DIGEST

Agricultural Export Value In October-July Totals \$20.7 Billion (see p. 4). Farm product exports slackened in July, but their 10-month value amounted to a record \$20.7 billion. Cotton, oilseeds and oilseed products, fruit and vegetables, livestock feeds, animal products, tobacco, and rice accounted for the increase.

July Agricultural Imports Lowest Since Last November (see p. 44). Agricultural imports totaled \$1 billion in July, 18 percent below the June level and the lowest value since last November. Green coffee accounted for a major part of the reduction. Despite the July decline, cumulative agricultural imports of \$11.4 billion for October-July 1976/77 were 31 percent above the year-earlier value.

Government Program Exports For October-June 1976/77 (see p. 79). Government program exports totaled \$833 million during October-June 1976/77, compared with \$948 million a year earlier. An increase in shipments under AID programs did not quite offset the 25-percent decline in exports under Public Law 480.

Export Prices Increase Moderately; Import Prices Soar (see p. 86). Increases for fats and oils more than offset lower grain prices in the April-June export price index. The second quarter of calendar year 1977 import price index rose 39 percent above its year-earlier level, largely because of gains in coffee and cocoa.

Introduction of U.S. Agricultural Export and Import Unit Value Indexes (see p. 91). More comprehensive coverage of U.S. agricultural trade prices are presented for the first time in this issue with additional commodity detail and a new fiscal year base.

AGRICULTURAL EXPORT VALUE IN OCTOBER-JULY TOTALS \$20.7 BILLION

Agricultural exports during July dropped to \$1.75 billion from \$1.88 billion in June and an average of \$2.2 billion over the March through May period. Farm product exports for July 1976 totaled nearly \$1.8 billion. Exports of most crops are usually at their lowest levels in July before harvest.

During the first 10 months of fiscal 1977, agricultural exports reached a record \$20.7 billion, however, compared with \$19.2 billion a year earlier. Increased values for cotton, oilseeds and oilseed products, fruits and vegetables, livestock feeds, animal products, tobacco, and rice offset declines for wheat and coarse grains.

The October-July agricultural trade surplus amounted to nearly \$9.4 billion, versus \$10.5 billion during the year-earlier period. Farm product imports rose faster than the increase in exports.

Export tonnage for major farm commodities in July was 8 percent below last July, but for the 10 months, volume slipped almost 3 percent to 91.2 million tons.

Cotton export volume fell to 282,000 bales (480 lbs. net) in July from 462,000 in June and 400,000 during May. The October-July total amounted to 3.9 million bales, compared with 2.6 million in 1975/76. Value nearly doubled to \$1.4 billion.

Soybean exports continued very low in July at 741,000 metric tons, but because of heavier shipments earlier in the year, volume since October totaled a little less than 14.3 million tons, compared with 13.8 million last year. Value jumped 48 percent to over \$4 billion. Soybean and cottonseed oil, peanuts, and sunflower seeds also contributed to the increase in oilseed product exports.

Sharp gains for fruit juices, almonds, dried beans, onions, and canned vegetables raised fruit, nut, and vegetable exports by 13 percent to \$1.45 billion in October-July from the previous year.

Increases in the value of livestock product exports included hide and furskin values, inedible tallow, lard, poultry products, and dry skim milk. Aggregate shipments amounted to nearly \$2.2 billion versus \$1.84 billion the year before.

Increases in livestock product exports included hide and furskin values, inedible tallow, lard, poultry products, and dry skim milk. Aggregate shipments amounted to nearly \$2.2 billion versus \$1.84 billion the year before.

Tobacco shipments in July were up significantly from July 1976, and the fiscal year total edged slightly higher than comparable months the preceding season. Flue-cured and burley leaf movements gained 3 percent and 9 percent, respectively, while higher prices pushed values up by 10 percent and 16 percent. West Germany, Italy, Egypt, Thailand, and Taiwan took larger quantities.

Rice tonnage for October-July moved 10 percent above 1975/76; Iran, Indonesia, and Nigeria were large recipients.

Wheat exports dipped 23 percent to 18.2 million tons as reduced shipments to Western Europe, Brazil, and India more than outweighed increases to Egypt, Iran, Nigeria, and Korea.

Lower prices depressed the overall wheat value by 39 percent to \$2.26 billion. In contrast, wheat flour exports rose 61 percent from year-earlier levels to more than 1.1 million tons. More flour went to Egypt, Sri Lanka, and Canada.

Coarse grain export tonnage in October-July held near last year's rate, but lower prices reduced value by 9 percent to \$4.65 billion. Corn volume slipped 4 percent to less than 36 million tons--mainly because of a sharp drop in shipments to the USSR--but larger grain sorghum and barley outflows offset the decline. Japan, Mexico, Israel, and Portugal took most of the increased sorghum. Korea, Iran, and the European Community members took a large proportion of the barley.

Table 1. --Agricultural, nonagricultural, and total trade balance
October-July 1975/76 and 1976/77 and July 1976 and 1977

JULY AGRICULTURAL IMPORTS LOWEST SINCE LAST NOVEMBER

U.S. agricultural imports totaled \$1 billion in July, 18 percent below the June level and the lowest value since last November. A major part of the reduction was in the value of green coffee imports which declined by one-third from June.

Since their April peak, when they represented 37 percent of total imports, green coffee imports have been dropping. They accounted for 24 percent of all farm imports in July. Importers have reduced their purchases, mainly because of a falloff in roastings and consumption, leaving inventories at satisfactory levels. Importers are also waiting for further reductions in world prices of green coffee. ^{1/} The International Coffee Organization (ICO) composite price of green coffee was \$2.42 per pound on June 16 compared with the mid-April high of \$3.40 per pound.

The majority of noncompetitive and competitive imports also declined in value from June. Imports of vegetables and vegetable oils were considerably lower. Although the import volume of sugar in July rose 15 percent from June--to the highest volume since last October--import value was about the same due to a large drop in unit prices.

Despite the July decline in many farm imports, cumulative agricultural imports for the first 10 months of fiscal 1977 of \$11.4 billion were 31 percent above the October-July 1975/76 period. Noncompetitive products, mainly green coffee, accounted for most of this value gain. Although the quantity of green coffee declined, sharp increases in unit import prices were more than offsetting, resulting in a 95-percent rise in green coffee import value from the previous year. Unit import prices of green coffee reached \$2.45 per pound in July, compared with \$1.09 a year ago.

Among other noncompetitive items, there were value and volume increases for bananas, soluble and roasted coffee, cocoa powder, chocolate preparations, spices, rubber, and tea. However, due to price increases, the value gains in these imports were much greater than volume gains.

During October-July 1976/77, the largest gain among noncompetitive imports was in tea which registered a 42-percent increase from the year-earlier period. The value of tea imports more than doubled.

In the same period, import volume of cocoa beans declined by one-fourth, but price increases resulted in a 30-percent value gain. Unit import prices of cocoa beans averaged \$1.06 per pound for October-July 1976/77 against \$0.61 per pound a year earlier.

Competitive agricultural imports rose only 4 percent in value during October-July 1976/77 from a year earlier, accounting for 48 percent of all farm imports compared with 60 percent in the year-earlier period. Principal value increases were in imports of fruits, vegetables, live cattle, dairy and poultry products, beer, wines, vegetable oils, and tobacco.

The volume of sugar imports rose 20 percent during October-July 1976/77 from a year earlier, but lower prices caused a 26-percent drop in value. Unit import prices of

^{1/} Foreign Agricultural Service, U.S. Department of Agriculture, "Coffee," Foreign Agricultural Circular, July 1977.

sugar averaged \$186 per ton over the 10-month period, compared with \$303 per ton a year earlier.

While the value of imports of vegetable oils rose, mainly due to higher prices, the quantity of vegetable oils imports fell 14 percent from the October-July 1975/76 period. The unit import price of coconut oil (the chief vegetable oil import) averaged \$0.22 per pound for October-July 1976/77, compared with \$0.15 per pound a year earlier.

Although imports of meat and meat products rose slightly in July from the previous month, both the volume and value of imports declined from a year earlier for October-July 1976/77. Import unit prices of fresh and frozen beef and veal (the major meat import) changed little.

 MGAL = 1,000 GALLONS

GOVERNMENT PROGRAM EXPORTS FOR OCTOBER-JUNE 1976/77

Government program exports totaled \$833 million during October-June 1976/77, compared with \$948 million a year earlier, as increases in agricultural shipments under AID programs did not quite offset a 25-percent decline in exports under P.L. 480. Exports under AID programs rose from 23 percent of all Government program exports during October-June 1975/76 to about 34 percent during the first 9 months of fiscal 1977.

P.L. 480 exports totaled \$548 million for October-June 1976/77, compared with \$732 million a year earlier. Exports declined under title I sales, mostly in wheat and rice, and title II donations, mainly through voluntary agencies. Because of a drop in prices, the value of wheat exported under title I fell much more than the quantity shipped. Exports of wheat flour and soybean oil increased under title I.

The decline in title II donations under voluntary relief agencies was mainly in non-fat dry milk, wheat flour, bulgur wheat, and blended food products. Title II exports of wheat and soybean oil increased.

Shipments under AID programs rose to \$285 million in October-June 1976/77, almost one-third higher than a year earlier. Principal AID commodities were corn, soybeans, wheat, and inedible tallow.

Commercial exports of agricultural commodities increased by about one-fourth during October-June 1976/77 from a year earlier. There were mainly increases in commercial exports of rice, grain sorghum, soybeans, vegetable oils, cotton, inedible tallow, and vegetables and vegetable preparations. Declines occurred mainly in commercial exports of wheat and corn.

Only about 4 percent of all commercial exports received credit under Commodity Credit Corporation (CCC) sales and Export-Import Bank loans and medium-term guarantees during October-June 1976/77. CCC sales totaled \$475 million, slightly less than a year earlier. CCC credit sales of wheat declined by one-fifth and cotton sales were less than one-half of the year-earlier period. CCC sales of corn rose from \$38 million to \$166 million in October-June 1976/77. Export-Import Bank credit, all accounted for by corn, totaled \$66 million, 47 percent higher than a year earlier.

1/ Less than \$50,000. 2/ The excess of Government program shipments over total exports may be attributed to lags in reporting or to differences in classification procedures. 3/ Total exports include those reported by Census plus foreign donations through voluntary relief agencies. Relief shipments of these commodities are not separately reported by Census. 4/ Less than 500 units.

^{3/} Less than \$50,000.

EXPORT PRICES INCREASE MODERATELY; IMPORT PRICES SOAR

by
H. Christine Collins

Second Quarter 1977 Prices

Strong prices in the fats and oils complex overrode the influence of weakened grain prices to set the second quarter 1977 index of U.S. agricultural export unit values 11 percent higher than a year ago and 4 percent higher than the first quarter of 1977.

Wheat, at a second quarter export unit value of \$3.19 a bushel, was priced about one quarter lower than a year ago, having declined because of bountiful harvests in 1976 and 1977. Wheat export unit values have been generally weakening since the peaks reached in the 1974/75 crop year. The export unit value of corn at \$2.74 a bushel was 10 percent lower during the second quarter 1977 than a year ago and was also priced lower than the same period the previous crop year. Corn prices have also been declining since the 1974/75 crop year because of the large 1976 corn crop and prospects for a near-record 1977 crop.

The short 1976 West European grain crops and small soybean meal supplies kept corn prices from sliding as much as wheat prices. Price quotations for U.S. No. 3 yellow corn during the second quarter were nearly the same as U.S. No. 2 Hard Winter wheat on a per-ton basis at Gulf ports in recent months (see Selected Prices of International Significance), but export unit values have not yet reflected this since the wheat export unit value was still 9 percent higher than the corn export unit value. The grain sorghum export unit value declined 8.5 percent from a year ago, but was priced only 5 percent less than corn. The export unit value of milled rice at 14.8 cents a pound has remained nearly steady from a year ago.

Higher export unit values for soybeans and products resulted from the short 1976 U.S. soybean crop. The export unit value of soybeans, at \$9.37 a bushel, was 78 percent higher than a year ago; bean values rose faster than the export unit values for either soybean oil or meal. At these values, the price of soybeans was well above the market value of oil and meal at U.S. ports. The export unit value of inedible tallow rose 14 percent.

The drawdown of cotton stocks brought on by domestic and export demand exceeding 1976 U.S. production caused cotton export unit values to increase 32 percent from a year ago to \$355 a running bale. Export unit values for tobacco, whole cattlehides, and nonfat dried milk were all higher than they were a year ago.

The more than doubling of coffee and cocoa bean prices has caused the index of U.S. agricultural import unit values to rise 39 percent from a year ago. During the second quarter, the import unit value of coffee was \$2.06 a pound. The rise in coffee prices for well over a year is as a result of the short 1976 Brazilian coffee bean crop. Cocoa beans also experienced supply shortages, causing their second quarter import unit value to soar to \$1.50 a pound.

The import unit value of sugar plummeted to 9.7 cents a pound after having hit record-level unit values in early 1975. A buildup of sugar stocks from bountiful 1976 sugarcane and sugar beet harvests caused the turnaround in sugar prices.

The livestock complex continued in the doldrums in the second quarter as fresh and frozen beef and veal declined 5 percent and canned hams and shoulders declined 10 percent from a year ago.

The rubber import unit value declined in the second quarter so that rubber imports were 2 percent higher than they were a year earlier.

Imported bananas, wines, tomatoes, dutiable cattle, and wool were all priced higher than they were a year ago, while imported tobacco was priced lower.

July Price Developments

In July, U.S. Hard Winter wheat, Thai white rice, and imported crude rubber were the only major agricultural trade commodities to weather the bearish price influences in international commodity markets brought on by new crop supplies. Prices declined for corn, grain sorghum, soybeans, soybean meal, cotton, imported cow meat, coffee, and sugar. A delay in the wheat harvest because of rain and early month trade rumors of possible Soviet grain purchases temporarily strengthened U.S. Hard Winter wheat prices at the Gulf ports and Rotterdam. Other wheat classes, in contrast, continued to decline.

The approaching corn harvest weakened the U.S. export price for corn to \$2.25 a bushel in July. For the first time this year, corn was priced lower than wheat on a per ton basis at a ratio of 0.91.

The Gulf ports soybean price declined 20 percent to \$6.80 a bushel in July with the prospect of new crop supplies.

The New York spot price for Brazilian coffee slid 22 percent in July to \$2.18 a pound as new crop coffee beans came to market.

INTRODUCTION OF U.S. AGRICULTURAL EXPORT AND IMPORT UNIT VALUE INDEXES

by
H. Christine Collins and Richard Hogeboom

- This issue introduces a comprehensive export unit value index and import unit value index which covers all the agricultural commodity codes that appear in the U.S. agricultural trade statistics published monthly.

- Monthly, quarterly, calendar year, and fiscal year (October-September) export unit value indexes are presented with a fixed 1967 base. Export unit value indexes for the 13 major agricultural commodities are also given. Commodities covered include wheat, wheat flour, corn, grain sorghum, soybeans, soybean oil, soybean meal, cotton, flue-cured tobacco, milled rice, inedible tallow, cattlehides, and nonfat dried milk. Export unit values of each of the 13 major commodities have also been calculated and are available upon request.

Comprehensive coverage is given in an overall U.S. agricultural import unit value index, and 12 major agricultural import commodities are covered in detail. These commodities include coffee, sugar, fresh and frozen beef and veal, crude rubber, wines, cocoa beans, unmanufactured tobacco, bananas, canned and cooked hams and shoulders, tomatoes, dutiable cattle, and apparel wool.

1/ Excludes imports of coconut oil. 2/ Excludes imports of fibers, excl. cotton and jute.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and aircraft engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. USDA payments are excluded from the export value. Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country known to him at the time of shipment from the United States. Shipments of certain U.S. grain from Great Lakes ports to Canadian ports are designated as exports to "unidentified countries." Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
