division, Economic Research Service.

^{2/} All tonnages shown in article are metric.

^{3/} This is the second of a series of reports on commercial sales for dollars and exports under Government-financed programs on a commodity-by-country basis for the major U.S. export commodities. A similar report for wheat grain was published in the January issue of *FATUS*.

^{4/} For further discussion of U.S. and world feed grain trade, see: "The Story of the 1960's: U.S. Feed Grains in World Trade" by Larry F. Thomasson, *Foreign Agriculture*, Jan. 19, 1970.

1/ Authorized by Title I, P.L. 480.

2/ Shipments under dollar credit sales agreements signed through Dec. 31, 1966, authorized by Title IV, P.L. 480. Shipments under dollar credit and convertible foreign currency credit sales agreements signed from Jan. 1, 1967, authorized by Title I, P.L. 480, as amended by P.L. 89-808.

3/ Authorized by Title II, P.L. 480, as amended by P.L. 89-808.

4/ Authorized by Sec. 303, Title III, P.L. 480, and other legislation.

5/ Includes expenditures under commodity (nonproject) programs, project programs, and economic development loans, authorized by P.L. 87-195. For fiscal 1969, includes July-December 1968 only because of a delay in the preparation of the report for January-June 1969.

6/ "Total feed grain exports outside specified Government programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some feed grains with governmental assistance in the form of (1) barter shipments for overseas procurement for U.S. agencies and (2) extension of credit and credit guarantees for relatively short periods.

7/ The apparent excess of Government-financed exports over total exports may be due to lags in reporting or the recording of the export as destined for the country through which transshipment was made.

8/ Less than 50 metric tons.

9/ The quantity shown for total exports includes, in addition to the quantities reported by the Bureau of the Census, the quantity of grain sorghums donated through voluntary relief agencies, not separately reported by Census.

1/ Authorized by Title I, P.L. 480.

2/ Shipments under dollar credit sales agreements signed through Dec. 31, 1966, authorized by Title IV, P.L. 480. Shipments under dollar credit and convertible foreign currency credit sales agreements signed from Jan. 1, 1967, authorized by Title I, P.L. 480, as amended by P.L. 89-808.

3/ Authorized by Title II, P.L. 480, as amended by P.L. 89-808.

4/ Authorized by Sec. 303, Title III, P.L. 480, and other legislation.

5/ Includes expenditures under commodity (nonproject) programs, project programs, and economic development loans, authorized by P.L. 87-195.

6/ "Total feed grain exports outside specified Government programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some feed grains with governmental assistance in the form of (1) barter shipments for overseas procurement for U.S. agencies and (2) extension of credit and credit guarantees for relatively short periods.

7/ The apparent excess of Government-financed exports over total exports may be due to lags in reporting, differences in valuation procedures, or the recording of the export as destined for the country through which transshipment was made.

8/ The value shown for total exports includes, in addition to the values reported by the Bureau of the Census, the value of donations of grain sorghums through voluntary relief agencies, not separately reported by Census.

9/ Less than \$500.

1/ Authorized by Title I, P.L. 480. 2/ Shipments under dollar credit sales agreements signed through Dec. 31, 1966, authorized by Title IV, P.L. 480. Shipments under dollar credit and convertible foreign currency credit sales agreements signed from Jan. 1, 1967, authorized by Title I, P.L. 480, as amended by P.L. 89-808. 3/ Authorized by Title II, P.L. 480, as amended by P.L. 89-808. 4/ Authorized by Sec. 303, Title III, P.L. 480, and other legislation. 5/ Includes expenditures under commodity (nonproject) programs, project programs, and economic development loans, authorized by P.L. 87-195. For fiscal year 1969, includes July-December 1968 only because of a delay in the preparation of the report for January-June 1969. 6/ "Total corn exports outside specified Government programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some corn grain with governmental assistance in the form of (1) barter shipments for overseas procurement for U.S. agencies and (2) extension of credit and credit guarantees for relatively short periods. 7/ The apparent excess of Government-financed exports over total exports may be due to lags in reporting, differences in valuation procedures, or the recording of the export as destined for the country through which transshipment was made. 8/ Less than \$500.

^{1/} Includes disbursements by the Export-Import Bank and disbursements by U.S. commercial banks under Export-Import Bank medium-term guarantees against political and/or financial risk.

in 1965/66, but declined to a low of 40 percent in 1968/69. The other eight leading exporters had 36 percent of the market in 1959/60 and 27 percent in 1965/66. Their share climbed to a record 48 percent in 1968/69.

Other leading importers have also adopted policies to stimulate domestic grain production and reduce dependence on the world market or, like Japan, to develop additional sources of supply as a means of expanding exports. Lacking sufficient land to expand its feed grain production, Japan expanded its imports rapidly. The United States is Japan's leading national supplier. However, Japan is seeking to develop other sources of supply, especially in Asia and Australia. The United States is also the major supplier for the United Kingdom -- the second largest feed grain market. To meet its growing feed requirements, the United Kingdom has successfully followed policies aimed at stimulating domestic grain production, especially of barley. Spain, the world's third largest feed grain market, has also followed a policy similar to the United Kingdom's.

Unlike wheat exports, of which a large proportion have moved under P.L. 480 and Mutual Security programs, shipments of feed grains under programs made up 27 percent of total feed grain shipments in 1959/60 and only 6 percent in 1965/66. The proportion rose to 16 percent in 1966/67, when much grain sorghum was shipped to India to supplement wheat as a food grain there. In 1968/69, exports of feed grains under food aid programs were only 5 percent of total feed grain exports. Most of the total program shipments during the 1960's were in exchange for local currency or during the latter part of the decade under long-term credits, both currently authorized under Title I, P.L. 480.

P.L. 480 exports to certain countries were programed to meet import needs after production shortfalls occurred. In other countries, the importation of feed grains under this authority contributed to the development and expansion of domestic livestock and poultry industries. In turn, this growth has resulted in larger commercial purchases of feed grains and other products from the United States. In some years, Israel, Greece, and Spain sold P.L. 480 imports of feed grains at prices below domestic farm prices to encourage livestock production and stabilize prices for domestic feeds. During the 1960's, Israel received program imports but also purchased sizable quantities of U.S. feed grains for dollars. Soon after our exports to Greece and Spain for foreign currency ended, these countries shifted to important commercial purchases of feed grains and other agricultural products from the United States. ^{5/}

During the last decade, U.S. feed grains exported to India under Title I consisted of grain sorghums to supplement wheat during a prolonged drought. Pakistan received large quantities of corn, largely during 1966/67 -- a drought year. Egypt was an important recipient of U.S. feed grains -- principally corn -- early in the decade. During 1960-62, Poland received substantial quantities of barley and lesser amounts of corn and grain sorghums for local currency. In 1962/63, Poland shifted to commercial purchases of feed grains from the United States. These purchases amounted to \$24 million in 1962/63 and nearly \$16 million in 1968/69. During the 1960's, the Republic of Korea was an important market for U.S. feed grains, including both P.L. 480 and commercial exports.

Larger dollar sales accounted for the rise in U.S. exports of corn from \$279 million (5.5 million tons) in 1959/60 to \$936 million (17.1 million tons) in 1965/66. During the span, our share of the global export market for corn rose from 47 to 60 percent. Although the United States remains the leading supplier, U.S. exports declined to \$631 million (12.9 million tons) in 1968/69, or 48 percent of world exports.

Larger commercial exports made up 60 percent of the rise in U.S. exports of grain sorghums from \$109 million (2.5 million tons) in 1959/60 to \$358 million (7.1 million tons) in 1966/67. Both smaller dollar sales and India's reduced import needs under P.L. 480 contributed to the drop to \$128 million (2.7 million tons) in 1968/69. In the past 2 years, corn prices were more favorable than prices of grain sorghums and U.S. exports met strong competition from other grain sorghum suppliers, particularly Argentina.

U.S. exports of barley and oats in 1968/69 were about a tenth of the level of the decade's opening year.

Barter shipments for overseas procurement for U.S. agencies.--Shipments of feed grains under supply-type barter contracts are included in "Exports outside specified Government programs" in tables 2 through 9, but are shown separately in tables 10 and 11. Exports of feed grains under this program amounted to \$30 million (598,000 tons) in 1967/68 and rose to \$42 million (883,000 tons) in 1968/69.

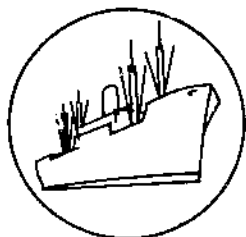

Europe took over a third of the total in 1967/68 and more than half the following year. Poland and Portugal were the leading European destinations. Approximately one-fourth went to Asia during both years. Israel and the Republic of Korea were the principal Asian markets. Chile, Jamaica, Colombia, and Guatemala were the largest Latin American purchasers. In Africa, the Canary Islands and Senegal bought corn and grain sorghums during both years.

CCC credit sales.--CCC credit sales are included in "Exports outside Government-financed programs" in tables 2 through 9, but are shown separately in tables 12 and 13. They amounted to \$22 million (412,000 tons) in 1967/68 and \$17 million (338,000 tons) in 1968/69. Hungary, Poland, Greece, and the Republic of Korea received all feed grains under this program during the 2 years.

Export-Import Bank guarantees.--Shipments of feed grains under Export-Import Bank guarantees are included in "Exports outside Government-financed programs" but are shown separately in table 14. During 1968/69, the Republic of Korea received 14,000 tons of corn worth \$0.9 million. Very little feed grains have been exported under Export-Import Bank loans or guarantees.

Transshipments through Canada and the Netherlands.--Transshipments through Canadian ports on the St. Lawrence and through the Netherlands for 1967/68 and 1968/69 are shown in tables 15 and 16. These shipments are reported in volume only. Values are computed from export unit values (f.o.b. U.S. ports) during the applicable period. They supply additional data on feed grain exports to a given country and help explain apparent discrepancies between program data and total exports as reported by the Bureau of the Census.

Discrepancies between Government-financed exports and total exports and between commercial exports and barter and credit sales shipments.--In the reports for 1967/68 and 1968/69, a few countries showed excess export quantity or value, or both, under Government programs over total exports of corn or feed grains reported in official trade statistics. The excess of program shipments to Tunisia in 1968/69 over total exports was due to transshipments through Canadian ports. In some instances, feed grains under barter contracts or under credit sales programs, or the sum of shipments under one or more of these programs, exceeded total commercial exports. The excess of barter exports over commercial to Finland and Portugal in 1967/68 was explained by transshipments to these countries through the Netherlands. The use of sales data for exports under the CCC credit sales program and disbursement data for exports under Export-Import Bank loans or guarantees may also account for discrepancies between these shipments and commercial exports. Lags in reporting, differences in valuation procedures, or transshipments through countries for which no data are available may also account for discrepancies. No adjustments have been made in the information as reported by the various sources.

SPECIAL in this issue

U.S. AGRICULTURAL IMPORTS BY ORIGIN, CALENDAR YEAR 1969

The Nation's demand for imported items remained quite strong during 1969, especially for meat, fresh vegetables, and wine. Import volume fell 9 percent to 117 percent of the 1957-59 index. But widespread price increases offset much of the volume loss and brought total U.S. agricultural imports to within 1 percentage point of the 1968 value level. Among the principal commodity imports, higher prices were paid for cattle, beef, pork, sugar, fresh vegetables, cocoa, rubber, and some spices. Considering broad trade areas, only Asia, Oceania, and Canada increased their sales of farm products to the United States during 1969 (table 17). Latin America's share of U.S. agricultural imports slipped 2 points in 1969 to 39 percent. Reduced coffee purchases accounted for much of the \$97 million decline in U.S. imports from Latin America between 1968 and 1969. All of the overall decline took place in purchases from South America and Caribbean Islands. Mexico shipped \$443 million worth of farm products to the United States in 1969, about 12 percent more than the previous year. U.S. imports from the CACM countries rose nearly 6 percent to \$316 million. Both of these value gains reflected strong U.S. demand for beef, sugar, fruits, and vegetables.

U.S. agricultural imports from European countries slipped 1 percent in 1969, but Europe's share of the total remained at 18 percent. Both EC and EFTA countries increased their agricultural exports to the United States during this period. The EC total reached \$363 million. Larger shipments of pork from the Netherlands and wine from France more than offset reduced imports from Italy and West Germany. Expanded exports of pork and cheese from Denmark were responsible for the 4-percent rise in EFTA shipments to the United States. Most of the other major European suppliers sent less last year. Reduced tobacco shipments from Turkey and Greece accounted for the drop in U.S. imports from those countries.

U.S. purchases of farm products from Asia rose 4 percent to \$849 million in 1969, primarily because of increased rubber purchases from Malaysia, Singapore, and Indonesia. Imports from Malaysia jumped 69 percent to \$146 million, those from Singapore gained 57 percent to \$21 million, and those from Indonesia were 6 percent higher at \$127 million. The Philippines exported items worth \$285 million, or 9 percent less than a year ago, as shipments of sugar and coconut products fell.

U.S. agricultural imports from Oceania gained 15 percent in 1969, and represented more than 11 percent of total U.S. farm product imports. Larger purchases of meat and sugar from Australia and beef from New Zealand accounted for the expansion.

Africa's share of U.S. agricultural imports slipped to 9 percent in 1969 from 11 percent a year earlier. Overall purchases from Africa fell 16 percent to \$468 million. The largest value decline occurred in U.S. purchases of coffee from all African suppliers, partly because of large U.S. stocks. Some African countries increased their agricultural exports to the United States in 1969, namely Ghana, Guinea, Liberia, Sierra Leone, and Tanzania (tables 18 and 19).

Table 17.--U.S. agricultural imports: Value by area and trade bloc, calendar years 1964-69

Total	1,865	1,903	2,133	2,120	2,423	2,336

An 8-percent gain in U.S. agricultural imports from Canada raised that country's total to \$244 million in 1969. Canada's share of all U.S. agricultural imports increased fractionally to 4.9 percent. Expanded U.S. purchases from Canada included grain preparations, fresh vegetables, cheese, and grass seed. The volume of beef and pork imports from Canada fell, but value rose because of higher prices.

SELECTED PRICE SERIES OF INTERNATIONAL SIGNIFICANCE

During March, the export price of Thai rice resumed the sharp drop, interrupted in February after a 13.6-percent crash from December to January. The monthly average was \$143.04 a metric ton, 5 percent below February, 23 percent below March 1969, and the lowest since January 1966 (table 20). Weekly quotations remained at \$150.00 from mid-February to mid-March, declined to a low point of \$136.80 on March 23, and recovered slightly to \$139.20 at the end of the month. Considering the worldwide rice surplus, the persistence of the export price of Thai rice within a \$178-199 range throughout 1969 was more surprising than the tottering in recent months.

The c.i.f. U.K. price for Argentine corn continued to climb for the third month. At \$65.55 a metric ton, the March price was 3 percent above February and 11 percent above a year ago. The c.i.f. U.K. price for U.S. No. 3 Yellow corn was also 11 percent above a year ago; but, in contrast to Argentine corn, it was virtually the same as in February. Thus, the customary premium of Argentine over U.S. corn reappeared, but only in the amount of \$1.26 a metric ton (3.2 cents a bushel). Comparable c.i.f. Rotterdam quotations did not reflect this price movement and realignment. At Rotterdam, both Argentine and U.S. corn prices dropped slightly from February to March, and the price of U.S. corn remained 79 cents a metric ton (2 cents a bushel) above that of Argentine corn. Throughout Italy, on the other hand, old-crop Argentine corn, levy-paid, continued to be quoted about \$9 a ton or 10 percent above quotations for U.S. No. 2 Yellow corn during March.

The c.i.f. U.K. sorghum grain price recovered to \$60.90 a metric ton in March, 1 percent above February and 18 percent above a year ago. That price was \$3.39 a ton (8.6 cents a bushel) below the U.S. corn price, a discount slightly below that prevailing in February. Argentine granifero sorghum grain throughout March was quoted at only \$52.36 a ton, c.i.f. Rotterdam -- \$7.87 a ton (20 cents a bushel) less than the corresponding price for U.S. No. 2 sorghum grain.

The c.i.f. U.K. price for U.S. No. 2 soybeans continued to climb. At \$113.31 a metric ton, it was 1.3 percent above February and 2.6 percent above a year earlier. U.S. soybean exports, which amounted to 287 million bushels during the marketing year ended last August and to 359 million bushels during the 12-month period ended February, are now estimated 375 million bushels for the marketing year ending August 1970.

Most wheat prices showed stability from February to March. Only the c.i.f. U.K. price of Australian wheat declined by almost 2 percent to \$64.37 a metric ton. Argentine wheat continued unquoted in the United Kingdom, but was quoted at \$64.67 a ton, c.i.f. Rotterdam, during the first 2 weeks of March. The Argentine wheat crop harvested last December and January is now officially estimated at 6.8 million metric tons, up 350,000 tons from a mid-harvest season estimate and up 1,060,000 tons from the 1968/69 crop. Despite these increases, only 599,000 tons were exported from Argentina during January-March, mostly to Italy and Brazil. January-March 1969 exports amounted to 1,104,000 tons.

The c.i.f. Liverpool price of American cotton, Memphis Territory, strict middling 1-1/16 inches, rose from 29.00 to 29.44 cents a pound -- its highest level since January 1969.

Commercial and Government Program Export Highlights

JULY-DECEMBER 1969

A rise of \$222 million in dollar sales brought U.S. agricultural exports in July-December 1969 to \$3,303 million, 6 percent higher than a year earlier. The largest gains were in feed grains and oilseeds and products. Smaller increases were recorded for animals and meat products, fruits and preparations, tobacco, rice, and vegetables and preparations. Exports of wheat, cotton, and dairy products were considerably lower.

Exports under Government-financed programs dropped \$27 million to \$437 million from the year-earlier period, with most of the decline in sales for foreign currency and in Government-level donations. Shipments of wheat and dairy products were substantially smaller, but more feed grains, rice, and cotton moved under programs than during the 1968 period (table 21).

Commodity Developments

Grains.--Shipments of wheat dropped to \$375 million (236 million bushels) from \$437 million (263 million bushels) in the first 6 months of 1968/69. Most of the decline was in P.L. 480 shipments, reflecting reduced import needs in several developing countries. India was the leading Title I destination, but took considerably less wheat than a year earlier. The Republic of Korea, Brazil, and Israel were also important recipients, mostly under long-term credits. Exports to Japan were up 12 percent, while those to the EC were only about 40 percent of last year's total.

A \$94 million gain in exports of corn and a small increase in grain sorghums brought U.S. exports of feed grains to \$555 million, 20 percent higher than the year-earlier total. Nearly four-fifths of the overall rise was in commercial exports. Feed grain shipments to Spain rose to \$32 million from \$3 million. Shipments to Japan were up 50 percent. Exports to the United Kingdom were 10 percent higher. The EC took about three-fourths of the year-earlier total. Program shipments, mostly under long-term credits, were principally to India, Chile, Israel, and the Republic of Korea. Despite large world supplies, U.S. exports of rice rose \$28 million to \$166 million with the increase nearly equally divided between program shipments and dollar sales. Indonesia and South Vietnam were the leading food aid recipients. Commercial exports to the EC, the United Kingdom, and Saudi Arabia were higher than a year earlier.

Cotton.--U.S. exports of cotton amounted to \$123 million (1.0 million bales), about 70 percent of the year-earlier total. Indonesia and the Republic of Korea were the leading Title I recipients of cotton and cotton products. Exports to India, partly under Title I, P.L. 480, amounted to \$24 million, compared with \$6 million in the 1968 period. Shipments to most Asian markets (including Japan) and to Western Europe (including the EC) were reduced. U.S. exports are lagging due to increased competition from several exporting countries with large stocks, the reduced use of cotton (particularly in Europe), and small U.S. supplies.

Table 21.--U.S. exports under specified Government-financed programs, commercial sales for dollars, and total agricultural exports: Value by commodity, July-December 1968 and 1969

Other	20.9	33.6	12.7	212.7	209.7	-3.0	233.6	243.3	9.7
Total agricultural exports	464.0	437.1	-26.9	2,644.2	2,866.1	221.9	3,108.2	3,303.2	195.0

^{1/} Includes sales for foreign currency, long-term dollar and convertible local currency credit sales, Government-to-government donations, donations through voluntary relief agencies, and barter for strategic materials under the authority of P.L. 480, and exports under Mutual Security (AID) programs, authorized by P.L. 87-195. Export under AID programs for July-December 1969 are not included because of a delay in the preparation of the report for this program.

^{2/} "Exports outside specified Government-financed programs" or "Commercial sales for dollars" include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter transactions involving overseas procurement for U.S. agencies, which benefit the balance of payments and rely primarily on authority other than P.L. 480; (2) extension of credit and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices; and (4) export payments in cash.

^{3/} Total exports of feed grains, excluding products, for July-December 1969 include the estimated value of donations of grain sorghums through voluntary relief agencies under P.L. 480, not separately reported by the Bureau of the Census, \$0.1 million.

^{4/} Total exports of dairy products include the estimated value of donations of blended food products through voluntary relief agencies under P.L. 480, not separately reported by the Bureau of the Census: 1968, \$10.4 million; and 1969, \$8.9 million.

Tobacco, unmanufactured.--U.S. exports of tobacco rose 10 percent in value to \$348 million, reflecting price advances for flue-cured and burley tobaccos. The quantity rise was about 2 percent. Larger shipments of stemmed leaf tobacco and the high quality of the 1969 crop boosted U.S. tobacco exports. Exports to most European markets were up, especially to the United Kingdom and Italy. Shipments to Japan and Australia were higher.

Oilseeds and products.--Exports in this group advanced 11 percent to \$769 million from the same period of 1968 with all of the rise in dollar sales. Soybean exports rose 8 percent in value; oil cake and meal, 16 percent; and soybean oil, 15 percent. Shipments of cottonseed oil increased to \$22 million, nearly 4½ times the year-earlier total. Of the major products, only flaxseed declined. Quantity increases for soybeans, protein meal, and cottonseed oil were greater than value rises because of lower prices which boosted exports. India and Pakistan continued as the leading outlets for soybean oil under P.L. 480. Global demand is expanding for U.S. oilseeds and products, reflecting continuing growth in livestock and poultry production and reduced competition from other world suppliers.

Dairy products.--Lower program and commercial exports contributed to the \$22 million drop in U.S. exports of dairy products to \$64 million. Most of the decline was in nonfat dry milk, butter, and anhydrous milkfat. Continued large supplies in Western Europe limited U.S. exports of dairy products.

Animals and products, except dairy.--Larger shipments of tanning items; live animals; meats and preparations; and fats, oils, and greases accounted for the \$41 million rise in U.S. exports of animals and products to \$325 million. Shipments of hides and skins were up nearly a fourth, reflecting plentiful U.S. supplies at competitive prices. The value of shipments of lard doubled, mainly because of much larger deliveries to the United Kingdom. Inedible tallow was up 10 percent in value, although the volume was reduced. Edible offals and variety meats rose over a fifth. Shipments of pork were higher, including a sizable increase in exports to Japan.

Fruits and vegetables and preparations.--In the first half of 1969/70, shipments of fruits and preparations advanced over \$35 million to \$188 million and exports of vegetables and preparations increased \$11 million to \$92 million. A rise of \$8 million in shipments of fresh oranges, plus smaller increases in some other fruits boosted the export value of fresh fruits by \$18 million. Canned fruits were up nearly \$14 million with most of the rise in canned peaches. Moderate increases in shipments of pulses and fresh and canned vegetables accounted for most of the 14-percent rise in shipments of vegetables and preparations.

Exports Under Supply-type Barter Contracts for U.S. Agencies and Credit Sales Programs

Included in "Commercial exports" or "Exports outside Government-financed programs" are shipments under barter contracts involving overseas procurement for U.S. agencies and credit sales programs. Exports under these programs are shown separately in tables 22 and 23. These shipments amounted to \$321 million in the first half of 1969/70, compared with \$228 million a year earlier. A \$72 million rise in shipments under barter contracts and a \$30 million increase in CCC credit sales was partly offset by a nearly \$9 million drop in shipments under Export-Import Bank loans and guarantees.

Barter for overseas procurement for U.S. agencies.--Exports under supply-type barter contracts rose 45 percent to \$230 million. Large increases were recorded in shipments of tobacco, corn, and cotton. The addition of rice, tallow, and grease to the commodities exported during the 1969 period also contributed to the rise. Exports of wheat, although slightly smaller than last year's, made up about a fifth of the total. Two-thirds of the tobacco went to Europe and three-tenths to Asia. Latin America took

^{1/} Credits for relatively short periods repayable in dollars plus interest (covering the financing costs of the lending agency).

^{2/} Includes disbursements by the Export-Import Bank and disbursements by U.S. commercial banks under Export-Import Bank medium-term guarantees against political and/or financial risk.

^{3/} Purchases during the period.

three-fourths of the wheat and Europe over seven-tenths of the corn. Over half the cotton was destined for Asia and nearly one-fourth for Europe.

Exports under credit sales programs.--Exports under credit sales programs amounted to \$91 million in July-December 1969, compared with \$69 million a year earlier. A rise of \$30 million in CCC credit sales more than offset a drop of nearly \$9 million in shipments under Export-Import Bank loans and guarantees. Most of the rise in CCC sales was in tobacco and corn. Shipments of cotton were considerably lower. All the tobacco went to Europe, with the United Kingdom the major recipient. Greece was the leading destination for the CCC corn. Japan took cotton, and Mexico received live-stock and baby chicks under Export-Import Bank loans and guarantees.

Government Program Developments

Exports under P.L. 480 programs amounted to \$437 million, down 6 percent from a year earlier. The reduction was mostly in shipments in exchange for local currency and Government-level donations. Larger wheat crops in developing countries substantially reduced import needs under P.L. 480. Less dairy products but more feed grains, rice, cotton, and tallow moved under food aid programs. Some lard moved under Title I for the first time since 1964/65 (tables 24 and 25).

Sales for foreign currency and dollar and convertible local currency credit sales.--Exports in exchange for local currency and under long-term credits amounted to \$350 million in July-December 1969. This compared with \$358 million a year earlier. All of the reduction was in sales for local currency. Less wheat and products, but more feed grains, rice, cotton, and tallow moved during the 1969 period. Of the 26 countries which received commodities under Title I, 18 received shipments under long-term credits only. Over 80 percent of the total sales were made with Asia. Leading destinations were India, Indonesia, South Vietnam, the Republic of Korea, Israel, and Brazil.

Foreign donations.--Declines largely in donations of wheat at the Government level reduced total donations under Title II, P.L. 480, to \$87 million in the first half of 1969/70 from \$96 million a year earlier. Less nonfat dry milk and blended food products were donated. Larger quantities of wheat flour, bulgur wheat, feed grains, soybean oil, and rice were shipped. No butter or anhydrous milk fat was shipped in the 1969 period, compared with \$6 million a year earlier. The leading recipients of Government-level donations were Indonesia, South Vietnam, the Republic of Korea, and Tunisia. The principal destinations for donations through voluntary relief agencies were India, Colombia, Morocco, the Dominican Republic, and Brazil.

Barter for strategic materials.--No deliveries were made under this program in July-December 1969. A year earlier, barter export value exceeded \$1 million.

Relief shipments of these commodities were not separately reported by the Bureau of the Census.

8/ Corn-soya-milk, 3,496,000 pounds, and wheat-soya-blend, 173,000 pounds, under Government-to-government donations; and corn-soya-milk, 118,559,000 pounds, and wheat-soya-blend, 400,000 pounds, through voluntary relief agencies.

World Trade Highlights

AGRICULTURAL IMPORTS OF CEYLON, IRAN, PAKISTAN, AND THE PHILIPPINES

Ceylon.--Wheat flour imports of Ceylon, continuing the upward trend of the early 1960's, replaced rice in 1967 as the top farm commodity imported (table 26). Wheat flour accounted for 30 percent of Ceylon's food imports in 1967, up from 13 percent the previous year. Rice imports, at 28 percent of the total, were down from 41 percent.

Vegetables, sugar, dairy products, and spices accounted for 35 percent of Ceylon's farm commodity purchases in 1967. Declines from the previous year occurred for all four categories, ranging from 16 percent for dairy products to 31 percent for sugar.

Principal agricultural suppliers in 1967 were Mainland China, 20 percent; Australia, 12 percent; and India, Burma, and Italy, 8 percent each. Shipments from Burma dropped two-thirds from a year earlier due mainly to much smaller rice purchases. Meanwhile, greatly increased imports of Italian wheat flour enabled Ceylon to more than triple its total takings from Italy.

Moving steadily upward, the U.S. share of Ceylon's agricultural imports reached 6.8 percent in 1967, up from 2.1 percent in 1964 (table 27). Wheat flour and dairy products accounted for 74 percent and 14 percent, respectively, of U.S. shipments to Ceylon in 1967. Principal competitors were Australia, Italy, France, and West Germany for the wheat flour trade and Australia, Netherlands, United Kingdom, and Denmark for the dairy products market.

Iran.--Agricultural imports of Iran in 1967 were valued at \$106 million, down 30 percent from the 1965 peak (table 28). Imports of wheat and flour fell to \$13 million from \$40 million during the 2-year period. Meanwhile, sugar imports dropped to \$16 million from \$37 million. Purchases of fats and oils, the leading import among farm product groups in 1967, were relatively stable at \$26 million.

The U.S. share of Iran's agricultural imports ranged from 30 percent in 1963 to 20 percent in 1967. Other main suppliers in 1967 were the U.S.S.R. and Australia with 14 percent and 9 percent shares. Major products from the United States were fats and oils and wheat and flour. These two groups accounted for 80 percent of the U.S. total in 1967, little changed from the previous year. Bulgaria and the U.S.S.R. were major competitors in the fats and oils category, while Australia competed successfully for a large slice of the wheat and flour market.

Iran's prime sources of imports in 1967 were U.S.S.R. and Cuba (sugar), Ceylon and India (coffee, tea, cocoa, and spices), Australia and Iraq (wool), the Netherlands and Israel (dairy products), and Malaysia (natural rubber).

Pakistan.--Recent annual fluctuations in Pakistan's agricultural imports chiefly reflected variations in wheat and flour purchases. Its 1967 wheat and flour imports reached \$147 million after sliding to \$64 million in 1966 from \$117 million in 1965

(table 29). These entries accounted for 60 percent of total farm imports in 1967, up sharply from 42 percent the year before, but slightly below the 63 percent share in 1964.

The United States remained the leading supplier of Pakistan's total agricultural imports although our share fell to 56 percent in 1967 from 74 percent in 1964. By commodity grouping, U.S. shares of Pakistan's leading farm imports in 1967 were: Wheat and flour, 65 percent; fats and oils, 65 percent; feed grains, 99 percent; dairy products, 16 percent; cotton, 29 percent; and tobacco, virtually 100 percent.

Ranking second through fifth were Australia, Canada, Afghanistan, and Mainland China. Australia supplied one-fourth of the wheat and flour and 5 percent of fats and oils. Imports from Canada were mainly wheat. Afghanistan provided 88 percent of Pakistan's imports of fruits and nuts. Mainland China was the source of three-fifths of the rice in 1967 although Burma supplied nearly all of Pakistan's rice imports during the preceding 3 years. Other important sources were Ceylon (fats and oils), Turkey (cotton), and the Netherlands (dairy products).

Philippines.--Rice, wheat and flour, dairy products, and cotton accounted for nearly three-fourths of Philippine farm imports in 1967. Rice regained its usual lead with \$46 million after dropping to fourth place the year before when these takings came to only \$15 million (table 30). Wheat and flour imports rose steadily from \$33 million in 1964 to \$40 million in 1967. Imports of dairy products followed a similar upward trend.

At 46 percent, the U.S. share of Philippine imports of farm products in 1967 was near the 1962-67 average. The United States was the leading source of wheat and flour, cotton, fruits and nuts, and animal feeds, and an important supplier of rice, dairy products, and other grain preparations.

Other important sources of Philippine agricultural purchases in 1967 include Thailand and Egypt (UAR) for rice; Netherlands, New Zealand, and Australia for dairy products; Mexico for cotton; Japan for fruits; and Argentina for meats.

Export Highlights

U.S. AGRICULTURAL EXPORTS, JULY-MARCH 1969/70

March 1970 exports of agricultural products totaled \$563 million, up 9 percent from year-earlier movements. Large gains were noted for wheat, rice, cotton, inedible tallow, almonds, hides and skins, and vegetable oils. Exports of soybeans, fruits and vegetables, feed grains, and tobacco approximated the high levels of 1969. During July-March 1969/70, agricultural exports advanced to \$4,932 million, over one-fifth above the year-ago period (table 35). Expanded exports of cotton, feed and food grains, fruits, vegetables, soybeans, vegetable oils, inedible tallow, hides and skins, protein meal, and tobacco contributed most to the 9-month gain.

Exports of animals and animal products increased 13 percent in July-March 1969/70. Total export value of animal fats, oils, and greases advanced by two-fifths to \$147 million, reflecting larger shipments of lard and higher prices for inedible tallow. Hide and skin sales were 28 percent above the \$93 million level of 1968/69 largely because of increased purchases by Eastern Europe, Japan, EC countries, and the U.S.S.R. Value of total meat exports rose slightly because of higher prices, but quantity fell. Exports of variety meats were up, while those of pork declined. Canadian and Japanese purchases of U.S. pork were down 29 and 6 million pounds, respectively, in July-March 1969/70 from the same period in 1968/69.

Cotton exports advanced to 2 million bales in July-March, up from the 1.7 million a year earlier. The gain largely reflected increased shipments to developing countries principally India, South Vietnam, and Indonesia. Exports to Japan totaled \$53 million, compared with \$43 million in July-March 1968/69.

Overseas deliveries of fruits and preparations were stimulated by substantial gains in U.S. production as well as lower prices for many products. Meanwhile, Australia and South Africa offered less competition because of their low production. Our July-March deliveries were up one-fifth from a year earlier. The sharpest value gains were recorded for oranges, fruit cocktail, canned peaches, and fresh grapes.

U.S. exports of grains and preparations were running 24 percent above levels of July-March 1969/70. Feed grain exports were two-fifths above the reduced levels of 1968/69 when strikes hampered movements at Atlantic and Gulf ports. In addition foreign production of feed grains was down last year in some major exporting countries. The export gain in feed grains was mainly to Japan and West European countries outside the EC. For example, exports to Spain totaled 744,000 tons against only 140,000 in July-March 1968/69.

Larger takings by industrial and developing countries boosted U.S. wheat and flour exports 64 million bushels above the relatively low 369 million bushel level of July-March 1968/69. Nationally, larger exports were noted for Japan, Colombia, Turkey, Switzerland, Brazil, Venezuela, India, Tunisia, and Nigeria. Wheat exports to the EC were down sharply because of increased West European production.

^{1/} Preliminary.

U.S. rice exports in July-March were about one-fourth above the level of the previous year. The EC, South Africa, United Kingdom, and Asian countries -- including South Vietnam and Indonesia -- purchased more U.S. rice this July-March. Improved production and larger stocks in many of the major exporting countries in Asia are expected to discourage U.S. exports in the next few months.

At 289 million bushels, U.S. exports of soybeans in July-March 1969/70 surpassed the total volume for 1968/69. Demand continued strong in Western Europe, especially in the EC. Because of the EC's high feed grain prices, West European feed manufacturers are substituting attractively priced soybeans for feed grains in livestock rations. Japan, the largest national outlet for U.S. soybeans, took 68 million bushels in July-March 1969/70, up 31 percent.

U.S. exports of unmanufactured tobacco were nearly one-fifth above the year-earlier levels. Higher prices for tobacco exports and the high quality crop of 1969 including more stemmed tobacco (which commands a premium price) contributed to sales gain.

U.S. exports of vegetables and preparations were about one-sixth above the level in July-March 1968/69. Dried beans, dried peas, canned tomatoes, and fresh vegetables led the increases for this group.

U.S. Agricultural Exports to the EC, July-March 1969/70

EC purchases of U.S. farm products in July-March totaled \$1,041 million, up about 10 percent from same months in 1968/69. Substantial gains in nonvariable-levy commodities accounted for all of the increase. Commodities subject to the EC variable levies were valued at \$271 million, 13 percent below a year earlier. The decrease reflected sharply reduced deliveries of feed grains and wheat. Rice exports, on the other hand, were up about two-fifths. Other variable-levy items remained near the low levels of a year earlier.

Exports of nonvariable-levy commodities were valued at \$770 million in July-March 1969/70, nearly one-fourth above those of 1968/69 (table 36). Soybeans and products made up about two-thirds of this gain. Increased exports of fruits and vegetables are associated with larger U.S. production and competitive prices. Oranges and canned fruits showed the largest gain for this group. Exports of cattle hides also improved in July-March as demand for leather products increased in the EC. Increased purchases of tobacco by West Germany and the Netherlands resulted in a 9-percent overall gain for this commodity.

Our exports of cotton were down because of increased foreign use of manmade fibers, expanded overseas production, and limited U.S. supplies. Exports of corn byproducts increased. These processed items, mainly gluten feed, are exempt from the variable levy.

1/ Grains, poultry, and pork were subject to variable levies beginning on July 30, 1962; rice, on Sept. 1, 1964; and beef and dairy products, on Nov. 1, 1964. 2/ Lard for food is a variable-levy commodity, while lard for industrial use is bound in the General Agreement on Tariffs and Trade (GATT) at 3 percent ad valorem. U.S. lard is for food use. 3/ Although canned poultry, tallow, and variety meats are subject to variable levies, these cannot exceed the amount of import duties bound in GATT. 4/ Variable levy on sugar-added content. 5/ Mainly corn gluten feed and meal, which are nonvariable-levy commodities; but may contain small quantities of other corn products, subject to variable levies (see "Export Highlights, March 1970").

Import Highlights

U.S. AGRICULTURAL IMPORTS, JULY-MARCH 1969/70

March imports of agricultural products by the United States totaled \$513 million, well above February's \$449 million and \$475 million recorded in March 1969. U.S. purchases of imported coffee this March declined to \$96 million, off \$7 million from a month earlier. But sugar entries rose in value to \$56 million from \$36 million the previous month.

For July-March 1969/70, U.S. agricultural imports totaled \$4,045 million, up 13 percent from a year earlier. Supplementary imports gained 12 percent to \$2,474 million, and complementary products were 13 percent higher at \$1,571 million (table 37).

Among supplementary commodities, imports were larger for cattle, meat, cheese, eggs, grain preparations, sugar, fresh vegetables, beverages, and animal feed. A domestic shortage and lower foreign prices created heavy import demand for eggs, particularly shell eggs. The surge in shell egg imports began during December when value jumped to \$470,000 from \$72,000 the previous month. In March, they began to decline after reaching a high of \$2.8 million in February (table 38).

Gains in complementary imports were centered mainly in coffee, cocoa, rubber, and spices. A large part of the increase in tropical products was accounted for by higher unit prices. The average unit value for coffee imported this March was 42 cents per pound, compared with less than 34 cents a year earlier. Other unit values and increases from March 1969 were as follows: cocoa beans, 37 cents per pound (3 cents), crude rubber, 21 cents per pound (3 cents), and unground black pepper, 45 cents per pound (19 cents).

Table 38.--U.S. imports of eggs: Value by month, July-March 1969/70

Month	Shell eggs	Eggs, not in shell
-- 1,000 dollars --		
1969:

1/ Based on 332 classifications.

2/ The seasonal adjustment series has been revised to incorporate the Bureau of the Census Method X-11. This new method of adjusting for seasonal variations is a continuing system which takes into account changing seasonal patterns. The previous adjustments were based on the seasonal factors developed from the base period 1957-59. For detailed explanation of the new adjustment procedures, see U.S. Department of Commerce, Bureau of the Census, The X-11 variant of the seasonal Method II seasonal adjustment program, Technical Paper No. 15. U.S. Government Printing Office, Washington, D.C., 1965.

1/ Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all other, about 98 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers. 2/ Based on 417 classifications.

3/ The seasonal adjustment series has been revised to incorporate the Bureau of Census Method X-11. The new method of adjusting for seasonal variations is a continuing system which takes into account changing seasonal patterns. The previous adjustments were based on the seasonal factors developed from the base period 1957-59. For detailed explanation of the adjustment procedures, see U.S. Department of Commerce, Bureau of Census, The X-11 variant of the seasonal Method II seasonal adjustment program, Technical Paper No. 15. U.S. Government Printing Office, Washington, D.C., 1965.

Explanatory Note

U.S. Foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in nonagricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued at \$251-\$499 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall export totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
