DIGEST

Agricultural Exports Up 9 Percent In October-July (see p. 5). Increased export values for wheat, oilseeds and products, fruit, edible nuts, coarse grains, rice, tobacco, and certain animal products raised U.S. farm product exports 9 percent above their year earlier rate to \$22.6 billion. Export volume was up 15 percent to 105 million tons. The trade surplus widened further to \$10.9 billion. Larger shipments to Latin America, North Africa, Eastern Europe, the U.S.S.R., and Asia accounted for the expansion.

U.S. Farm Imports Rise 3 Percent During First 10 Months of Fiscal 1978 (see p. 57). For the period October 1977 to July 1978, U.S. agricultural imports were valued at \$11.7 billion--3 percent higher than a year ago. Rising prices generally caused value gains in imports of cocoa beans, cocoa powder, chocolate preparations, live animals, meat and products, fruits, vegetables, tobacco, wine, and malt beverages. Value declines occurred for coffee, sugar, vegetable oils, and edible nuts.

The Role Of Prices In The Growth Of U.S. Agricultural Exports (see p. 111). Price increases accounted for nearly two thirds of the gain in agricultural exports in 1974 when prices peaked. By 1977, price increases had declined from 1974 levels, and comprised 56 percent of the value gain from their 1967 base.

Selected Prices Of International Significance (see p. 115). Favorable crop prospects had a downward effect on agricultural commodity prices in July. Between June and July, average monthly prices declined for corn, soybeans, rice, cotton, beef, and sugar. Wheat prices remained steady, while cocoa and rubber prices increased.

AGRICULTURAL EXPORTS UP 9 PERCENT IN OCTOBER-JULY

Throughout the first 10 months of fiscal year 1978, farm product exports totaled \$22.6 billion, 9 percent above similar months a year earlier. Principal commodity increases included wheat, soybeans and products, fruit, edible nuts, and some animal products. While coarse grain volume exceeded the 1976/77 rate by 6 percent, lower average prices held value to slightly above its previous year's level of \$4.7 billion. Conversely, higher rice and tobacco prices resulted in value gains for those commodities despite lower quantities shipped.

The agricultural trade surplus for October-July 1977/78 amounted to \$10.9 billion, up 16 percent from like months during 1976/77. July's surplus declined somewhat from June's record \$1.5 billion level to \$946 million, as exports diminished, but nevertheless remained strong compared with last year's rate.

Export volume over the October-July period exceeded its year-earlier level by 16 percent, reaching a record 105 million tons. While shipments dropped off in July to 10 million tons compared with 12 million tons in June, they remained well above July 1977's rate.

During the first 10 months through July, U.S. wheat export volume increased 37 percent over the same period a year earlier. Shipments rose to nearly 25 million tons from 18.2 million tons. Brazilian purchases--resulting from drought damage--raised cumulative exports to that country to 2.5 million tons from only 419,000 tons the previous year, pushing Brazil ahead of Japan as second largest destination behind the U.S.S.R. Latin American countries as a group took more than twice as much U.S. wheat so far this year. Brazil, Venezuela, Chile, Colombia, and Central America accounted for most of the increases.

Other destinations showing substantial growth rates this year included the European Community, North Africa (Morocco, Algeria, and Tunisia) and Asia (Pakistan, the Philippines, Taiwan, Iraq, and the People's Republic of China).

Agricultural exports to the U.S.S.R. totaled \$1.6 billion, up 58 percent from the same period a year earlier. Most of the increase occurred in corn shipments, which rose to 9.3 million tons (\$984 million) from only 2.9 million tons (\$331 million) a year earlier. Wheat shipments rose to nearly 3 million tons, from about 2.8 million tons in October-July 1976/77. Value dropped to \$359 million from \$414 million because of lower prices. Soybean exports to the U.S.S.R. declined somewhat to 744,000 tons (\$200 million) from 825,000 tons (\$218.7 million) the previous year. Last season's mediocre U.S.S.R. grain crop triggered substantial corn purchases from the U.S. this year. Continued demand for high protein feed helped boost coarse grain exports and maintain soybean shipments at a relatively high level.

Direct U.S. farm product exports to Eastern European countries--Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Romania, and Yugoslavia--totaled \$790 million in October-July, 39 percent more than a year earlier.

Sharp increases occurred for shipments to Bulgaria (up 494 percent to \$22 million), Hungary (up 105 percent to \$49 million) East Germany (up 139 percent to \$81 million), Poland (up 52 percent to \$396 million), Yugoslavia (up 31 percent to \$64 million), and Romania (up 4 percent to \$115 million). These gains were partly offset by a decline in shipments to Czechoslovakia (down 27 percent to \$62 million).

After 2 years of low activity, agricultural exports to the People's Republic of China resumed in 1977/78. Through July, direct farm product exports amounted to \$257 million versus virtually none the year before. Cotton shipments equalled 414,000

bales, valued at \$119 million; wheat volume amounted to 440,000 tons, valued at \$57 million; soybean oil quantities reached 106,000 tons, worth \$54 million; soybeans totaled 47,000 tons, worth \$14.4 million; and tallow, at 19,000 tons, was worth \$8.8 million. In addition, 45,000 tons of U.S. wheat, worth about \$5.6 million, moved through Canadian ports during May and June. These shipments were reported in earlier Census Bureau data as export to unidentified countries (to Canada for transshipment).

North African countries took \$772 million in U.S. farm products thus far in 1977/78, up a fifth from 1976/77's \$641 million. Wheat exports gained 46 percent to 2.6 million tons (\$306 million); coarse grains went to 890,000 tons (\$92 million) from 720,000 tons (\$77 million), and soybeans went to 111,000 tons (\$25 million) from 49,000 tons (\$17 million). Exports to Morocco more than doubled, reaching \$121 million. Shipments to Algeria were up 73 percent to \$123 million; those to Tunisia gained 82 percent to \$32 million, while Libya's rose 95 percent to \$21 million. Egypt, the largest, declined slightly to \$475 million.

Farm product exports to Japan were up 5 percent in value to \$3.5 billion. Larger shipments of corn, tobacco, hides, fruits, vegetables, beef, poultry, and protein meal more than offset declines for wheat, cotton, animal feeds, and pork. Soybean volume was up 20 percent to 3.35 million tons, but lower average prices resulted in a slight value decrease to \$807 million.

European Community (EC) members took about 10 percent less U.S. farm products in October-July, mainly because of lowered coarse grain, vegetable, and livestock product requirements. Aggregate value dropped to \$5.6 billion from \$6.3 billion. Larger shipments of wheat, soybeans, protein meal, and fruit offset some of the reductions, however.

Agricultural exports to Mexico gained 15 percent in October-July over similar months a year earlier, reaching \$536 million. Grain exports accounted for a large part of the increase. Wheat shipments shot up to 252,000 tons (\$27 million) from 15,000 tons (\$1.1 million) a year ago; corn exports jumped to over 1 million tons (\$113 million) from 888,000 tons (\$98 million). Soybean exports rose to 463,000 tons (\$115 million) from 373,000 tons (\$102 million).

Recently, the agricultural export forecast was revised upward to \$26.6 billion, and the trade surplus is now expected to widen to a new record of almost \$13 billion in fiscal year 1977/78. ^{1/}

Detailed export statistics for January 1978 which were not available when the March issue of this publication was released appear in table 8. Revisions to February and March 1978 data are shown in tables 10 and 12.

U.S. FARM IMPORTS RISE 3 PERCENT DURING FIRST 10 MONTHS OF FISCAL 1978

For the period October 1977 to July 1978, U.S. agricultural imports were valued at \$11.7 billion--3 percent higher than a year ago. Rising prices generally caused value gains in imports of cocoa beans, cocoa powder, chocolate preparations, live animals, meat and products, fruits, vegetables, tobacco, wine, and malt beverages. Value declines occurred for coffee, sugar, vegetable oils, and edible nuts.

The drop in coffee imports generally caused the 5 percent decline in total imports of noncompetitive products which were valued at \$5.6 billion from October 1977-July 1978. Imports of green coffee--valued at \$3 billion--declined by 16 percent. Unit import prices of green coffee dropped from \$1.81 per pound to \$1.70 per pound.

A late winter frost in August hit some coffee-growing regions of Brazil, the world's largest coffee exporter. The impact of the frost will not be known for several months.

From October 1977 to July 1978, imports of competitive products--valued at about \$6.1 billion--were 13 percent higher than a year earlier. Except for vegetable oils, sugar, and edible nuts, all major competitive imports rose.

Declining U.S. domestic beef production and an increase in the voluntary import quotas for fresh and frozen beef and veal announced in June caused total value imports of beef and veal to rise by nearly 20 percent from a year ago. Fresh and frozen beef and veal was the leading individual competitive import, while sugar dominated the first 10 months of fiscal 1977. Imports of beef and veal for the year are forecast to be about 15 percent above their 1977 level. ^{1/}

Australia and New Zealand are the major suppliers of beef and veal. During the first 10 months of fiscal 1978, Australia supplied half of all beef imports, compared with 43 percent a year earlier. New Zealand shipped 19 percent--about the same share as a year earlier. Among smaller suppliers, the largest increase occurred in entries from Nicaragua where volume imports rose 43 percent during the first 10 months of fiscal 1978.

Record December imports of sugar, coupled with very large July imports, helped reduce the decline in the value of sugar imports to only 1 percent during October 1977 to July 1978. The quantity imported actually increased slightly as import unit prices declined. Higher import fees helped discourage trade during the first four months of 1978 but since May, imports of sugar have risen. Except for December 1977, July imports of sugar, at \$110 million, reached their highest monthly level in 2 years and more than double the previous month. Expectations of an increase in import fees, U.S. ratification of the International Sugar Agreement, and the need to increase supplies after the low level of imports in early 1978 were reasons for the large July imports.

Imports of vegetable oils declined 15 percent in value from their previous year's rate. Coconut oil, mainly from the Philippines, accounted for half of all vegetable oil imports. Higher prices are the major factor affecting imports. Palm oil--mostly from Malaysia--accounted for two-fifths of all vegetable oil imported. Larger domestic supplies of soybean and cottonseed oils, at prices below palm oil, have reduced the incentive to import. Also, Malaysia's export supplies have been reduced as other countries, such as India and China, increased their imports from Malaysia due to shortfalls in their own domestic production of vegetable oils.

THE ROLE OF PRICES IN THE GROWTH OF U.S. AGRICULTURAL EXPORTS

by
H. Christine Collins

The striking growth in U.S. agricultural exports has been a boon to the U.S. economy, as shipments of agricultural commodities have partially offset our trade deficit. U.S. agricultural exports in calendar year 1977 reached \$23.7 billion, 2.5 times the level of 1972 and more than triple the level of 1967. Between 1972 and 1974, the value of U.S. agricultural exports made a particularly large jump.

As can be seen from table 25, U.S. export prices rose sharply between 1972 and 1974, then declined only slightly. Since 1972 net price gains have been the major influence in boosting the value of agricultural exports. Gains in the value index since 1972-74 are mainly attributable to increases in the quantity of exports rather than sharp price rises. In 1974, when U.S. agricultural export prices were collectively at their peak, price hikes comprised nearly two thirds of the gains made in the value of agricultural exports from the base year of 1967. By 1977, price increases comprised 56 percent of the increased value of U.S. agricultural exports during the decade. In 1977, after U.S. agricultural export prices had declined 10 percent from the 1974 peak, they were still 85 percent higher than they had been in 1972, when large grain sales to the U.S.S.R. and other events contributed to generally higher prices in the U.S. and the world economy. The oil embargo, rising real incomes in importing countries through 1973, and the second devaluation of the dollar in February of that year each had their impact on U.S. agricultural export prices.

Specific commodity events also contributed to higher prices. The world grain crop setbacks of 1974 and the declines in the 1972 and 1976 U.S. soybean crops drove these commodity prices to new highs during the corresponding marketing years. Various commodities attained their export price peaks in 1974 or 1975, with wheat in 1974; corn in 1975; grain sorghum in 1974; soybeans in 1974 and 1977; beef, pork, and poultry in 1975; and unmanufactured tobacco in 1974. Cotton export unit values have been on the upswing since 1975 and attained their peak in 1977 (table 26).

Export unit value increases have been ahead of U.S. inflation. The U.S. Consumer Price Index (CPI), which is generally used as a measure of general inflation in the U.S. economy, has risen steadily, equaling an index of 182 (1967 = 100) in 1977. The composite of U.S. agricultural export unit values, at an index of 210 (1967 = 100) in 1977, was well ahead of the CPI.

During the years 1973-1976, every major agricultural export commodity except poultry had export unit values staying ahead of the overall CPI (table 28).

In 1977, because of the sharp downturn in the export unit value, wheat fell behind. The wheat export unit value nevertheless was still well above its 1973 level and was far from slipping back to the pre-1972 level. The composite of U.S. agricultural export unit values was also ahead of the Wholesale Price Index (WPI), which averaged 198 (1967 = 100) in 1977. Through 1973-76 all major export commodities, except poultry, kept up with the WPI. By 1977, however, as wheat, corn, and grain sorghum export unit values declined, they fell behind the general wholesale price index.

A similar situation occurred with U.S. imports in 1977 when the U.S. import unit value of coffee hit its peak triggered by Brazil's debilitating freeze in 1975 (tables 29 and 30). ^{1/}

Sugar import unit values hit their peak in 1975 because of shortfalls in production in major producing countries, and have since fallen sharply to the level of 1973. Imported beef hit its peak unit value in 1973. Abundant worldwide beef supplies dampened beef and veal prices since, although 1978 is well on its way to becoming a year of rising beef and veal prices.

The fact that commodity prices hit peaks at about the same time and have not yet slipped below their levels of 1973 suggests that underlying general economic factors such as realignment of the dollar vis-a-vis other major currencies, and rising incomes in importing countries have played their role in buoying international farm commodity prices measured in dollar terms. Developments specific to the individual commodities themselves, however, play a particularly significant role in determining whether farm commodity prices rise or fall.

^{1/} U.S. imports are valued at the point of export to the United States. Thus, import unit values exclude ocean freight and do not reflect c.i.f. prices.

Table 25--U.S. agricultural exports: Indexes of quantity, unit value, and total value, 1967 - 1977

Year	Quantity Index	Unit Value Index	Total Value Index
(1967 = 100)			
1967	100	100	100
1968	100	97	98
1969	94	99	93
1970	111	102	114
1971	111	108	121
1972	130	113	147
1973	166	168	277
1974	155	223	345
1975	156	220	343
1976	174	207	360
1977	177	210	371

Note: The Laspeyres Price Index $\frac{P_{1Q0}}{P_{0Q0}}$ has been used as the Unit Value Index. The

Laspeyres Quantity Index $\frac{P_{0Q1}}{P_{0Q0}}$ has been used as the Quantity Index. Multiplication of the Laspeyres Price Index by the Laspeyres Quantity Index (as given above) approximates a total Value Index.

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

In July, international agricultural commodity prices generally declined as prospects for abundant crops began to materialize. Prices declined for corn, sorghum, soybeans, soybean meal, rice, cotton, sugar, beef, and coffee. Prices for cocoa beans and rubber strengthened, while wheat prices remained steady.

The Gulf ports price for wheat has remained steady at \$3.52 a bushel. The U.S. export price is fairly strong because of good early marketing year export prospects. Exportable supplies from other major competing countries will not enter the market for several months. Moreover, the 1978 U.S. wheat crop is 10 percent below the large 1977 crop. Over the course of the forthcoming crop year, Canada and the U.S.S.R. are looking forward to harvesting large wheat crops, and U.S. wheat stocks will remain at a substantial level, bringing a bearish note to an otherwise buoyed market. The \$11 a ton price spread between the Gulf ports and Rotterdam for U.S. Hard winter wheat was about \$2 lower than it was in July.

The U.S. export price for corn continued downward. Prospects for a bumper U.S. corn crop, combined with large carryover stocks from the 1977 crop, caused the Gulf ports price to decline to \$2.55 a bushel in July. The July price spread for U.S. corn between the U.S. Gulf ports and Rotterdam was \$8 a metric ton, down slightly from recent months. In Rotterdam, prices for Argentine corn and U.S. sorghum fell, but not to the same extent as U.S. corn prices. The soybean crop year is also coming to a close with declining prices. The Gulf ports price for soybeans has declined slightly to \$7.08 a bushel, since the United States is expecting to harvest a record soybean crop. In Rotterdam, the import price for U.S. soybeans declined 4 percent, closing the Gulf ports-Rotterdam price spread to \$6 a ton. The Rotterdam price for U.S. soybean meal remained nearly steady at \$207 a ton.

The large carryover in the current marketing year's U.S. cotton stocks caused the Osaka price for U.S. cotton to decline to 68 cents a pound. The Thai rice price declined 5 percent to \$384 a metric ton. The prospective record 1978 U.S. rice crop is weighing heavily on international rice prices.

The high beef prices of April and May have brought out large numbers of cattle for slaughter which in turn has weakened cattle prices. This domestic price decline is also reflected in the price of imported beef which reached 89 cents a pound in July.

The London Daily Price for raw cane sugar at Caribbean ports continued to decline, because of large world market supplies. In July, the London Daily Price reached 6.42 cents a pound at Caribbean ports.

Improved coffee supplies brought New York spot price for coffee down 12 percent to \$1.50 a pound. The New York cocoa bean futures price, in contrast, strengthened to \$1.43 a pound, due to political uncertainties in Ghana, the world's largest cocoa bean producer.

The New York spot price for crude rubber also strengthened slightly to 50 cents a pound. Wheat, corn, soybeans, cotton, rice, imported beef, and crude rubber were priced higher than they were a year earlier, while coffee, sugar, soybean meal, and cocoa beans were lower.
