## Digest

---

U.S. Agricultural Imports From the European Community Up More Than One-Third in 1973 (see p. 5). U.S. agricultural imports from the European Community (EC) advanced 37 percent in value to reach \$1.1 billion in 1973. Denmark, the Netherlands, France, West Germany, and Italy were the principal suppliers. Higher prices and volume gains for dairy products and beverages led to much of the gain between 1972 and 1973.

\* \* \* \* \*

Export Price Rises Moderated During First Quarter of 1974 (see p. 14). The unit values of U.S. export commodities during the first quarter of 1974 rose at a more moderate pace than the galloping rates characteristic of the quarterly increases of 1973. During the first quarter of 1974, prices of the 13 leading U.S. agricultural commodities averaged 12 percent higher than the fourth quarter of 1973. Average quarter-to-quarter increases in 1973 were 23 points. Wheat, corn, sorghums, soybeans and soybean oil, cattle hides, milled rice, and inedible tallow were the fastest moving commodities in the index during the first quarter. The unit value of soybean meal declined.

Prices of the 12 leading U.S. agricultural import commodities were 1 percent lower during the first quarter of 1974 than during the last quarter of 1973. The quarter-to-quarter rises in the unit values for coffee, sugar, rubber, tobacco, and cocoa beans were tempered by the falling unit values for beef and veal, hams, wool, dutiable cattle, bananas, tomatoes, and wines.

\* \* \* \* \*

Ocean Freight Rates Decline From Record Levels (see p. 23). Following marked increases throughout 1973, ocean freight rates for heavy grain decreased during the first quarter of 1974. These decreases averaged 31 percent below the record levels of the fourth quarter of 1973, but did not appear to represent the beginning of a long-term trend.

\* \* \* \* \*

Government Program Exports, July-March 1973/74 (see p. 25). Agricultural exports under Government-financed programs, at \$567 million during July-March 1973/74 were 15 percent below the year-earlier level. Wheat and wheat flour, rice, and soybean oil continued to make up the bulk of these exports, but rice was the only commodity registering an appreciable value gain.

World food program donations under Title II of P.L. 480 advanced considerably, but exports under Government-to-government programs registered sharp declines. Barter transaction shipments, totaling \$268 million were down almost two-thirds. Total credit sales of agricultural commodities, valued at \$332 million, were off by 54 percent.

\* \* \* \* \*

Selected Price Series of International Significance (see p. 31). In May, the Dow-Jones and Reuter's commodity indexes dropped about 1 percent, reflecting the decline in international agricultural prices. Prices of all major U.S. agricultural export commodities declined. The f.o.b. Gulf Port price of U.S. No. 2 Hard Winter wheat dropped 11 percent, while soybean and corn prices were off slightly. Among imported commodities, only the price of cow meat and New York spot price of Brazilian Santos No. 4 coffee dropped. Price quotations for sugar and cocoa beans continued to soar. The New York spot price for rubber turned around to register a gain.

In April, U.S. export unit values of wheat, corn, and soybeans were well above the price quotations, but were down slightly from the March export unit values. The export unit value of cotton and soybean meal also declined, while the rice unit value rose 5 percent. On the import side, the unit value of fresh and frozen beef dropped, but unit values of imported tropical products rose.

\* \* \* \* \*

U.S. Agricultural Exports, July-May (see p. 36). U.S. agricultural exports reached a May record of \$1.8 billion in 1974, boosting sales during July-May 1973/74 to \$19.6 billion. More than three-fourths of the \$8.1-billion increase over the year-earlier level was due to higher prices for grains, oilseeds and products, tallow, and cotton. Except for shipments to the USSR, U.S. exports to most major markets were up substantially during July-May. The most impressive gain occurred in shipments to Japan, whose purchases totaled over \$3 billion, thereby strengthening our one-third share of that market.

\* \* \* \* \*

U.S. Agricultural Imports Total \$8.67 Billion in July-May (see p. 66). Price increases, and volume gains for dairy products, pork, sugar, wheat, cotton, tobacco, and beverages, accounted for most of the 30-percent jump in U.S. agricultural imports over year-earlier values. Volume showed little change, since inflows of most commodities declined or remained near last year's levels. Competitive farm product imports were one-third above the July-May 1972/73 value, while volume was only slightly higher. Noncompetitive agricultural items advanced 25 percent in value, but volume declined more than 3 percent.

---

### U.S. AGRICULTURAL IMPORTS FROM THE EUROPEAN COMMUNITY UP MORE THAN ONE-THIRD IN 1973

The enlarged European Community (EC) has become an increasingly important supplier of U.S. agricultural imports, with the value of 1973 shipments up 37 percent from 1972. When Denmark, the United Kingdom, and Ireland joined the six original EC members on January 1, 1973, the Community became second only to the Latin American Free Trade Association as a trading bloc supplying farm goods to the United States. Prior to 1973, the original six members shipped just over 7 percent of U.S. agricultural imports. After enlargement, the "six" provided nearly 9 percent. Between 1971 and 1973, the nine countries' share rose from 11.6 percent to 13.2 percent.

U.S. agricultural imports from the countries now comprising the EC advanced from \$800 million in 1972 to \$1.1 billion in 1973, with the original six members accounting for two-thirds of the 1973 total. Denmark, the Netherlands, France, West Germany, and Italy were the principal suppliers. Meat, wine and beer, dairy products, fruits, vegetables, and flower bulbs were some of the main items shipped.

Nearly 90 percent of our 1973 agricultural imports from EC members were competitive or partially competitive with U.S. farm products. Demand for these remained strong despite dollar devaluation relative to most European currencies. Import values for canned hams, specialty cheeses, distinctive wines, and many other items rose faster than the average rate. The EC countries are major suppliers of these products.

U.S. meat import volume from the EC declined in 1973 as European demand increased. However, higher prices in the EC countries and appreciation of currencies resulted in value gains for meats shipped to U.S. importers. Canned hams and shoulders, largely from Denmark and the Netherlands, totaled 220 million pounds or 4 percent above 1972's volume; value meanwhile jumped 49 percent to \$272 million. Beef and veal entries, all from Ireland and Northern Ireland, fell nearly one-fourth to about 26 million pounds, but value was 14 percent higher at \$22 million.

Our dairy product imports from the EC more than doubled in 1973, reaching \$157 million, as a result of liberalized import quotas. Cheese imports totaled 115 million pounds (\$79 million), compared with about 88 million pounds (over \$60 million) in 1972. All EC member countries, except Italy, shipped significantly more cheese to the United States during 1973. Nonfat dry milk entries jumped from zero to nearly 137 million pounds (\$41.6 million). Butter imports were 16.7 million pounds (\$9.1 million), against only 201,000 pounds (\$185,000) a year earlier. Butteroil imports totaled 21 million pounds (\$11.5 million) compared with insignificant amounts in 1972. Casein entries rose 58 percent in volume to 26 million pounds and 33 percent in value to \$12 million. (Casein is not under quota controls.)

<sup>1/</sup> Totals may not add due to rounding.

The volume of U.S. wine imports from the EC gained 17 percent in 1973 to reach 34 million gallons. Value advanced 37 percent to \$208 million. Most of the gain was in table wines from France, Italy, and West Germany. Beer and ale import volume was up one-fifth to nearly 25 million gallons; value gained 40 percent to \$38 million. The Netherlands and West Germany were the principal suppliers.

Fruit and vegetable imports from EC sources declined \$2 million between 1972 and 1973 to \$46.5 million. Reduced purchases of canned tomatoes from Italy accounted for the drop. Prepared vegetables, chestnuts, and canned cherries are the main import items within this group.

The \$22-million gain in complementary, or largely noncompetitive, agricultural commodities from EC members between 1972 and 1973 resulted mainly from additional inflows of soluble coffee and tea, and higher prices for cocoa products and essential oils. Soluble coffee purchases, mostly from France and the United Kingdom, increased 78 percent to 14.5 million pounds (\$35 million). Essential oils used in perfumes originate chiefly in France and include geranium, lavender, bergamot, and rose oils.

Table 2.--U.S. agricultural imports from the enlarged EC: Quantity and value by commodity or commodity group, calendar years 1968-73 1/

### EXPORT PRICE RISES MODERATED DURING FIRST QUARTER OF 1974

by  
H. Christine Collins 1/

The unit values of U.S. export commodities continued to rise during the first quarter of 1974, but not at the galloping rates characteristic of the quarterly increases of 1973. The indexes calculated from export unit values for the quarter ended March 1974 show that export unit values of the 13 leading U.S. agricultural export commodities were 167 percent of the export unit values for the first quarter of 1973. First quarter 1974 export prices averaged 12 percent higher than the previous quarter. Wheat, milled rice, and inedible tallow were the fastest moving commodities in the quarterly index.

The decline in the unit value of soybean meal from the fourth quarter of 1973 to the first quarter of 1974 was a turnabout from the rapid quarter-to-quarter rises that occurred during 1973. Cattle hides, however, were the only major agricultural export commodity to cost less than in the first quarter of 1973. Dried eggs, oat meal, and dried peas are minor items in U.S. exports, but the extremely rapid rise in their unit values from January-March 1973 to January-March 1974 was noteworthy.

Prices of the leading U.S. agricultural import commodities were 1 percent lower during the first quarter of 1974 than during the fourth quarter of 1973, but were still 26 percent higher than they were the first quarter a year ago. Rubber experienced the fastest rise in unit value from the first quarter of 1973 to the first quarter of 1974, with increases occurring as late as January-March 1974. Cocoa beans followed close behind, despite a minimal rise in unit value during the first quarter 1974. These rises were tempered by continued declines in the unit values for bananas and tomatoes.

The United States continued to have very favorable terms of trade between agricultural exports and imports in the first quarter 1974. The same combination of goods which paid for the purchase of 100 units of a combination of import goods during January-March 1973 paid for 132.4 units of such goods a year later.

Wheat, our leading agricultural export commodity, had a January-March 1974 quarterly unit value of \$4.93 a bushel, more than double a year earlier and 15 percent higher than the previous quarter. However, there were smaller quantities being shipped out than in the fourth quarter or a year earlier. Japan, Brazil, and Korea accounted for the largest value of wheat. Quantity-wise, however, the USSR and PRC followed

1/ Unit values were computed from the value and quantity figures published in Foreign Agricultural Trade of the United States. Cotton poundages were obtained from U.S. Bureau of the Census Reports, Supplement to EM 522.

2/ The index numbers are of "Fisher's Ideal" type.

Japan as recipients of U.S. wheat during the winter quarter. The differential between the quarterly export unit value and the quoted price for wheat, which has been significant since June 1972, is narrowing, as the share of wheat going to the USSR and PRC declines.

The unit value of flour rose to \$10.83 a hundredweight--in the 1974 winter quarter--nearly double a year earlier and 27 percent higher than a quarter earlier. (Wheat flour made the sharpest advance from the fourth quarter 1973 of all leading agricultural export commodities.) This implies that flour was valued 1.32 as high as a pound of wheat. Over the preceding quarters, this price relationship ranged from 1.30 to 1.64. Because of the milling rate between wheat and flour, 1.4 pounds of wheat are required to make 1 pound of flour. These quarterly statistics imply a negative milling margin.

The quarterly unit value of rice was \$23.84 a hundredweight, also more than double a year ago and 10 percent above the previous quarter. The effect of strong export demand is continuing to influence rice prices, hence the export unit value. The quantity of rice exports was higher than a year ago but off slightly from the previous quarter. While the unit value of rice is reflecting the rapid rise in the quoted prices, it may not match them.

The price quotation given in Selected Prices of International Significance in this publication pertains to milled rice with 5-percent broken kernels, while the unit value includes milled rice with much higher portions of broken. Milled rice was our sixth largest agricultural import during the winter quarter and South Vietnam, Cambodia, Republic of South Africa, and Saudi Arabia were our leading rice importers.

The first quarter 1974 unit value of inedible tallow at \$18.43 a hundredweight was 212 percent of a year ago, but was only 2 percent higher than the fourth quarter of 1973. The fall in U.S. tallow output during most of 1973 drove unit values to their high levels.

Soybean oil replaced soybean meal as the soybean-complex commodity with the fastest rising unit value from a year ago. During January-March 1974, soybean oil was valued at 23 cents a pound, 97 percent higher than a year ago. The price rise was due to the tightness of supply of soybean oil during the fall quarter of 1973. While the unit value of soybean oil rose 4 percent from the previous quarter, the unit value of soybean meal dropped 4 percent to \$10.19 a hundredweight. The decline in the soybean meal unit value reflected the decline in the quoted prices which occurred as soybean meal became more plentiful. The price ratio between soybean meal and soybean oil returned to a more normal level. Normally, the meal content of soybeans is worth more than the oil extract, i.e., about 1.4 times as much. Of the 1974 winter quarter unit values, the meal content of soybeans was worth 1.9 times the oil content, closer to normal than it was during any quarter of 1973. The quarterly export unit value of soybeans was \$6.54 a bushel, 41 percent higher than a year ago, and 13 percent higher than the previous quarter.

During the first quarter of 1974, the value of soybean exports nearly topped the value of wheat exports. Soybean meal was our fourth largest agricultural export; soybean oil, our eighth largest. Soybeans were principally destined for the Netherlands, Japan, and West Germany; while soybean meal was largely shipped to West Germany, Italy, Yugoslavia, and France.

During the 1974 winter quarter, the unit values for cotton began reflecting last summer's extremely high prices prevailing for U.S. cotton in the Liverpool market. The differences between the U.S. export unit value for cotton and the c.i.f. Liverpool price for American cotton, Memphis Territory, strict middling, 1-1/16 inches, in March 1974 was \$105 a running bale. In March 1973, before cotton prices were bid up,

the differential was \$66 a running bale, while in September 1973, the differential had leaped to \$254 a running bale. U.S. cotton prices have moderated on the Liverpool market, but heavy forward buying during the summer of 1973 buoyed U.S. cotton export unit values through the 1974 winter quarter. Japan, the PRC, and Korea were the leading importers of U.S. cotton during the quarter.

Corn, our third largest agricultural export commodity, was valued at \$2.94 a bushel, 68 percent higher than a year ago. The unit value, which was still rising in the first quarter, reflected the rise in the Gulf port export price, which also occurred through February 1974. The largest purchasers of U.S. corn during the quarter were Japan, West Germany, and Spain.

Whole cattle hides are the only major agricultural export commodity with a lower export unit value during the 1974 winter quarter than a year ago. After quarter-to-quarter declines during 1973, the unit value rose slightly from the 1973 fall quarter to the 1974 winter quarter.

Over the long run, export commodity values which have more than doubled since 1967 include wheat, wheat flour, corn, sorghum grain, soybeans, cotton, inedible tallow and hides and skins. The export unit value of milled rice and soybean meal have tripled and more than quadrupled, respectively, since 1967 (table 10). Most of these rapid unit value increases have occurred during the past 2 years. In comparing the first quarter of 1974 with calendar year 1967, the price index of the major export commodities is 238.9.

#### Import Price Index

Fewer major import commodities have doubled in unit value since 1967. Imported fresh and frozen beef and veal, wool, cocoa beans, and dutiable cattle increased 120 percent or more, but tobacco, bananas, and tomatoes remained nearly constant during the 7-year period. In comparing the first quarter of 1974 with calendar year 1967, the price index of the major import commodities is 169.1.

From the first quarter of 1973 to the first quarter of 1974, rubber, our fourth largest agricultural import, was the only major import commodity to double in unit value. In the first quarter of 1974, rubber was valued at 33 cents a pound. Indonesia, Malaysia, and Singapore were the principal exporters of rubber to the United States. Despite the higher prices, the quantity of rubber imported by the United States increased over a year ago.

The quarterly unit value of cocoa beans, our sixth largest agricultural import, rose 76 percent from a year ago, also reflecting the rise in the price quotations. The quantity of cocoa bean imports was down nearly 20 percent. Brazil, Ghana, and Ivory Coast were the leading suppliers of cocoa beans to the United States.

The unit value of wool, which rose rapidly during 1973, declined slightly during the first quarter of 1974. The quantity of imports during the first quarter of this year was about one-third of a year ago.

The price of coffee, our leading agricultural import, was 16 percent higher than a year ago. Coffee, valued at 58 cents a pound during January-March 1974, was obtained from Colombia, Brazil, and Mexico. Because of the U.S. import demand for coffee, the quantity imported during the first quarter 1974 was larger than a year ago.

During the first quarter of 1974, sugar was our second largest agricultural import, with Brazil, the Philippines, and Peru supplying the largest quantities. The unit value was 10.6 cents a pound, reflecting increases mostly during the January-March quarter, as world and U.S. import prices rose to unprecedented levels. In comparison to a year ago, the quantity of sugar imports also rose.

Table 9.--U.S. export unit values for selected agricultural commodities; by quarter, 1967-74

n.q. = No quotation.

The unit values of products in the livestock-meat complex dropped during the first quarter of 1974 but were still higher than a year ago. Fresh and frozen beef and veal, our third largest import, was valued at 86 cents a pound, 36 percent higher than a year ago. Ham, our fourth largest import, valued at \$1.31 a pound, was 35 percent higher. The unit value of dutiable cattle rose 22 percent to \$180 a head. Dutiable cattle are the tenth largest of our agricultural imports. Australia, New Zealand, and Canada were the principal sources of U.S. imports of beef and veal, while Denmark, the Netherlands, and Poland exported ham to us.

The quantity of U.S. fresh and frozen beef and veal and hams increased 5 percent and 17 percent, respectively, from a year ago. In contrast, the number of dutiable cattle imported declined.

For the fourth consecutive quarter, the unit value of tomatoes declined, reaching 11 cents a pound during the first quarter. The unit value of bananas was 4 cents a pound, valued 5 percent lower than both the first and fourth quarters of 1973. The unit value of wines at \$5.00 a gallon has only recently begun to decline. The quantity of wines imported during the first quarter was down 15 percent from the corresponding 1973 quarter.

The unit value of tobacco, which has been relatively steady since 1967, was 64 cents a pound during the first quarter of 1974.

The total value of U.S. agricultural exports during the first quarter of 1974 was 63 percent higher than a year ago and 3 percent higher than the previous quarter; the total value of agricultural imports was one-third higher than a year ago. The quarterly quantity indexes (which are obtained as byproducts of the price indexes) were down slightly for exports, and up slightly for imports, as shown below:

January-March 1974

|                           | <u>Percent of a<br/>year earlier</u> | <u>Percent of a<br/>quarter earlier</u> |
|---------------------------|--------------------------------------|-----------------------------------------|
| Quantity index of exports | 94.2                                 | 97.4                                    |
| Quantity index of imports | 104.8                                | 103.9                                   |

Prices paid by Foreign Countries Importing U.S. Agricultural Products

Now let us consider how U.S. export unit values changed from 1972 to 1973 for a basket of agricultural goods to various countries. From price indexes of foods based on the value of U.S. agricultural commodities exported to the individual foreign countries in 1972 and 1973, it appears that the increase in U.S. export prices fell heavily on the less developed countries. Chile, Argentina, Yemen, Nepal, Senegal, Central African Republic, Chad, Kenya, and Malagasy all had a price index of 200 or more. Many of these countries had to go into the market and purchase wheat and rice, when a year earlier they had no need to import these foodstuffs. Many of the export unit value indexes of U.S. agricultural exports to West European countries ranged from 130 to 150. The unit value index of U.S. agricultural exports to Japan was 152. Shifting monetary exchange rates, resulting from the U.S. dollar devaluation, allowed many West European countries to absorb higher U.S. export prices. Generally, the monetary tool of devaluation has the initial effect of lowering the price of the devaluing country's exports in relation to other countries. The unit value index of U.S. agricultural exports to the USSR was 111, reflecting the relatively low prices at which the Soviet Union purchased U.S. wheat, corn, and soybeans. Some countries such as Paraguay, Uruguay, Syria, Bahrain, Burma, Uganda, Tanzania, and Malawi paid less for their composite of imported goods in 1973 than in 1972.

Table 11.--U.S. import unit values for selected agricultural commodities;  
by quarter, 1967-74

| Quarter ending last<br>day of month | Coffee | Sugar | Beef<br>and<br>veal | Rubber | Wool  | Cocoa<br>beans | Tobacco | Bananas | Hams  | Tomatoes | Cattle<br>duntable | Wines  |

## Ocean Freight Rate Highlights

---

### RATES DECLINE FROM RECORD LEVELS

by  
T. Q. Hutchinson 1/

In the first quarter of 1974, ocean freight rates for heavy grain declined 31 percent from the record levels of the last quarter of 1973. No trade reporting showed even a nominal increase.

No U.S.-flag vessels were reported participating during the first quarter of the year.

Rates for foreign-flag vessels from U.S. Gulf ports led the general decline, with reductions averaging \$9.38 per ton (34 percent) below the fourth quarter of 1973. This decrease was caused primarily by a reduction of \$22.68 per ton in average rates for the U.S. Gulf to Antwerp-Rotterdam-Amsterdam trade. Other trades from the U.S. Gulf origin area showed less dramatic, but still significant, decreases.

St. Lawrence River port rates decreased 35 percent to \$9.92 per ton. Pacific Coast ports, with only the Japan trade reporting, declined 26 percent to \$19.55 per ton. Great Lakes ports, where seasonal highs were expected in the first quarter, slipped 2 percent to \$26.78 per ton.

Shipments from U.S. Atlantic ports commanded rates averaging 9 percent (\$1.48 per ton) below the prior quarter. Rates from these ports to the United Kingdom fell an average of \$9.69 per ton, while rates to Antwerp-Rotterdam-Amsterdam averaged only \$0.21 per ton lower.

Rates for heavy grain declined markedly in January and February 1974. The transportation crunch caused by record overseas demand for U.S. grain also eased during this period. In March, however, rates commenced to rise. Preliminary indications are that second quarter averages may have equaled the records set in the fourth quarter of 1973.

## Government Program Export Highlights

JULY-MARCH 1973/74

Agricultural exports under Government-financed programs continued their downtrend through the third quarter of fiscal year 1974. July-March exports, at \$567 million, were 15 percent below the year-earlier level. Wheat and wheat flour, rice, and soybean oil accounted for the bulk of Government program shipments. With the exception of rice exports, shipments of all major commodities normally moving under Government programs registered steep declines. Rice exports, totaling \$203 million, were \$27 million above last year's shipments and accounted for nearly two-fifths of total rice exports during July-March. The value gain reflected higher unit values as volume was down about 60 percent. Small value gains occurred in exports of feed grains and vegetables and preparations. Cotton exports, down \$55 million, showed the largest value decline.

During July-March 1973/74, exports under Title I of P.L. 480 moved almost exclusively as long-term dollar credit sales. Local currency shipments, all cotton, totaled only \$14,000. Dollar-credit sales, valued at \$374 million, were nearly one-fifth below the year-earlier level. Rice and wheat made up more than three-fourths of all dollar-credit shipments. Other major commodities shipped under this program included corn, grain sorghums, tobacco, and soybean oil.

Title II donations under P.L. 480 amounted to \$143 million in July-March 1973/74, compared with \$181 million a year earlier. Donations through the world food program registered a \$14-million advance, but Government-to-government and voluntary relief donations declined sharply. Reduced Government-to-government shipments were largely due to a \$32-million drop in wheat exports. The decline in shipments under the voluntary relief program reflected the absence of nonfat dry milk exports during July-March and a \$6-million drop in wheat exports.

Shipments under Mutual Security (AID), reported for July-December only, totaled \$49 million, compared with \$20 million a year earlier.

Barter shipments under contract for overseas procurement for U.S. agencies totaled \$269 million in July-March 1973/74, slightly better than one-third the value shipped a year earlier. Shipments of cotton and tobacco, the major commodities moving under this program, were down considerably. No wheat moved under barter during July-March. Wheat accounted for 14 percent of barter shipments a year earlier.

Credit sales of U.S. agricultural commodities in July-March dropped to \$332 million from \$714 million a year earlier. Wheat and cotton continued to make up the major part of total credit sale exports but were down 58 and 14 percent, respectively.

CCC credit sales of agricultural commodities--mainly wheat, cotton, and corn--totaled \$282 million against \$662 million a year earlier. The sharpest declines occurred in sales of tobacco and vegetable oils.

Shipments under Export-Import Bank loans, valued at \$50 million during July-March were down slightly from the previous year's level. Cotton accounted for more than nine-tenths of total exports under this program. Tobacco exports, at \$3.3 million, made up the remaining transactions.

Table 14.--U.S. agricultural exports: Specified Government-financed programs, commercial sales for dollars, and total; value by commodity, July-March 1972/73 and 1973/74

1/ Includes sales for foreign currency, long-term dollar and convertible local currency credit sales, Government-to-government donations, and donations through voluntary relief agencies authorized by P.L. 480, as amended; and exports under Mutual Security (AID) programs authorized by P.L. 87-195. (AID exports include data only for July-December in both years.)

2/ "Export outside specified Government-financed programs" or "Commercial sales" include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter transactions involving overseas procurement for U.S. agencies, which benefit the balance of payments and rely primarily on authority other than P.L. 480; (2) extension of credits and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices; and (4) export payments in cash.

3/ Total exports of feed grains, excluding products, include the estimated value of donations of grain sorghums through voluntary relief agencies under P.L. 480, not separately reported by the Bureau of the Census: 1974, \$0.5 million.

1/ Less than 500.

2/ Less than \$50,000.

3/ Total exports include those reported by Census plus foreign donations through voluntary relief agencies. Relief shipments of these commodities are not separately reported by Census.

## International Price Highlights

### SELECTED PRICE SERIES OF INTERNATIONAL SIGNIFICANCE

In May, the Dow-Jones and Reuter's commodity indexes reflected the slight decline in international agricultural prices. The indexes dropped about 1 percent to 338 and 1,355, respectively.

All export commodities covered in this article's price series registered declines during May. Among the import commodities, only the price of cow meat and the New York spot price of Brazilian coffee dropped. Price quotations for sugar and cocoa beans continued to soar, and the New York spot price for rubber sheets turned around to register a gain.

As Northern Hemisphere harvests approach, international wheat prices have plunged. The f.o.b. vessel, Gulf ports price of U.S. No. 2 Hard Winter Wheat (HWW) dropped 11 percent to \$140 a metric ton during May. Similarly, the Thunder Bay price for No. 1 Canadian Western Red Spring (CWRS) wheat fell 9 percent to \$200 a ton. The c.i.f. U.K., nearest forward shipment, price of HWW fell 10 percent to \$173 a ton and the c.i.f. Rotterdam price for U.S. No. 2 HWW, 12-percent protein, dropped 7 percent to \$170 a ton in May. Spreads between the U.S. Gulf price and Rotterdam and U.K. prices were \$30 and \$33 a ton, respectively, with both spreads far exceeding the \$18-per-ton freight rates between U.S. Gulf ports and Rotterdam. At Rotterdam, the import price fell below the EC threshold price, bringing the EC import levies back into operation for wheat, as well as for corn and rice.

While the Thunder Bay price for Canadian Western Red Spring wheat declined in May, it was still higher than the c.i.f. Rotterdam price of \$179 a ton. The c.i.f. U.K. price for CWRS fell 7 percent (in comparison to the 14-percent plunge in the Rotterdam price for No. 1 CWRS). Nevertheless, the c.i.f. U.K. price of No. 1 CWRS, at \$233 a ton, was sufficient to adequately cover transportation costs from Canada. The Canadian Wheat Board is, however, bringing export wheat prices down into line with U.S. export wheat prices. In mid-May, the Canadian Wheat Board lowered the offering price for No. 1 CWRS, 13.5-percent protein, in-store, Thunder Bay, from \$5.75 (Canadian) to \$4.75 (Canadian).

According to the May 1973 Wheat Situation (USDA, ERS), initial projections place the 1974 world wheat crop 2 percent higher than in 1973. The United States is beginning harvests of a bumper crop, and output in Canada, Australia, and Argentina is expected to be larger than a year ago. The USSR's crop, however, is estimated to be below last year's outstanding level. India's crop, the first of the major 1974 wheat crops to be harvested, is estimated at 22.5 million tons--down from last year's 24.9 million tons.

International corn prices were generally more steady than wheat prices in May. The f.o.b. vessel, Gulf ports price for No. 2 yellow corn dropped less than 1 percent

to \$114 a ton. The c.i.f. Rotterdam prices for U.S. No. 3 yellow corn and Argentine corn dropped slightly to \$130 and \$144 a ton, respectively. Similarly, the Rotterdam price for U.S. No. 2 sorghum grain slipped to \$122 a ton. The c.i.f. U.K., nearest forward shipment, price for U.S. No. 3 yellow corn, however, plunged 12 percent to \$121 a ton.

Corn prices, like wheat prices, are still well above those of a year ago. Prospects for larger U.S. corn supplies in 1974 have been tempered by the wet weather since mid-May. Total feed grain carryover this fall is currently forecast at 22 million tons, the lowest level since 1952.

Except for the 9-percent drop in the c.i.f. Rotterdam price for U.S. soybean meal to \$157 a ton, prices in the soybean complex were generally steady in May. The f.o.b. vessel, Gulf ports, price for U.S. No. 2 yellow soybeans dropped 2 percent to \$210 a ton; similarly, the c.i.f. U.K., nearest forward shipment, price stayed at \$230 a ton, bringing the price differential between the U.S. and U.K. markets to \$20 a ton. The c.i.f. Rotterdam price for U.S. No. 2 yellow soybeans, bulk, slipped 3 percent to \$234 a ton. The price differential between the U.S. Gulf port and Rotterdam markets narrowed slightly to \$24 a ton.

In the oilseed complex, the United States has prospects for a large soybean crop, as does Brazil. India's peanut crop should reduce that country's import requirements of fats and oils and increase export supplies of groundnut cake. A sharp increase in sunflower output, is expected in the USSR, and world groundnut and palm oil output will probably expand in 1974.

Rice prices have moderated. The May price for Thai rice, 5-percent broken, f.o.b. Bangkok, was \$625 a ton, the same as in April. This is consistent with the f.o.b. mill prices for Texas medium and long grain rice, which were off only slightly from the April prices. According to the February 1974 Monthly Bulletin of Agricultural Economics and Statistics (United Nations, FAO), the price outlook for the second half of 1974 depends largely on the monsoon in Asia, the world's main rice-producing region.

The price series for American cotton, Memphis Territory, strict middling, 1-1/16 inches, has been changed from c.i.f. Liverpool to c.i.f. North European ports. In the new price series, the May price was 64 cents a pound, 9 percent lower than the April price.

Price movements among imported products were mixed in May. The f.o.b. U.S. port of entry price for imported cow meat, 90-percent lean, frozen, boneless, declined 5 percent to 70 cents a pound.

Coffee prices declined slightly in the New York spot market. In May, the spot price for coffee from Santos, No. 4, was 74 cents a pound. The spot price for Colombian Manizales coffee, however, moved up slightly to 82 cents a pound. The offering price for Santos No. 4, f.o.b. Santos, moved up slightly to 73.15 cents a pound. On May 14, 1974, Brazil's coffee marketing institute announced a price rebate to importers of Brazilian coffee, which should be reflected in the New York spot price for coffee in the near future. The outlook is for a plentiful 1974 coffee bean harvest in Brazil.

The New York spot price for cocoa beans from Accra continued to rise slightly to \$1.14 a pound.

The New York spot price for No. 1 rubber, ribbed smoked sheets, which dropped in April, rose 2 percent to 44 cents a pound in May. In recent months, in reaction to the higher prices of 1973, rubber tapping in producer countries has increased.

In May, the f.o.b. and stowed, Caribbean ports prices of raw cane sugar for the world market and the U.S. market continued to climb, as indicators point to a tight supply

situation. The world price at Caribbean ports was 24 cents a pound, 9 percent higher than a month earlier. The price to the U.S. market was 21 cents a pound, 21 percent higher than the April price. In May, the world market price for sugar exceeded the U.S. sugar price (priced at Caribbean ports) by 2.35 cents a pound. (In June 1974, however, the premium paid for sugar destined for the U.S. market again became positive.)

In early June, the U.S. House of Representatives rejected the House Agricultural Committee's Sugar Bill, which contained provisions for allocating sugar imports. The rejection of the bill played a part in maintaining a firm undertone to the U.S. market. It is not yet clear how future sugar legislation will be formulated.

How do the quoted U.S. export and import price quotations compare with import and export unit values? In April, the export unit value of wheat was \$5.31 a bushel, well above the April price quotation of \$4.30. The relationship between the price quotation and the export unit value is now the reverse of the relationship in 1973, when price quotations were higher. Likewise, in April, the export unit values of corn (\$3.05 a bushel) and soybeans (\$6.46 a bushel) were above the Gulf ports price quotations. These differences between prices and unit values reflect the forward buying which is characteristic of wheat, corn, and soybeans. The export unit value of milled rice rose 5 percent in April to \$588 a ton, while the unit value of U.S. soybean meal slipped slightly to \$219 a ton. Raw cotton unit values, at \$1,176 a ton, were running far below Liverpool price quotations.

On the import side, the unit value of fresh and frozen beef dropped 6 percent in April to 78 cents a pound. Import unit values of tropical products rose substantially from March to April. Cocoa beans rose 13 percent to 61 cents a pound; coffee increased 3 percent to 61 cents a pound; sugar, 17 percent to 13 cents a pound; and rubber, 6 percent to 40 cents a pound.

n.q. = No quotation.

1/ Prior to July 1971 quotation was for Canadian No. 1 Northern wheat in store Fort William-Port Arthur ports. Content of 14-percent protein, until November 1973; thereafter 13 percent.

2/ 14-percent protein until May 1973; thereafter 13½-percent protein.

3/ New York spot price minus .625c/lb. duty and minus freight and insurance from Caribbean to New York.

4/ Beginning in April 1974, price quotations for Northern European ports.

Note: The price series for U.S. No. 2 Hard Winter wheat, ordinary protein, f.o.b. vessel, Gulf ports, has been changed to be consistent with the price series of the same published in Wheat Situation (ERS/USDA).

The price series for No. 1 Canadian Western Red Spring wheat, in store, Fort-William-Port Arthur-Thunder Bay has been changed. Except for the most recent quarter are consistent with series Quarterly Bulletin of Agricultural Statistics, Statistics Canada. The Ministry of Industry, Trade and Commerce, Canada. The price series for imported cow meat 90 percent lean, frozen, boneless, f.o.b. U.S. port of entry has been changed. The new monthly price is an average of daily quotations. The price series for cocoa beans from Accra has been changed. The new monthly price is an average of daily quotations.

## Export Highlights

### U.S. AGRICULTURAL EXPORTS, JULY-MAY

U.S. agricultural exports, continuing to set records, reached \$19.6 billion during July-May 1973/74. Shipments for the 11-month period topped year-earlier exports by \$8.1 billion or 70 percent. Record high prices for several of our major export items were important in the dramatic value increase.

Grains accounted for over three-fifths of the overall value gain. Value totals were also up for soybeans, protein meal, cotton, rice, tallow, fruits, and vegetables and preparations. Exports of dairy products and whole cattle hides, however, continued to decline despite substantially lower prices.

Agricultural exports in May 1974 totaled \$1.8 billion, compared with \$1.4 billion last May.

Exports increased to all major markets, except USSR. The biggest value increases occurred in shipments to Japan, People's Republic of China, West Germany, Netherlands, Mexico, and Italy, with these six markets accounting for 43 percent of the total increase. Wheat, feed grains, and soybeans were the major commodities shipped to these countries.

Our farm exports to Japan topped the \$3 billion mark during July-May 1973/74, more than doubling sales to West Germany, our second largest market. A year earlier, our agricultural exports to Japan had just reached the \$2 billion level. Exports of feed grains, wheat, and soybeans, all at higher prices, were up \$800 million during the 1973/74 period and represented 71 percent of total value increase in exports to Japan.

Exports to other Asian countries totaled \$4.2 billion during July-May, double the year-earlier level. Substantial increases occurred in shipments to Taiwan, Hong Kong, the Philippines, India, Pakistan, and most West Asian countries.

The enlarged European Community (EC) took \$4.9 billion worth of U.S. farm products in July-May 1973/74, compared with \$3.2 billion a year earlier. Nonvariable-levy items such as soybeans and tobacco accounted for most of the increases. Purchases of these two commodities boosted total nonvariable-levy imports from the United States to \$3.4 billion, 42 percent above the July-May 1972/73 level. Purchases of variable-levy items in July-May rose to \$1.5 billion from \$831 million a year earlier. Feed grains--mainly corn--and wheat grain continued to make up 90 percent of the variable-levy commodities.

In contrast to record U.S. exports to other major markets, our farm shipments to the USSR dropped to \$471 million in July-May 1973/74 from \$786 million a year earlier. Reduced shipments of wheat and soybeans were primarily responsible for the almost steady decline in exports to the USSR over the past year. In May 1974, U.S. farm shipments to the USSR amounted to about 21 percent of the value shipped in May 1973.

Table 20.--U.S. agricultural exports: Value by commodity  
July-May 1972/73 and 1973/74

## Import Highlights

---

### U.S. AGRICULTURAL IMPORTS TOTAL NEARLY \$8.67 BILLION IN JULY '74

During the first 11 months of fiscal 1974, U.S. imports of agricultural products amounted to nearly \$8.67 billion, 30 percent above the year-earlier total. The increase was due primarily to higher import prices as volume remained about the same.

Competitive, or supplementary, farm product imports totaled almost \$5.7 billion, compared with \$4.27 billion in the year-earlier period. Sharply higher prices for many commodity groups plus volume gains for dairy products, pork, sugar, wheat, cotton, tobacco, and beverages accounted for the 37-percent gain. Volume of beef and veal imports was 1.38 billion pounds--about 2 percent below the same as last year--while value advanced 34 percent to \$1.18 billion because of price increases.

Swine imports in July-May totaled 125,000 head (\$14.2 million), compared with 54,000 head (\$5.2 million) a year earlier. All of these imports came from Canada. Pork imports, at 369 million pounds (\$444 million), were chiefly canned hams--287 million pounds valued at \$379 million--and most came from Denmark, the Netherlands, Poland, and Yugoslavia. Fresh or frozen pork entries, mainly from Canada, advanced to 55.8 million pounds (\$38.5 million) from 52.5 million pounds (\$28.3 million).

Cattle hide imports during July-May totaled 35 million pounds (\$11 million), compared with 19 million pounds (\$7 million) a year earlier. Canada shipped most of the cattle hides. The reduction in U.S. cattle slaughter created the additional demand for foreign hides.

Cheese imports totaled 327 million pounds (\$226 million), compared with 172 million pounds (\$107 million) in July-May 1972/73. Nonfat dry milk entries were 285 million pounds (\$144 million) against 82.4 million pounds (\$25.7 million) the previous year.

Gains in butter, butter oil, and casein imports also occurred. The EC, Canada, and New Zealand accounted for most of the increase in U.S. dairy product imports.

Wheat imports (excluding seed) in May amounted to 1,023,746 bushels valued at \$4,780,471, all from Canada. Wheat import quotas were suspended in January 1974.

Import value was lower for cattle, wool, and most fresh vegetables.

Noncompetitive, or complementary, imports increased in value to \$2.97 billion during July-May 1973/74 from nearly \$2.39 billion in similar months in 1972/73. Overall volume declined 3.5 percent. Higher import prices for coffee, cocoa, crude rubber, essential oils, spices, and carpet wools resulted in the value gain. Import volume rises were limited to crude rubber, tea, and essential oils.

Banana imports in July-May 1973/74 rose only slightly to 4 billion pounds (nearly \$180 million) as volume in May dropped 36 million pounds below the May 1973 level. Green coffee entries nearly equaled the year-earlier volume, while value rose to \$1.56 billion from \$1.36 billion. Dry crude rubber entries advanced 15 percent to 1.26 billion pounds, but value more than doubled to \$402 million owing to price rises. Tea imports gained 10 percent to 162.7 million pounds and \$65.8 million.

Table 29.--U.S. agricultural imports: Value by commodity,  
July-May 1972/73 and 1973/74

| Commodity or commodity group                      | July-May                     |         | Change         |
|---------------------------------------------------|------------------------------|---------|----------------|
|                                                   | 1972/73                      | 1973/74 |                |

1/ P.L. 88-482, (1964) provides for the imposition of quotas on fresh, chilled or frozen beef, veal, mutton and goat meat. Fresh, chilled or frozen boneless beef accounted for more than 90 percent of the import volume in 1969-73 (95.3 percent in 1973). The data in this table include rejections by APHIS inspectors totaling 13.5 million pounds in 1969, 17.4 million pounds in 1970, 21.0 million pounds in 1971, 17.8 million pounds in 1972, and 18.4 million pounds in 1973.

TABLE 32.—U.S. AGRICULTURAL IMPORTS: QUANTITY AND VALUE BY COMMODITY

1/ Based on 359 classifications in 1971.

2/ The seasonal adjustment series has been revised to incorporate the Bureau of the Census Method X-11. This new method of adjusting for seasonal variations is a continuing system which takes into account changing seasonal patterns. For detailed explanation of the new adjustment procedures, see U.S. Department of Commerce, Bureau of the Census, The X-11 Variant of the Seasonal Method of Seasonal Adjustment Program, Technical Paper No. 15, U.S. Government Printing Office, Washington, D.C., 1965.

|                            |                                      |                        |                                      |                                      |       |                              |                                 |       |                                            |
|                            |                                      |                        |                                      |                                      |       |                              |                                 |       |                                            |

1/ Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 98 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers.

2/ Based on 430 classifications in 1971.

3/ The seasonal adjustment series has been revised to incorporate the Bureau of the Census Method X-11. The new method of adjusting for seasonal variations is a continuing system which takes into account changing seasonal patterns. For detailed explanation of the new adjustment procedures, see U.S. Department of Commerce, Bureau of the Census, *The X-11 Variant of the Seasonal Method II Seasonal Adjustment Program*, Technical Paper No. 15, U.S. Government Printing Office, Washington, D.C., 1965.

7/74 Foreign Agricultural  
Trade

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in transit through the United States from one foreign country to another when documented as such through U.S. Customs.

**EXPORTS** The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in nonagricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued at \$251-\$499 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

**IMPORTS** Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
