The contributors to this issue are Susan A. Libbin and H. Christine Collins. Principal coordinators are Robert L. Tontz, Thomas A. Warden, Dewain H. Rahe, and Thomasine B. McCall, Statistics Program Area, Foreign Demand and Competition Division, Economic Research Service, Washington, D.C.

DIGEST

U.S. Agricultural Exports To 50 Countries, 1971-76 (see p. 4). A record \$23 billion in farm products moved to foreign countries during 1976. Most of the \$1.1 billion increase over 1975 went to the European Community, Comecon, Japan, and Canada.

* * * * *

Calendar 1976 Government Program Exports--P.L. 480 Below 1975 Level (see p. 24). U.S. agricultural exports under all Government-financed programs totaled almost \$1.4 billion in 1976, 2 percent below 1975. An 18-percent decline in P.L. 480 exports, mostly in Title I exports of wheat and rice, more than offset the large increase in farm products under AID programs.

* * * * *

U.S. Coffee Import Value Up, Quantity Down Over Last 5 Years (see p. 46). Green coffee, the leading U.S. farm import, rose from a value of \$1.2 billion in 1972 to \$2.6 billion in 1976, and accounted for 25 percent of all U.S. farm imports, but the quantity of coffee imported declined. The outlook for coffee production in the next few years will be largely affected by production in Brazil, the world's leading producer.

* * * * *

Farm Product Exports Near \$15 Billion During October-April (see p. 53).

U.S. agricultural commodities valued at more than \$2.2 billion were exported during April, bringing the fiscal year total to \$14.9 billion. The 7-month cumulative value was 8-1/2 percent above the year-earlier period.

U.S. Farm Imports In October-April 1976/77 Up One-Third From Year Earlier (see p. 93). U.S. farm imports in April reached a record \$1.4 billion, bringing the total for October-April 1976/77 to \$7.8 billion, one-third higher than a year earlier. Green coffee accounted for the major increase due to rising prices as the quantity imported declined slightly. The cold front that hit the Parana coffee area in Brazil in May will have little effect on Brazil's 1977/78 production.

* * * * *

International Price Highlights (see p. 124). During January-March 1977, the price index for U.S. agricultural imports jumped 48 percent above the same quarter last year. Increased coffee prices accounted for most of the rise. Prices of U.S. agricultural exports gained 6 percent.

U.S. AGRICULTURAL EXPORTS TO 50 COUNTRIES, 1971-76

Farm product exports in 1976 totaled a record value of nearly \$23 billion, \$1.1 billion above the 1975 value and almost \$1 billion larger than the previous high in 1974. Most of the increase went to Europe, primarily to the European Community (EC-9), the USSR, and Eastern Europe.

After adjustments for transshipments through Canadian and West European ports, exports to the EC-9 members rose to \$6 billion from \$5.3 billion in 1975. Within the EC, shipments increased to West Germany, Holland, Italy, the United Kingdom, France, Belgium, Denmark, and Ireland. Adverse weather affected crops in most EC countries for the second consecutive year. Severe drought in the summer of 1976 reduced crop yields and raised import requirements for animal feeds, grains, oilseeds, and vegetables.

Agricultural exports to Comecon members (East Germany, Czechoslovakia, Hungary, Poland, the USSR, Romania, and Bulgaria) totaled \$2.9 billion in 1976, up nearly 38 percent from 1975's \$2.1 billion. The USSR, Poland, East Germany, Romania, Czechoslovakia, and Bulgaria stepped up purchases of U.S. farm products following poor 1975 harvests.

U.S. agricultural exports to Asia totaled just under \$7.6 billion in 1976, about the same as the previous year's level. Shipments to Japan at nearly \$3.6 billion recovered strongly from a 1975 decline, but offsetting reductions occurred in exports to China, Taiwan, Pakistan, Bangladesh, Iran, Iraq, and Turkey.

Farm product exports to Latin American countries fell in 1976 to \$1.6 billion from over \$2 billion during the 2 preceding years. Shipments to Mexico, Brazil, and Peru dropped as weather-damaged crops recovered. Conversely, exports to Venezuela, Chile, and the Dominican Republic remained strong.

A record \$1.5-billion value in exports to Canada was reached last year, reflecting increases for fruits and vegetables, meat, soybeans, and protein meal.

Overall, U.S. agricultural exports to Africa remained level at \$1.2 billion, with increases to Egypt, Nigeria, Morocco, and Zaire offset by declines to Algeria, Tunisia, and several other countries.

Accompanying tables show trends in exports by destination for the last 5 years. The 50 major destinations for 18 commodity groups between 1971 and 1976 are also summarized.

Table 1--U.S. agricultural exports to selected countries, 1975 and 1976

^{1/} Because of transshipments, U.S. agricultural exports to certain countries such as Canada (prior to Jan 1, 1973), the Netherlands, and Belgium are overstated; exports to many other countries are therefore understated, particularly the United Kingdom, France, Switzerland, Ireland, Italy, Denmark, and Sweden. The data in these tables are not adjusted for transshipments. ^{2/} New classification effective Jan. 1, 1976. ^{3/} Separately classified Jan. 1, 1972. ^{4/} Separately classified May 1, 1972. ^{5/} New classification effective Jan. 1, 1976. Previously included under the former designation "Southern and Southeastern Asia, n.e.c." now classified as Southern Asia, n.e.c. ^{6/} Separately classified prior to June 1, 1972. ^{7/} New classification effective Jan. 1, 1976. British Indian Ocean Territory reported partly with Seychelles and partly with Mauritius prior to Jan. 1, 1976. ^{8/} Separately classified Jan. 1, 1975. ^{9/} Transshipments through Canada where final destination was not known at the time of export. ^{10/} Totals may not add due to rounding.

CALENDAR 1976 GOVERNMENT PROGRAM EXPORTS— P.L. 480 BELOW 1975 LEVEL

by
Susan A. Libbin*

U.S. agricultural exports under Government-financed programs (P.L. 480 and AID) totaled almost \$1.4 billion in calendar 1976, 2 percent below 1975. An 18-percent decline in P.L. 480 exports more than offset the large increase in farm products under Agency for International Development (AID) programs.

Total commercial agricultural exports amounted to \$21.6 billion in 1976, 6 percent above a year earlier. About 4 percent of these commercial sales received credit under Commodity Credit Corporation (CCC) sales programs and Export-Import Bank loans, compared with 2 percent of commercial exports under credit sales in 1974 and 1975.

Except for Chile, Cambodia, and South Vietnam, Government exports went to the same leading recipients in 1976 as in 1975. However, there were substantial declines in Government exports to Bangladesh, India, and Pakistan and large increases to Israel, Egypt, and Indonesia.

Title I exports (long-term dollar and convertible foreign currency sales) totaled \$771 million in 1976, one-fifth less than in 1975, but still higher than any other year since 1968. The value of Title I wheat and rice exports each declined by about two-fifths in 1976. Wheat accounted for almost 50 percent of all Title I exports and rice amounted to about 29 percent, each somewhat lower than in 1975. However, there was an increase in the quantity of Title I rice exported in 1976, even though a fall in rice prices resulted in a smaller value shipment. Principal recipients of Title I wheat shipments in 1976 were Egypt (34 percent), Korea, India, and Pakistan. Rice went mainly to Indonesia (43 percent), Korea, Bangladesh, and India. There were increases in Title I exports of soybean oil, wheat flour, and tobacco in 1976, and a small decline in cotton exports.

Title II exports of \$265 million in 1976 were 14 percent below 1975. However, donations still accounted for about one-fourth of all P.L. 480 shipments as they did during 1973-75. Title II donations went to more than 70 countries in 1976; and, India received one-third of the total. Shipments of major Title II commodities that declined in 1976 were non-fat dry milk, bulgar wheat, wheat flour, and soybean oil. Peanut oil exports rose considerably, mainly to India, because of the use of CCC stocks to fill Title II vegetable oil requirements in 1976. Donations to the World Food Program declined considerably, accounting for 18 percent of all Title II exports in 1976, compared with 37 percent in 1975. Donations through voluntary agencies--three-fourths of all Title II shipments in 1976--increased slightly, while Government-to-Government donations remained about the same.

Disbursements of AID commodities, mostly wheat, corn, soybeans, inedible tallow, and vegetable oils, totaled \$363 million, compared with \$202 million in 1975, and \$37 million in 1974. AID accounted for 26 percent of all Government programs, compared

*International Economist, Statistics Program Area, Foreign Demand and Competition Division. Special acknowledgment is due Linda Myers for compilation and review of data in this article.

with less than 5 percent during most of 1962-74. Over four-fifths of AID commodities went to Israel.

Wheat and Wheat Products

Wheat and wheat products, valued at \$602 million, accounted for about 43 percent of the total value of commodities under Government programs in 1976. Wheat, which accounted for most of the Government-financed wheat and product shipments, declined. The reduction was all in Title I sales. AID disbursements of wheat rose considerably and accounted for 15 percent of all Government exports of wheat in 1976, compared with only 2 percent in 1975.

Commercial exports of wheat and products also declined in 1976. The Government share of total U.S. wheat and product exports was about 14 percent in 1975 and 1976, compared with around 6 percent in 1973 and 1974.

Rice

Because of lower prices, the quantity of rice exported under Government programs (all Title I sales) increased by 6 percent in 1976 over 1975, and the value exported declined by about 40 percent. Both the quantity and value of commercial rice shipments fell in 1976. During 1973-76, Government rice exports accounted for slightly over one-third of all U.S. rice exports.

Oilseeds and Products

Vegetable oils--accounting for most Government oilseeds and products--rose from \$43 million in 1975 to a record \$152 million in 1976. There were gains in vegetable oils under P.L. 480 and AID. Government exports of soybeans (usually under Mutual Security AID programs) declined from 1975 which was the first year of large Government shipments of soybeans since the early sixties.

Commercial exports of vegetable oils declined, and commercial soybean exports increased in 1976 over a year earlier. Government exports of vegetable oils rose from 7 percent of all U.S. vegetable oils exported in 1975 to 26 percent in 1976. Almost all soybean exports have been commercial.

Feed Grains and Products

Government program exports of feed grains (almost all corn under AID) totaled \$119 million in 1976, compared with \$19 million (mostly AID) in 1975, and with \$68 million (mainly Title I) in 1974. Commercial exports of feed grains also rose in 1976.

Cotton and Tobacco

Government program cotton exports (all Title I sales) of \$28 million were almost the same value as in 1974 and 1975, but were much below the \$82 million exported in 1973. Commercial exports of cotton declined by 27 percent. Only 3 percent of all cotton exported was under Government programs.

Government program tobacco exports (all Title I sales) were valued at \$22 million in 1976, compared with \$3 million in 1975, and \$37 million in 1974. Commercial tobacco exports increased in 1976. Only 2 percent were under Government programs.

Other Commodities

Government program exports of nonfat dry milk (donations) in 1976 were 56 percent below 1975, which was near the level of the late sixties.

Blended food products (corn-soya milk and wheat flour-soya) totaled \$43 million in 1976, 23 percent below a year earlier.

Commercial Exports Under Credit Sales

Credit sales of commercial exports rose by more than two-thirds in 1976 from the previous year. Almost the entire increase was in CCC credit sales of corn to Poland, Greece, and Portugal; wheat to Indonesia, Korea, Morocco and Poland; and soybean oil-cake and meal to Poland.

^{1/} Includes long-term dollar and convertible local currency credit sales, donations through Government-to-government, World Food and voluntary relief agencies authorized by P.L. 480, and exports under Mutual Security (AID) programs authorized by P.L. 87-195. ^{2/} "Exports outside specified Government-financed programs" or "Commercial sales" include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter transactions involving overseas procurement for U.S. agencies, which benefit the balance of payments and rely primarily on authority other than P.L. 480; (2) extension of credits and credit guarantees for relatively short periods; and (3) sales of Government-owned commodities at less than domestic market prices. ^{3/} Total exports of feed grains and products, include the estimated value through voluntary relief agencies under P.L. 480, not separately reported by the Bureau of the Census: 1975, \$7.1 million, 1976, \$5.4 million. ^{4/} The excess of Government program shipments over total exports may be attributed to lags in reporting or to differences in classification or valuation procedures. ^{5/} Less than \$50,000.

^{1/} Shipments under overseas procurement barter contracts are authorized by the CCC Charter Act and are essentially equivalent to dollar sales since they offset the dollar outflow for foreign purchases by U.S. agencies with a dollar inflow for agricultural commodities. The barter program was suspended July 1, 1973. Shipments shown are completion of prior transactions.

^{2/} Shipments under Export-Import Bank loans and guarantees and under the CCC credit sales program are credits for relatively short periods repayable in dollars plus interest (covering the costs of the lending agency).

1/ Less than \$50,000.

2/ The excess of Government program shipments over total exports may be attributed to lags in reporting or to differences in classification or valuation procedures.

3/ Total exports include those reported by Census plus foreign donations through voluntary relief agencies. Relief shipments of these commodities are not separately reported by Census.

4/ Less than 500 units.

U.S. COFFEE IMPORT VALUE UP, QUANTITY DOWN OVER LAST 5 YEARS

by
Susan A. Libbin*

Green coffee, the leading U.S. agricultural import, rose from a value of almost \$1.2 billion in calendar 1972, or 18 percent of all U.S. agricultural imports to \$2.6 billion in 1976, or 24 percent of all U.S. farm imports, whereas the quantity imported declined slightly (table 19). Because of large price increases in 1976, the value of U.S. coffee imports rose by more than two-thirds over 1975, although about the same volume of green coffee was imported. During 1972-75, the value of coffee imports increased by one-third, partly because of inflation, whereas the quantity imported declined slightly.

The unit import value of green coffee jumped from an average of 73 cents per pound during the first 3 months of 1976 to \$1.69 per pound during the same period for 1977. In 1975, the coffee import price averaged 58 cents per pound, about one-third higher than in 1972. Retail prices of regular coffee also skyrocketed from 93 cents per pound in 1972 to \$1.87 per pound in 1976. ^{1/}

The sharp import price increase was mainly because of a combination of unusual events that reduced production in major coffee growing countries, principally Brazil. ^{2/} World production of green coffee declined from 73.6 million bags in 1975 to an estimated 62.2 million bags in 1976/77. ^{3/} Brazil has been the world's major coffee producer, except when crops were affected by frosts, and traditionally has accounted for about one-third each of the world's production and export of green coffee. A severe frost in Southern Brazil in July 1975 reduced its 1976 harvest from a potential of 28-30 million bags to an estimated 9.5 million bags, the lowest level since 1964. About 50 percent of Brazil's coffee trees were damaged; thus, many trees will not produce again for at least 2 years.

Other factors reducing world coffee production, but which were secondary to the Brazilian situation, were heavy rains in Colombia and political unrest in African producing countries, mainly Angola and Ethiopia.

In addition to green coffee, the United States also imports roasted and soluble coffee, which together only account for 9 percent of all U.S. coffee imports. The value of these coffee imports also rose sharply in the last 2 years.

Major U.S. Suppliers of Green Coffee

About two-thirds of U.S. green coffee has generally come from Latin America--mainly South American countries (table 20). Close to 30 percent has come from Africa since 1971.

Central America and Mexico were the only major supplying areas to increase their share of the U.S. market during 1969-76 (fig.1). These areas provided 13 percent and 9 percent, respectively, of the total quantity of U.S. green coffee imports in 1976, compared with less than 1 percent and 6 percent, respectively in 1969. The South American share dropped from 52 percent of U.S. import volume in 1969 to 37 percent in 1976, and the African share was maintained at about 29 percent of the total. Although only about 7 percent of U.S. imports came from Asia (mainly Indonesia) in 1976, the total quantity and relative share from the region have increased.

U.S. IMPORTS OF GREEN COFFEE, BY SELECTED AREAS

(fig. 1)

Although the United States imported green coffee from over 50 countries in 1976, four countries--Brazil, Colombia, Mexico, and the Ivory Coast--supplied about 50 percent of the total. Brazil has been the leading supplier, but the quantity imported from that country declined by one-half during 1972-76, and its volume share of U.S. imports dropped from 30 percent to 16 percent. Colombia, the second leading supplier, maintained its share of the U.S. market at about 14 percent. In recent years, Mexico and the Ivory Coast have become the third and fourth leading suppliers. Both have increased their share of the U.S. market since 1972.

The next main group of U.S. suppliers of green coffee has been Ecuador, El Salvador, Indonesia, Uganda, Ethiopia, and Angola. Except for the latter two, the other countries slightly increased their share of the U.S. market during 1972-76. In 1972, Angola was the third leading supplier of coffee to the United States, but by 1976, it had dropped to 12th position.

The United States has had a negative overall trade balance with its principal African and Asian suppliers but has had a positive trade balance with the Latin American major suppliers (table 21). Generally, the United States has exported a large value of nonagricultural items to the Latin American suppliers, such as Brazil, Colombia, and Mexico. Thus, the positive nonagricultural trade balance the United States has maintained with these countries has more than offset the negative agricultural trade balance with them.

Importance of United States in Export Trade of Principal Suppliers

The importance of the United States as a market for the four principal suppliers has varied. In 1975, the United States took 29 percent of Brazil's total coffee exports, 39 percent of Colombia's exports, 70 percent of Mexico's trade, and 18 percent of the total exported by the Ivory Coast. ^{4/}

Although the United States has always been the leading single buyer of coffee from Brazil and Colombia, its relative share of both these countries' export markets has declined considerably since the early sixties. ^{5/} The U.S. share of Brazil's total coffee exports fell from about one-half during the early sixties to one-third in the early seventies and less than 30 percent in 1974 and 1975. During the early sixties, about two-thirds of Colombia's total coffee exports went to the United States; since the early seventies, this share dropped to about 40 percent. Brazil has been exporting more coffee to the EC and Japan, and Colombia has exported more to West Germany.

The United States has always taken most of Mexico's coffee exports, but its share of the Mexican market dropped from close to 90 percent in the early sixties to about 70 percent in 1974 and 1975.

France has been the leading market for the Ivory Coast. The U.S. share of Ivory Coast coffee exports fell from about one-third in 1972 and 1973 to 18 percent in each of the next 2 years.

International Coffee Agreement ^{6/}

On October 1, 1976, a new International Coffee Agreement went into effect and is scheduled to last for 6 years. Over 60 nations, including the major producers and im-

^{6/} Foreign Agricultural Service, U.S. Dept. Agr., "Coffee," Foreign Agriculture Circular, Jan. 1976 and Oct. 1976.

porters, are participating. The U.S. Senate ratified this agreement in July 1976. The new agreement differs from the 1962 and 1968 agreements by offering more flexibility and provisions for periods of scarcity. It also offers producers more incentive to maintain production during times of scarcity, together with the expectation that market prices and long-term earnings will remain fairly stable during periods of surplus.

The agreement would impose a system of export quotas whenever prices dropped below a minimum trigger range determined by the International Coffee Council. Export quotas are not expected to become effective for several years because of current high coffee prices and expectations that they will remain relatively high for several years.

Outlook for Supplies

Exportable production for 1976/77 is forecast at 45 million bags, 18 percent below 1975 and 10-12 million bags less than net world import demand. 7/ Thus, the low stocks in producing countries, along with those held by importers, will be drawn down during the current marketing year.

The outlook over the next few years for production and prices will be largely tied to the success of Brazil's recovery from the 1975 frost. Brazil's prospects for regaining capacity for production are considered good. 8/ Plantings have shifted to frost-free areas. Brazil's production is currently forecast at 17 million bags in 1977/78. 9/

Unless there is unfavorable weather, there should be about 20-22 million bags produced during 1974 and 1975. Barring any further major crop disasters, world coffee production should return to a normal trend by 1979/80 or sooner. 10/

FARM PRODUCT EXPORTS NEAR \$15 BILLION DURING OCTOBER-APRIL

Since the beginning of fiscal 1977, U.S. agricultural exports totaled \$14.9 billion, 8-1/2 percent above the October-April 1976 level. Volume at 66 million tons fell about 1 million tons below last year's level.

Principal contributors to the value gain included oilseeds and products, cotton, animal products--mainly hides, tallow, meat, and poultry--fruits and vegetables, and animal feeds.

In April, farm product exports exceeded \$2.2 billion, compared with \$1.9 billion last April. Increases in the volume of soybeans, vegetable oils, cotton, rice, and feeds offset declines in wheat and coarse grains, which contributed to a slight decline in tonnage.

Soybean exports in October-April totaled 11.2 million tons, up 8 percent from a year earlier, while value jumped 49 percent to over \$3 billion. Japan, West Germany, the USSR, France, the United Kingdom, and Mexico accounted for the gain. Sunflowerseed, peanuts, soybean oil, and cottonseed oil also showed strong export growth. Import demand for U.S. soybeans and other oilseed products in many countries remains high because of a combination of factors, mainly bad weather abroad and increased use of high-protein feeds in animal rations.

Raw cotton exports surged two-thirds ahead of year-earlier levels to 610,000 tons (2.8 million bales); value more than doubled to \$991 million because of price increases. Japan, Hong Kong, India, Egypt, Canada, Thailand, and Western Europe took most of the additional shipments.

Cattlehide exports rose more than 1 million units from the previous year to nearly 15 million, but value jumped 52 percent to \$312 million. U.S. commercial cattle slaughter in the last quarter of 1976 (October-December) and the first quarter of 1977 (January-March) fell from comparable year-earlier rates. With improved economic conditions in foreign countries and increased footwear raw material requirements, hide prices escalated. Also, several countries have progressively adopted export controls or taxes on their hide exports over the last few years. Japan and Korea are the main markets for U.S. cattle hides. Increases have taken place for shipments to Italy, Spain, France, Germany, Czechoslovakia, Romania, and Yugoslavia.

Tallow exports during October-April amounted to 692,000 tons, 164,000 more than a year earlier. Increased inedible tallow use in animal feed rations, especially in Western Europe and Japan, accounted for most of the gain. U.S. lard shipments were 80 percent above last year's rate, with larger exports to the United Kingdom, Holland, Belgium, Poland, and Mexico. Reduced availabilities of certain vegetable oils contributed to the growth in demand for U.S. animal fats abroad.

In contrast to sharply lower wheat exports this year, rice has gained. Over 1.1 million tons of rice moved abroad in the first 7 months, up one-fifth from a year ago. Iran, Indonesia, Nigeria, and the USSR purchased substantially more, whereas Western European countries, Bangladesh, Korea, Iraq, and Saudi Arabia took less.

Although demand for U.S. vegetable exports has recently diminished as new crops have become available in Western Europe, total vegetable exports for the 7 months were well ahead of year-earlier levels. Overall fresh vegetable volume was up 30 percent. Fresh potato exports amounted to 304,000 tons versus 209,000 tons in October-April 1975/76.

Table 26 --Export quantities of selected commodities,
October-April 1975/76 and 1976/77 and April 1976 and 1977

Commodity	October-April		April	
	1975/76	1976/77	1976	1977
-- 1,000 metric tons --				
Animal products:				
Fats, oils, and greases	589	804	106	132
Meats and meat products	211	248	34	37
Poultry meat, fresh or frozen :	73	110	11	15
Grains:				
Wheat and products	18,283	13,036	2,200	2,162
Feed grains and products	30,175	31,531	4,655	4,176
Rice	966	1,161	120	119
Oilseeds and products:				
Soybeans	10,359	11,170	1,375	1,552
Protein meal	2,955	2,889	599	389
Vegetable oils and waxes	526	703	73	98
Other:				
Fruits and preparations <u>1/</u>	863	872	152	142
Vegetables and preparations <u>2/</u> :	781	980	151	112
Tobacco	197	183	21	15
Cotton, excluding linters	365	610	66	119
Feeds and fodders <u>3/</u>	885	1,916	150	447
Total	67,228	66,213	9,713	9,515

1/ Includes fresh fruits, canned fruits, and dried fruits.

2/ Includes fresh vegetables, canned vegetables, and pulses.

3/ Includes prepared animal feeds, corn byproducts, and alfalfa meal and cubes.

2/ NOTE: MND = 1,000 HEAD OR PIECES

MLB = 1,000 POUNDS

MRBA = 1,000 RUNNING BALES

MGAL = 1,000 GALLONS

MNT = 1,000 METRIC TONS

MBU = 1,000 BUSHELS

MSTN = 1,000 SHORT TONS

ZERO QUANTITIES INDICATE NONE OR LESS THAN 500 UNITS.

U.S. FARM IMPORTS IN OCTOBER-APRIL 1976/77 UP ONE-THIRD FROM YEAR EARLIER

U.S. farm imports in April reached a record \$1.4 billion, bringing the total for October-April 1976/77 to \$7.8 billion--one-third higher than a year earlier. Green coffee accounted for the major increase. Tight supplies generally caused coffee to more than double in value over October-April 1975/76, as the quantity imported declined slightly. Other farm imports increasing in value during the first 7 months of fiscal 1977 were soluble coffee, dry rubber, bananas, tea, dairy products, live animals, vegetable oils, fruits and preparations, vegetables and preparations, tobacco, and wines.

Meat and sugar were the major farm imports to decline in value in October-April 1976/77 from a year earlier. However, the volume of sugar imported rose by one-fifth over a year earlier as price declines resulted in a 39-percent drop in value imports.

Noncompetitive imports rose only 4 percent in April over the previous month, and competitive farm imports increased about 13 percent. Major value increases occurred in green coffee, vegetables and preparations--chiefly fresh tomatoes--and sugar. Value declines in April from March 1977 were in dry rubber, roasted and soluble coffee, bananas, meat, and vegetable oils.

The reported cold front that hit the northern Parana coffee area in Brazil in May will have little effect on 1977/78 production. Since the 1975 frost, Parana farmers have shifted over one-half the coffee area to other crops. Coffee plantings have increased in frost-free areas. Thus, Parana state production declined from about 40 percent of the Brazilian coffee crop to an estimated 12 percent.

U.S. sugar imports in calendar 1977 are expected to be about the same as last year--4.5 million short tons. ^{1/} Factors influencing imports include domestic use, U.S. cane and beet production, and beet sugar processor and cane sugar refiner stock policies. U.S. beet sugar production for 1977/78 is expected to be below a year earlier, while the U.S. cane sugar crop is expected to nearly match the 1976/77 level. Imports could decline from last year if refiners reduce their currently high stocks and there is a significant increase in the production of high fructose corn sirup.

The President rejected the U.S. International Trade Commission's recommendation to place quotas on sugar imports. Instead, on May 4, 1977, a new program was announced of direct payments to processors and growers to supplement their incomes when sugar prices are low. ^{2/} When the U.S. raw price drops below \$13.50 per hundredweight, a payment of no more than 2 cents per pound will be made to processors to be shared with growers. It is expected that this program will have little impact on 1977 sugar plantings, which are almost completed, or on the level of sugar imports, deliveries, consumption, and prices. However, it could influence sugar crop plantings next year.

INTERNATIONAL PRICE HIGHLIGHTS

Skyrocketing coffee prices have driven up the U.S. import price index by 48 percent from the first quarter of 1976 to the first quarter of 1977. Cocoa bean, rubber, and tobacco prices have also contributed to the rise. In contrast, sugar prices have fallen markedly. The quarter-to-quarter leveling off of banana prices, and declines in tomato and wine prices contrast to the price trends that have developed throughout the year.

During the first quarter of 1977, specific commodity developments caused import price indexes to rise sharply and export price indexes to rise moderately. U.S. export prices at an index of 218 (1967=100) rose 6 percent from the first quarter of 1976 to the first quarter of 1977, with most of the price increase occurring since the fourth quarter of 1976. Soybeans, soybean meal, soybean oil, cotton, cattlehides, and non-fat dry milk experienced sharp price hikes from a year ago, whereas wheat, wheat flour, and rice export prices slid.

Except for a quarter-to-quarter slowdown in the decline of corn and grain sorghum prices, a slight downturn in soybean oil prices, and a sharp upturn in rice prices, quarter-to-quarter changes followed the direction of the price shifts from the first quarter of 1976 to the first quarter of 1977.

First Quarter 1977 Commodity Developments

The 18-percent decline in export unit value for wheat to \$3.49 a bushel reflected the current marketing year's plentiful worldwide wheat supplies. The wheat flour export unit value experienced a similar drop--which has largely occurred during the first quarter of 1977.

The milled rice export unit value at nearly 15 cents a pound is 14 percent lower than a year ago. The first quarter upturn in the U.S. export unit value reflected the slight downturn in 1976/77 world rice production compared to 1975/76 when supplies were more plentiful.

Although corn prices have moderated, the first quarter U.S. export unit value for corn has declined only 7 percent from a year ago, and has steadied since the previous quarter.

U.S. Gulf port prices for No. 2 yellow corn has been at the same level as U.S. Hard Winter wheat prices in recent months (see table 43), Selected Prices of International Significance), but export unit values have not reflected these price developments because of long-term contracts that had been in effect. The corn export unit value was \$2.85 a bushel.

Corn prices--and export unit values--have been buoyed by the expected tight end-of-year stock position.

Grain sorghum was priced 94 percent of corn during the first quarter of 1974, compared to 92 percent in the first quarter of 1976.

In the soybean complex, the export unit value of soybeans has risen faster than soybean oil and soybean meal since the first quarter of 1976 as the soybean situation has tightened.

Cotton experienced a 30-percent increase in price, having reached \$355 a bale during the first quarter of 1977 because of short crops and a pickup in domestic and foreign demand for cotton.

Among import commodities, the import unit value of crude coffee reached \$1.73 a pound, more than double a year earlier. The import unit value, however, was still behind the New York spot price which averaged \$2.59 a pound for the quarter. Cocoa beans, which have been in short supply in the 1976/77 marketing year, had a first-quarter import unit value of 93 cents a pound (the New York spot price for cocoa beans from Accra averaged \$1.91 a pound for the quarter). Rubber, which has faced an increased demand situation in manufacturing countries like the United States, has also experienced a 36-percent price runup to an import unit value of 36 cents a pound.

In the livestock and meat complex, beef and veal import unit values rose 5 percent from a year earlier to 60 cents a pound. Canned hams at \$1.49 a pound were priced 7 percent lower than a year ago, when pork prices were relatively high.

Selected Prices for April

Soybeans, with a spectacular 16-percent price hike at the Gulf ports, made the strongest price gains of the major agricultural commodities in April, as speculators strove to take advantage of the tight end-of-marketing year situation that is developing. Rotterdam prices for soybeans and soybean meal made similar increases.

Coffee also continued to post gains in its nearly uninterrupted year-long price climb--reaching \$3.27 a pound in New York.

Sugar made a turnabout to rally its highest level in 9 months, with the New York spot price for raw sugar reaching nearly 13 cents a pound in April.

Other major commodities experienced price setbacks in April. Cocoa beans, which had enjoyed a year-long rally, made a technical adjustment in April to fall 8 percent to \$1.89 a pound. The major grains, cotton, imported cow meat, and rubber also declined in price.

The Dow Jones commodity spot price index, reflecting these volatile prices, declined slightly to an index of 431.

Table 41 --Unit values of 25 leading U.S. agricultural trade commodities, quarter and year ending March 1976 1/

1/ Excludes imports of coconut oil.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and aircraft engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. USDA payments are excluded from the export value. Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country known to him at the time of shipment from the United States. Shipments of certain U.S. grain from Great Lakes ports to Canadian ports are designated as exports to "unidentified countries". Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
