Abstract: The report for FY 1994 exports dip slightly. The U.S. agricultural exports totaled 26.4 billion for October 1993-April 1994, 1 percent lower than during the same period in fiscal year (FY) 1993. Exports dipped below FY 1993 because of lower grain, oilseed, and tobacco shipments. Bulk exports totaled \$11.4 billion, 9 percent less than the previous year. High-value product (HVP) exports gained 5 percent to \$15 billion on increased sales of meat, chicken, horticultural products, and sugar and tropical products. Imports rise, pushed by grain and feed from Canada. U.S. agricultural imports from October 1993 through April 1994 totaled \$15.4 billion, 5 percent over the same period in FY 1993. Export share of agricultural production remains steady.

Digest

U.S. Exports Unchanged From Last Year (see page 2)--U.S. agricultural exports totaled \$33.3 billion during the first 9 months of fiscal 1994, unchanged from last year. Overall export growth remained flat in 1994 because bulk exports fell 7 percent to \$14 billion as a result of weak grain and soybean sales. Exports of high-value products (HVP) increased 6 percent to \$19.3 billion. Rising meat, poultry meat, and horticultural products accounted for large gains in HVP exports, and offset the decline in bulk shipments.

Fiscal 1994 Agricultural Imports Slightly Ahead of Fiscal 1993 (see page 6)--U.S. agricultural imports for the first three quarters of fiscal 1994 (October 1993 through June 1994) totaled \$19.8 billion, 5 percent ahead of the same period last year. Competitive imports were \$15.5 billion, 6 percent over the previous year, with increased purchases of grain, oilseeds, and horticultural products, especially orange juice. Livestock imports decreased as well as most meats, excluding pork. Gains in coffee and banana value advanced noncompetitive imports 3 percent to \$4.3 billion.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.

U.S. Exports Unchanged From Last Year

U.S. agricultural exports totaled \$33.3 billion during the first 9 months of fiscal 1994, unchanged from last year. Overall export growth remained flat in 1994 because bulk exports fell 7 percent to \$14 billion as a result of weak grain and soybean sales. Exports of high-value products (HVP) increased 6 percent to \$19.3 billion. Rising meat, poultry meat, and horticultural products accounted for large gains in HVP exports, and offset the decline in bulk shipments.

Bulk Exports Fall

Total bulk export volume was 21 percent lower than last year because of a sharp drop in wheat, coarse grain, and soybean shipments. Shipments totaled 67 million tons, 19 million tons below 1993, and the lowest since fiscal 1986. The value of wheat, coarse grain, and soybean exports fell 14 percent to \$10.1 billion. The value decline was not nearly as steep since substantially higher coarse grain and soybean prices boosted value.

Wheat shipments during October-June totaled 23.3 million tons, compared with 27.7 million last year, as U.S. wheat exports fell because of weak import demand in many foreign markets. Shipments to the former Soviet Union (FSU) were only 1.5 million tons, over 2 million tons below a year earlier. The FSU's weak economic situation and Kazakhstan's ability to supply wheat to other FSU countries lowered demand for imported U.S. wheat. Increased production led to significant declines in exports to India, down nearly 880,000 tons to 8,300 tons; Morocco, down 770,000 tons to 812,000 tons; and the Republic of South Africa, down nearly 400,000 tons to 180,000 tons. The average export unit value for wheat was \$131 per ton, about the same as last year, and wheat export value declined to \$3.1 billion.

Coarse grain exports were over 10 million tons lower for October-June, as higher U.S. prices and increased competition from other exporters weakened U.S. shipments in 1994. Once again, the FSU was a major factor in reduced U.S. exports, as exports totaled 2.6 million tons through June, over 2 million tons less than in 1993. Exports to South Africa were 2 million tons less than last year because of increased corn production there. A drought in 1992 substantially raised U.S. corn exports in 1993. Korea imported over 800,000 fewer tons of corn, purchasing most of its corn supplies from China, or purchasing feed quality wheat because of the high corn prices in 1994. There were

also sharp drops to Japan, Poland, and Canada. Coarse grain exports to Mexico were 17 percent lower at 3.2 million tons, although corn exports of 900,000 tons were over 560,000 tons higher. Exports of grain sorghum to Mexico were over 1 million tons less, as corn replaced sorghum exports.

Soybean exports were 13.6 million tons, 4.1 million tons below a year earlier. High prices, weak demand for soybeans in the European Union (EU), and competition from Latin American producers, reduced U.S. soybean exports in 1994. U.S. exports to the EU totaled 5.8 million tons, 2.4 million tons less than a year earlier. EU agricultural reform reduced grain prices, and resulted in more grain use in feed rations. Increased oilseed production in the EU further reduced the demand for U.S. soybeans in 1994. Exports to Japan were down over 350,000 tons to 3 million tons, and 375,000 tons lower to Taiwan at 1.5 million tons. Some U.S. sales were displaced by increased exports from South American producers. U.S. shipments to Mexico were 7 percent higher at 1.3 million tons. The export unit value for soybeans was \$258 per ton, 16 percent higher than last year, which held the value decline to 10 percent, compared with a 23-percent decrease in volume.

HVP Continues To Rise

High-value product exports were \$1 billion higher than a year earlier, and much of the gain was due to expanding beef, pork, poultry meat, and horticultural exports. Many of the gains have occurred in Japan, Hong Kong, Taiwan, and South Korea, countries with rising incomes and expanding consumer demand for a variety of foods. U.S. exports also received an added boost in Mexico because of economic growth and the implementation of the North American Free Trade Agreement in January 1994. The FSU became a significant buyer of poultry meat in 1994, as the FSU private sector imported to fill consumer demand.

The volume of U.S. beef exports rose 11 percent to 356,000 tons because of gains to Japan. Exports to Japan rose 27,000 tons to 195,000 tons. Japan has imported more beef because lower beef prices and the strong yen relative to the dollar further reduced the price of imported U.S. beef. Beef exports to South Korea were 37,000 tons, up 24 percent. Seven percent lower beef export prices held value gains to 3 percent at \$1.6 billion. Lower pork prices also boosted exports 22 percent to 126,000 tons valued at \$382 million. Most of the gain was to Mexico where exports rose 39 percent to 31,000 tons.

The largest increase was in poultry meat exports, which were a record 1 million tons and valued at \$1 billion for the first 9 months of fiscal 1994. The FSU was the largest market during October-June with 253,000 tons of poultry meat imports, valued at \$220 million. Hong Kong, which was the largest market at this time last year, was up 42 percent to 214,000 tons. There was also a 23-percent gain to Mexico, with exports reaching 134,000 tons.

Exports of fruit (including juice), nuts, and vegetables totaled \$5.8 billion during October-June, compared with \$5.3 billion last year. Fruit exports rose 10 percent on a 28-percent gain to \$418 million to Japan, and a 71-percent gain to \$128 million to Mexico. Grapefruit and orange exports to Japan were each about \$24 million higher than last year, and cherries, raisins, and prunes accounted for

much of the rest of the gain. Apple exports to Mexico rose \$32 million to \$77 million, and pears rose \$8 million to \$22 million because of increasing consumer demand and a reduction in tariffs on imported apples and pears.

Nut exports rose 16 percent to \$1 billion because of sharply higher almond prices. Export volume actually fell 21 percent. Vegetable exports rose 7 percent to over \$2.6 billion. Lower average unit value for fresh vegetables reduced value 7 percent to \$726 million, although sales rose 2 percent to 1.3 million tons. Fresh vegetable exports to Japan reached \$108 million, up 67 percent from last year. Total processed vegetables were up 17 percent to \$1.6 billion, with strong gains to Japan, Hong Kong, Taiwan, and Southeast Asian countries.

(Joel Greene, Commodity and Trade Analysis Branch, 202-219-0020)

Fiscal 1994 Agricultural Imports Slightly Ahead of Fiscal 1993

U.S. agricultural imports for the first three quarters of fiscal 1994 (October 1993 through June 1994) totaled \$19.8 billion, 5 percent ahead of the same period last year. Competitive imports were \$15.5 billion, 6 percent over the previous year, with increased purchases of grain, oilseeds, and horticultural products, especially orange juice. Livestock imports decreased as well as most meats, excluding pork. Gains in coffee and banana value advanced noncompetitive imports 3 percent to \$4.3 billion.

Coffee Prices Escalate

Coffee import value rose on escalating prices, as buyers reacted to frosts in Brazil. Roasters in the United States were hesitant to replenish low stocks with higher priced coffee. At the start of the fiscal year, coffee imports were \$1,450 per ton. In June, unit value increased to \$2,200 per ton, up \$850 per ton, and \$900 higher than June 1993. Unit values for the first 9 months of fiscal 1994 were 37 percent higher than the previous year, averaging \$1,700 per ton. Volume was 22 percent behind last year, at 719,000 tons.

Livestock Down, Meats Down, Except for Pork

October-June live animal import volume was 11 percent behind that of fiscal 1993 due to reduced cattle shipments from Canada. U.S. feeder and slaughter cattle numbers have been increasing, discouraging imports. Year-to-date cattle volume fell 13 percent from fiscal 1993. October-June cattle import value was \$921 million, down from \$1.1 billion in fiscal 1993.

Fiscal year-to-date pork imports increased 18 percent to nearly \$579 million. Volume was up 23 percent at 248,000 tons. October-June unit values declined from \$2,444 in fiscal 1993

to \$2,157 per ton this year, due to an increase in shipments of lower-priced fresh and frozen pork relative to processed (mostly canned, from Denmark) pork, and declines in processed pork prices due to low European Union (EU) hog prices.

Grain Imports Continue at High Levels

Grain and feed imports were strong during the third quarter with October-June shipments valued at \$1.8 billion, 48 percent above the same period last year. Canadian wheat shipments continued at record levels, with October-June shipments valued at \$251 million. Volume reached 2.2 billion tons, 1.2 million tons greater than last year. Canada also shipped large amounts of corn, barley, and oats to the United States. Oat shipments from Sweden and Finland were also up, reaching 680,000 tons, compared with 860,000 tons from Canada.

Oilseed Imports Rise

The poor 1993 U.S. soybean crop caused fiscal 1994 oilseed imports to surge. Year-to-date soybean imports, primarily from Canada, were up 186 percent from last year and Canadian rapeseed shipments have jumped from 12,000 tons last year to 344,000 tons.

Orange Juice Shipments Surge in Fiscal 1994

Brazilian orange juice shipments jumped from last year's October-June level of 7.5 million hectoliters to 12.3 million hectoliters. Although prospects were good for the coming Florida orange crop, it was forecast to be down slightly from last year's record crop and traders made early season commitments to buy Brazilian orange juice to be delivered in fiscal 1994. The October-June value of orange juice imports increased from \$122 million in fiscal 1993 to \$246 million in fiscal 1994.

(Tom Capehart, Commodity Trade Analysis Branch, 202-219-1262)

SUMMARY OF REPORT #AER-688

Costs of Extra Cleaning of U.S. Corn Would Exceed Benefits

June 1994

Contact: William Lin (202) 219-0840

Although foreign buyers have shown a strong preference for clean corn, there is no economic justification to mandate additional cleaning, according to a new report by USDA's Economic Research Service. Costs of additional cleaning to lower the level of broken corn and foreign material (BCFM) below the current level would exceed benefits by \$49 million per year. The best strategy for addressing the corn cleanliness issue is to prevent kernel breakage in the first place.

Concern over the quality of grain exported from the United States versus the quality of competitors' grain has increased in recent years. Advocates believe that selling grain that contains higher levels of foreign material than that of our competitors has reduced U.S. competitiveness in the world grain market. (Foreign material includes dirt, weed seeds, pieces of cob, other grains, leaves, stalks, and finely broken corn.) They argue that improving the cleanliness of U.S. grain will increase or retain market share. Critics argue that improving cleanliness will increase marketing costs, reduce profits, and diminish U.S. competitiveness.

In response to a request from Congress, the Economic Research Service (ERS), in cooperation with researchers at land-grant universities and the U.S. grain industry, conducted a study on the costs and benefits of cleaning U.S. grain. *Costs and Benefits of Cleaning U.S. Corn* presents an overview and summarizes two other ERS reports produced in response to this study. The first, *Economic Implications of Cleaning Corn in the United States*, focuses on the costs and domestic benefits of cleaning corn. The second, *The Role of Quality in Corn Import Decisionmaking*, focuses on importers' preferences with respect to cleanliness and other quality factors, and assesses the benefits of cleaning export corn for international markets.

Selling cleaner corn in the international market could help maintain U.S. market shares, but would not likely result in premiums paid by foreign buyers for clean corn. Nor would it likely expand U.S. corn exports. Most exported corn is used for livestock and poultry feed. Feed

manufacturers in those markets, like their counterparts in the United States, are tolerant of broken corn if aflatoxin (mold) and insects are not present. Dry millers in those markets use locally produced corn. Wet millers are more stringent in their cleanliness requirements than feed manufacturers, because they must remove BCFM prior to processing. Some are buying the U.S. No. 2 grade, but their quality preferences are not strong enough to induce them to pay a premium for cleaner U.S. corn, or switch their corn purchases from the current grade to better-grade corn.

SUMMARY OF REPORT FAER-253

U.S. Investment in Mexican Agribusiness Quintupled From 1987 to 1992

July 1994

Contact: Christine Bolling, 202-219-0689

U.S. investment in Mexico's agribusiness increased five-fold from 1987 to 1992, and may, under the North American Free Trade Agreement (NAFTA), increase even more rapidly during the 1990's. Mexico ranked fifth among host countries for U.S. direct investment in food and agribusiness in 1992, with nearly \$2 billion, up from \$320 million in 1987. Changes in Mexico's land tenure and investment laws have driven the rapid growth. Other contributing factors include economic growth and increased consumption in Mexico, as well as the complementary Mexican production-U.S. consumption of many seasonal fruits and vegetables.

Most U.S. investments in Mexico's agribusiness are in food processing and beverage industries, farm machinery wholesale establishments, and textiles. Other U.S. investments include packing sheds, refrigeration for fresh fruit and vegetables, restaurants, and grocery stores. A new report by USDA's Economic Research Service, *The U.S. Presence in Mexican Agribusiness*, reviews U.S. investments in Mexico, the reasons for those investments, and their impact on U.S. and Mexican agriculture.

The United States accounts for approximately 70 percent of Mexico's total foreign investment. The more visible U.S. investments include ownership of fast food chains, poultry processing, tomato products, soft drinks, agricultural chemicals, and agricultural machinery.

The textile and apparel industries have attracted \$70 million in U.S. investment through the *maquiladora* system, importing raw materials to bonded warehouses and producing finished goods for export. *Maquiladoras* in the apparel industry grew from 117 plants employing 18,000 workers in 1981 to 304 plants employing 43,000 workers in 1990. Standardized apparel like bluejeans, underwear, and men's shirts are most often produced in *maquiladoras*, as are household products like sheets and towels.

Until 1992, foreign investment in Mexico's agricultural land was prohibited. As a consequence, the Mexican agricultural production sector attracted little foreign investment. According to the U.S. Department of Commerce, U.S. investment in Mexico's agricultural land was only \$5 million in 1992, with horticulture the largest recipient.

Table 1—Foreign direct investment between Mexico and the United States, 1992

Category	U.S. direct investment in Mexico	Mexico's direct investment in the United States
	<i>Million dollars</i>	
All industries	13,330	1,184
Food industry	1,340	69
Other agribusinesses	554	NA
Total food and agribusinesses	1,894	NA
Agricultural land	5	232
