FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES

Digest

Agricultural Exports Under Government-Financed Programs in 1974 (see p. 5). U.S. agricultural exports under specified Government-financed programs dropped 8 percent in calendar year 1974 to \$797 million, accounting for only 4 percent of all U.S. farm exports. Farm shipments under P.L. 480 edged up 1 percent to \$760 million, largely as a result of a strong advance in shipments under Government-to-Government (world food) and voluntary relief programs. Shipments under Title I long-term dollar credit sales were down 10 percent, or \$54 million, and exports under the Mutual Security (AID) program in 1974 amounted to only one-third of the 1973 level.

* * * * *

U.S.-Mexican Agricultural Trade Again Sets New Records (see p. 33). United States-Mexican trade continued its strong upward trend during 1974, reflecting rising Mexican food deficits and a general increase in price levels. U.S. agricultural exports to Mexico were more than double the 1973 record, reaching \$863 million, and U.S. imports from Mexico were up slightly from the 1973 peak to \$767 million.

* * * * *

U.S.-USSR Agricultural Trade, 1972-74 (see p. 42). U.S. agricultural exports to the USSR in calendar 1974 dropped by two-thirds to \$300 million, consisting mainly of wheat and corn. The level of imports, however, nearly doubled, reaching \$8.5 million.

* * * * *

International Commodity Prices Continued High in 1974 (see p. 44). The 1974 Dow Jones commodity spot price index was 40 percent higher than the 1973 average. Yet, recent developments suggest that the rising world price trends which began in 1972 may have ended with 1974. Soybeans and soybean meal, cotton, and imported cow meat experienced sharp downturns in 1974, following 1973 increases. Wheat, corn, sorghum, rice, coffee, sugar, cocoa bean, and rubber prices continued their upsurge into 1974, reaching all-time highs, but by year's end had also started to weaken.

* * * * *

U.S. Agricultural Export Value Gains 10 Percent in July-February (see p. 55). Farm product exports in July-February 1974/75 totaled more than \$15 billion, compared with \$13.7 billion a year earlier. Higher prices accounted for most of the gain, as volume declined 15 percent for major items. February farm product exports amounted to \$1.92 billion, a decline from the January record high, but about the same as February 1974. Exports to Canada, Mexico, Western Europe, West and South Asia, Africa, Oceania, Central America, and the Caribbean increased.

* * * * *

Agricultural Import Value Up 10 Percent in July-February, Volume Down (see p. 90). U.S. agricultural imports for the first 8 months of fiscal 1975 totaled \$6.55 billion, 10 percent more than the same months a year earlier. However, overall volume was down. February's monthly value of \$694 million was the lowest since September 1973. Competitive farm product imports accounted for all of the July-February value increase.

SPECIAL in this issue

AGRICULTURAL EXPORTS UNDER GOVERNMENT-FINANCED PROGRAMS IN 1974

by

M. Louise Perkins ^{1/}

U.S. agricultural exports under Government-financed programs in calendar year 1974 totaled \$797 million, down 8 percent from 1973. Government-financed exports accounted for 4 percent of all agricultural exports--the lowest share since the inception of Government-financed programs. In 1973, Government-financed exports accounted for 5 percent of the agricultural total, but total farm shipments in 1973 and 1974 valued at \$18 billion and \$22 billion, respectively, were substantially above the \$5.7-billion average during 1955-1972.

While the vast bulk of commercial farm exports are unassisted commercial transactions, the U.S. Government provides various forms of assistance to a small portion of commercial exports. Included in this group are exports that have received payment assistance, exports bartered for overseas procurement for U.S. agencies, and exports under short-term credits and guarantees issued by the CCC and the Export-Import Bank. Exports under barter contracts totaled \$80 million in 1974, compared with \$874 million in 1973. Exports under the CCC credit sales program, valued at \$182 million, amounted to one-fifth of last year's sales. The value of shipments under Export-Import Bank loans was unchanged from the \$79-million level of 1973.

The remainder of this article concerns noncommercial exports financed under Government programs, which include shipments under P.L. 480 and under Mutual Security (AID) programs. These Government-financed exports, valued at \$797 million were distributed primarily under the P.L. 480 program. Exports under the auspices of AID dropped to \$37 million in 1974 from \$113 million in 1973, when they had accounted for 13 percent of all Government-financed exports.

The decline in U.S. food aid under Government-financed programs in 1974 stems from the fact that authorization to export U.S. agricultural commodities under P.L. 480 depends on the availability criteria established in Section 401 of the P.L. 480 act. To assure adequate food supplies for domestic consumption, announcements of large volumes of U.S. food aid shipments began only in late 1974 after the unfavorable effects of the year's poor growing weather on crops could be evaluated. Thus, late programming in 1974 is reflected in the low level of food aid shipped.

^{1/} Special acknowledgements are due Louise Stanton and Linda C. Myers for the compilation and statistical analysis of data in this article.

President Ford, in his budget message submitted to Congress on February 3, 1975, revealed that the Food for Peace program would be increased for fiscal year 1975. The new figures show \$1.47 billion for the purchase of commodities, compared to \$851 million in 1974, an increase of more than \$600 million. Moreover, the President called for \$679 million for programs aimed at improving and expanding food production in the developing countries.

Agricultural exports under P.L. 480 edged up about 1 percent to \$760 million in 1974, with the usual three-fifths share (by value) moving under the dollar-credit sales program. Dollar-credit sales of farm products valued at \$488 million in 1974 were \$54 million below last year's level and \$172 million below the 1972 peak. Major recipients under the dollar-credit sales program were South Vietnam, Cambodia (Khmer Republic), Bangladesh, Pakistan, and Egypt. In 1974, combined shipments to these countries accounted for more than nine-tenths of all dollar-credit sales. These same countries received slightly more than half of all dollar-credit sales a year earlier. Wheat, rice, and substantially smaller amounts of soybean oil, cotton, and tobacco accounted for nearly all dollar-credit sales in 1974. No shipments moved under the Local Currency Program in 1974. Sales for local currencies, formally authorized under Title I, P.L. 480, were discontinued on December 31, 1971. But shipments to fulfill existing contracts continued through 1973.

In 1974, the value of farm products shipped under Title II of P.L. 480 rose 30 percent to \$272 million, reaching a record share of all Government-financed exports. Donations under Government-to-government (world food) programs rose 12 percent to \$132 million. Most of the increase in Title II shipments, however, was due to a 54-percent gain in donations through Voluntary Relief Agencies. Voluntary Relief donations advanced \$49 million to \$140 million in 1974.

Better than three-fifths of all Voluntary Relief donations went to India, Morocco, the Philippines, Colombia, and Egypt. The bulk of these donations was concentrated in wheat and wheat products, blended food products, and soybean oil. With the exception of grain sorghums, the commodity composition of Government-to-government donations was similar to that of Voluntary Relief exports. But the distribution of these farm products was more widespread. Mali and Niger were the largest recipients of farm shipments under Government-to-Government programs in 1974.

AID shipped \$37 million worth of farm products in 1974, mainly to South Korea, Indonesia, Pakistan, Morocco, India, and South Vietnam. Wheat, corn, grain sorghums, and inedible tallow made up about three-fourths of all AID shipments. In 1973, rice valued at \$31 million was included among the principal commodities exported through AID. Rice exported under the AID program in 1974 totaled only \$34,000. Wheat shipments under AID were also down, to \$5 million in 1974 from \$40 million a year earlier.

The direction of flow of U.S. food aid in 1974 was governed by recent U.S. policy with respect to countries most seriously affected by food shortages. The United Nations designated thirty-two countries as "Most Seriously Affected" by the current economic crisis. These were countries without the internal food production capability or the foreign exchange availability to secure food to meet their immediate food requirements. The Congress called upon the President and Secretary of State to take several steps to mobilize appropriate resources to meet the food emergency. Included in these actions, the Congress directed that during the fiscal year ending June 30, 1975, not more than 30 percent of concessional food aid should be allocated to countries other than those which were most seriously affected by current food shortages, unless the President demonstrated to appropriate Committees of the Congress that the use of such food assistance was solely for humanitarian food purposes.

Wheat and wheat products--Total U.S. wheat and wheat product exports valued at \$4.6 billion in 1974 registered a 10-percent increase over the previous year's record. But wheat and wheat product exports under Government-financed programs dropped sharply to \$218 million from \$298 million in 1973. Most of the decline was due to a 50-percent reduction in dollar-credit sales of wheat. Wheat shipments under the AID programs were also sharply reduced. Title II, P.L. 480 donations of wheat and wheat products, valued at \$78 million in 1973, rose 72 percent to \$134 million in 1974. While donations of all commodities in this group advanced in 1974, the major part of the increase resulted from substantially larger donations of wheat flour in 1974. Major country destinations in 1974 were India, Bangladesh, South Vietnam, Morocco, Indonesia, and Egypt.

Feed grains and products--The United States exported \$4.7 billion worth of feed grains and products in 1974, compared with \$3.6 billion a year earlier. The growth in commercial sales, however, accounted for more than the growth in total exports as feed grains and products shipped under Government-financed programs fell 23 percent to \$77 million. Feed grain donations under Title II almost doubled the 1973 levels, and shipments under the AID program totaled some \$12 million, against no exports in 1973. These increases, however, were insufficient to offset the massive decline in dollar-credit sales of feed grains in 1974.

Government program shipments of grain sorghums valued at \$46 million in 1974 were virtually unchanged from the year-earlier level. The value of Government-financed corn exports, on the other hand, declined from \$47 million in 1973 to \$21 million in 1974. Major outlets for Government program shipments of grain sorghums in 1974 included Mali, Niger, Pakistan, South Korea, Chad, and Mauritania. Better than three-fourths of the Government-financed corn went to Indonesia, Ethiopia, Guinea, South Korea, Tanzania, and South Vietnam in 1974.

Rice--Government program shipments of rice in 1974 rose 36 percent to \$288 million and accounted for slightly more than one-third of all U.S. rice exports. All rice shipments under P.L. 480 were dollar-credit sales and went to Cambodia and South Vietnam. AID supplied Cambodia with rice valued at \$34,000 in 1974.

Blended food products--In 1974, Government program exports of corn-soya-milk and wheat-soya-flour totaled \$43 million against \$59 million a year earlier. Nearly all of the decline in shipments of these blended food products was due to a sharp decline in corn-soya-milk. With the exception of \$519,000 in dollar-credit sales to Jamaica, all blended food products moved under Title II donations in 1974.

Cotton--Exports of cotton under Government programs totaled \$30 million in 1974 against \$82 million a year earlier. A doubling in the unit price of cotton between 1973 and 1974 is very likely responsible for part of the decline in the value of Government-financed shipments. In 1973, Government-financed cotton moved at \$168 per running bale, but in 1974 the export unit price was \$346. All cotton exports in 1974 moved under the dollar-credit program to South Vietnam and Indonesia.

Tobacco--Exports of tobacco under Government programs totaled \$37 million in 1974 against \$25 million a year earlier. Although the volume of tobacco exported increased nearly one-third, the increase reflected a much higher unit value in 1974. Tobacco exports, continuing to move heavily under the dollar-credit sales program, went to South Vietnam, Egypt, Thailand, Cambodia, and the Philippines. Israel received about \$322,000 worth of tobacco under the AID program.

Oilseeds and products--Government program shipments of oilseeds and products, mainly soybean oil, rose 19 percent to \$76 million in 1974. Soybean oil, about equally distributed under dollar-credit sales and Title II donations, amounted to \$74 million in 1974 against \$61 million a year earlier. Higher prices accounted for all of the value gain; volume was down about one-third. Three-fifths of all soybean oil shipped under dollar-credit sales went to Pakistan. Other recipients of soybean oil under dollar-credit sales include Tunisia, South Vietnam, and Bangladesh, each receiving about \$4 million worth of soybean oil, and Israel and Cambodia. Widespread distribution of this commodity occurred under the Voluntary Relief and Government-to-Government programs. No soybean oil was shipped under the AID program in 1974.

Dairy products--In 1974, total exports of dairy products rose 27 percent to \$76 million, but commercial shipments accounted for all of this value gain. Government program shipments of dairy products at \$3 million in 1974 amounted to three-fifths of the previous year's level. Shipments of dairy products in 1974 moved under the AID program and included infant dietary supplements and lactose destined for South Vietnam and Cambodia.

Animals and animal products, except dairy products--Government program shipments of animals and animal products, continuing to move mainly under the AID program, totaled \$14 million in 1974 compared with \$18 million in the previous year. Inedible tallow valued at \$11 million in 1974 accounted for the bulk of these shipments. In order of importance, AID shipments of inedible tallow went to Pakistan, India, Morocco, Ghana, and Cambodia.

Fruits and vegetables and preparations--In 1974, U.S. exports of fruits and vegetables rose 18 percent to \$1.1 million, but Government program shipments of this commodity group were negligible. Fruits and vegetables shipped under Government programs amounted to about \$400,000 in 1973 and 1972.

Exports Under Barter Contracts and Credit Sales

Overseas procurement barter transactions in 1974 totaled \$80 million, compared with \$874 million a year earlier. Barter transactions included five eligible commodities in contrast to 13 a year earlier. Cotton bartered for overseas procurement, valued at \$72 million, accounted for 90 percent of all 1974 barter transactions. Tobacco, worth \$7 million, ranked second. Small amounts of corn, grease, and inedible tallow made up the remainder. Major barter transactions were made with Japan, Taiwan, Hong Kong, West Germany, Italy, and Thailand. Barter transactions with these countries consisted of cotton exclusively, except in Thailand, where tobacco was the only commodity involved.

Exports under credit-sales programs--Total credit sales of U.S. farm products totaled \$262 million in 1974 compared with \$993 million in 1973. All of the decline was due to a \$731-million drop in CCC credit sales.

However, effective December 3, 1974, the list of commodities eligible for export financing under the CCC Export Credit Sales Program as announced November 29, 1974, was amended to include dry edible beans for 6 to 12 months of financing. The amended list of eligible commodities includes beef and dairy breeding cattle, breeding swine, cotton, eggs (dried, frozen, and canned), canned and frozen poultry, milled and brown rice, tallow, tobacco, and wheat. The amendment made feed grain (barley, corn, grain sorghums, oats, and rye) ineligible for new financing.

In 1974, wheat, rice, barley, corn, grain sorghums, tobacco, and cotton worth \$182 million were exported under CCC credit sales programs and accounted for more than two-thirds of all credit sales. CCC credit sales of wheat went mainly to Pakistan, Chile, and Peru. The United Kingdom took nearly three-fifths of our tobacco exported under CCC credit sales. Credit sales of U.S. corn went primarily to the USSR, Romania, and Chile. The Republic of Korea took more than three-fourths of the cotton, while barley moved exclusively to Romania.

Transactions under Export-Import Bank loans and medium-term guarantees amounted to \$79 million in 1974, virtually unchanged from the year-earlier level. Cotton worth \$76 million moved to Japan, down about \$3 million from the 1973 level, but this decrease was offset by some \$3 million worth of tobacco exported to Ireland.

Table 1.--Agricultural exports outside Government-financed programs or commercial exports under barter contracts for overseas procurement and credit sales programs, value, calendar years 1955 through 1974 and July-December 1954

1955-74 and July-December 1954	4,811	1,533	3,607	9,951	108,053	118,004

1/ Shipments under overseas procurement barter contracts are authorized by the CCC Charter Act and are essentially equivalent to dollar sales since they offset the dollar outflow for foreign purchases by U.S. agencies with a dollar inflow for agricultural commodities.

2/ Shipments under Export-Import Bank loans and guarantees and under the CCC credit sales program are credits for relatively short periods repayable in dollars plus interest (covering the costs of the lending agency).

^{1/} Includes sales for foreign currency, long-term dollar and convertible local currency credit sales, Government-to-government donations, and donations through voluntary relief agencies authorized by P.L. 480, and exports under Mutual Security (AID) programs authorized by P.L. 87-195.

^{2/} "Exports outside specified Government-financed programs" or "Commercial sales" include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter transactions involving overseas procurement for U.S. agencies, which benefit the balance of payments and rely primarily on authority other than P.L. 480; (2) extension of credits and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices; and (4) export payments in cash.

^{3/} Total exports of feed grains and products, include the estimated value of donations of grain sorghums through voluntary relief agencies under P.L. 480, not separately reported by the Bureau of the Census: 1974, \$0.9 million.

^{4/} Total exports include those reported by Census plus Government-to-Government donations.

NA - Not available. ^{1/} Authorized by Title I, P.L. 480. ^{2/} Shipments under agreements signed through Dec. 31, 1966, authorized by Title IV, P.L. 480. Shipments under agreements signed from Jan. 1, 1967, authorized by Title I, P.L. 480, as amended by P.L. 89-808. ^{3/} Authorized by Title II, P.L. 480. ^{4/} Authorized by Sec. 416 of the Agricultural Act of 1949 and Sec. 302, Title III, P.L. 480 through Dec. 31, 1966. Authorized by Title II, P.L. 480, as amended by P.L. 89-808, effective Jan. 1, 1967. ^{5/} Authorized by Sec. 303, Title III, P.L. 480, and other legislation. Includes some shipments in exchange for goods and services for U.S. agencies before 1963. ^{6/} Sales for foreign currency, economic aid, and expenditures under development loans authorized by P.L. 's 165, 665, and 87-195. ^{7/} "Total agricultural exports outside specified Government programs" (sales for dollars) include in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter shipments for overseas procurement for U.S. agencies; (2) extension of credit and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices; and (4) export payments in cash or in kind. ^{8/} Includes shipments only for July-December 1970. ^{9/} Less than one-half percent.

Other	1.5	5.5	+3.8	492.0	496.9	+4.9	493.5	502.2	+8.7

^{1/} Includes sales for foreign currency, long-term dollar and convertible local currency credit sales, Government-to-government donations, and donations through voluntary relief agencies authorized by P.L. 480, and exports under Mutual Security (AID) programs authorized by P.L. 87-195.

^{2/} "Exports outside specified Government-financed programs" or "Commercial sales" include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter transactions involving overseas procurement for U.S. agencies, which benefit the balance of payments and rely primarily on authority other than P.L. 480; (2) extension of credits and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices; and (4) export payments in cash.

^{3/} Total exports of feed grains and products, include the estimated value of donations of grain sorghums through voluntary relief agencies under P.L. 480, not separately reported by the Bureau of the Census: 1973, \$0.3 million.

^{4/} Total exports including those reported by Census, plus Government-to-government donations.

Table 17.--U.S. credit sales of agricultural commodities: Value by commodity

U.S.-MEXICAN AGRICULTURAL TRADE AGAIN SETS NEW RECORDS

by

John E. Link

United States-Mexican agricultural trade continued its strong upward trend during 1974, reflecting rising Mexican food deficits and a general increase in price levels. U.S. agricultural exports to Mexico more than doubled the 1973 record and reached \$863 million. U.S. agricultural imports from Mexico were up slightly from the 1973 peak and totaled \$767 million.

Agricultural products advanced from 12 to 18 percent of total U.S. exports to Mexico, which rose 68 percent to \$4.8 billion in 1974. In contrast, agriculture's share declined from about 33 percent to 23 percent of total U.S. imports from Mexico, which increased nearly 50 percent to \$3.3 billion.

In 1970-72, the United States accounted for two-thirds of total Mexican imports. While this is substantial, the U.S. share has actually declined about 10 percent from the mid-1960's as a result of Mexican diversification efforts. However, the U.S. is still an expanding market for Mexican goods. In 1963-65, the U.S. imported about 60 percent of total Mexican exports and by 1970-72 this had increased to 88 percent. ^{1/} On the agricultural side, the United States has increased its share of both Mexican imports and exports. From 1963-65 to 1970-72, U.S. farm products increased from 60 to 66 percent of total Mexican agricultural imports. In the same period, the U.S. share of total Mexican agricultural exports went from one-half to nearly three-fourths.

In 1974, for the first time in recent years, the balance of U.S. agricultural trade with Mexico favored the United States (figure 1). Traditionally, the United States has had a favorable total balance of trade with Mexico which has nearly always been offset by U.S. tourist expenditures and investment flows to Mexico.

Maintaining food supplies and building up stocks expanded imports as prices continued to advance in 1974. The growing consumption of wheat products in Mexico pushed exports of U.S. wheat to a new record of over 1.01 million metric tons valued at \$181 million in 1974.

^{1/} Based on U.S. trade statistics for U.S. imports from Mexico and Mexican trade data for Mexican exports to the United States.

U.S. exports of corn, a basic food staple in Mexico, soared to 1.39 million tons valued at \$194 million in 1974. This reflects a 67-percent increase in volume and about an 80-percent increase in price. Grain sorghum shipments also reached a record level of 451,000 tons valued at \$55.3 million. Grain sorghum is the primary feed grain used in Mexico, used mainly for poultry and swine. A shortage of malting barley and increasing demand for beer pushed U.S. exports of barley to 180,000 tons valued at \$26.2 million, up sharply from 56,000 tons in 1973 and the 1970-72 average of 4,000 tons.

As a result of anticipated lower soybean production in Mexico during 1974, U.S. exports of soybeans jumped to 337,000 tons valued at \$81.6 million, up from 81,000 tons in 1973. Cottonseed exports were also higher. Soybean meal exports were down, but cottonseed meal exports were higher. Soybean oil exports were higher, offsetting a drop in cottonseed oil exports.

Most other U.S. farm exports to Mexico were higher. Exports of potatoes and dried beans were 30.4 million pounds and 113.7 million pounds, respectively, valued at \$1.5 and \$30.9 million.

Mexico is placing more emphasis on agricultural production but the 1975 crop will depend more on weather conditions than government policy. Because of a killing frost which hit parts of Mexico in mid-September 1974, continued heavy imports of basic grains are expected throughout most of 1975.

Mexico is one of the main suppliers of U.S. agricultural imports, and accounted for 7.5 percent of the U.S. total in 1974, compared with 8.8 percent in 1973. The overall picture for farm imports from Mexico was mixed in 1974. Imports of live animals and animal products were generally lower as U.S. consumer demand weakened and U.S. live animal prices declined.

Fresh vegetable imports were down nearly 40 percent as a result of lower volume and lower prices for many items. Cucumbers were down 37 percent; onions, 23 percent; and peppers and tomatoes, 44 percent. Tomatoes, the largest item in this group, were valued at \$64.1 million as volume dropped from 749 million pounds in 1973 to 591 million pounds in 1974. Mexico is the main supplier of U.S. fresh vegetable imports.

Imports of fruits and preparations advanced moderately in 1974. The two main items, frozen strawberries and fresh cantaloupes, were valued at \$25.2 million and \$11.5 million, respectively. The quantity of frozen strawberries was up slightly and with higher prices, total value increased about 9 percent above 1973.

Sugar imports from Mexico in 1974 of 1.07 billion pounds, were down about 15 percent from 1973. Higher sugar prices, however, just about doubled total value to \$229.2 million. Slightly higher coffee prices failed to offset the decline in the quantity imported, reducing the value of U.S. imports from Mexico 13 percent to \$107.1 million.

U.S.-USSR AGRICULTURAL TRADE, 1972-74

by

Linda A. Bernstein

Exports

U.S. agricultural exports to the USSR (excluding transshipments through Canada) grew from \$430 million in 1972 to a peak of \$921 million in 1973, but then dropped to \$300 million last year. Wheat and corn were overwhelmingly the most important commodities exported. Nearly one-fourth of all U.S. wheat exports in 1973, and 13 percent in 1972, were shipped to the USSR.

Table 24.--U.S. exports of wheat and corn to the USSR, 1972-74

Year	Wheat	Corn	Total grain value
	Metric tons		Million dollars
1972	2.7	3.1	364
1973	8.7	4.2	836
1974	1.1	2.0	277

Soybeans were the next most important U.S. export to the USSR in 1972 and 1973. In 1972, 392,000 tons of soybeans valued at \$53 million were shipped to the USSR. This trade increased to 482,000 tons valued at \$72 million in 1973. But none were exported in 1974, and no purchases have been made for delivery in 1975. The 1972/73 soybean purchase was an unusual occurrence, and does not represent the historical pattern, although the USSR is a probable future market for substantial sales of soybeans. In 1974, agricultural commodities accounted for 49 percent of total U.S. exports to the USSR, as opposed to 77 percent in 1973.

In addition to grains, U.S. agricultural exports to the USSR also included sheep and cattle hides, almonds, hops, and lemons in 1974. These commodities, which had amounted to \$5.8 million in 1973, reached \$20.7 million in 1974. The United States exported linseed oil to the USSR valued at \$5.6 million in 1973, but none in 1974.

Prior to 1972, U.S. agricultural exports to the USSR were relatively small and consisted primarily of cattle hides. The principal exception was the grain purchase following the 1963 Soviet crop failure, which pushed U.S. agricultural exports to the USSR in 1964 to \$137 million.

U.S.-Soviet agricultural trade in 1973 was unrepresentative because it reflected the impact of the poor 1972 grain crop in the USSR, and the resultant large wheat purchases from other countries. Nevertheless, the Soviets are expected to continue to import substantial quantities of U.S. grain, especially feed grains. During the feed grain marketing years, 1971/72-1974/75, ^{1/} U.S. feed grain exports to the USSR averaged 3.2 million tons, ranging from 1.1 to 4.7 million tons.

Imports

The United States imported \$3.8 million worth of agricultural commodities from the USSR in 1972; \$4.7 million worth in 1973; and \$8.5 million in 1974, consisting primarily of furskins. These agricultural commodities represented less than 5 percent of total U.S. imports from the Soviet Union.

^{1/} Including a forecast of the balance of the current marketing year.

INTERNATIONAL COMMODITY PRICES CONTINUED HIGH IN 1974

by

H. Christine Collins

The rising trend in international agricultural commodity prices that began in late 1972 continued into 1974, when the Dow Jones commodity spot price index increased an average of 40 percent from 1973. Yet, recent developments suggest that the 1974 price rally has ended.

Prices of soybeans and soybean meal, cotton, and imported cow meat took sharp downturns in 1974, following increases in 1973. Wheat, corn, sorghum, rice, coffee, sugar, cocoa bean, and rubber prices continued their upsurge, reaching all-time highs, but by year's end also had started to weaken.

The quantity of U.S. agricultural exports declined 10 percent from 1973 to 1974, with smaller shipments of wheat, wheat flour, corn, cotton, and whole cattle hides. Smaller exports to the USSR caused most of the volume loss.

High 1974 prices have dampened U.S. export demand. Moreover, many foreign customers, including Japan and Western Europe, faced serious economic difficulties brought on by the oil crisis. The triple threat of high international agricultural prices, high oil prices, and declining real GNP's may have sheared the buying power of our chief trading partners by the end of the year. Meanwhile, adverse weather cut U.S. grain harvests in the fall, limiting the amount of grain available for selling abroad.

Specific commodity development are as follows:

The f.o.b. vessel, Gulf ports price for U.S. No. 2 Hard Winter Wheat climbed 20 percent to average \$167 a ton in 1974.

In early 1974, U.S. wheat stocks were low since U.S. wheat exports were just coming down from the frantic pace of July-December 1973. In mid-1974, the U.S. harvested a 49-million ton wheat harvest--a record crop, but of a lesser magnitude than had earlier been anticipated. Thus, supplies for fiscal 1975 again appeared to be insufficient to meet export and domestic needs without further depleting stocks.

The c.i.f. Rotterdam price for U.S. No. 2 Hard Winter wheat, ordinary protein, followed much the same pattern as the Gulf ports price, reaching \$200 a metric ton in 1974. The strength of foreign demand was reflected in the sharply widened U.S. Gulf ports-Rotterdam price spread of \$33 a ton during 1974.

From 1973 to 1974, the f.o.b. Duluth price for U.S. No. 2 Dark Northern Spring (DNS) wheat rose 51 percent to \$195 a ton, while the c.i.f. Rotterdam price climbed 42 percent to \$218 a ton. The price spread between the U.S. Great Lakes and Rotterdam for U.S. No. 2 DNS declined slightly to \$23 a metric ton. The 1974 in store, Thunder Bay, price for Canadian Western Red Spring wheat reached \$207 a ton, while the c.i.f. Rotterdam price climbed to \$222 a ton.

While the 1973/74 crop year yielded a record world outturn for feed grains, world stock levels were depleted. This situation, combined with strong feed grain export demand, supported corn prices at high levels early in 1974. A record-breaking 1974/75 feed grain crop was required if stocks were to be replenished--but it did not materialize. The 1974/75 world feed grain outturn is currently estimated at 563 million tons, down 7 percent from 1973/74. The United States, with a 20-percent decline in 1974 feed grain output, bore the brunt of the crop reduction. Worsening U.S. feed grain crop prospects maintained high corn prices through the year.

Grain feeding dropped dramatically in the United States in 1974 in response to high feed grain prices and lower cattle prices than in 1973. Nevertheless, until late 1974, the shortfall in the 1974/75 grain crop was the overriding factor affecting feed grain prices. The f.o.b. Gulf ports price for U.S. No. 3 Yellow corn advanced to \$132 a ton, 35 percent higher than a year ago. The c.i.f. Rotterdam price for U.S. No. 3 Yellow corn rose 34 percent to \$160 a ton, widening the U.S. Gulf ports-Rotterdam price spread to \$16 a ton. Argentine corn was priced at \$160 a ton in the Rotterdam market; the price spread between U.S. and Argentine corn in that market widened to \$12 a ton. In Rotterdam, the price spread between U.S. corn and U.S. sorghum widened in favor of corn.

The f.o.b. Bangkok price for white Thai rice, 5 percent broken, reached an unprecedented annual average of \$541 a ton. Thailand banned rice exports for most of 1973. The world rice market remained tight until the early fall when rice from a record U.S. harvest became available.

Soybean prices weakened in 1974, largely because of plummeting soybean meal prices. (Soybean oil prices, in contrast, remained strong through most of the year.) The 1974 soybean crop totaled 1.23 billion bushels, about a fifth below the 1973 record. Nevertheless, the softened demand for protein meals resulting from expanded worldwide protein meal supplies and the cutback on livestock feeding took its toll on prices. The f.o.b. Gulf ports price for U.S. No. 2 Yellow soybeans declined 6 percent to \$256 a ton in 1974. Similarly, the c.i.f. Rotterdam price for U.S. No. 2 soybeans slipped 4 percent to \$277 a ton. The c.i.f. Rotterdam price for U.S. soybean meal plunged 40 percent to \$184 a ton.

The 1974 c.i.f. Liverpool price of American Memphis Territory strict middling cotton declined 6 percent from the record \$1,430 a ton of 1973. The high prices of early 1974 were largely determined by the heavy foreign buying that characterized the August 1973/July 1974 crop year. But the 1974/75 crop year has been marked by an abrupt slowdown in U.S. and foreign cotton demand caused by good crops, the building of foreign stocks, and a slump in global textile manufacturing activity. An indication of the stalled purchasing activity is that only a fifth of the 1974 U.S. crop was forward contracted, compared to about three-fourths of the 1973 crop.

Imported cow meat prices were weakened by the glut of beef that appeared in international markets. At \$1,582 a ton, the 1974 imported cow meat price was 21 percent lower than a year earlier.

Last year has been called the Sugar Year of the Century. The year opened with the unprecedented high New York spot price of \$256 a ton, but this was to prove to be the low point of the year. The New York spot price for raw cane sugar averaged \$650 a ton--nearly triple the 1973 average. The f.o.b. and stowed Caribbean ports price for raw sugar to the world market averaged \$661 a ton, more than triple the 1973 price. Thus, for the second consecutive year, the Caribbean ports price for sugar destined for the world market was higher than the price of \$614 a ton for sugar destined for the U.S. market.

The year was also remarkable for the fact that many of the international treaties which normally take precedence over the world market transactions ran into difficulty. The U.S. Sugar Act, which came up for renewal in 1974, was terminated. Commonwealth suppliers to the United Kingdom made sales to the open market rather than fulfill their obligations under the U.K. Commonwealth Sugar Agreement, thus contributing to the United Kingdom's acute sugar shortage. The Commonwealth Agreement was also terminated in 1974, but more because of the adjustments the United Kingdom was undergoing as a recent member of the European Community. The Paris Terminal Market for sugar futures trading also collapsed, because of the inability of certain traders to meet margin obligations.

These events were the culmination of several years of tightening sugar supplies in relation to demand. The Arab nations and Japan had already become heavy sugar purchasers. The USSR, anticipating shortages resulting from its own short domestic sugar beet crop, bought both sugar and sugar futures in the London market--but their purchases were a closely guarded secret until November 1974. Thus, November marked the month that speculative forces went into full swing. Thereafter, consumer demand for sugar diminished as wholesale market prices reached the grocery store, causing a backlash in the wholesale market and the inevitable readjustment of prices.

The international coffee and cocoa bean price hikes were carryover results of poor 1973/74 crops. The New York spot price and the f.o.b. Santos price for Santos No. 4 coffee both rose 5 percent to 69 and 68 cents, respectively. The July 1974-June 1975 coffee harvest is placed at a near-record 79 million bags, 27 percent higher than last year's shortfall. Thus, coffee prices dropped during the latter half of 1974, despite producer countries' attempts to support them. The New York spot price for cocoa beans rose 53 percent to 98 cents a pound in 1974. Cocoa bean prices began to weaken in December--probably because of new crop availability and consumer reaction to the earlier high prices. The 1974 crop was only 2 percent higher than the previous year, and total supplies, which include the carryover, tightened.

The New York spot price for No. 1 rubber, ribbed smoked sheets, rose to \$869 a ton, 11 percent higher than a year earlier. New York spot prices hit their peak in January and then trailed off through 1974, largely in response to the recession in the automobile and tire industries in consuming countries and a 3-percent increase in rubber output in producing countries. Rubber trade was rather inactive during 1974.

Export and Import Unit Value Indexes

When measured by export and import unit value indexes, prices (i.e., unit values) of the leading U.S. agricultural export commodities were 39 percent higher in 1974 than in 1973, while prices of the leading U.S. import commodities were 28 percent higher.

Soybean oil, which was in short supply in 1974 and whose export unit value nearly doubled, led the way in 1974 price hikes. Wheat and wheat flour export unit values rose about 60 percent, followed by corn and grain sorghum, cotton, inedible tallow, and non-fat dried milk. Soybean meal and whole cattle hides registered price declines.

On a quarter-to-quarter basis, unit values of inedible tallow, milled rice, soybean meal, and whole cattle hides declined during the fourth quarter. The heavy cattle slaughter, yielding large supplies of tallow, brought down the export unit value for inedible tallow, while new crop supplies weakened rice prices.

Raw sugar, whose import unit value more than doubled from 1973 to 1974, experienced the largest price hike among import commodities.

The unit value of cocoa beans rose by two-thirds, and coffee by 9 percent. Meats, principally fresh, chilled, and frozen beef and canned hams, were priced 5 to 6 percent lower in 1974 than in 1973.

Fourth-quarter unit values for coffee were off from a year earlier and the third quarter, in response to larger 1974/75 crops. The import unit value of rubber also declined in the fourth quarter.

The unit values of imported cocoa beans and of wines strengthened from the third quarter to the fourth quarter of 1974, perhaps in response to the holiday season. The unit value of tomatoes, which fluctuates with the season, increased from the third quarter to the fourth quarter, but overall tomato prices were higher in 1974 than a year earlier.

The 1974 terms-of-trade index (export price index divided by the import price index) was over 109. Thus, the same combination of export goods that paid for the purchase of 100 units of a combination of import goods in 1973 paid for 109 units of such goods a year later. During the latter half of the year, however, import unit values rose faster than export unit values, turning the terms-of-trade index in favor of imports during those months.

Selected Prices of International Significance in February 1975

International prices for agricultural commodities continued to falter in February. The Dow Jones spot commodity index declined 5 percent to 342 and the Reuters commodity index dropped 4 percent to 1,094. Spot prices of wheat, corn, soybeans, sorghum, soybean meal, coffee, and sugar declined from January to February. The slowdown in foreign demand for most of these commodities was the primary bearish influence in these markets.

The f.o.b. vessel, Gulf ports, the c.i.f. Rotterdam, and U.K. ports prices all weakened in February because of the sluggishness in international trade. A market review by a leading West German trading house reported that world wheat output in 1975 could almost reach the record 1973 levels. February ended with China cancelling a number of additional orders for wheat from the 1975 U.S. crop. These factors overrode the influence of Brazilian, Japanese, and Indian wheat purchases that occurred in late February.

While the f.o.b. vessel, Gulf ports price for U.S. No. 2 Hard Winter wheat, ordinary protein, fell 6 percent to \$155 a ton, the c.i.f. Rotterdam price for the same market class was only \$158 a ton.

Corn and grain sorghum prices declined nearly as sharply. The f.o.b. vessel, Gulf ports price of U.S. No. 3 Yellow corn declined 4 percent to \$125 a ton. Because activity in West Europe was generally sluggish, feed grain import prices at Rotterdam and the U.K. faltered even more.

The glut in West European soybean meal supplies continued to drag down soybean meal and soybean prices. Moreover, the United States is currently facing stiff competition from Brazil in the supply of oilseed products to Western Europe. The c.i.f. Rotterdam price of U.S. soybean meal dropped 9 percent to \$140 a ton in February. Rotterdam prices of U.S. No. 2 Yellow soybeans slid to \$218 and \$231 a ton, respectively.

The February f.o.b. Bangkok price for Thai rice strengthened slightly to \$404 a ton, the first turnaround in 6 months. The c.i.f. Liverpool price for U.S. strict middling cotton rose 6 percent, the first strengthening of the cotton price in 7 months.

Prices for the principal U.S. agricultural import commodities were mixed. The f.o.b. U.S. port of entry price for imported cornmeal rose slightly to 52 cents a pound--the first price rally in 7 months. The New York spot price for cocoa beans from Accra also strengthened, largely on the basis of a revision of USDA estimates of world cocoa bean production. The 1974/75 crop is now being placed at 1.46 billion tons, about the same as last year. International coffee prices weakened slightly, the February New York spot price for Santos No. 4 coffee reaching 69.8 cents a pound. Raw cane sugar prices nosedived.

The New York spot price of raw cane sugar at 36 cents a pound was back to levels of October-November 1974. The f.o.b. and stowed, Caribbean ports price for raw sugar destined for the United States was at 34.57 cents a pound, at a premium to prices for raw sugar destined for the world market.

Real Prices of U.S. Agricultural Export and Import Prices

In view of inflation, it is well to review how commodity prices have changed when measured in "real" terms. Using the U.S. wholesale price index (WPI) as a deflator, real prices of wheat, coffee, and rubber declined from 1973 to 1974, while in nominal terms, import and export prices of these commodities rose (table 25). The U.S. export soybean price declined in both nominal and real terms. In the late 1960's, however, real prices of U.S. wheat, corn, and soybeans at the Gulf ports were especially low. New York spot prices for coffee and rubber, when put in real terms, were lower in 1974 than they had been during selected years of the late 1960's.

Export Highlights

U.S. AGRICULTURAL EXPORT VALUE GAINS 10 PERCENT IN JULY-FEBRUARY

Farm product exports during the first 8 months of fiscal 1975, valued at over \$15 billion, were 10 percent above the same period a year earlier, although the volume index was 15 percent lower. Export volume declines occurred for wheat, corn, soybeans, and cotton. Due to higher prices, wheat, feed grain, and cotton export values remained near last year's levels. Soybean value, however, advanced 12 percent. Both volume and value gains occurred in fats and oils, meat, and pulses.

February 1975 agricultural exports totaled \$1.92 billion, compared with a record \$2.46 billion in January 1975 and \$1.91 billion in February 1974. Volume declines and some price reductions accounted for the drop from January. Cancellations in exports sales contracts have increased since January for corn, soybeans, and cotton.

In July-February, exports of grains and preparations totaled \$7.65 billion, 10 percent above the year-earlier level. Increased shipments of rice and wheat products for relief (bulgar, rolled wheat, and wheat-soya blend) combined with price increases to expand total value. Wheat exports dropped 18 percent to 714 million bushels, whereas value, at nearly \$3.5 billion, remained above last year's level.

Rice exports totaled nearly 1.4 million metric tons (\$632 million) in July-February, against 1 million tons (\$456 million) a year earlier. Larger shipments to the United Kingdom, Iraq, Iran, Kuwait, Bangladesh, Korea, and Japan accounted for much of the gain.

During July-February, corn exports declined 17 percent to just under 19 million tons, while value rose almost a fifth to nearly \$2.7 billion. Reduced movements to Japan, the PRC, the USSR, and Taiwan were outweighed by larger shipments to Canada, Mexico, Peru, the EC, Portugal, Romania, Iran, Israel, and Egypt.

Soybean export volume declined 8 percent to 291 million bushels, while value rose 12 percent to \$2.2 billion. Volume reductions were mainly to the European Community, the USSR, the PRC, Korea, Colombia, and Peru. Exports of soybean oil climbed 70 percent to over 1 billion pounds; value nearly tripled to \$383 million. Shipments increased to Canada, Mexico, Central America, the Caribbean islands, Chile, Uruguay, Spain, Portugal, Yugoslavia, Turkey, Iran, Bangladesh, Taiwan, Japan, Morocco, and Egypt.

Cotton export volume dropped to 2.3 million bales in July-February from 3.2 million bales during the same months a year earlier. Due to higher prices, value remained near last year's level. The volume drop was mainly in shipments to the Far East.

1/ PRELIMINARY

2/ REEXPORT ERRONEOUSLY REPORTED AS DOMESTIC EXPORTS IN JANUARY 1975.

Import Highlights

AGRICULTURAL IMPORT VALUE UP 10 PERCENT IN JULY-FEBRUARY, VOLUME DOWN

U.S. agricultural imports during July-February 1974/75 advanced 10 percent over the same period a year earlier. The aggregate value was \$6.55 billion, compared with less than \$6.0 billion for July-February 1973/74. Accounting for all of the gain, competitive farm product imports rose 17 percent to \$4.7 billion. Noncompetitive items declined 5 percent to \$1.86 billion.

The higher value of farm product imports was due to price increases. The overall volume index dropped 10 percent to 105 (1967 = 100). The index of supplementary commodities declined 5 percent to 120, and complementary items fell 14 percent to 87.

During February 1975, U.S. agricultural imports totaled only \$694 million, the lowest monthly level since September 1973 (table 41). February 1975 inflows of cattle, meat, dairy products, wool, fresh vegetables, sugar, wine, and coffee were lower than in January 1975 and February 1974.

Relatively low cattle prices in the U.S. and import restrictions on Canadian feeders were the main factors contributing to reduced inflows of live animals in February. Dutiable cattle entries in July-February amounted to less than one-fifth the previous year's volume at 104,000 head. Feeder cattle imports (200-700 pounds) totaled only 54,000 head, mostly from Mexico, compared with 546,000 a year before. Cattle or calves weighing less than 200 pounds, primarily from Canada, dropped to 11,000 head from 47,000.

July-February beef imports (fresh, chilled, or frozen) totaled 735.6 million pounds, a fifth below last year's volume. Value, at \$390 million, dropped by half. Australia, Nicaragua, Mexico, Honduras, Guatemala, Canada, Ireland, and the Dominican Republic shipped less beef than in fiscal 1974. Pork imports, at 225.5 million pounds, were off 15 percent. Despite sharply lower prices, beef imports during January and February began to increase from their December 1974 levels, and also from year-earlier amounts.

Dairy product imports fell from last year's \$310 million level to \$161.5 million. Declines occurred for cheese, butter, nonfat dry milk, and casein. The previous year's totals were high due to increases for quota-controlled items, including cheddar cheese, butter, butteroil, and nonfat dry milk.

During July-February, volume increases took place for miscellaneous animal products, raw cotton, certain fruits and processed vegetables, grains, vegetable oils, tobacco, and malt beverages.

U.S. sugar imports in February 1975 were slightly above the January 1975 volume at 203,000 short tons, but well below the 500,000 short tons recorded in February 1974. The average import unit value fell significantly in February to \$659 from \$829 in January, but remained well above the February 1974 average of \$210 (table 45). The 3-percent decline in sugar imports to 3.3 million short tons (tel quel) in July-February mainly reflected reduced shipments from the Philippines, Dominican Republic, Mexico, and Australia (table 46).

1/ P.L. 88-482 (1964) provides for the imposition of quotas on fresh, chilled, or frozen beef, veal, mutton, and goat meat. Fresh, chilled, or frozen boneless beef accounted for more than 90 percent of the import volume in 1969-74 (95.8 percent in 1974). The data in this table include rejections by APHIS inspectors totaling 13.5 million pounds in 1969, 17.4 million pounds in 1970, 21.0 million pounds in 1971, 17.8 million pounds in 1972, and 18.4 million pounds in 1973.

2/ Preliminary.

3/ Totals may not add due to rounding.

Table 43.--U.S. agricultural imports: Value by commodity, July-February 1973/74 and 1974/75

Commodity or commodity group	July-February		Change
	1973/74	1974/75	
	-- Million dollars --		Percent
<u>Complementary</u>			
Bananas, fresh	27	130	+2
Cocoa and chocolate:			
Cocoa beans	143	171	+20
Cocoa butter	23	40	+70
Cocoa and chocolate, prepared	51	74	+45
Coffee:			
Coffee, green or crude	1,040	796	-23
Coffee, soluble	63	68	+8
Drugs, crude	20	31	+54
Essential oils	43	55	+28
Fibers, unmanufactured	16	38	+138
Rubber, crude:			
Rubber, crude, dry form	260	260	---
Rubber, latex	22	27	+22
Silk, raw	2	2	+12
Spices	48	55	+15
Tea, crude	45	54	+20
Wool, carpet	23	8	-65
Other complementary products	34	51	+50
Total complementary products	1,960	1,860	-5
<u>Supplementary</u>			
Animals and animal products:			
Cattle and calves	142	38	-73
Dairy products and eggs	315	165	-52
Hides and skins, including furskins	94	89	-6
Meat and meat products, excluding poultry:			
Beef and veal	925	481	-48
Pork	326	232	-29
Other meats and products	38	25	+34
Sausage casings	19	23	+21

1/ Totals may not add due to rounding.

2/ Excludes transshipments of grains and oilseeds beginning Jan. 1, 1973.

3/ Formerly Western Portuguese Africa, n.e.c.

4/ Separately classified beginning Jan. 1, 1975.

5/ Transshipments through Canada where final destination was not known at the time of export.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued at \$251-\$499 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
