McCall, Statistics Program Area, Foreign Demand and Competition Division, Economic Research Service, Washington, D.C. 20250.

DIGEST

Egypt Becoming A Major Market For U.S. Farm Products (see p. 4). Egypt's agricultural imports are rising rapidly, spurred by an acceleration in economic growth. A rise in per capita GNP from \$230 in 1972 to about \$296 in 1976 brought a strong demand for food. The U.S. benefited from the expanded Egyptian market. U.S. agricultural exports to that country in fiscal 1976 totaled \$454 million compared with \$43.6 million in 1972. For 1977, the value is likely to surpass \$600 million.

July-September 1976 Government Program Exports Reach \$524 Million (see p. 28). Government program exports of \$524 million in July-September 1976 accounted for almost two-thirds of the increase in total U.S. agricultural exports in the quarter. P.L. 480 Title I sales of wheat and rice accounted for the major increase in Government exports. P.L. Title II exports and AID shipments were also much higher than in most previous July-September quarters.

1976 Figure For Government-Financed Programs is \$1,123 Million (see p. 41). The final figure for U.S. Government-financed program exports in fiscal 1976 (July-June) is more than \$1.1 billion (\$907 million under P.L. 480), compared with more than \$1.2 billion (\$1.1 billion under P.L. 480) in fiscal 1975. There was an additional \$76 million in P.L. 480 exports not previously shown in the data reported in October.

Farm Product Exports Total \$8.4 billion in First 4 months (see p. 50). Since the beginning of the new fiscal year, U.S. agricultural exports maintained their last year's rate despite lower grain prices. A slight increase from October-January 1975/76 reflected gains for oilseeds and products, cotton, fruits and vegetables, animal feed, and most animal products. Export values for wheat, corn, and grain sorghums were lower, however.

U.S. Agricultural Imports Up One-Fourth During First 4 Months of Fiscal 1977 (see p. 91). Higher coffee prices contributed significantly to this January's record of more than \$1.1 billion in U.S. agricultural imports. U.S. agricultural imports reached \$4 billion during the first 4 months (October-January) of fiscal 1977, compared with \$3.2 billion during the year-earlier period. Most of this increase was in noncompetitive commodities, mainly green coffee.

International Price Highlights (see p. 125). In January, trade prices for agricultural commodities generally strengthened from a month ago. Cotton was the only major commodity that experienced a price downturn.

EGYPT BECOMING A MAJOR MARKET FOR U.S. FARM PRODUCTS

by

John B. Parker 1/

Egypt is likely to be one of the 12 major markets for U.S. farm products in 1977. Three years ago it was our 30th most important market. Together, U.S. wheat and wheat flour shipments to Egypt in 1977 might be nearly as large as those to the European Community. Egypt is the major foreign market for U.S. wheat flour and cottonseed oil. In 1976, it was the leading Mideast market for wheat, corn, tallow, vegetable oils, and tobacco.

U.S. agricultural exports to Egypt increased from \$43.6 million in 1972 to \$454 million in 1976. The value is likely to surpass \$600 million in 1977 because of larger shipments of wheat, wheat flour, cotton, and vegetable oils. Commercial sales accounted for over half of the 1976 agricultural exports. Wheat accounted for about 80 percent of the concessional sales. Some financing of wheat flour and tobacco sales also occurred. Large exports of cottonseed oil and corn were made completely through commercial sales.

Changes in trade policy or availability of financing could unleash surprising new sales of certain U.S. farm commodities to Egypt, including rice, pulses, frozen poultry, dairy products, and processed foods. Demand for all these commodities in Egypt exceeds available supplies. Changes in trade policy for cotton precipitated Egyptian purchases of 24,000 tons of U.S. cotton for \$65 million in December 1976 for 1977 delivery. World market prices for Egyptian extra-long staple cotton were recently about double the cost of shorter staple lengths in the United States.

Egypt's Total Agricultural Imports Rising Rapidly

The tenfold increase in value for U.S. agricultural exports to Egypt between 1972 and 1976 was less spectacular than gains recorded by some other exporters, including Brazil, Uruguay, and India. Deliveries of food by the European Community and Australia also increased markedly, but arrivals from Communist countries declined.

Egypt's total agricultural imports remained relatively stable near the \$300 million level during 1971-72, but skyrocketed to \$1.1 billion in 1973. Higher world prices and increased volume caused the value to climb to about \$1.5 billion in 1975. The quantity of grain and meat imported increased substantially in 1976, but lower world prices held the total import value to about \$1.6 billion. Egypt's 1977 agricultural imports are likely to reach \$1.8 billion, and additional financing or higher prices could push them to \$2 billion.

Demand for agricultural imports has accelerated in Egypt because prices for basic commodities have remained fixed at artificially low levels, while urban population and income have been rising faster than anticipated. Income per capita for the 9 million people of greater Cairo is probably double the average for all of Egypt. Rural income

1/ Agricultural Economist, Developing Countries Program Area, Foreign Demand and Competition Division.

per capita is about \$200 annually. Consumer demand for cereal products rose an estimated 7 percent in 1976, while grain production declined about 1 percent.

Acceleration of Economic Growth Spurs Imports

Egypt's agricultural imports have been stimulated in recent years by rising foreign investments and loans, particularly from the oil-rich countries, by increased trade, and by activities related to reopening the Suez Canal. A shortage of foreign exchange was a major barrier to such imports in the last decade.

Egypt now has a GNP of over \$12 billion (using the official exchange rate). Incomes are rising by over 7 percent annually, as is the purchasing power of the average Egyptian family, particularly in Cairo, Alexandria, and along the Suez Canal. New policies designed to attract foreign investments and technology which will utilize surplus labor and boost industrial or agricultural output should further spur income growth. These investments usually involve joint ventures with public companies, Government-operated enterprises (which account for over 70 percent of the industrial output), and factory employees.

A rise in per capita GNP from \$230 in 1972 to about \$296 in 1976 brought a strong rise in demand for food. The average Egyptian family currently spends about half its income on food. A goal of the 10-year plan (1971-81) is to double per capita income by 1981, and new programs to attract foreign investment are part of the plan to raise per capita income to \$600 by 1981.

Egypt's population is expected to grow almost 2 percent annually during the late 1970's, and reach 42 million by 1980. The urban population is expected to rise from 16 million in 1975 to about 20 million in 1980. New urban developments near Cairo, along the Mediterranean, and in the Suez Canal area are expected to cause a tremendous increase in demand for agricultural imports.

Total exports by Egypt in 1976 were less than \$1.8 billion. Income from Suez Canal tolls, the Sumed petroleum pipeline, tourism, and remittances from Egyptians working abroad provided about \$1 billion in foreign currency. Total imports in 1976 were estimated at about \$5.8 billion. The \$4-billion gap between foreign exchange earnings and imports was covered through loans and grants from developed countries and OPEC. Saudi Arabia, the United States, the European Community, Kuwait, United Arab Emirates, Iran, and Australia were major sources of credit.

In addition to larger financial assistance from these sources, Egypt will receive substantial economic assistance in 1977 from Canada, Japan, the United Kingdom, Sweden, and some Latin American countries. Agricultural imports are likely to become more diversified in terms of commodity mix during 1977.

The Ministry of Supply handles most imports of basic food items. Government operated bakeries and grocery stores receive most of their products from this agency. Private grocery stores provide over one-fourth of the imported food sold in cities, but their prices for many commodities are also fixed by the Ministry of Supply.

Imports of processed foods by private companies have increased as foreign exchange regulations were relaxed. Many Egyptians working in other countries pool their foreign exchange to help importers buy canned meats and special processed foods, particularly from Europe. Since most food imports enter duty-free and the money to pay for these imports comes from outside Egypt's banking system, small purchases of processed food by private importers escape much of Cairo's red tape.

Because Egypt imports about one-fourth of its food supply, with the proportion expected to rise in the future, foreign trade has become more important to Egypt's economy in

recent years. Over 90 percent of the bread sold in Cairo and Alexandria is made from imported grain. About one-fourth of Egypt's grain consumption during 1971-76 came from imports. Over half of the vegetable oil supply and all tobacco, tea, coffee, rubber, and jute are imported.

Imports of most commodities have shown a sharp upward trend so far in the seventies.

Agricultural Production Lags Behind Demand for Food

The inhabited area of Egypt is about the size of Maryland. Almost half the roughly 40 million people now live in cities, where imported food is becoming increasingly important.

Over 99 percent of Egypt's crop production and water supply depends on the Nile. Agricultural production has increased fast enough to prevent a decline in per capita output in the last decade. Yet, demand for food and clothing has increased by about twice the annual rate of farm output.

The physical area of cropland increased slightly in the last decade to about 6 million acres. Because of multiple-cropping, the area reported for crops harvested approximates 11.4 million acres annually. Agricultural output increased at an average annual rate of 2.5 percent during 1968-76. However, the newly cultivated areas were developed from desert land, while the more fertile land was lost to urbanization. Two or more crops are grown annually on over 85 percent of the farmland. But only one-seventh of an acre of cropland per person is now available, compared with 1 acre 60 years ago.

Most of Egypt's recent gains in crop production have come from high-yielding seed varieties. Wheat yields have been improved through the use of Mexican varieties and crosses between Mexican and native varieties. Average yields for wheat and rice in Egypt are now triple those for India. Total grain production decreased to 7.3 million tons in 1976, reflecting smaller crops of wheat and corn, but a rebound in rice. About 30,000 hectares were shifted from corn to rice.

Although further gains in yields will provide larger grain harvests in the future, demand is expected to rise much faster than local production. Wheat imports are expected to surpass 5 million tons annually in the late seventies. New commercial cattle feedlots and broiler operations will cause a marked rise in imports of corn, sorghum, and oilcake. Shortages of meat and dairy products have also become more acute with higher incomes and rapid urban growth bolstering the demand for food.

Egypt produces a year-round supply of fruits and vegetables. Most Egyptian farms are located near large cities, providing market opportunities for sales of fresh produce similar to those available to a New Jersey farmer. Increased multiple-cropping and attractive prices for fresh vegetables in the open market have caused vegetable production to rise. Vegetable production rose 7 percent in 1976 to 7.7 million tons. Fruit sively in new areas developed in the Western Desert. Output of oranges and tangerines reached 1 million tons in 1976.

Large new poultry operations based on imported corn and soybean or peanut meal are expected to develop. They will satisfy part of the booming demand for poultry meat, and create more jobs for rural laborers. Growth in the lagging farm sector will receive a boost and a new source of organic matter needed to build topsoil for barren desert soils.

While almost half the Egyptians still depend on agriculture for their living, they receive less than one-third of the national income. Slim prospects for owning enough cropland to make a good living have caused millions of rural residents to seek urban

opportunities. Cairo's metropolitan area now has a population of 9 million--almost triple the level of 15 years ago.

Commodities Imported

An analysis of recent trends and the outlook for 1977 for major commodities provides some idea of where opportunities exist for U.S. exporters.

Wheat and Flour

Egypt's imports of wheat and flour combined (in wheat equivalent) increased from 2.5 million tons in 1974 to 3.2 million tons in 1975, and apparently surpassed 3.7 million tons in 1976 (table 1). Total wheat imports rose from 2.68 million tons in 1975 to about 3.0 million tons in 1976, with arrivals from the United States increasing from 935,000 to about 1.3 million tons. Arrivals of Australian wheat also increased in 1976, reaching 965,000 tons. Imports of wheat from the European Community (EC) declined in 1976, but the EC still provided about half of the wheat flour imports.

Total imports of wheat flour increased from 521,000 tons in 1975 to over 600,000 tons in 1976. Imports of U.S. flour in 1976 were over 300,000 tons--4 times the 1975 arrivals.

Imports of U.S. flour in 1977 are already scheduled to exceed 350,000 tons. Imported flour is used extensively in the growing output of toast bread, buns, cakes and an array of Egyptian bakery products. Total flour imports in 1977 are likely to reach 650,000 tons.

Strong gains in wheat imports are expected in 1977. Consumer demand continues to increase by over 5 percent annually. The average loaf of balady bread weighs 135 grams and has a fixed price of one-half piaster. At the tourist rate of exchange (\$1.43 per Egyptian Pound), this would mean that the average shopper would pay 5.3 cents per kilo or 2.4 cents per pound for balady bread. A long roll of French bread (about 250 grams) costs 1 piaster or about 5.7 cents per kilo. Recent steps to increase the retail price for French bread, buns, and cakes were rescinded after widespread protest occurred. No increase was attempted for balady bread, the traditional basic food for most Egyptians, but prices for special types of bread and bakery products used by affluent urban residents and tourists had been increased by 50 percent.

Subsidies provided for the Ministry of Supply for the distribution of imported wheat and flour increased from \$34.7 million in 1972 to \$762.6 million in 1975. Lower world prices held the subsidy cost for these two commodities to about \$792 million in 1976, although the volume distributed increased about 14 percent.

Less than 250,000 tons of domestic wheat were distributed by the Ministry of Supply in 1976. Wheat production declined from a record 2.03 million tons in 1975 to about 1.97 million tons in 1976. Most farmers chose to sell their wheat to neighbors rather than accept the low procurement price of \$72 per ton (less than \$2 per bushel).

U.S. exports of wheat and flour combined to Egypt increased from 1.0 million tons in 1975 to 1.7 million tons in 1976. Further gains are likely in 1977, possibly pushing the quantity to more than 2.2 million tons. Australia has already arranged new contracts for 1.25 million tons of wheat to Egypt in 1977. Some contracts for 1976 were carried over, so total Australian wheat exports to Egypt might be even larger. Canada recently sold 500,000 tons of wheat to Egypt and some Argentine sales are likely.

Rice

Policy changes could cause Egypt to emerge as a major rice importer. Egypt has imported small quantities of U.S. rice in recent years, mostly for use in hotels. Egyptian consumers would be glad to get 200,000 tons of imported short and medium grain rice.

Egyptian rice output increased about 4 percent in 1976 to 2.53 million tons of paddy. Because of low Government prices, Egyptian farmers were reluctant to sell their rice at Government mills this season. The Government offered \$140 per ton of milled rice, but traders and individual customers offered farmers 15 to 20 percent higher prices. Shortages of rice in urban areas have become more acute. Plans to increase the ration price at cooperative shops from about 7.9 cents to 8.6 cents per kilo were rescinded in January 1977. Retail prices for rice purchases above the ration of 1 kilo per month for each person ranged from 20 to 25 cents per kilogram.

In the past, Government trading agencies made enough profits from rice exports to offset losses from subsidized sales through the ration system. Stagnation in Egyptian rice production and rising consumer demand caused available supplies for export to decline. Rice exports declined from a peak of 772,000 tons in 1970 to about 90,000 tons in 1976. Because of previous trade agreements, rice exports for early 1977 were scheduled at 41,000 tons. Most of these shipments would go to the Soviet Union, Syria, Libya and Jordan.

Coarse Grains

Corn imports increased from 517,000 tons in 1975 to about 670,000 tons in 1976. Imports from the United States rose from 511,000 tons to 658,000 tons during the same period. Small quantities of corn were imported from Romania, Bulgaria, and Brazil in the early seventies.

Demand for imported corn increased because local production declined and use of corn for commercial dairy, sheep, and poultry operations expanded. The starch industry also used more imported corn. The use of corn for animal feed has doubled since 1974.

Corn production declined from a peak of 2.78 million tons in 1975 to 2.71 million tons in 1976. Farmers in the northern Delta shifted from corn to rice and vegetables.

Sorghum production increased from 775,000 tons in 1975 to about 800,000 tons in 1976. Excellent winter rains allowed farmers along the Mediterranean to harvest 123,000 tons of barley in 1976.

Tallow

Because of rapid expansion in Egypt's soap output, tallow imports increased from 48,460 tons in 1972 to about 150,000 tons in 1976. U.S. tallow exports to Egypt reached a record 127,534 tons valued at \$51.2 million in 1976--double the 1972 level. A commodity loan for \$35.8 million provided by USAID helped Egypt finance larger purchases of U.S. tallow.

Tobacco

Imports of leaf tobacco increased from 25,888 tons in 1975 to about 31,000 tons in 1976 for a value of over \$70 million. Demand for cigarettes continued to exceed the supply. Prices for cigarettes remained fixed at about 40 cents per pack, while urban income increased over 10 percent annually during 1973-76. Cigarette consumption in 1976 was estimated at 32 billion pieces, including 1 billion of imported brands.

U.S. tobacco exports to Egypt increased from 4,732 tons in 1975 to 5,044 tons in 1976 valued at \$17.6 million. Egyptian imports of tobacco from Italy, Yugoslavia, Zambia, and Brazil during the last 2 years were markedly higher than during 1970.

Livestock Products

Egyptian meat consumption increased from 430,000 tons in 1974 to more than 520,000 tons in 1976. Local output of poultry increased from 117,000 tons in 1975 to 129,000 tons in 1976, and egg output jumped from 54,000 to 76,000 tons.

- Imports of beef arranged by the Ministry of Supply reached 68,500 tons in 1976--up from about 22,770 tons in 1975. This included 28,400 tons of beef from Uruguay, 16,000 tons from Argentina, and 10,000 tons from Australia. Smaller imports of beef were received from Brazil, New Zealand, France, and the United States. Private imports of beef from all sources were about one-tenth the volume provided by the Ministry of Supply.

About 30 tons of U.S. beef were used for tourists in major hotels. Arabs from oil-rich countries now operate hotels and restaurants in Cairo and use their own foreign exchange to import certain food items.

Egypt is one of the major consumers of beef in the Mideast. Mutton is usually the leading meat in other Mideast countries. Imports of mutton from China, New Zealand, and Somalia in 1976 were about 4,000 tons. About 20,000 live sheep were imported in late 1976 from Somalia and Sudan for religious holiday events.

The Ministry of Supply imported 3,000 tons of frozen poultry from Argentina in 1976. Private importers arranged purchases of about 1,400 tons of Dutch, Danish, German, Bulgarian, and American frozen poultry in 1976.

Imports of canned meat increased markedly in 1976 to about 8,800 tons. This included 5,000 tons of canned beef from the EC and considerable supplies from Uruguay and Brazil.

Milk output increased slightly in 1976 to about 1.75 million tons. Imports of preserved milk increased markedly to about 15,000 tons. In addition, over 7,000 tons of butter oil arrived from Europe. The Netherlands and France provided most of the butter oil and dry milk provided under subsidized exports through Egypt's agreement with the European Community for 1976 deliveries.

Imports of cheese increased markedly from 733 tons in 1973 to more than 4,00 tons in 1976. Shoppers can buy Colby cheese from Australia and New Zealand for \$1.14 per kilo. Cheese is now imported from many countries including Switzerland, Czechoslovakia, and Syria. About half the total cheese supply was imported in 1976. U.S. Cheddar cheese imports under P.L. 480 reached 1,000 tons in 1965. Small imports of canned cheese and cheese spreads from the United States occurred last year.

Fruits, Vegetables, and Nuts

- Egyptian farmers work diligently to provide urban produce stands with ample supplies of fresh fruits and vegetables throughout the year. Imports of canned fruits and vegetables increased significantly in 1976. Some of the significant imports of canned fruit included peaches from Greece and Australia; cherries from Greece, Bulgaria, and Cyprus; apple pie filling from France and the United States; pineapples from Malaysia; and fruit cocktail from Greece, Australia, and the United States.

U.S. exports of vegetable preparations to Egypt have exceeded \$200,000 annually during the last 3 years. Exports of canned fruit and fruit juice from the United States reached \$300,000 in 1976 - more than double the 1975 value.

Egypt plans to import over 120,000 tons of dry beans, lentils, and peas in 1976. Ethiopia supplied most of the bean imports in the past. Syria has been a major supplier of lentils. Egypt would like to buy a larger volume of dry beans in the United States, in addition to shipments of 4,000 tons already sold.

Egyptian private candy manufacturers plan to buy over 100 tons of U.S. almonds in 1977. Exports of U.S. almonds, walnuts, and mixed nuts to Egypt should reach \$300,000 in 1977.

Sugar and Tropical Products

Egypt imported over 250,000 tons of sugar in 1975 and again in 1976, mostly from India and Latin America. Yet, a shortage of sugar caused candy output to remain far below the 1973 level. Candy imports increased sharply.

Egypt was a significant exporter of sugar to neighboring countries through 1973. In late 1974, imports of sugar from India began as exports ceased. Egypt plans to import 200,000 tons of sugar in 1977. U.S. exports of packaged sugar to Egypt, mainly for tourist hotels, totaled \$40,000 in fiscal 1975.

Trends in U.S.-Egyptian Agricultural Trade

U.S. agricultural exports to Egypt moved steadily upward from \$9 million in 1969 to \$425 million in 1975 and to a record \$454 million in 1976. The rate of growth in our farm exports to Egypt slowed down in 1976 because of the following factors:

1. The average price for U.S. wheat to Egypt declined about 20 percent.
2. Competition from Brazilian soybean oil caused U.S. exports of cottonseed oil to Egypt to decline about 28 percent.
3. Budget constraints limited availability of P.L. 480 financing for Egypt.
4. Competitive suppliers offered an array of farm commodities to Egypt for lower prices and through attractive credit terms.

U.S. exports of cereals and preparations to Egypt increased from \$66.3 million in 1973 to \$290 million in 1976--an increase of 337 percent. Total agricultural exports to Egypt rose by 268 percent.

Prior to 1973, when Egypt resumed large purchases of U.S. wheat, our major agricultural exports to this market were cottonseed oil, tallow, and corn. U.S. exports of wheat to Egypt moved steadily upward from 425,701 tons in 1973 to a record 1.3 million tons in 1976. The value of U.S. wheat exports to Egypt increased from \$154.7 million in 1975 to a record \$169.1 million in 1976. Strong consumer demand and the availability of P.L. 480 financing contributed to the rise in U.S. wheat and wheat flour exports to Egypt.

U.S. agricultural imports from Egypt increased markedly in 1976 to \$4.7 million--up from \$1.7 million in 1975. Larger purchases of special types of cotton, molasses, and mint oil accounted for most of the increase.

Outlook

The growth rate in U.S. agricultural exports to Egypt is likely to accelerate in 1977 for the following reasons:

1. Recent purchases of U.S. cotton valued at \$65 million for cash were above and beyond earlier expectations.
2. U.S. exports of wheat and flour are likely to reach 2 million tons in 1977 for a gain of possibly \$40 million in value.
3. New foreign exchange regulations will allow private importers to greatly increase purchases of many U.S. food products, particularly those for tourists and higher income urban residents.
4. Egypt will receive about \$1 billion in financial assistance from USAID in 1977, including commodity loans to import agricultural raw materials for factories.
5. Recent policy changes indicate that consumers will be given a higher priority than earlier planned.

As it now stands, U.S. agricultural exports to Egypt in 1977 might reach \$600 million. The potential is much greater but financing is the unknown key. Plans to satisfy urban consumers and reduce food shortages could include much larger purchases of U.S. rice, pulses, frozen poultry, vegetable oils, peanuts, and animal feed. Even if imports of U.S. tobacco doubled in 1977, a shortage of cigarettes would still exist in Egypt.

If financing for these extra commodities could be arranged, the value for total U.S. agricultural exports to Egypt might reach \$800 million in 1977. Egypt expects to earn \$1.5 billion annually from petroleum exports by 1980. This bright prospect has improved Egypt's credit rating with OPEC. Changes in agricultural policy and land use should allow Egypt to greatly increase the future value of farm exports.

The value for Egypt's exports of cotton and horticultural products could increase by 70 percent through 1980. Then, obtaining foreign exchange for badly needed agricultural imports should be less of a problem. Programs to import more raw materials in order to boost industrial output have been discussed, but very little action has occurred so far. Egypt has the location, labor, water supplies, and infrastructure to become an important center for distribution of processed foods and manufactured items to many other Mideast countries. However, current foreign exchange and investment laws discourage foreign investment, unless the investor plans to spend his profits within Egypt.

Table 1 --Egypt: Agricultural imports by quantity and value for major items, CY 1972-76

Commodity	Quantity					Value				
	1972	1973	1974	1975	1976 estimate	1972	1973	1974	1975	1976 estimate
	<u>Metric tons</u>									
										<u>1,000 dollars</u>

JULY-SEPTEMBER 1976 GOVERNMENT PROGRAM EXPORTS REACH \$524 MILLION

by
Susan A. Libbin 1/

July-September 1976 was the transition period between the end of the old July-June fiscal year series and the new fiscal year beginning October 1, 1976.

Total U.S. agricultural exports were valued at \$5.4 billion in July-September 1976, 15 percent above the year-earlier period. Government program or Food for Peace exports, mainly P.L. 480 Title I sales of wheat and rice, accounted for almost two-thirds of the increase. P.L. 480 and AID shipments totaled \$524 million, compared with \$175 million in July-September 1975 and \$59 million in the previous period. Government program exports accounted for 10 percent of all U.S. agricultural exports in July-September 1976, compared with less than 5 percent in several previous year-earlier periods. Government program exports in the quarter were almost one-half the total value of Government program shipments for the entire fiscal year 1976. The high level of Government program exports was partly the result of programming some Title I sales over the 15-month period.

Commercial exports increased 5 percent in July-September 1976 over the year-earlier period. Of the major commercial exports, feed grains and products rose by 29 percent; smaller gains were recorded for cotton, fruits and preparations, and vegetables and preparations; exports of wheat declined by almost one-third; and exports of rice, oilseeds and products and tobacco remained about the same as during the year-earlier period.

P.L. 480 Title I sales (long-term dollar credits and convertible local currency exports) totaled \$316 million in July-September 1976, more than double the high level of July-September 1975. Wheat, accounting for 44 percent of Title I sales in the quarter, went mainly to the Republic of Korea, Egypt, and India. Title I wheat shipments of \$41 million to Korea exceeded the amount of Government program wheat exported to Korea during any of the individual fiscal years 1973-76. Rice exports accounted for about one-third of Title I sales and were shipped mainly to Indonesia, India, the Republic of Korea, and Bangladesh. The rice shipments to Indonesia, the first Government-program rice exports to that country since fiscal 1973, were primarily due to a poor harvest in that country. No Government program rice moved to India during fiscal 1973-75 and only a small amount was shipped in fiscal 1976. Other principal Title I exports in the July-September quarter were cotton, mainly to Korea; wheat flour, mostly to Sri Lanka (Ceylon); and soybean oil, chiefly to Pakistan.

^{1/} International Economist, Statistics Program Area, Foreign Demand and Competition Division. Special acknowledgments are due Louise Stanton and Linda Myers for compilation of the data in this article.

Title II exports, mostly through voluntary agencies, were valued at \$69.5 million in July-September 1976, compared with less than \$40 million in the 3 previous year-earlier periods. Principal commodities were wheat and wheat flour, vegetable oils, blended food products, bulgur, and nonfat dry milk.

It was the first July-September quarter in several years that commodities were recorded under AID programs. AID shipments were valued at \$138 million, compared with \$216 million for the entire fiscal year 1976 and \$123 million for fiscal 1975. The value of AID shipments represents disbursements rather than the export market value of shipments, as in P.L. 480 programs. Thus, AID commodities may actually be shipped at different times than indicated by the disbursement data in the tables. Principal AID commodities in the quarter were corn, soybeans, and wheat for Israel.

In July-September, commercial sales financed under Commodity Credit Corporation (CCC) sales programs totaled \$335 million, more than double the year-earlier value. This amount, however, was less than 1 percent of all commercial exports during the quarter. Most of the gain in CCC sales represented corn to Greece and Portugal; soybean meal to Poland; soybeans to Portugal and Romania; and wheat, chiefly to Peru and the Republic of Korea. CCC sales of cotton declined.

1/ Shipments under overseas procurement barter contracts are authorized by the CCC Charter Act and are essentially equivalent to dollar sales since they offset the dollar overflow for foreign purchases by U.S. agencies with a dollar inflow for agricultural commodities. The barter program was suspended July 1, 1973. Shipments shown are completion of prior transactions. 2/ Shipments under Export-Import Bank loans and guarantees and under the CCC credit sales program are credits for relatively short periods repayable in dollars plus interest (covering the costs of the lending agency).

1976 FIGURE FOR GOVERNMENT - FINANCED PROGRAMS IS \$1,123 MILLION

by
Susan A. Libbin

The final figure for fiscal 1976 (July-June)--\$1,123 million in U.S. Government-financed programs (P.L. 480 and AID)--is 9 percent below the \$1,224 million exported in fiscal 1975. ^{1/} Final P.L. 480 exports totaled \$907 million in fiscal 1976, compared with \$1,101 million in 1975. AID disbursements rose by 75 percent.

The principal declines in Government program exports in 1976 were in Title I exports of rice and Title II donations of nonfat dry milk, partly because of programming lags and the planning of shipments during the July-September fiscal transition. Government food aid shipments of wheat--accounting for 37 percent of all Government programs in fiscal 1976--were about the same as in fiscal 1975.

Final fiscal 1976 data for P.L. 480 exports show an additional \$76 million, or 367,000 metric tons than was shown in the preliminary figures reported in October. There were \$35 million more in Title I exports and \$41 million more in Title II donations. Among Title I commodities, there was an addition of \$20.6 million (4.8 million bushels) in wheat exports, \$7.1 million (753,000 C.W.T.) in wheat flour, and \$6.6 million (53 million pounds) in rice exports. The main addition to Title II shipments, \$34 million, was from voluntary relief agencies. Additional donations were chiefly peanut oil, valued at \$17.4 million or 33.8 million pounds; nonfat dry milk, at \$10.8 million or 18.9 million pounds; and wheat flour, at \$2.0 million or 118,000 C.W.T.

The main additions in P.L. 480 exports among countries were as follows: Egypt, \$19.8 million; India, \$14.0 million; Indonesia, \$5.9 million; Morocco, \$2.9 million; Tanzania, \$2.8 million; Colombia, \$2.6 million; Sri Lanka, \$2.3 million; and Chile, \$2.0 million.

^{1/} For a more detailed comparison, see Libbin, Susan, "Exports Under Government-Financed Programs Decline in Fiscal 1976," FATUS, October, 1976.

1/ Authorized by Title I, P.L. 480. 2/ Shipments under agreements signed through December 31, 1966, authorized by Title IV, P.L. 480. Shipments under agreements signed from January 1, 1967, authorized by Title I, P.L. 480, as amended by P.L. 89-808. 3/ Authorized by Title II, P.L. 480. Includes World Food Program. 4/ Authorized by Section 416 of the Agricultural Act of 1949 and Section 302, Title III, P.L. 480 through December 31, 1966. 5/ Authorized by Title II, P.L. 480, as amended by P.L. 89-808, effective January 1, 1967. 6/ Authorized by Section 303, Title III, P.L. 480, or other legislation. Includes some shipments in exchange for goods and services for U.S. agencies before 1963. 7/ Sales for foreign currency, economic aid, and expenditures under development loans authorized by P.L.'s 165, 665, and 87-195. 8/ Total agricultural exports outside specified Government programs (1) barter shipments for overseas procurement for U.S. agencies; (2) extension of credit and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices, and (4) export payments in cash or in kind. 9/ Data not revised to include furkins (1) barter shipments for overseas procurement for U.S. agencies; (2) extension of credit and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices, and (4) export payments in cash or in kind. 10/ Less than one-half percent.

1/ Credit sales for relatively short periods repayable in dollars plus interest (covering the financial costs of the lending agency).

2/ Includes disbursements by the Export-Import Bank and disbursements by the U.S. commercial banks under Export-Import Bank medium-term guarantees against political and/or financial risk.

3/ Less than \$50,000.

FARM PRODUCT EXPORTS TOTAL \$8.4 BILLION IN FIRST 4 MONTHS

During the first 4 months of the new fiscal year beginning in October, U.S. agricultural exports totaled almost \$8.4 billion, or about 2 percent more than the year earlier level. Expanded shipments of oilseeds and products, cotton, fruits and vegetables, animal feeds, and animal products more than compensated for value reductions in wheat, corn, and sorghum.

The value of oilseed and product exports was up 27 percent to nearly \$2.3 billion, reflecting both volume and price increases for soybeans, oilcake and meal, vegetable oils, and sunflowerseed. World demand for these products has been strong because of improved economic conditions. Also, poor crops in Western and Central Europe resulted in short animal feed supplies as well as reduced oilseed availability.

Cotton exports, at nearly 1.3 million bales, were 41 percent above the year-earlier level, and because of higher prices, value was up 93 percent to \$431 million. Larger shipments to Europe and some Asian countries, where textile production has been growing, accounted for most of the increase.

Exports of vegetables, fruits, and edible nuts were up 22 percent, reaching \$617 million. Fresh and processed potatoes, dried beans and peas, onions, fresh citrus, juices, almonds, and walnuts were principal contributors to the gain. West European and Far Eastern markets received most of the increased shipments.

Feed and fodder exports, mainly to Western Europe and Japan for supplemental animal feeding, rose 83 percent above year-earlier rates to \$205 million. Corn gluten, alfalfa meal, hay, and prepared feeds all advanced sharply in volume and value.

Animal product exports including hides, fats and oils, meat, poultry, and dairy items showed strong growth during October-January. Cattle hide shipments--mainly to Japan, Spain, and Italy--exceeded year-earlier levels by over 1 million units, while value surged 70 percent to \$173 million. Edible offals, such as livers and kidneys, advanced by 53 percent to 149 million pounds, chiefly going to Western European markets. Chilled or frozen poultry meat exports more than doubled, reaching 124 million pounds and \$50 million. Principal destinations included Iraq, the Caribbean area, Japan, Hong Kong, and Canada. Lard and tallow shipments to Western Europe, the Far East, and Nigeria showed noticeable gains.

Wheat exports during October-January fell more than one-third to 7.1 million tons. Value amounted to only one-half the year earlier rate because of lower prices. Reduced world demand and stiff competition from other wheat producers resulted in substantially lower exports during those months. Smaller amounts were exported to the USSR, Japan, India, Bangladesh, Brazil, Algeria, and the European Community. Exports to Korea, Egypt, Iran, and Nigeria were up, however.

Although the export tonnage for corn, at 15.8 million tons, was larger than the year-earlier volume, lower prices reduced value by 4 percent to \$1.7 billion. Volume increases to the European Community, Japan, Korea, Portugal, Egypt, and Greece more than compensated for reduced shipments to the USSR and Mexico.

1/ Beginning January 1970, export values include small amounts of commodities formerly classified as nonagricultural.

2/ Preliminary.

3/ Totals may not add due to rounding.

Table 38.--Export quantities and values of selected commodities,
October-January 1975/76 and 1976/77 and January 1976 and 1977

Commodity	October-January		January	
	1975/76	1976/77	1976	1977
-- 1,000 metric tons --				
Animal products:				
Fats, oils, and greases	326	434	96	89
Meats and meat products	106	144	28	30
Poultry meat, fresh or frozen ..	39	70	11	15
Grains:				
Wheat and products	11,922	7,477	2,571	1,472
Feed grains and products	17,674	18,805	4,240	3,957
Rice	586	693	154	108
Oilseeds and products:				
Soybeans	6,140	6,398	1,409	1,386
Protein meal	1,528	1,624	511	433
Vegetable oils and waxes	262	337	73	86
Other:				
Fruits and preparations 1/	474	471	117	110
Vegetables and preparations 2/ ..	373	665	101	150
Tobacco	130	118	43	35
Cotton, excluding linters	185	263	47	77
Feeds and fodders 3/	491	1,103	115	177
Total	40,236	38,602	9,516	8,125

1/ Includes fresh fruits, canned fruits, and dried fruits.

2/ Includes fresh vegetables, canned vegetables, and pulses.

3/ Includes prepared animal feeds, corn byproducts, and alfalfa meal and cubes.

1/ PRELIMINARY

2/ NEW CLASSIFICATION EFFECTIVE JAN. 1, 1976 EXCLUDES TURKS, CAICOS, AND CAYMAN ISLANDS.

NOTE: MHD = 1,000 HEAD OR PIECES

MLB = 1,000 POUNDS

MRBA = 1,000 RUNNING BALES

MGAL = 1,000 GALLONS

MNT = 1,000 METRIC TONS

MBU = 1,000 BUSHELS

NSTW = 1,000 SHORT TONS

ZERO Quantities indicate none or less than 500 units.

U.S. AGRICULTURAL IMPORTS UP ONE-FOURTH DURING FIRST 4 MONTHS OF FISCAL 1977

Higher coffee prices contributed significantly to the January surge in farm product imports. January's record of more than \$1.1 billion raised U.S. agricultural imports to \$4 billion during the first 4 months of fiscal 1977 (October-January). Imports for the same period a year earlier totaled \$3.2 billion.

- Imports of farm products not grown in the United States jumped 68 percent in value over October-January 1975/76 to nearly \$2 billion. This jump raised the largely tropical product share of total agricultural imports from 37 percent to 50 percent.

The major increase was in green coffee which more than doubled to \$1.2 billion, mainly due to price increases. Coffee unit values were \$1.52 per pound in January 1977 compared with 69 cents for last January.

There were also increases in import values for tea, bananas, spices, rubber, essential oils and crude drugs in October-January 1976/77 over a year earlier. Crude rubber import tonnage declined, but prices increased. Rubber prices averaged 35 cents per pound in January 1977 compared with 25 cents a year earlier. Tight supplies of most tropical agricultural products relative to demand have resulted in higher prices.

The value of competitive farm product imports during October-January declined slightly from its year-earlier rate to \$2,026 million. Sharp declines in meat and sugar more than offset principal increases in fruits, vegetables, dairy, cattle, cotton and tobacco.

Fresh vegetable imports during January were probably understated in the accompanying tables. Plant Protection and Quarantine Division inspectors at U.S. ports reported significantly larger entries of tomatoes, cucumbers and peppers than those in Census Bureau statistics. Freeze damage to winter vegetable crops in Florida resulted in heavy import demand.

Imports of fresh and frozen beef and veal valued at \$53.7 million in January 1977 were considerably higher than in December 1976, but were somewhat lower than most other months in 1976. The low December figure was mainly the result of the Meat Import Act quota restrictions. The United States recently signed voluntary restraint agreements on amounts of beef and veal that supplying countries should export to the United States in 1977. If the countries exceed the limits, the United States can impose mandatory trade regulations, such as quotas.

- Sugar imports valued at \$45 million in January were lower than any month in 1976 and were about one-half the value imported in December 1976. Domestic use was made of large carryover stocks from December sugar imports, reducing the need for January imports. The level of sugar imports in 1977 may be affected by such factors as (1) prospects of a small U.S. beet crop and bumper sugar crops in many principal producing countries; (2) increases in domestic consumption of high-fructose corn syrup; (3) possible adoption of an International Sugar Agreement, which will be considered at the negotiating conference in Geneva on April 18, 1977; and (4) possible U.S. legislative and executive actions following the mid-March report by the U.S. International Trade Commission on the impact of sugar imports on U.S. industry. 1/

1/ For more detail, see U.S. Dept. of Agr., Sugar and Sweetener Report, SSR-Vol. 2, No. 2, Feb. 1977.

1/ PRELIMINARY2/ NEW CLASSIFICATION EFFECTIVE JAN. 1, 1976 EXCLUDES TURKS, CAICOS, AND CAYMAN ISLANDS.

NOTE: MHD = 1,000 HEAD OR PIECES

HLB = 1,000 POUNDS

HGLB = 1,000 pounds, greasy basis.

HRBA = 1,000 RUNNING BALES (480 lbs. net)

HGAL = 1,000 GALLONS

HBU = 1,000 BUSHELS

METH = 1,000 LONG TONS (2,240 lbs.)

MSTN = 1,000 SHORT TONS

ZERO Quantities indicate none or less than 500 units.

INTERNATIONAL PRICE HIGHLIGHTS

by
H. Christine Collins

In January, trade prices for agricultural commodities generally strengthened from December. The Dow Jones commodity spot price index, reflecting the general upturn, rose 6 percent to 380.

U.S. export grain and soybean prices fluctuated sharply from December to January when ice jams hampered barge movements on the Mississippi, Illinois, and Ohio Rivers.

For wheat, the inclement weather overrode the dampening influence of record U.S. and world wheat crops on prices. At U.S. Gulf ports, the January export price for No. 2 Hard Winter wheat rose slightly to \$2.97 a bushel. Rotterdam prices for U.S. Dark Northern Spring wheat and Canadian Western Red Spring wheat rose 4 to 6 percent, respectively.

Corn prices at Gulf ports rose 7 percent to \$2.86 a bushel in January. The expected tightness of end-of-year supplies contributed to the strengthened corn prices. By September, the end of the crop year, a 10-week supply is expected for U.S. corn carryover. In the Rotterdam market, U.S. and Argentine corn prices rose 11 and 6 percent respectively, and U.S. sorghum was priced 10 percent lower than corn.

The Gulf ports price of soybeans rose 4 percent in January to \$7.36 a bushel. In Rotterdam, the U.S. price rose 7 percent, and soybean meal rose 9 percent to \$251 a ton. The outlook for U.S. carryover of a 1-month supply continued to keep soybean and soybean product prices in a nervous state. The news of the Soviets possibly switching orders for supplies from the 1977 U.S. crop rather than the 1976 harvest, and rumors of Brazil offering soybeans to world buyers after a lengthy pause, however, kept soybean prices from soaring.

Cotton was the only major commodity to experience a price downturn in January. The Osaka price for U.S. cotton declined for the second month to 72 cents a pound. The U.S. estimate of the 1976 crop was increased to 10.6 million bales, indicating that the U.S. end-of-year carryover will not be as low as had been anticipated earlier.

All the major import commodities had higher prices. The New York spot price for Santos No. 4 coffee continued to skyrocket in January, reaching \$2.22 a pound. Within the month, however, coffee prices weakened slightly as a result of profit taking after the prolonged price runup. Cocoa bean prices also rose in January because of tight supplies brought on by the second consecutive month of a reduced West African cocoa bean crop. Moreover, cocoa bean supplies are reportedly being held back in the exporting countries. The New York spot price for coffee in January was double the year-earlier prices and the New York spot price for cocoa beans, at \$1.76 a pound, was 232 percent of a year earlier.

Sugar prices on the international market rebounded as both the USSR and China bought raw sugar. Raw cane sugar, at almost 11 cents a pound in New York, was 7 percent higher than the December price. The f.o.b. Caribbean ports price to the world market and the U.S. market rose 11 and 8 percent, respectively--with U.S. sugar imports priced lower than sugar destined for the world market.

The New York spot price for rubber rebounded to more than 40 cents a pound. The imported cow meat price strengthened for the second consecutive month in January.

Wheat, rice, and sugar prices were lower this January than they were in January 1976, but soybean, soybean meal, cotton, imported cow meat, coffee, cocoa beans, and crude rubber prices were higher. For the third consecutive month, Thai white rice prices remained steady at \$259 a ton. Corn prices at Gulf ports remained the same as a year ago, but in the Rotterdam market, U.S. and Argentine corn have gone in opposite directions.

1/ Excludes imports of coconut oil.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and aircraft engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. USDA payments are excluded from the export value. Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country known to him at the time of shipment from the United States. Shipments of certain U.S. grain from Great Lakes ports to Canadian ports are designated as exports to "unidentified countries". Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
