DIGEST

Index of Articles, July-June 1976/77 (see p. 5).

* * * * *

U.S. Agricultural Commodity Aid and Commercial Exports, 1955-1976 (see p.10). U.S. exports of agricultural commodities under Government-financed programs totaled \$28.6 billion from fiscal 1955 through September 1976. P.L. 480 exports provided 90 percent of the total shipments under Government-financed programs. Title I credit sales, mainly wheat, accounted for 70 percent of these exports and Title II donations, mainly nonfat dry milk and wheat flour, accounted for 22 percent. P.L. 480 exports went to more than 130 countries. Twelve countries, mainly developing nations, received nearly 80 percent of these exports. Almost all major P.L. 480 recipients have increased their commercial purchases of U.S. farm products.

* * * * *

Kuwait's Agricultural Imports Rise Rapidly, But U.S. Share Remains Small (see p. 29). Kuwait's total agricultural imports are likely to reach \$520 million in 1977--up from \$381 million in 1975 and only \$187 million in 1973. Rapid population growth due to immigration, rising incomes, and improved marketing facilities have contributed to the growth in food imports. U.S. agricultural exports to Kuwait are expected to rise again in 1977, possibly reaching the 1974 peak of \$21 million.

* * * * *

U.S. Agricultural Exports Up 10 Percent In October-May (see p. 42). The export value of farm products in May remained strong at nearly \$2.2 billion, bringing the cumulative total since October to \$17.1 billion. Cotton, oilseeds and oilseed products, animal products, feeds, and rice accounted for the increase.

* * * * *

U.S. Agricultural Imports From 50 Major Sources, 1971-76 (see p.81). U.S. farm imports reached a record of nearly \$11 billion in 1976, compared with \$9.3 billion in 1975 and \$5.8 billion in 1971. Brazil remained the leading supplier.

* * * * *

U.S. Farm Imports in May Drop 12 Percent Below April (see p.100). U.S. farm imports in May 1977 totaled \$1.2 billion, 12 percent below April, with green coffee accounting for most of the monthly decline. But total farm imports, valued at \$9.1 billion for October-May 1976/77, were about one-third higher than a year earlier.

* * * * *

Public Law 480 Exports For October-March 1976/77 Down (see p.134). P.L. 480 exports declined to \$301 million during October-March 1976/77 from \$404 million a year earlier, more than offsetting an increase in AID shipments. Total farm exports under Government-financed programs were nearly \$495 million for this period.

International Price Highlights (see p.131). Most agricultural export and import commodity prices declined from April to May, including wheat, corn, sorghum, soybeans, cotton, sugar, meat, rubber, and coffee.

U.S. AGRICULTURAL COMMODITY AID AND COMMERCIAL EXPORTS, 1955-1976

by
Susan A. Libbin ^{1/}

Although the United States has been the world's major donor of food aid, mainly through Public Law 480 exports (P.L. 480), the U.S. share of developed donors' food aid disbursements dropped from more than 90 percent during 1960-68 to 59 percent in 1975. ^{2/} Since 1968, food aid has increased considerably from other developed countries (chiefly Canada, Japan, and the EC countries).

U.S. agricultural exports under Government-financed programs totaled \$28.6 billion from fiscal 1955 through September 1976. P.L. 480 exports provided about 90 percent of the total with the remainder under Mutual Security/AID programs. Agricultural commodities amounted to about 40 percent of all U.S. economic aid over the last two decades but during 1970-75, the food aid share was reduced to 26 percent.

P.L. 480 Programs

Although the United States began providing agricultural commodity aid in 1948, the basic legislative authority for agricultural commodity aid was enacted in 1954--the Agricultural Trade Development and Assistance Act of 1954 or Public Law 480. P.L. 480 was created primarily as a temporary measure to bypass foreign exchange shortages of foreign nations and to dispose of U.S. surpluses. Since its inception, there have been several changes in the program's laws, priorities, commodity content, and recipient destinations. ^{3/} The Food for Peace Act of 1966 emphasized the program's objectives of encouraging agricultural and overall economic development abroad and combating hunger and malnutrition. The current legislative authority for P.L. 480 expires December 31, 1977. The U.S. Senate and House farm bills and House International Development and Food Assistance Act of 1977 contain amendments to P.L. 480. These amendments will be finalized by joint Senate-House conference committees.

Size, Commodity Content, and Destination of P.L. 480

P.L. 480 exports rose from \$385 million in fiscal 1955 to a peak of nearly \$1.6 billion in 1965 (table 2). Then the value declined for the next 4 years to around \$1 billion in 1969 and stayed near that level until fiscal 1973. P.L. 480 shipments dropped to a low of \$867 million in fiscal 1974, mainly because of reduced U.S. stocks following increased U.S. commercial exports to meet the additional demand from the 1973 decline in world output.

^{1/}International Economist, Statistics Program Area, Foreign Demand and Competition Division.

^{2/} Libbin, Susan, "Bilateral and Multilateral Food Aid," FATUS, Jan. 1977.

^{3/} A history of P.L. 480 laws, objectives, administration, and operations will be contained in a forthcoming ERS report, "P.L. 480 Concessional Sales," by Amalia Vellianitis-Fidas and Eileen Marsar-Manfredi. Also, see Committee on Agriculture and Forestry, U.S. Senate, American Foreign Food Assistance Public Law 480 and Related Materials, Aug. 13, 1976.

P.L. 480 exports rose to \$1.1 billion in 1975, but declined by about 20 percent in fiscal 1976, partly due to programming lags and planning for large shipments during the July-September transition period to the new fiscal reporting period. ^{4/}

Inflation has affected the value of P.L. 480, especially between 1970 and 1976 (fig.1). In fiscal 1976, P.L. 480 exports of 4.5 million metric tons were less than 50 percent of the volume shipped in 1970, although the value exported in 1976 was 16 percent below that in 1970.

As required by the availability criteria of P.L. 480 (Section 401), domestic requirements, commercial export demand, and adequate carryover stocks must first be met before the Secretary of Agriculture can determine the volume and type of commodities available for annual P.L. 480 programming.

During the 1955 to September 1976 period, principal commodities exported under P.L. 480 were wheat, 40 percent; rice and cotton, each 10 percent; feed grains, 8 percent; soybean oil and wheat flour, each 7 percent; and nonfat dry milk, tobacco, and blended food products (table 3). Since 1970, P.L. 480 exports of cotton, tobacco, feed grains, and nonfat dry milk have declined considerably, whereas blended food products have risen.

From 1955 to 1976, \$20.9 billion or four-fifths of all P.L. 480 exports went to developing countries; South Asia received about 40 percent of the developing countries' share and about 33 percent of all P.L. 480 exports (table 4). Southeast and East Asia received 30 percent of the developing countries share and 25 percent of all P.L. 480 exports. P.L. 480 shipments went to more than 130 countries, of which 100 were developing nations, twelve of these developing countries received nearly 64 percent of all P.L. 480 exports (table 5). India, the leading recipient, received one-fifth of all P.L. 480 exports. Brazil, Turkey, and Republic of China (Taiwan) got the bulk of P.L. 480 commodities during the first decade of aid. Bangladesh, South Vietnam, and Indonesia have received most P.L. 480 exports since the late sixties. About three-fourths of all P.L. 480 exports to developing countries were title I credit sales with most of the remainder in title II donations.

P.L. 480 exports went to about 27 developed countries with 6 countries getting over two-thirds of the developed countries share. Most P.L. 480 shipments to developed areas were exported during the first decade of food aid. About 54 percent were title I credit sales and 28 percent were title III barter sales; the remaining were donations.

Title I Credit Sales

Title I exports, totaling \$18.2 billion, accounted for 70 percent of all P.L. 480 shipments from 1955 through September 1976. ^{5/} Title I has involved three types of credit arrangements: (1) Sales for foreign currencies, (2) long-term dollar credit sales, and (3) long-term credit sales for convertible foreign currencies. No new foreign currency sales agreements were permitted after December 1971. Convertible foreign currency has been provided to countries financially unable to handle dollar credit. Almost one-half of all title I exports were foreign currency sales. Since 1970, convertible foreign currency sales have accounted for 60 percent or more of all title I exports (table 6).

Wheat has been the leading title I commodity, providing nearly one-half of all title I exports. Other major commodities under title I include rice, cotton, soybean oil,

^{4/} "July-September Government Program Exports Reach \$524 Million," FATUS, Mar. 1977.

^{5/} Data on exports under P.L. 480 Titles during fiscal 1955-76 and July-September 1976 were published in the Mar. 1977 FATUS, p. 42.

feed grains, wheat flour, and tobacco. Rice was the only major commodity under title I that did not decline in value or quantity since the early sixties.

Title I exports have gone to about 70 countries; however, 10 countries got almost three-fourths of the total. Amendments to P.L. 480 in the International Development and Food Assistance Act of 1975 (expires December 1977) required that a minimum of 75 percent of Title I food aid in any fiscal year must be allocated to countries with an annual per capita GNP of \$300 or less that are unable to meet their immediate food needs through domestic production or commercial imports. Pending bills contain an amendment to this provision which would use the World Bank's International Development Association poverty criterion of per capita GNP. This level is now \$520 and is adjusted to reflect inflation.

The administration of the title I program involves several agencies.^{6/} The Department of Agriculture determines the types and quantities of commodities available, based on the availability criteria of P.L. 480 and other factors. A foreign government initiates the request for a title I program.

The Department of Agriculture develops a proposed sales agreement which is reviewed and cleared by the Interagency Staff Committee (ISC) comprised of Departments of Agriculture, Treasury, Defense, Commerce, State/Agency for International Development (AID), and Office of Management and Budget. Consultations are also held with other interested agencies and third country exporters to help assure that title I sales will not unduly interfere with normal commercial trade.

Title I commodities are exported entirely by private U.S. trade. A U.S. bank pays the commercial exporter in dollars the same market price for the title I sale as for a commercial sale. The U.S. Government reimburses the bank and the recipient government repays the United States on a long-term, low-interest basis.

Title II Donations

Title II donations, totaling \$5.6 billion, accounted for 22 percent of all P.L. 480 exports from fiscal 1955 through September 1976. During fiscal 1971-75, donations were up over previous years, averaging almost one-third of all P.L. 480 shipments, and title I exports generally trended downward.

During 1955-1976, nonfat dry milk and wheat flour were the leading title II commodities, followed by wheat, blended food products, and soybean oil. In the early seventies, a scarcity of milk and high prices substantially reduced the availability of milk donations. Increasing emphasis has been placed on supplying high protein, fortified products, such as corn-soya milk and wheat-soya flour.

Since 1955, donations have gone to more than 137 countries and territories with about 15 countries getting almost 60 percent of the total. India was by far the leading recipient, receiving 15 percent of all donations during 1955-1976.

Title II commodities are distributed through three cooperating sponsors: recipient governments operating under a bilateral agreement with the United States, nonprofit voluntary U.S. agencies, such as CARE; and international agencies, chiefly the World Food Program (WFP). The share shipped through nonprofit U.S. voluntary agencies fell from around three-fourths of all title II exports prior to fiscal 1967 to about one-half during most of 1970-75 and then rose to more than 70 percent in 1976. In recent years, government-to-government donations have declined sharply, accounting for only

^{6/} Veilantis and Manfredi, op. cit.

8 percent of all Title II exports in fiscal 1976, compared with almost 50 percent in 1972.

Although title I commodities are not designated for any specific recipient group prior to shipment, donations are specifically allocated to such groups as low-income expectant mothers, preschool and school children, farmers, and disaster victims. Except for 2 years during the 1969-76 period, donations for recipients other than emergency and disaster victims (or food for development programs) accounted for about three-fourths of all title II shipments (table 7). Since 1972, highest priority has been given to maternal/preschool feeding programs and food-for-work, self-help projects (such as agricultural, economic, and community development). For example, donations for school lunch programs dropped from 62 percent of all donation shipments for development programs in 1969 to 20 percent in 1976, while donations for maternal/preschool feeding rose from 14 percent to 54 percent.

Title III Barter

Barter occurred mainly during fiscal 1955-1962 when it accounted for 18 percent of all P.L. 480 shipments. Commodities were exported for the acquisition of foreign-produced strategic materials for U.S. Government stockpiles. Since 1963, barter for overseas procurement has been classified as commercial exports. All P.L. 480 barter transactions were completed by fiscal 1969. Wheat and feed grains were the main barter products, followed by cotton and tobacco. Europe (mainly the European Community) and Japan were the principal destinations.

Mutual Security/AID Programs

Since 1953, U.S. concessional agricultural aid has been provided under Mutual Security/AID programs, as sales for foreign currency until 1962 and then as AID loans and grants. About two-thirds of Mutual Security agricultural exports were sent during fiscal 1955-1961 when they amounted to about one-fifth of all agricultural Government program exports. In these years, the EC, Spain, Korea, and Republic of China (Taiwan) were the principal recipients, with wheat and cotton as the chief commodities (table 8).

In the last 2 years, AID shipments consisting mainly of soybeans, corn, wheat, and soybean oil to Israel and inedible tallow, chiefly to Egypt, have increased considerably.

Commercial Exports Expand

U.S. commercial sales of major farm commodities have increased considerably, and P.L. 480 have shipments accounted for a declining share of all U.S. farm exports. Prior to 1965, P.L. 480 exports amounted to 25 percent or more of all U.S. agricultural exports, but during fiscal 1973-76, P.L. 480 exports were only 4-7 percent of total farm exports.

During fiscal 1956-1965, about two-thirds of all U.S. wheat exports and nearly one-half of all U.S. rice exports were under P.L. 480 (table 9). The P.L. 480 share of all wheat exports dropped to an annual average of 46 percent during 1966-70 and to only 9 percent from 1973 to 1976. The P.L. 480 rice share did not decline as much as the wheat share, but dropped to around 30 percent of all rice exports in 1975 and 1976.

Among other commodities, the P.L. 480 share of cotton exports dropped from an annual average of about 25 percent from 1956 to 1970 to less than 5 percent during 1974 to 1976. Vegetable oils (soybean and cottonseed) under P.L. 480 averaged over one-half

of the total during 1956 to 1970 and then dropped to less than one-third of the total in 1973 to 1976. Feed grain under P.L. 480 exports averaged approximately 30 percent of all U.S. feed grain exports during 1956 to 1960 and less than 7 percent since fiscal 1968.

As developing countries have increased their economic growth and foreign exchange reserves, they have tended to increase their commercial purchases from the United States and lessen or even terminate their need for food aid (fig.2). During fiscal 1974-76, U.S. commercial farm exports accounted for more than 80 percent of all U.S. farm exports to developing countries, compared with 40 percent of the total to these areas a decade ago (fig.3). U.S. commercial sales of farm products to developing countries were up from less than \$1 billion during 1956-1966, or around 20 percent of all commercial farm exports, to nearly \$7 billion in fiscal 1975, or 34 percent of all commercial farm sales (table 10).

Almost all major P.L. 480 recipients have substantially increased their commercial purchases of U.S. farm products (tables 11 and 12). Five developing countries-- Republic of China, Brazil, Iran, Peru, and Colombia--and two developed ones--Japan and Spain--are examples of former Title I recipients that became good U.S. commercial customers. In fiscal 1976, Republic of China and Brazil were the 11th and 13th major commercial markets for U.S. farm products. In 1975, Iran was our 9th best customer. For several years, Japan has been our top commercial farm market, and Spain has been among the top 10.

Several recent recipients of concessional aid, such as Korea, India, Indonesia, Egypt, and Israel have also greatly expanded their commercial farm purchases. In fiscal 1976, India was the 8th leading commercial market for U.S. farm products--up from 18th place in fiscal 1974. Since fiscal 1972, Korea has been one of the 10 leading commercial customers.

Wheat, the major commodity exported under P.L. 480, has increased in commercial sales to most major former and recent aid recipients, such as Japan, India, Brazil, Korea, Republic of China, Iran, and Morocco. In fiscal 1976, Japan, India, Brazil, and Korea were among the top five cash purchasers of U.S. wheat; Republic of China ranked 12th.

1/ Includes sales for foreign currencies (which predominated until 1969) and long-term dollar and convertible foreign currency credit sales.

2/ Through Government-to-Government, international (World Food Program) and U.S. private voluntary agencies.

3/ Less than \$50,000.

4/ During most of the P.L. 480 period, Israel was considered developing; in recent years, it has generally been classified as developed.

 2/ About 50 percent was P.L. 480 barter.

KUWAIT'S AGRICULTURAL IMPORTS RISE RAPIDLY, BUT U.S. SHARE REMAINS SMALL

by
John B. Parker

Outlook

U.S. agricultural exports to Kuwait are expected to range between \$15 million and \$21 million in 1977 because of further gains in shipments of frozen poultry, pulses, and processed foods. Yet, the U.S. share of Kuwait's total agricultural imports, estimated at \$520 million in 1977, will remain at only 3 percent.

Kuwait's total agricultural imports in 1976 were about \$435 million--almost triple the 1972 level.

U.S. agricultural exports to Kuwait increased from \$4.6 million in 1972 to a peak of \$21.3 million in 1974 when large rice deliveries occurred, but exports declined to \$10.6 million in 1975. Larger sales of poultry, almonds, pulses, and processed foods caused U.S. agricultural exports to Kuwait to reach nearly \$13 million in 1976.

However, the United States still has only a relatively small share of Kuwait's import market--with the European Community, Australia, India, Pakistan, and Lebanon being major sources of farm imports in recent years.

Most food items enter Kuwait duty-free. Sharp competition among traders and the influential union of cooperatives tend to keep food prices low. The average family in Kuwait spends less than 15 percent of their income on food--one of the few countries where food expenditures are a smaller share of the family budget than in the United States.

Import Trends For Selected Commodities

Wheat and Wheat Products

Australia provides virtually all of the wheat imports because of arrangements between Australia and the major wheat flour mill in Kuwait. Total wheat imports range from 100,000 to 130,000 tons, annually.

Wheat flour imports average about 1,000 tons annually, mostly for use by special bakeries. Imports of bakery products increased markedly from 1972 to 1976, rising from 2,000 to 5,000 tons. The United Kingdom, PRC, Poland, Belgium, and Iran are major suppliers of the cookies, cakes, and imported bakery specialties.

Rice

The United States has been a residual supplier of bulk rice imports by Kuwait, and a steady supplier of small parcels of packaged rice. U.S. exports of rice to Kuwait increased from 4,680 tons in 1973 to 27,922 tons in 1974 when Pakistan's deliveries dwindled. However, Kuwait shifted back to basmati rice from Pakistan and India in 1975 and U.S. rice shipments to this market fell to 755 tons.

The value of U.S. rice exports to Kuwait declined from \$13.6 million in 1974 to \$371,000 in 1975, but the United States may find it a substantial rice market this year since exportable supplies from Pakistan are again scarce.

Total rice imports reached 73,089 tons in 1975, including 41,439 tons from Pakistan and 23,301 tons from the United States. Rice consumption is rising rapidly--about 10 percent annually. Rice is purchased at bargain subsidized prices in Dubai and Abu Dhabi and transported by private vehicles to Kuwait in times of scarcity. These rice arrivals are not included in import statistics.

Coarse Grains

Thailand supplied most of the corn imports which averaged 15,000 tons annually during 1971-76. A brief shortage of supplies from Thailand precipitated imports of 7,454 tons of U.S. corn in 1973.

Pakistan was the major source of barley imports in 1973, but France was the leading supplier during 1974-76. Barley imports reached a peak of 47,142 tons in 1971, including 20,483 tons from Australia, 15,719 tons from France, and 10,652 tons from the United States.

Soybeans

U.S. exports of soybeans to Kuwait increased from 2,869 tons in 1974 to 8,954 tons in 1975 and were valued at \$2 million. Then Brazil captured the entire market for soybeans in Kuwait last year, halting U.S. soybean shipments.

Sugar and Products

The United Kingdom is a major source of sugar products. Poland supplied about 40 percent of the 59,141 tons of imported sugar in 1975. U.S. exports of beverage ingredients and syrups exceeded \$1 million in 1976.

Meat

Kuwait's meat imports soared from only \$4.4 million in 1966 to about \$60 million in 1976, reflecting larger imports of beef and mutton from Australia, Latin America, PRC, Iran, and India. Imports of beef and mutton now exceed 20,000 tons annually, and frozen poultry reached 17,000 tons in 1976--double the 1971 level. Most of the imported poultry came from Denmark, the PRC, Hungary, France, Brazil, and the United States in the last 2 years. PRC, Denmark and Norway supplied about half of the imported canned meat in 1976.

Dairy Products and Eggs

The Netherlands supplies about one-third of Kuwait's imports of dry milk which exceed 12,000 tons annually, and Denmark supplies over two-thirds of the butter. Czechoslovakia and West Germany each supplied about 29 percent of the 5,670 tons of cheese imported in 1975.

Lebanon supplied 36 percent of the 9,409 tons of eggs imported by Kuwait in 1975, and Romania shipped 26 percent. Prospects for sales of U.S. eggs have improved with the opening of new transportation facilities.

Fruits and Vegetables

U.S. exports of almonds, pulses, canned fruit, tomato juice, meat sauces, frozen poultry, snack foods, and peanut preparations more than quadrupled between 1972 and

and 1976 (see table 13).

Total imports of fruits, vegetables, nuts, and preparations neared \$100 million in 1976--about triple the 1972 value. Lebanon and Jordan supplied most of the 26,750 tons of oranges imported in 1975. Egypt became an important source of oranges in 1976 as deliveries by Lebanon dwindled. Lebanon supplied 10,525 tons of the 12,580 tons of apples imported in 1975, but Italy and France accounted for the growth in 1976 imports.

Exports of U.S. almonds to Kuwait soared to 425 tons and were valued at \$740,000 in 1976--up from only 16 tons in 1972. U.S. exports of vegetables and preparations to Kuwait reached \$1.4 million in 1976--more than double the 1974 level.

U.S. AGRICULTURAL EXPORTS UP 10 PERCENT IN OCTOBER-MAY

U.S. farm product exports in May totaled nearly \$2.2 billion, about the same as April and well above the \$1.85 billion recorded in May 1976. The 8-month cumulative value beginning last October advanced almost 10 percent over a year earlier to \$17.1 billion. Overall volume amounted to 75 million tons, slightly below 1975/76's tonnage.

Cotton shipments for October-May were 60 percent above their year-earlier level at 3.2 million bales. Value more than doubled, exceeding \$1.13 billion. Japan, Hong Kong, India, Egypt, Canada, and Western European countries accounted for the export increase.

Soybeans were another large foreign exchange earner. Volume rose 8 percent to 12.7 million tons and value jumped 55 percent to \$3.5 billion. Japan, Canada, Mexico, the USSR, Germany, and France took most of the increase. Soybean oil quantities soared three-fourths, reaching 493,000 tons; higher prices resulted in a sharper value gain to \$279 million. India, Iran, and Peru were the principal destinations. Sunflower-seeds, peanuts, and cottonseed oil also indicated marked gains over 1975/76 levels.

Among the animal products, exports were significantly higher for hides and skins, lard and tallow, and frozen chickens. Inedible tallow shipments gained 30 percent to nearly 795,000 tons; lard jumped almost 70 percent to 68,000 tons.

Strong foreign demand for animal feeds, including corn gluten feed, alfalfa, hay, and prepared livestock feeds, raised these exports by 82 percent to \$427 million.

Rice exports approached 1.4 million tons--paced by shipments to Iran, Indonesia, and Nigeria--yielding 12 percent more in value terms.

Coarse grain exports rose slightly to over 35 million tons, but dollar returns edged downward to \$3.9 billion. Japan, Korea, Taiwan, and West European markets such as the United Kingdom, the Netherlands, Belgium, Germany, Italy, and Portugal remained strong, but these were offset by steep downturns in shipments to the USSR and Poland. A sharp drop in corn movements to Mexico was cushioned somewhat by the surge in grain sorghum sales.

Wheat export volume during May nearly equaled those in May 1976 at 1.8 million tons, but prices averaged lower. But for the 8-month period, tonnage fell almost a third and value dropped 43 percent to \$1.76 billion because of lower prices. Shipments to most countries declined, but Korea, Egypt, Iran, and Nigeria took increased quantities. Conversely, foreign demand for wheat flour remained strong, especially in Egypt, Sri Lanka, and Canada. Strikes at mills in Canada resulted in strong demand for U.S. flour.

Table 25--Export quantities of selected commodities,
October-May 1975/76 & 1976/77 and May 1976 and 1977

Commodity	October-May		May	
	1975/76	1976/77	1976	1977
-- 1,000 metric tons --				
Animal products:				
Fats, oils, and greases	686	917	97	113
Meats and meat products	250	282	40	34
Poultry meat, fresh or frozen :	86	125	14	15
Grains:				
Wheat and products	20,267	15,003	1,985	1,967
Feed grains and products	34,299	35,614	4,124	4,083
Rice	1,140	1,393	174	232
Oilseeds and products:				
Soybeans	11,706	12,671	1,348	1,501
Protein meal	3,320	3,323	365	434
Vegetable oils and waxes	655	827	129	124
Other:				
Fruits and preparations <u>1/</u>	1,021	1,001	158	129
Vegetables and preparations <u>2/</u> :	960	1,138	178	158
Tobacco	211	201	14	18
Cotton, excluding linters	436	697	71	87
Feeds and fodders <u>3/</u>	1,021	1,836	136	208
Total	76,058	75,028	8,833	9,103

1/ Includes fresh fruits, canned fruits, and dried fruits.

2/ Includes fresh vegetables, canned vegetables, and pulses.

3/ Includes prepared animal feeds, corn byproducts, and alfalfa meal and cubes.

1/ PRELIMINARY

2/ NEW CLASSIFICATION EFFECTIVE JAN. 1, 1976 EXCLUDES TURKS, CAICOS, AND CAYMAN ISLANDS.

NOTE: MNO = 1,000 HEAD OR PIECES
 MLB = 1,000 POUNDS
 MRBA = 1,000 RUNNING BALES
 MGAL = 1,000 GALLONS
 MMT = 1,000 METRIC TONS
 MBU = 1,000 BUSHELS
 MSTN = 1,000 SHORT TONS
 MKG = 1,000 KILOGRAMS
 ZERO = QUANTITIES INDICATE NONE OR LESS THAN 500 UNITS

U.S. AGRICULTURAL IMPORTS FROM 50 MAJOR SOURCES, 1971-76

U.S. farm imports reached a record of nearly \$11 billion in 1976, compared with \$9.3 billion in 1975 and \$5.8 billion in 1971. Brazil, the leading supplier, provided 9 percent of all farm imports in 1976 and was followed by Mexico, Canada, Australia, the Philippines, Colombia, Indonesia, and the Dominican Republic.

Noncompetitive products accounted for about two-fifths of all farm imports during 1971-76. Green coffee, the leading agricultural commodity, accounted for most of the value increase in noncompetitive imports during this period. The share of green coffee in total farm imports rose from 20 percent in 1971 to 24 percent in 1976. Higher prices accounted for most of the increase in the value of coffee imports as the quantity imported declined slightly during 1971-76. Brazil, Colombia, and Mexico have been leading suppliers of green coffee. The share supplied by Brazil fell from 28 percent in 1971 to 19 percent in 1976; Colombia's share remained at 14 percent; and Mexico's share rose from 5 percent to 10 percent.

Competitive farm imports rose by 70 percent during 1971-76. Chief products were meat and meat products (mainly from Australia and New Zealand), sugar (chiefly from the Philippines and the Dominican Republic), oilseeds and oilseed products, and vegetables and preparations. The quantity of sugar and oilseeds imported rose 18 percent and 46 percent, respectively, from 1975 to 1976, but as prices fell, the value declined.

U.S. FARM IMPORTS IN MAY DROP 12 PERCENT BELOW APRIL

U.S. farm imports in May 1977 totaled \$1.2 billion, 12 percent below April--the first major monthly decline since last October. The value of green coffee imports declined about one-third in May, accounting for most of the total decrease. There were also monthly declines in roasted coffee and dry rubber, but substantial increases in imports of cocoa beans and tea which reached record levels.

Total farm imports were valued at \$9.1 billion during October-May 1976/77, about one-third higher than a year earlier. Once again, green coffee accounted for about one-third of all agricultural imports during this period, causing most of the value increase. There were also major value increases in imports of soluble and roasted coffee, cocoa beans, tea, chocolate preparations, dry rubber, fruits and preparations, and vegetables and preparations.

Fresh vegetable imports in May eased slightly from the record \$65 million reached in April, but because of sharp increases in imports of tomatoes, onions, peppers, and cucumbers, May imports of fresh vegetables exceeded \$50 million compared with only \$5 million in May 1976.

The quantity of frozen strawberries imported almost doubled during October-May 1976/77, compared with a year earlier. This was mainly due to winter freezes which reduced U.S. supplies and led to large imports in the spring.

Imports of vegetable oils rose very slightly during October-May 1976/77, compared with a year earlier; however, the quantity imported declined by one-fifth. Reduced availabilities of coconut oil, along with sharply higher prices for coconut and palm oils, indicate that vegetable oil imports may decline in 1977 from the 2.4 billion pounds imported in calendar 1976. ^{1/}

Principal value declines during October-May 1976/77 occurred in imports of sugar and meat and meat products. The quantity of sugar imported rose over a year earlier as the import unit value fell from an average of \$309 per short ton to \$187.

ZERO DENOTES NIL OR LESS THAN 500 UNITS

MLB = 1,000 POUNDS

MLTN = 1,000 LONG TONS (2,200 LBS.)

MGLB = 1,000 POUNDS, GREASY BASIS

MNO = 1,000 HEAD OR PIECES

MRBA = 1,000 RUNNING BALES (480 LBS. NET)

MBU = 1,000 BUSHELS

MSTN = 1,000 SHORT TONS (2,000 LBS.)

MGAL = 1,000 GALLONS

INTERNATIONAL PRICE HIGHLIGHTS

Most U.S. commodity prices drifted downward in May as the harvest season of several major commodities began. The Dow Jones commodity spot price index, reflecting these declines, declined 2 percentage points to 422.

At the Gulf ports, wheat continued to slide, reaching \$2.65 a bushel, as a bountiful U.S. and world wheat crop came into harvest. On a per-ton basis, wheat was in the unusual position of being priced lower than corn as it has been since April. Both USDA and private analysts predict that wheat prices probably will not reestablish their normal premiums until next fall when an anticipated bumper corn crop becomes available for delivery. Corn prices declined 3 percent to \$2.64 a bushel because of good crop prospects. In Rotterdam, U.S. and Argentine corn and sorghum prices declined by about 3 percent.

In contrast, rice prices have held up. The Thai rice price rose slightly to \$257 a ton.

Gulf port soybean prices have declined slightly to \$9.84 a bushel as the tight 1976/77 soybean marketing year draws to a close and prospects for a fully recovered 1977 crop is on the horizon. In Rotterdam, similar price declines were registered for soybean meal, which averaged \$298 a ton.

The Osaka price for U.S. cotton has also begun to decline as the U.S. harvest draws near, reaching 76 cents a pound. The 17-percent increase in the planted acreage points to a potentially larger U.S. cotton crop. Through the fall, several bullish factors may be at work to buoy cotton prices. The outlook for 1977/78 is for continued strong demand, particularly from abroad, since foreign textile production is expected to rise, mirroring improving general economic conditions. Foreign supplies are also likely to be tight early in the fall.

Most import commodity prices have also declined. Although the New York spot price for coffee has skyrocketed in recent months, prices have slightly declined to \$3.05 a pound in May, down from \$3.27 in April. The decline in U.S. consumer purchases and the beginning of the Brazilian coffee harvest are price-weakening factors. The Brazilian 1977/78 crop, which is currently being harvested, will be mostly collected by mid-July. Estimates of the current Brazilian harvest range from 15 to 17 million bags, a substantial increase from last year's freeze-stricken crop, but still well below the 25 million-bag level in each of the 2 years before the frost.

Cocoa beans rebounded in May to \$1.96 a pound, responding to the tightness of immediately available supplies. There were not enough supplies available to meet immediate needs in Europe, especially to fulfill expiring May 1977 futures contracts in London. Cocoa bean shipments were delayed from major producers in West Africa, but were in heavy demand by European candymakers, whose supplies were relatively low.

The sugar market continued to be lackluster in May as the New York spot price for raw cane sugar slid to 11 cents a pound. Prices for crude rubber and imported cow meat also declined.

PUBLIC LAW 480 EXPORTS FOR OCTOBER-MARCH 1976/77 DOWN

by
Susan A. Libbin ^{1/}

Public Law 480 exports declined to \$301 million during October-March 1976/77 from \$404 million a year earlier, more than offsetting the increase in AID shipments. Total farm exports under Government-financed programs were nearly \$495 million for the first half of fiscal 1977.

About 60 percent of the P.L. 480 reduction was in Title I long-term dollar and convertible foreign currency credit sales, which totaled \$234 million for October-March 1976/77, compared with \$296 million a year earlier. Principal Title I recipients in October-March 1976/77 were Indonesia, getting about one-third of the total; Egypt, 27 percent; India, 20 percent; Pakistan, 11 percent; and Sri Lanka (Ceylon), 8 percent.

Almost the entire decrease in Title I exports was in wheat, mainly due to the normal delays in shipping experienced at the beginning of a new fiscal year. There were small increases in most other Title I exports, such as rice, wheat flour, soybean oil, tobacco, and bulgur wheat.

Title II donations totaled \$68 million for October-March 1976/77, almost 60 percent below a year earlier. Principal declines were in blended food products and bulgur wheat. Also, peanut oil was shipped in October-March 1976/77 because of the use of CCC stocks to fill Title II vegetable oil requirements. Shipments increased for wheat, soybean oil, and nonfat dry milk.

Agricultural commodities under AID programs totaled \$193 million during October-March 1976/77, about one-third higher than a year earlier. Almost the entire amount went to Israel and consisted mainly of corn, soybeans, and wheat.

Commercial exports receiving credit under Commodity Corporation Credit (CCC) sales totaled \$225 million in October-March 1976/77, 13 percent less than a year earlier. CCC sales of cotton, tobacco, and wheat were considerably less. There were no CCC corn sales in October-March 1975/76, but there were \$69 million worth of corn sales (mainly to Poland) in the first half of fiscal 1977.

^{1/} International Economist, Statistics Program Area, Foreign Demand and Competition Division. Special acknowledgment is due Linda Myers for compilation of data for this article.

1/ Less than \$50,000.

2/ The excess of Government program shipments over total exports may be attributed to lags in reporting or to differences in classification procedures.

3/ Total exports include those reported by Census plus foreign donations through voluntary relief agencies. Relief shipments of these commodities are not separately reported by Census.

1/ Excludes imports of coconut oil.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and aircraft engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. USDA payments are excluded from the export value. Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country known to him at the time of shipment from the United States. Shipments of certain U.S. grain from Great Lakes ports to Canadian ports are designated as exports to "unidentified countries". Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
