McCall, Statistics Program Area, Foreign Demand and Competition Division, Economics, Statistics, and Cooperatives Service, Washington, D.C.

DIGEST

Agricultural Exports Set New Record In May (see p. 5). Over \$2.7 billion worth of U.S. farm products moved abroad in May 1978, up sharply from recent monthly highs and well above a year ago. Grain and oilseed shipments accounted for most of the increase. Agriculture's trade surplus also exceeded last year's rate.

U.S. Agricultural Imports: Principal Commodities and Major Sources, 1972-77 (see p. 34) Farm product imports were valued at \$13.5 billion in calendar 1977, slightly more than double the 1972 value. There were value increases in imports of most noncompetitive products, mainly because of sharply rising prices in recent years. In 1977, green coffee, the leading farm import, was valued at \$3.9 billion, more than triple the 1972 value, while the quantity imported fell by 27 percent. Among competitive products, since 1974 there were mainly value increases in imports of fruits, vegetables, oilseeds, and tobacco and value declines in sugar and meat, partly because of falling prices. Ten countries provided about half of all agricultural imports in 1977. Latin America has been the leading regional supplier in 1977 providing about 43 percent of the total.

U.S. Farm Imports Up Slightly During October 1977 and May 1978 (see p.58). U.S. agricultural imports for the period were valued at \$9.4 billion, 3 percent higher than a year ago. Price inflation generally caused value gains in imports of cocoa beans, cattle, meat and meat products, fruits, vegetables, tobacco, and wines. Value declines occurred chiefly in imports of green coffee, vegetable oils, and sugar.

Selected Prices of International Significance (see p.83). World agricultural commodity market prices changed little from April to May. Slightly lower prices for grains, coffee, cocoa, and sugar more than offset gains for soybeans, cotton, beef, and rubber.

AGRICULTURAL EXPORTS SET NEW RECORD IN MAY

Agricultural exports during May 1978 set a new monthly record, reflecting large grain shipments to Latin America, Asia, North Africa, and the Centrally Planned countries. In May, over \$2.7 billion in U.S. farm products moved abroad, compared with \$2.5 billion per month during March and April, and about \$2.2 billion in May 1977.

Exports of agricultural commodities thus far this fiscal year totaling nearly \$17.9 billion are running almost 5 percent ahead of last year. Agriculture's trade surplus-- exports less imports--totaled \$8.5 billion, up from \$8 billion this time last year.

Shipments of grains and grain products accounted for a substantial share of the increase in U.S. agricultural exports. May exports exceeded \$1.15 billion, compared with just under \$940 million in April and \$912 million in March. October through May cumulative value for grains and preparations totaled \$6.5 billion. Over 3.2 million tons of wheat moved in May--the largest tonnage since October 1975--bringing October-May 1977/78's volume to more than 19 million tons and 38 percent above that period in 1976/77.

Increased wheat shipments went mainly to Latin America (especially Brazil, Mexico, and Venezuela), North Africa (Algeria, Morocco, and Tunisia), the U.S.S.R., Iraq, Pakistan, and the Philippines. Brazil was the largest single foreign destination for U.S. wheat in May. The more than 582,000 tons shipped in May raised the October-May 1977/78 aggregate to nearly 1.9 million tons, trailing behind only the U.S.S.R. and Japan.

Coarse grain exports set a record in May at more than 5.7 million tons, bringing the fiscal year volume to just under 35 million tons. Japan, the U.S.S.R., Poland, Spain, Korea, and Mexico took increased amounts, while European Community (EC) members took substantially less.

Although rice tonnage declined in October-May 1977/78 from similar months a year earlier, higher prices yielded a 15 percent value gain to \$483 million.

Oilseed and products exports in the first 8 months of 1977/78 totaled over \$5.4 billion, up 7 percent from those of a year earlier. Soybean shipments, at 14.9 million tons, were 18 percent above similar months last year; value was slightly less, however, because of lower prices. Most of the tonnage gain went to Japan and the EC.

Soybean meal volume rose 19 percent to 3.8 million tons, while value was up 9 percent to \$769 million. EC, Japan, Spain, Eastern European, and Middle Eastern countries were principal destinations. Other oilseed product exports showing gains were sunflower seeds, peanuts, and vegetable oils.

1/ PRELIMINARY

U.S. AGRICULTURAL IMPORTS: PRINCIPAL COMMODITIES AND MAJOR SOURCES, 1972-77

In calendar 1977, farm product imports were valued at \$13.5 billion, slightly more than double the 1972 value. Annual increases occurred in every year except 1975 when farm imports declined by 9 percent. Since 1972, agricultural exports nearly tripled to \$24 billion in 1977. Thus, the U.S. agricultural trade surplus rose from \$1.8 billion to \$10.6 billion. In recent years, however, farm imports have increased at a faster rate than farm exports, causing a decline in the agricultural trade surplus.

Although the United States imports agricultural products from over 150 countries, in 1977 over 90 percent of the total value was imported from the 50 sources shown in table 12 and almost half came from just 10 of these countries. As in 1972, Brazil and Mexico were the leading suppliers, each providing around 10 percent of all agricultural imports. Green coffee was the major import from Brazil, while Mexico provided chiefly coffee, fruits, and vegetables. In 1977, the other eight leading suppliers included Canada, Indonesia, Colombia, the Philippines, Australia, the Dominican Republic, Guatemala, and Malaysia. Of the top 10 suppliers, since 1972 the largest percentage gain in agricultural imports came from Indonesia, mainly in coffee and crude rubber.

Latin America has been the leading regional supplier; in 1977, it provided about 43 percent of the total value, a slightly higher percentage than during 1972-76. In 1974, Asia became the next leading regional supplier, while Europe dropped to third. In 1976, Africa pulled ahead of Australia and Oceania as the fourth largest regional supplier. Since 1972, the largest percentage increase in farm imports from a region has been Africa, chiefly in coffee and cocoa beans.

Imports of noncompetitive products rose from \$2.2 billion in 1972, or one-third of all farm imports, to \$6.8 billion or half of 1977's total. Most of this increase occurred in the last 2 years, mainly because of inflation. Green coffee has generally accounted for about half or more of the value of noncompetitive imports. During 1975-77, the quantity of imported green coffee fell by 27 percent, while the value more than doubled as unit import prices rose from \$.58 per pound to \$1.97 per pound. Brazil has been the leading coffee supplier, but since 1972 the quantity imported from Brazil has declined. In 1977, 16 percent of all green coffee came from Brazil, compared with 30 percent in 1972. Among other leading suppliers during 1972-77, there were mainly increases in imports from Mexico, various Central American countries, Indonesia, and Uganda. Declines occurred mostly from Ethiopia and in 1977, from Colombia, and the Ivory Coast.

The next major noncompetitive agricultural import is crude rubber which during 1972-77 registered the largest percentage value gain of complementary products, more than doubling over the period. Higher prices caused much of this increase, as the quantity imported rose by only about one-third. In 1977, Indonesia supplied half the crude rubber, Malaysia another 27 percent and most of the remainder came from Thailand and Liberia.

For the period 1972-77, the value of imports of cocoa beans also more than tripled because of higher prices as the quantity imported declined. Brazil, the Dominican Republic, Ghana, and Nigeria are the major suppliers.

Among other noncompetitive products, there were value and volume increases in imports of bananas and tea. Most of the rise in tea imports came in 1977 as rising coffee prices caused consumers to shift to tea. Indonesia, India, and Sri Lanka are chief suppliers.

During the last 6 years, imports of competitive products reached a peak of \$7 billion in 1974. Since 1974, value imports of fruits, vegetables, oilseeds, tobacco, and hides and skins increased, while falling prices partially caused value declines in imports of sugar and meat and meat products.

As sugar imports declined in value, by 1976 it had lost its place as the leading agricultural import. Throughout 1977, sugar imports accounted for 8 percent of all farm imports, compared with 22 percent in 1974. The value decline was due to a fall in unit import prices from \$430 per metric ton in 1974 to \$195 per ton in 1977. The quantity of imported sugar rose by 28 percent in 1977, because of sharply higher import duties and fees anticipated to be imposed in January 1978, low world sugar prices, and movement of sugar into the world market prior to imposition of export quotas under the International Sugar Agreement. ^{1/}

During 1977, six traditional sugar suppliers--the Philippines, the Dominican Republic, Brazil, Australia, Peru, and Guatemala--provided about 70 percent of all U.S. sugar imports. The Philippines, the leading supplier, provided 22 percent of the total. In the early 1970's, Mexico was a leading supplier, but increased internal consumption and insufficient production have sharply reduced its export supplies.

In 1977, 13 percent of all sugar imports entered duty-free, compared with 17 percent in 1976. ^{2/} In January 1976, under the Generalized System of Preferences (GSP) authority of the Trade Act of 1974, sugar became another commodity eligible for duty-free treatment for designated beneficiary countries. Excluded from duty-free status are economically developed countries, members of the Organization of Petroleum Exporting Countries, and countries who have supplied the United States with 50 percent or more of all its sugar imports in the previous year or a specified value fixed annually in relation to the U.S. Gross National Product. Throughout 1977, nearly 41 percent of sugar imports duty-free treatment came from Central America, mainly Guatemala and Costa Rica, compared with nearly 60 percent in 1976. The decline was mostly due to the removal of Guatemala from the duty-free list in March 1977 because its 1976 exports exceeded the fixed value of \$29.9 million. Most of the remaining duty-free sugar in 1977 came from Arica. While GSP countries have duty-free status, they are still subject to the current fixed fees for refined and raw sugar.

Since 1973, value and volume imports of meat and products have not increased. Because of 1977's falling prices, the value of meat imports declined by more than the volume from the previous year. Australia has been the principal supplier, providing almost two-fifths of the total in 1977. New Zealand has been the other major meat source, followed mainly by Canada, Denmark, Mexico, Poland, the Netherlands, and several Latin American countries.

In recent years, imports of fruits and vegetables have increased significantly, partly because of U.S. winter freezes. Mexico has been the major source.

During 4 years of the 1972-77 period, rising prices generally caused value increases in imports of oilseed products (mostly vegetable oils). The Philippines and Malaysia were the principal sources.

U.S. FARM IMPORTS UP SLIGHTLY DURING OCTOBER 1977 AND MAY 1978

During October 1977 to May 1978, U.S. agricultural imports were valued at \$9.4 billion, 3 percent higher than a year earlier. Price inflation generally caused value gains in imports of cocoa beans, cocoa powder, chocolate preparations, dairy products, cattle, meat and meat products, poultry and poultry products, fruits, vegetables, tobacco, and wines. Value declines occurred chiefly in imports of green coffee, soluble and roasted coffee, vegetable oils, and sugar.

Imports of noncompetitive products were valued at \$4.6 billion, 4 percent lower than the previous 8-month period, mainly due to a decline in coffee imports. The value of green coffee imports dropped by 16 percent, accounting for 27 percent of all farm imports during October 1977 to May 1978, compared with 33 percent a year earlier. Unit import prices of green coffee increased by only 2 percent, mainly during the first few months of the fiscal year. From January to May 1977, unit import values of green coffee fell by 13 percent from \$1.86 per pound to \$1.61 per pound.

During the 8-month period, Colombia was the leading green coffee supplier, although it provided a slightly lower volume than a year earlier and about the same value due to rising prices. Among other leading suppliers, there were value declines in imports from Brazil, Mexico, El Salvador, Uganda, and the Ivory Coast and increases from Central American countries. Coffee imports from Brazil, the leading supplier in many previous years--fell from 188,000 metric tons or one-fourth of all coffee imports to 73,000 metric tons or about one-tenth of the total during October 1977 to May 1978. Several Latin American countries have been reducing their coffee exports in order to bolster falling world coffee prices.

Imports of competitive products were valued at \$4.8 billion during October-May 1977/78, 12 percent higher than a year earlier. Among principal items, there was a 17-percent rise in value imports of meat and meat products (mainly beef and veal). In June 1978, to help stem rising domestic beef prices and increase supplies, the Administration announced a 200-million pound increase in quotas on U.S. imports of meat subject to the Meat Import Law (primarily fresh and frozen beef and veal). The quota previously set for 1978 was 1.3 billion pounds. Last year 1.2 billion pounds of meat subject to the Law entered the country. Australia and New Zealand will supply the bulk of the additional meat to be imported. During October 1977 to May 1978, unit import prices of beef and veal increased 5 percent from a year ago.

The value of sugar imports declined by 6 percent as higher import fees and duties imposed since January have discouraged trade. However, sugar imports in May 1978, valued at \$60 million, were over four times the record low of April and also higher than the values imported during January-May 1978.

As of June 1978, 50 nations had signed the ISA and over half of these had fully ratified it. The United States has not ratified it.

1/ PRELIMINARY

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

by
Elizabeth Hobbs

International commodity markets were quiet in May. Wheat, corn, grain sorghum, rice, coffee, sugar, and cocoa bean prices declined slightly, while soybeans, cotton, imported beef, and crude rubber prices strengthened a bit.

As the 1978 wheat harvest commenced, the Gulf ports price for wheat declined to \$3.48 a bushel. Nevertheless, the Gulf ports price for wheat is considerably stronger than it was in May 1977 since heavy rains delayed spring planting, acreage set-aside programs for U.S. wheat farmers to reduce planted area were introduced, and export demand for wheat continued strong.

The delay in planting, which resulted from late spring rains, has been especially critical for corn and soybeans. Corn planting in the Midwest has been affected to the point where farmers were faced with the problem of deciding whether to switch from corn to soybeans, which have a shorter growing period. The U.S. Government set-aside program will also discourage farmers from planting corn. Moreover, the U.S.S.R. bought more corn in May, bringing their total corn purchases up to 9.7 million tons. Nevertheless, the bearish factor in the United States, which is ending the 1977/78 marketing year with large ending stocks, is overriding the preceding bullish factors.

The Gulf ports price for corn declined slightly to \$2.97 a bushel. In Rotterdam, U.S. corn and grain sorghum and Argentine corn were also priced slightly lower in May. In Bangkok, the Thai rice price declined slightly to \$409 a ton.

The soybean market continued to be buoyed by the expectation of low end-of-marketing-year stocks. Moreover, only 25 percent of the U.S. crop had been planted by May, whereas by the same date last year, 60 percent of the crop had been planted. The Gulf ports soybean price has continued to strengthen through the marketing year, reaching \$7.78 a bushel in May.

While the May's Gulf export price was 22 percent lower than it was a year ago, 1978 soybean prices have been higher than had been anticipated because of strong export demand and the smaller-than-expected Brazilian soybean crop. In Rotterdam, soybean and soybean meal prices declined slightly between April and May.

In May, the Osaka price for cotton continued its climb, reaching 71 cents a pound. China's continued purchases of U.S. cotton have a buoying force on prices. China has been in the market for U.S. cotton every week since the first of April and has purchased well over 500,000 bales of cotton over the course of the marketing year. Rainy weather delayed seeding of cotton, particularly in the Mississippi Delta. Rain also fell in some of the drought areas of west Texas.

Among import commodities, beef prices rose \$1.02 a pound. While U.S. wholesale prices for beef weakened slightly in May, the outlook is for generally higher cattle and beef prices because of the reduction in U.S. cattle herds.

Coffee and cocoa bean prices continue to weaken, principally because of improved market supplies compared to a year ago. Due to the uncertain price situation, wholesale coffee buyers have been trying to buy as little coffee as possible. May's New York spot price for Brazilian coffee was \$1.67 a pound, 45 percent lower than the

price a year ago. Cocoa beans, at \$1.41 a pound, were 14 percent lower.

Sugar, priced at 8 cents a pound in May, at Caribbean ports, was about where it has been in recent months. The fate of the ISA may be a major determinant of prices in coming months. The United States has not yet ratified the ISA, which would use reserve stocks and export restraints as a means of keeping raw sugar prices between 11 cents and 21 cents a pound.

The New York spot price for rubber has also strengthened slightly to 46 cents a pound. The Dow Jones commodity spot price index, reflecting May's relatively small price changes, declined one point to an index of 360. Compared to a year ago, wheat, corn, grain sorghum, rice, imported beef, and crude rubber were priced higher than they were a year ago, but soybean, soybean oil, soybean meal, cotton, coffee, sugar, and cocoa beans were priced lower.
