DIGEST

October-June Exports Total \$19 Billion (see p. 4). Although farm product exports during June dropped below recent highs, the October-June value neared \$19 billion versus \$17.4 billion for the same period a year earlier. Cotton, oilseeds and products, tallow, hides, animal feeds, vegetables, and miscellaneous specialty items contributed to the increase.

* * * * *

Agricultural Imports Exceed \$10.3 Billion in October-June (see p. 43). Although June farm product imports eased from recent monthly rates, the October-June value totaled \$10.3 billion or 34 percent higher than the same period a year earlier. Gains in non-competitive commodities--coffee, cocoa, rubber, and tea--accounted for most of the increase.

* * * * *

Customs Duties on Agricultural Imports in 1976 Averaged 3.3 Percent (see p. 79). The ad valorem equivalent duty rate on all imported farm products totaled \$367 million in 1976, down to 3.3 percent from 3.4 percent last year. Duty-free items reached a record \$5.7 billion, as tropical product prices increased sharply and tariff rates were suspended on about 250 commodities from more than 100 developing countries. Higher duties in the last quarter raised rates on sugar imports.

* * * * *

International Price Highlights (see p. 85). Most agricultural export and import commodity prices declined between May and June, including wheat, corn, soybeans, coffee, and sugar.

* * * ERRATA * * *

In the July 1977 issue, the last paragraph, first sentence on page 3 and the first sentence of the first paragraph on page 134 should read as follows: "P.L. 480 exports declined to \$301 million during October-March 1976/77 from \$362 million a year earlier, more than offsetting an increase in AID shipments."

On page 134 of the same issue, the first sentence of the second paragraph should read as follows: "Title I long-term dollar and convertible foreign currency credit sales declined from \$253 million to \$234 million for October-March 1976/77."

OCTOBER-JUNE EXPORTS TOTAL \$19 BILLION

Exports of farm products during June dipped to \$1.88 billion, the lowest since September 1976. Export volume of principal commodities dropped to 8 million tons in June, down from nearly 9 million in recent months.

During the 9-month period of October-June 1976/77, the export value reached nearly \$19 billion against \$17.4 billion for the same period a year earlier. Volume edged down 2 percent to just over 83 million tons.

The 9-month agricultural trade balance continued favorable at \$8.6 billion, but the surplus was down from the record \$9.7 billion during October-June 1975/76.

Coarse grain export volume in June continued the decline begun in April. However, for the 9 months as a whole, coarse grain shipments remained slightly above year-earlier levels because of heavy shipments during the first 6 months. Increased outflows to the European Community (EC), Japan, Korea, Taiwan, and Portugal more than offset reduced movements to the USSR, Poland, Spain, and Mexico.

Over 15 million tons (39 percent) of U.S. coarse grain exports went to EC members during October-June, compared with about 10.4 million tons (less than 30 percent) in the same 1975/76 period. Feed grain exports to Japan neared 7.9 million tons, compared with 5.8 million a year earlier.

According to the General Sales Manager's report, corn exports to East Germany totaled 2.2 million tons in October-June versus less than 1.5 million during the same period in 1975/76. ^{1/} Most of these exports appear as movements to West Germany in the commodity by country tables, p. 34, and are subsequently transshipped to East Germany. While corn shipments to the USSR neared 3 million tons, as called for in the bilateral grain agreement, these were less than one-third of their 9.2-million-ton peak for October-June 1975/76.

Wheat exports increased 16 percent from May to June, exceeding the 2-million-ton level for the first month since October 1976. Over 300,000 tons went to the USSR, bringing the total to 2.5 million tons since last October. Japan, Korea, and Brazil were other large commercial markets in June, while Egypt and Bangladesh took most of the 289,000 ton P.L. 480 shipments. Cumulative wheat exports over the October-June period dropped 26 percent to 16 million tons, and value fell 41 percent to \$2 billion.

Soybean exports in June plunged to their lowest point since September 1976 as only 843,000 tons were shipped. Prevailing high prices for limited U.S. supplies and competition from Brazilian beans reduced sales to some destinations. For the 9-month period, export tonnage exceeded the year-earlier rate by 4 percent while value was up 55 percent. Principal markets included the EC members, Japan, Spain, and the USSR.

Soybean oil shipments in June more than doubled those during June 1976, with increases to India, Pakistan, and Mexico predominating. October-June volume totaled 568,000 tons, up four-fifths from similar months a year earlier.

Cotton exports gained 58 percent over their previous year's 2.3 million bales in October-June. Value more than doubled to \$1.3 billion.

Other commodity gains over the 9-month period included inedible tallow, lard, frozen chickens, hides, fruits, nuts, vegetables, feeds, and miscellaneous specialty items.

^{1/} USDA, OGS, Export Sales, July 14, 1977, and July 8, 1976.

1/ PRELIMINARY

AGRICULTURAL IMPORTS EXCEED \$10.3 BILLION IN OCTOBER-JUNE

Imports of farm products drifted slightly downward during June to \$1.24 billion, continuing the downtrend from the record peak \$1.4 billion inflow in April. Nevertheless, imports remained well above year-earlier levels. Cumulative agricultural imports over the last 9 months at \$10.35 billion were 34 percent above the October-June 1975/76 period.

Noncompetitive commodities accounted for most of the sharp value gain in agricultural imports. During October-June, the first 9 months of fiscal 1977, noncompetitive items jumped 81 percent in value over the same months of 1975/76.

Coffee, cocoa, rubber, tea, bananas, spices, and carpet wools all registered value gains over year-earlier levels because of higher prices. Tea and spice volumes were significantly above the year-earlier period, but other commodities were about the same or lower.

Green coffee quantity fell 8 percent to 855,000 tons as manufacturers' roastings declined. Import prices averaged \$1.77 per pound against \$0.76 in the same 9 months of 1975/76; value, therefore, more than doubled to over \$3.3 billion. In June, import unit values averaged \$2.41 per pound compared with \$0.97 in June 1976. Because prices have gained so rapidly, coffee's share of total U.S. agricultural imports rose to one-third in October-June from 22 percent a year earlier.

Cocoa bean volume dropped off by one-fourth to 165,000 tons during October-June, but higher prices raised the import value by 28 percent to \$373 million. Unit values for June averaged \$1.43 against \$0.72 last June.

Shifts in consumption from coffee to tea resulted in a 40-percent volume increase for tea imports thus far this fiscal year. Tea imports have exceeded 20 million pounds per month since March compared with 12-15 million pounds historically. Prices escalated sharply to over \$1.00 per pound in June from \$0.62 in March and \$0.51 during June 1976.

Imports of competitive farm products during October-June moved up 4 percent in value to \$4.9 billion as increases for live cattle, dairy products, poultry products, fruits, vegetables, edible nuts, oilseed products, tobacco, and wine more than offset lower values for sugar, meat, and cotton. Gains in cheeses and casein boosted dairy product imports 17 percent to \$225 million. Gains for shell eggs and feathers and downs more than doubled poultry product values.

Fruit and vegetable imports showed marked increases during late winter and spring because of freezing weather which affected U.S. crops. Fruit imports for October-June totaled \$282 million, up 36 percent from a year earlier. Berries, citrus, grapes, melons, pineapples, and fruit juices showed strong gains. Vegetable imports rose 46 percent to \$505 million. Fresh vegetables jumped 82 percent to \$244 million, led by tomatoes, peppers, cucumbers, and onions. Most of these winter and spring vegetables enter from Mexico.

Oilseed and product imports surged ahead in June to just under \$79 million with strong gains for flaxseed and most vegetable oils. Wine and malt beverage import values rose 17 percent and 38 percent, respectively, over the 9-month period.

Sugar imports at nearly 3.5 million short tons were 17 percent above October-June 1975/76, but lower prices caused a 27-percent value drop to \$655 million. Meat imports over the 9-month period fell 10 percent.

 MGAL = 1,000 GALLONS

CUSTOMS DUTIES ON AGRICULTURAL IMPORTS IN 1976 AVERAGED 3.3 PERCENT

The ad valorem equivalent rate of duty on imported agricultural commodities averaged 3.3 percent in 1976, a further reduction from 3.4 percent a year earlier, and from 5.8 percent 10 years ago. Customs duties totaled \$367 million on imports valued at nearly \$11 billion.

The value of duty-free farm product imports moved up sharply to a record \$5.7 billion, mainly because prices for many tropical products, such as coffee, cocoa, tea, rubber, and spices, increased. The proportion of duty-free agricultural commodities consequently grew to 52 percent of the total from 40 percent in 1975. In addition, a Generalized System of Preferences (GSP), under the 1974 Trade Act, reduced tariff rates to zero on many items from less developed countries. ^{1/} The duty-free import values in table 22 include 250 commodities on the GSP list.

Dutiable agricultural imports diminished to \$5.25 billion in 1976, the lowest level since 1973. This decline reflected the drop in some commodity prices--notably sugar, live cattle, meat, and vegetable oils--and the increase in items eligible for GSP tariff treatment. Since most tariff duties are assessed on actual units imported (termed "specific" rates), a decline in unit values (or prices) caused ad valorem equivalent rates to increase. Thus, ad valorem equivalent duty rates on dutiable imports rose to 7 percent in 1976 from 5.6 percent the previous year.

Sugar import duties increased as a result of a presidential proclamation in the last quarter of calendar year 1976, raising the tariff to 1.9 cents per pound (raw value) from 0.625 cents (\$37.50 per short ton versus \$12.50). The new rate affected about 1.2 million tons out of the 4.5 million tons imported during 1976. Ad valorem equivalent rates on total sugar imports rose to 5.1 percent from 2.6 percent in 1975. Since imports from developing countries supplying less than \$25 million were exempt from duties, the dutiable value of sugar fell to \$976 million and the ad valorem equivalent amounted to 6.3 percent.

^{1/} Foreign Agricultural Supplement, Generalized System of Preferences Effective January 1, 1976, published in December 1975, listed 318 commodities from 137 developing countries and dependent territories eligible for duty-free treatment based on a "competitive need" formula.

INTERNATIONAL PRICE HIGHLIGHTS

by
Richard Hogeboom ^{1/}

Trade prices took a downswing in June, as prices for most major commodities, including grains and coffee, were lower than in May. The Dow Jones commodity spot price index fell 4 percent to 405.

The 1977 U.S. wheat crop is currently expected to reach 2,041 million bushels, 5 percent less than last year. Prices at Gulf ports in June declined 3 percent from May to \$2.55 a bushel, reflecting the new harvest additions to existing record surpluses.

Prices for Dark Northern Spring Wheat, f.o.b. Duluth; Hard Red Winter Wheat, c.i.f. Rotterdam; and Canadian Western Red Spring, Thunder Bay, each dropped 6 percent from May to June.

The U.S. Gulf ports price for corn declined 7 percent to \$2.45 a bushel in June from May's average in response to the record U.S. corn crop forecast for harvest in the fall of 1977. The current USDA crop estimate is for 6.1 billion bushels, 2 percent below 1976.

For the sixth consecutive month, corn was priced higher than wheat on a per-ton basis at Gulf ports.

Soybean prices at Gulf ports dropped \$49 in June to \$312 a ton. Smaller U.S. soybean exports and improved weather figured importantly in this precipitous drop.

Rotterdam c.i.f. prices for both U.S. soybeans and soybean meal each dropped \$45 in June to \$326 and \$253 a ton, respectively. Total U.S. soybean production for 1977 is estimated at 1,595 million bushels, up 26 percent from the 1976 crop.

The Thai rice price, up \$7 to \$264 a ton, strengthened for the third consecutive month.

The New York spot price for Santos No. 4 coffee dropped 24 cents a pound in June to \$2.80 a pound. Expectations of a 5-to-10 percent drop in world coffee consumption and improved weather in Brazil are bearish factors contributing to lower prices.

The New York spot price for raw cane sugar slid 9 percent to 10.28 cents a pound in response to burdensome world stocks. The United States has also temporarily withdrawn from the international sugar market as U.S. consumption of sugar has reportedly declined.

1/ Totals may not add due to rounding. 2/ New classification effective Jan. 1, 1976. Turks and Caicos Islands and Farallon Islands reported with Canada prior to Jan. 1, 1976. 3/ Prior to Jan. 1, 1976 country designation read West Germany. 4/ Prior to Jan. 1, 1976 country designation read East Germany. 5/ Prior to Jan. 1, 1976 country designation read Yemen Arab Republic. 6/ New classification effective Jan. 1, 1976. Previously included under the former designation "Southern and Southeastern Asia, n.e.c." now classified as Southern Asia, n.e.c. 7/ New classification effective Jan. 1, 1976. British Indian Ocean Territory reported partly with Seychelles and purely with Mauritius prior to Jan. 1, 1976. 8/ Transshipments through Canada where final destination was not known at the time of export.

Table 26-Quantity indexes: U.S. agricultural exports,
October-September 1969-76, monthly and accumulated, October 1975 to date

^{1/} Excludes imports of coconut oil. ^{2/} Excludes imports of fibers, excl. cotton and jute.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and aircraft engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. USDA payments are excluded from the export value. Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country known to him at the time of shipment from the United States. Shipments of certain U.S. grain from Great Lakes ports to Canadian ports are designated as exports to "unidentified countries". Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
