Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Lilia E. George. Mrs. George also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publications Services Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services, Information Services Division.

Digest

Agricultural Exports a Record in Fiscal 1995 (see page 2)--U.S. agricultural exports for October 1994-August 1995 of fiscal 1995 totaled a record \$49.4 billion, 24 percent higher than a year earlier. With 11 months of data available, the United States has already achieved record exports to many of its major markets in 1995. The primary exceptions were Mexico and the former Soviet Union (FSU). Japan remains the leading market for U.S. agricultural exports, followed by the European Union (EU), Canada, Mexico, South Korea, Taiwan, China, Hong Kong, Egypt, and the FSU.

Tropical and Horticultural Commodities Boost Fiscal 1995 Import Value (see page 6)--With 1 month remaining in fiscal 1995, agricultural imports totaled \$27.2 billion, 13 percent higher than October-August of fiscal 1994. Tropical and horticultural commodities led import gains.

U.S. Agricultural Trade Boosts Overall Economy (see page 8)--U.S. agricultural exports contribute to employment, income, and purchasing power in both the farm and nonfarm sectors. Each dollar received from agricultural exports in 1994 stimulated another \$1.39 in supporting activities to produce those exports. In 1994, agricultural exports of \$45.7 billion stimulated an additional \$63.8 billion and generated an estimated 765,000 full-time civilian jobs, including 485,000 jobs in the nonfarm sector. Farmers' purchases of fuel, fertilizer, and other inputs to produce commodities for exports spurred economic activity in the manufacturing, trade, and transportation sectors.

Notice

FATUS tables A-2 and B-3 are now available over the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229 or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-2791.

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

Agricultural Exports a Record in Fiscal 1995

U.S. agricultural exports for October 1994-August 1995 of fiscal 1995 totaled a record \$49.4 billion, 24 percent higher than a year earlier. With 11 months of data available, the United States has already achieved record exports to many of its major markets in 1995. The primary exceptions were Mexico and the former Soviet Union (FSU). Japan remains the leading market for U.S. agricultural exports, followed by the European Union (EU), Canada, Mexico, South Korea, Taiwan, China, Hong Kong, Egypt, and the FSU.

The ten leading markets were the same as in fiscal 1994, and the United States exported at least \$1 billion worth of commodities to each country. The top 10 markets accounted for 75 percent of total U.S. agricultural exports in 1995. The five East Asian markets of Japan, China, Taiwan, Hong Kong, and South Korea accounted for \$18.6 billion worth of exports, 38 percent of the total.

Ten Leading Markets in 1995

U.S. agricultural exports to Japan totaled \$9.6 billion through August, 12 percent higher than a year earlier. Exports to Japan have advanced in 1995 mainly because of increased meat, fruit, vegetable, and corn shipments. Beef and pork exports have gained 19 percent to a record \$1.9 billion, and poultry meat exports rose 12 percent to \$160 million. Fruit and vegetable exports have increased 21 percent to a record \$1.4 billion. The United States has shipped a record 4.8 million tons of corn to Japan, but the value of exports is below the record year of 1984 when the average unit value of corn exports was \$150 per ton, compared with \$110 per ton in 1995.

Exports to the EU have risen nearly 23 percent to \$7.7 billion. Strong soybean exports accounted for most of the gain in 1995. Soybean export volume has increased 46 percent to 9.4 million tons, and value has gained 27 percent to over \$2 billion, as lower soybean prices limited the value gain. Grain exports increased on higher wheat, rice, and corn exports. Corn shipments were 63 percent higher at 2.8 million tons valued at \$305 million.

Canada was the third largest market with exports of \$5.4 billion. Much of the increase was due to

gains in fresh and highly processed vegetables. Fresh vegetable export volume dropped 3 percent to 1.2 million tons, but value increased 19 percent to \$723 million because higher average export prices significantly boosted export value. For example, lettuce exports fell 3 percent to 225,000 tons, but value surged to \$153 million as the average unit value jumped 83 percent to \$678 per ton.

Even though U.S. agricultural exports to Mexico have fallen nearly 10 percent, it is still the fourth leading market. Exports totaled \$3.4 billion, but most commodity shipments declined sharply starting in January 1995. Meat exports have declined 25 percent to \$300 million, fruit exports have fallen 40 percent to \$97 million, vegetables have decreased 16 percent to \$173 million, and oilseed and products have dropped 4 percent to \$677 million. Grain exports were slightly ahead of 1994 because of strong corn shipments. Corn shipments have risen 91 percent to 2.7 million tons, and value has gained 76 percent to \$304 million.

South Korea replaced Taiwan as the fifth leading market because of extraordinarily strong export growth in 1995. Exports to South Korea have increased 72 percent to \$3.2 billion. Most of the gain was due to strong exports of corn. U.S. corn shipments soared to a record 7.8 million tons, compared with 474,000 tons in 1994 because China sharply reduced its corn exports to foreign markets, including South Korea. The value of corn exports reached \$896 million. Exports of beef and pork have risen by nearly \$100 million to about \$300 million. Exports of intermediate animal products rose sharply as exports of hides and skins have increased 23 percent to \$666 million.

Exports to Taiwan rose 19 percent to \$2.3 billion. The largest increases were in exports of corn, up 23 percent to 5.6 million tons, and soybeans, up 42 percent to 2.3 million tons. The value gains were smaller as corn and soybean prices were lower than in 1994. Cotton exports rose 32 percent to \$132 million but volume only increased 3 percent as higher cotton prices boosted value.

U.S. agricultural export growth to China surpassed any other major market, as exports soared 184 percent to \$2.2 billion. The United States has exported record amounts of corn and soybean oil in 1995, and cotton is at a near record. Corn exports

reached 3.2 million tons valued at \$360 million. Cotton exports rose 56 percent to 465,000 tons valued at \$794 million. U.S. soybean oil shipments jumped from 20,400 tons in 1994 to a record 551,000 tons in 1995. Wheat shipments have also increased in 1995, reaching 3.4 million tons, the largest volume shipped since 1992.

Exports to Hong Kong increased 31 percent to \$1.3 billion on strong sales of poultry meat. Poultry meat exports to Hong Kong rose 72 percent to a record \$354 million. There were smaller gains in a variety of other commodities. Fruit and vegetable exports have gained 7 percent to nearly \$288 million.

U.S. exports to Egypt jumped 134 percent to \$1.2 billion because of large increases in grain exports. Wheat exports have risen 72 percent to a record 5.1 million tons valued at \$697 million. U.S. wheat export value rose 165 percent because Export Enhancement Program bonuses in 1995

were significantly lower than in 1994. Egypt's average wheat price was \$136 per ton in 1995, compared with \$88 in 1994. Corn exports rose 89 percent to 2.4 million tons, and the United States shipped 35,000 tons of cotton but none in 1994.

Exports to the FSU fell 24 percent to \$1 billion, and exports to Russia were down 21 percent to \$835 million. Exports of grains continued to fall in 1995 as wheat exports dropped 66 percent to 643,000 tons, the lowest since 1986, and corn shipments fell 95 percent to 115,000 tons, the lowest since 1972. Chocolate exports, which were a record \$80 million in 1994, have fallen sharply to \$8 million in 1995. But U.S. poultry meat shipments to the FSU continue to counter these downward trends. Poultry meat exports have jumped 90 percent to \$489 million, and the FSU continues to be the leading market for U.S. poultry meat. *(Joel Greene, Trade Analysis Branch, 202-219-0816)*

Tropical and Horticultural Commodities Boost Fiscal 1995 Import Value

With 1 month remaining in fiscal 1995, agricultural imports totaled \$27.2 billion, 13 percent higher than October-August of fiscal 1994. Tropical and horticultural commodities led import gains.

Tropical Commodities

Coffee import value surged as world prices shot up in the wake of low production in Brazil and low stocks in many consuming countries. Year-to-date coffee import volume was down 2 percent, but value gained 81 percent to \$3.1 billion for the period. Coffee import unit values nearly doubled. Mexico, Brazil, Colombia, and Guatemala were major sources of coffee, together accounting for 62 percent of the 860,000 tons imported by the United States.

Low rubber production in Southeast Asia combined with strong global demand spurred by economic growth, especially in the Pacific Rim, boosted world rubber prices. Rubber import value almost doubled, although volume rose only 5 percent. Indonesia, Thailand, and Malaysia supplied nearly all U.S. rubber imports.

Horticultural commodities

Horticultural commodities (vegetables, fruits, nuts, and juices) advanced 20 percent to \$5.4 billion mostly due to increased shipments from Mexico and Chile. Most of the fresh vegetable gain was from Mexico. Fresh vegetable volume from Mexico increased 20 percent while value jumped 23 percent. Tomatoes accounted for 31 percent of fresh vegetable imports from Mexico by value. Peppers, cucumbers, onions, and cauliflower and broccoli were the other major vegetables imported from Mexico.

Total fruit imports advanced 11 percent. Mexico, the leading supplier, accounted for over \$100 million of the \$150 million increase. Imports of mangoes from Mexico gained 28 percent, reaching nearly \$100 million, and grapes surged 78 percent to \$83 million. Melons and strawberries increased less dramatically. Fruit imports from Chile increased \$26 million, mostly due to a 6-percent gain in grape shipments which reached \$215 million.

Leading Sources of Agricultural Imports in Fiscal 1995

Canada was the leading source of agricultural imports. So far this year, Canada shipped \$100 million more than the same period in fiscal 1994, reaching \$4.9 billion for the October-August period. Advances in cattle, vegetables, rapeseed oil, and cocoa products have been offset by broad declines in a wide array of commodities. Grains and oilseeds, malt beverages, and meat values declined. However, grains, live animals, and meats remain the top commodities shipped to the United States. Grain and feed shipments to the United States declined 8 percent in value due to resurgent U.S. supplies. Lower meat shipments were, in effect, replaced by live cattle.

Mexico ranks second as a supplier of agricultural commodities to the United States. After the January 1995 devaluation of the Mexican peso, imports from Mexico surged. Coffee, vegetables, fruits, and cattle gained the most. Mexico became the largest supplier of coffee, capturing much of the Brazilian share of the market due to low production there. Value jumped as world coffee prices soared. Tomatoes, peppers, cucumbers, and onions led vegetables in value and mangoes were the leading fruit, followed by grapes and melons. Malt beverage shipments have jumped 22 percent for the October-August period. Mexico was also a major supplier of pecans and orange juice.

Indonesia was the third largest source for agricultural commodities shipped to the United States. Import value has increased 51 percent to \$1.2 billion so far this year as world rubber prices have nearly doubled and Indonesian shipments to the U.S. remained the same as fiscal 1994. Indonesia also shipped spices, cocoa, coffee, and vegetables (primarily canned mushrooms). But these commodities were dwarfed by rubber, which accounted for 70 percent of U.S. agricultural import value from Indonesia.

Brazil barely trailed Indonesia as a supplier of agricultural products by value so far in fiscal 1995 with total exports to the United States of \$1.2 billion. Skyrocketing coffee prices maintained total import value shipped to the United States, offsetting sharply lower tobacco leaf, orange juice, cocoa, and beef imports.

Agricultural imports from Colombia were \$1.1 billion, up 24 percent for the 11-month period, driven primarily by a surge in coffee value similar to Brazil's. Colombia was able to take advantage of the high world coffee prices because its coffee production was not as adversely affected by weather as was Brazil's. As with Brazil, coffee quantity shipped to the United States declined. Cut flower shipments, the second-ranking commodity from Colombia destined for the United States, rose 13 percent to \$252 million, two-thirds of U.S. imports.

In 1994, developed and developing countries each accounted for about half of U.S. import value. In

fiscal 1995, import value shifted to developing countries, which accounted for \$14.4 billion compared with \$12.3 billion, or 53 percent of the total. Developing countries supply coffee and rubber, which accounted for most of the gain in value. Vegetable and fruit imports also advanced. Declines in beef and pork import value diminished the developed-country total slightly, but other major commodities gained, albeit not as sharply as coffee and rubber. *(Tom Capehart, Trade Analysis Branch, 202-219-1262)*

U.S. Agricultural Trade Boosts Overall Economy

U.S. agricultural exports contribute to employment, income, and purchasing power in both the farm and nonfarm sectors. Each dollar received from agricultural exports in 1994 stimulated another \$1.39 in supporting activities to produce those exports. In 1994, agricultural exports of \$45.7 billion stimulated an additional \$63.8 billion and generated an estimated 791,000 full-time civilian jobs, including 485,000 jobs in the nonfarm sector. Farmers' purchases of fuel, fertilizer, and other inputs to produce commodities for export spurred economic activity in the manufacturing, trade, and transportation sectors.

In 1994, U.S. agricultural export value rose 9 percent over 1993 (\$45.7 versus \$42.6 billion). More than a third of U.S. cropland used for crops moved into export channels. The United States exported an estimated 51 percent of its wheat, 48 percent of its rice, 31 percent of its soybeans, 21 percent of its corn, and 43 percent of its cotton in the 1994 marketing year.

U.S. agricultural exports peaked in 1981 at \$43.3 billion after years of steady growth, but then declined 33 percent by 1986. The current dollar value of 1994's agricultural exports, \$45.7 billion, surpassed 1981's record. Bulk and processed agricultural exports provided employment for 1.2 million workers in 1981. Employment from agricultural exports in 1994 required 791,000 workers. Exports in 1981 generated \$106.3 billion in business activity: \$43.3 billion for exports and \$63 billion for supporting activities. Exports in 1994 generated \$109.5 billion in business activity: \$45.7 billion for exports and \$63.8 billion for supporting activities. Thus, each dollar received from agricultural exports produced a multiplier effect of more than 2. Net exports in 1994 contributed \$18.9 billion to the U.S. trade balance, an increase from \$17.6 billion in 1993.

Exports Generate New Business, Add Jobs

Of the \$45.7 billion of agricultural products the United States exported in 1994, raw product exports accounted for \$17.6 billion; processed commodities, \$18.7 billion; and transportation and trade services for raw and processed products, \$9.4 billion.

The \$63.8 billion in 1994 supporting activity included \$16.9 billion from the farm sector, \$5.6 billion from the food processing sector, \$14.2 billion from other manufacturing sectors, \$8.3 billion from trade and transportation, and \$18.8 billion from other services. Nonfarm sectors of the economy received about 74 percent of the additional economic activity.

Employment required to support 1994's agricultural exports increased after two years of gradual decline. Many different factors, (increased labor productivity, export commodity mix, sectoral price changes, etc.), may have contributed to this effect. Of the 791,000 full-time civilian jobs related to agricultural exports, more than 305,000 U.S. farmworkers, 9 percent of the farm labor force, worked in the production of export commodities. In addition, 485,000 jobs in the nonfarm sector were directly or indirectly related to the assembling, processing, and distributing of agricultural products for export. About 78,000 of these were in food processing, 178,000 in trade and transportation, 71,000 in other manufacturing sectors, and 158,000 in other services.

Bulk Exports Continue To Decline

Maintaining a trend begun in 1990, bulk agricultural exports (grains, oilseeds, and cotton) continued to provide a decreasing share of the total export mix. Non-bulk products (fresh fruits and vegetables, semi-processed, and high value processed) were worth more in the \$45.7 billion commodity mix of agricultural exports in 1994. High value agricultural exports accounted for \$28.6 billion, or 63 percent of all direct exports.

Bulk exports have a smaller proportional effect on the nonfarm economy than processed exports. Direct bulk exports generated an additional \$17.0 billion of business activity while direct non-bulk exports generated an additional \$46.8 billion. Bulk exports generated \$0.99 of additional output per dollar compared with \$1.64 for high value exports.

The additional business activity attributable to bulk exports was distributed differently across economic sectors (11 percent to farming, 29 percent to manufacturing, 46 percent to other services, and 14 percent to wholesale trade and transportation) than the additional business activity for high value agricultural exports (32 percent to farming,

32 percent to manufacturing, 23 percent to other services, and 13 percent to wholesale trade and transportation). Of the 791,000 jobs related to U.S. agricultural exports, 541,000 (68 percent) supported non-bulk exports.

Agricultural Exports Bolster U.S. Trade Balance

Agriculture's contribution to the U.S. trade balance increased substantially through the 1970's. Net U.S. agricultural exports (exports minus imports) rose to \$27 billion in 1981 from about \$1 billion in 1969. Net agricultural exports of \$18.9 billion partially offset a \$195-billion deficit in nonfarm trade in 1994, leaving the U.S. trade balance in deficit by \$176 billion.

The Effect of Agricultural Imports on U.S. Output

The United States imported \$26.8 billion in agricultural commodities in 1994. Some \$6.7 billion of this total was spent on noncompetitive items (not produced in the United States in significant quantities) such as bananas, coffee, and tea. The balance of \$20.1 billion was spent on competitive items such as meat, dairy products, fruits, nuts, vegetables, sugar, and wines.

Noncompetitive farm product imports increased over the previous year for the first time since 1986. Non-competitive imports were 20 percent larger in 1994 than in 1993. They had been declining at an annual rate of nearly 2 percent. Competitive agricultural imports are growing annually by 5 percent. Only competitive imports were included in the input-output (I/O) analysis of the effects of imports on the economy.

Using the United States I/O model, it was estimated that the equivalent domestic output effect of the \$20.1 billion of competitive imports in 1994 was \$49.7 billion. That is, each dollar spent on imports would have required roughly another \$1.48 in supporting goods and services if those imported items had been produced domestically, an output multiplier of about 2.48.

Stimulating the U.S. Economy through Agricultural Trade

Almost all of the positive trade balance or direct benefit comes from bulk agricultural exports. The port value of other agricultural exports and total

imports just about offset each other (table 5). The additional business activity needed to produce the supporting goods and services for exports and the output lost by importing competitive farm products show the different sectoral effects of these activities. The economywide net business surplus for agricultural trade was an estimated \$53.1 billion for 1994, the result of \$109.5 billion of total output generated by farm exports minus \$56.4 billion stimulated by agricultural imports (including noncompetitive imports).

U.S. agricultural trade positively affects most sectors of the economy. The farm sector's \$34.5 billion of output associated with agricultural exports more than doubled the \$13.8 billion of farm output implicitly lost because of competitive agricultural imports. All manufacturing, including the food processing sectors, gained \$19.5 billion in total output, about 70,000 jobs and \$5.1 billion in income.

Some industrial sectors were examined for their net gain or loss due to trade. Trade in dairy (except cheese) poultry and grain processing; fats and oils milling (except miscellaneous vegetable oil mills) confectioners; and miscellaneous foods were beneficial in terms of income, employment, and output. Agricultural trade was not beneficial to domestic sausage and prepared meat producers; cheese processors; wine and malt beverage makers; sugar processors; canners; and bakers.

The U.S. economy, outside of farming and food processing, directly accrued a net \$5 billion from agricultural trade and a net increase in output of \$41.3 billion after considering the output lost to competitive agricultural imports.

Nonfarm Sector Receives Most Income Effects

Some of the business activity stimulated by foreign trade includes inputs purchased from other sectors. Of the \$2.39 in total (direct and supporting) economic activity generated by \$1 of agricultural exports in 1994, \$1 represented income to wage earners, profits, and taxes. Thus, the \$45.7 billion of agricultural exports in 1994 that generated \$109.5 billion of total economic activity resulted in \$45.7 billion of income in the form of wages, profits, and taxes. This income is directly associated with agricultural trade. With additional income earned from exports, U.S. farmers can purchase more

household appliances, farm equipment, building supplies, and other capital and consumer goods. More purchasing power is spread throughout the total economy. The heightened activity, trade, and transportation can boost investment in plants and

equipment. However, because I/O analysis does not consider this additional spending, our estimates of the economywide influences of agricultural trade are conservative. (*William Edmondson, Rural Industry Branch, 202-219-0777*)

Changes in trade and income effects, 1984 to 1994

1/ Brazilian, green. 2/ Average of nearest 3 active futures-trading months. 3/ No. 1, ribbed smoked sheets.

ERS AutoFAX

Another Service for Users of

ERS Information and Data

Timely information and data from ERS are as handy as your fax machine! A call from your fax to the ERS AutoFAX gives you immediate access to documents covering crops and livestock, rural affairs, farm sector economics and many other topics. Enter your selections using the instructions below and AutoFAX will fax these documents to you, free, in the same call!

How to use AutoFAX—

1. Use the handset and Touch Tone keypad attached to your fax machine.
2. Call 202-219-1107 and listen for the voice prompts.
3. Enter document ID number 0411 and confirm when prompted.
4. Enter # to complete your selections.
5. When prompted, press the "start" button on your fax machine and hang up the handset.
6. In moments, the 0411 "help" document will be on its way to you with information on the contents and use of AutoFAX.

Available now, ERS AutoFAX is online 24 hours a day, 7 days a week for your convenience.

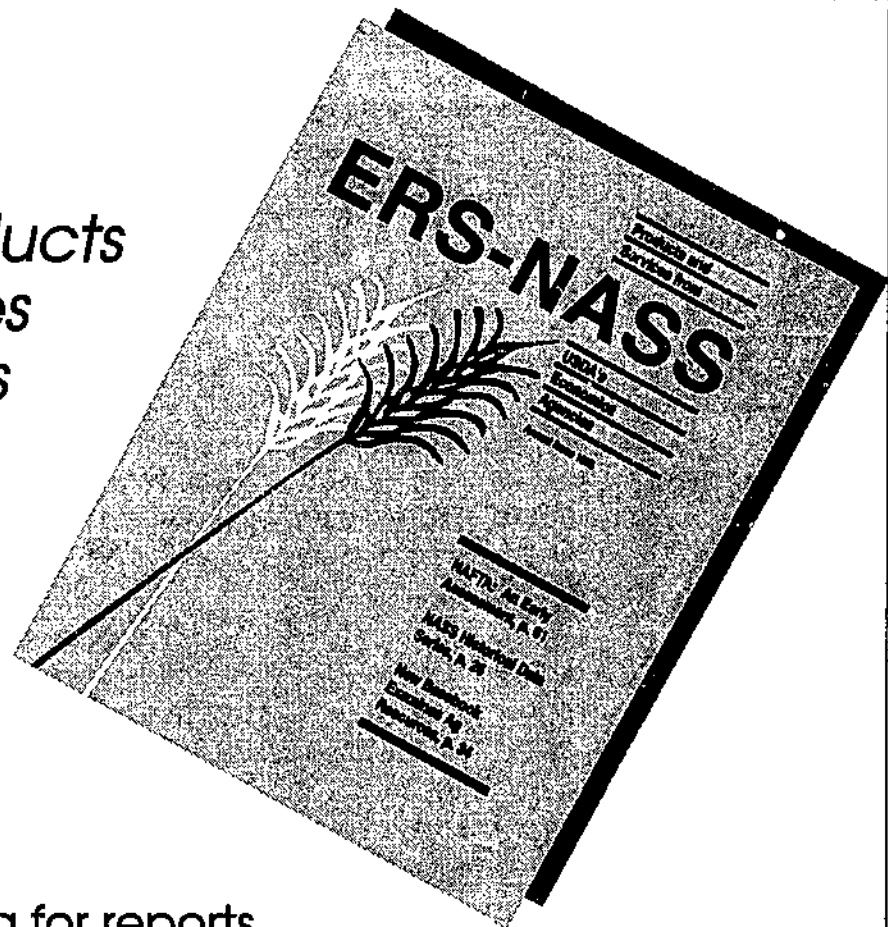

ERS AutoFAX

202-219-1107

AutoFAX works with most common fax machines. For assistance or to report system problems, please call the system manager at 202-219-0232 (8:00 a.m. - 4:30 p.m. ET).

You need the *International Agriculture and Trade Reports to:*

- understand what spurred China's imports of cotton and soybean oil
- see if you should bank on continued Russian wheat imports
- find out how the peso crisis affects U.S. agricultural exports
- get a handle on U.S. agricultural trade with Europe
- discover new markets for high-value products in the former Soviet Union
- learn what factors will affect future trade within NAFTA
- decide if you should count on corn exports to China
- determine where EU agricultural production and trade are headed

This four-report series includes *China, Europe, Former USSR, and NAFTA*. USDA economists draw on original foreign source materials to explain how basic forces are changing agriculture and agricultural trade around the world. Each report anticipates short- and long-term production, consumption, and trade of the region's key commodities. Detailed analysis backs up forecasts on how agricultural policies and structure, as well as macroeconomic and trade policies, will affect world food and fiber markets. Each report includes consistent, up-to-date data bases on key agriculture and trade indicators.
