DAIRY FARM BUSINESS SUMMARY

[illegible]

Stuart F. Smith

Department of Agricultural Economics
New York State College of Agriculture and Life Sciences
A Statutory College of the State University
Cornell University, Ithaca, New York 14853

It is the policy of Cornell University actively to support equality of educational and employment opportunity. No person shall be denied admission to any educational program or activity or be denied employment on the basis of any legally prohibited discrimination involving, but not limited to, such factors as race, color, creed, religion, national or ethnic origin, sex, age or handicap. The University is committed to the maintenance of affirmative action programs which will assure the continuation of such equality of opportunity.

1985 DAIRY FARM BUSINESS SUMMARY
Northern Hudson Region*

Introduction

Dairy farmers throughout the State have been participating in New York Cooperative Extension's farm business summary and analysis program since the early 1950's. Each participating farmer receives a complete summary and analysis of his or her farm business in addition to this publication. The information in this report is compiled by averaging data submitted from the region described at the bottom of this page.

Program Objective

The primary objective of the dairy farm business summary, DFBS, is to help farmers improve their management skills through appropriate use of record data and application of modern farm business management decision-making techniques. In short, DFBS identifies the records farmers need and demonstrates how to use them in making business and financial management decisions.

Program Improvements

The 1985 DFBS report features improved accrual accounting procedures, a new measure of farm profitability, a more indepth balance sheet, an annual cash flow statement, and several major improvements in the business analysis format and the analysis measures used. These and other changes are identified in the body of this report.

The revised format provides one full page for the analysis of the farm cropping program and another for complete analysis of the dairy program. Corn and hay crop related expenses are evaluated separately for cooperating farmers. The cost of producing milk per cow and per hundredweight of milk sold has been compiled. An annual cash flow worksheet has been added to the farmer's individual report. The popular Progress of The Farm Business report has been moved to page one of the farmer's report and added to this publication.

Micro DFBS, which allows Cooperative Extension agents and specialists to calculate and print individual farm business reports in their offices, is now being used by more than 50 percent of our dairy farm management field staff. This innovative program provides faster processing of farm record data and increased use of DFBS in farm management programs.

*This summary was prepared by Stuart F. Smith with invaluable assistance from Linda Putnam, Cindy Farrell, and Beverly Carcelli, Department of Agricultural Economics, New York State College of Agriculture and Life Sciences, Cornell University. The individual business records were collected by Cooperative Extension agents Tom Gallagher, John Thurgood, Cathy Wickswat, and David Wood. The Northern Hudson Region (with the number of participating farms in parentheses) is comprised of Albany (4), Rensselaer (29), Saratoga (1), and Washington (25).

SUMMARY OF THE FARM BUSINESS

Business Characteristics

Finding the right management strategies is an important part of farming. Various combinations of farm resources, enterprises, business arrangements, and management techniques are used by the dairy farmers in this region. The following table shows important farm business characteristics and the number of farmers reporting these characteristics.

BUSINESS CHARACTERISTICS
59 Northern Hudson Region Dairy Farms, 1985

Type of Farm	Number	Type of Business	Number
Dairy	54	Single proprietorship	42
Part-time dairy	4	Partnership	14
Dairy cash-crop	1	Corporation	3
Part-time cash-crop dairy	0	Other	0
Type of Ownership	Number	Type of Barn	Number
Owner	57	Stanchion	39
Renter	2	Freestall	18
		Other	2
Milking System	Number	Business Record System	Number
Bucket & carry	0	CAMIS	10
Dumping station	6	Account Book	20
Pipeline	34	Agrifax (mail-in only)	12
Herringbone parlor	17	On-Farm Computer	2
Other parlor	2	Other	15
Dairy Records Service	Number		Number
DHIC	38	Other	2
O.S.	7	None	12
<u>Milk Diversion Program Participants</u>		<u>Number:</u>	6

The averages used in this report were compiled using data from all the participating dairy farms in this region unless noted otherwise. There may be regular dairy farms, part-time farms, dairy cash-crop farms, farm renters, partnerships, and corporations included in the average. These specific classifications are used to separate farms in the State Business Summary.

A part-time farm has less than 12 months of labor from all operators.

A dairy cash-crop farm has income from crop sales that exceed 10 percent of milk sales.

A farm renter owns no farm real estate at the end of the year or owns no tillable land.

Milk Diversion Program Participants are the farmers that were in the 1984-85 federal milk diversion program. These farms have also been included in the regional summary averages.

Income Statement

The revised accrual income statement begins with an accounting of all farm business expenses.

CASH AND ACCRUAL FARM EXPENSES
59 Northern Hudson Region Dairy Farms, 1985

Expense Item	Cash Paid +	Change in Inventory +	Change in Accounts Payable -	Accrual Expenses
<u>Hired Labor</u>	\$ 17,355		\$ 83	\$ 17,438
<u>Feed</u>				
Dairy grain & conc.	37,173	\$ 883	424	38,480
Dairy roughage	2,531	0	-86	2,445
Other livestock	61	34	0	95
<u>Machinery</u>				
Mach. hire, rent/lease	1,430		29	1,459
Machinery repairs/parts	8,265	-23	-711	7,531
Auto expense (f.s.)	294		-3	291
Fuel, oil & grease	5,911	12	78	6,001
<u>Livestock</u>				
Replacement livestock	1,661		0	1,661
Breeding	2,163	43	55	2,261
Vet & medicine	3,031	-12	41	3,060
Milk marketing	14,067		-70	13,997
Cattle lease/rent	0		0	0
Other livestock expense	5,605	48	-7	5,646
<u>Crops</u>				
Fertilizer & lime	8,238	752	392	9,382
Seeds & plants	2,924	-113	185	2,996
Spray, other crop exp.	2,343	-393	108	2,058
<u>Real Estate</u>				
Land/bldg./fence repair	2,427		-75	2,352
Taxes	4,625		120	4,745
Insurance	2,419		27	2,446
Rent & lease	3,824		102	3,926
<u>Other</u>				
Telephone (f.s.)	683		0	683
Electricity (f.s.)	4,012		-11	4,001
Interest paid	13,247		61	13,308
Miscellaneous	2,236	21	-10	2,247
Total Operating	\$146,525	\$1,252	\$732	\$148,509
Expansion livestock	\$3,532		\$237	\$ 3,769
Machinery depreciation				12,824
Building depreciation				6,309
TOTAL ACCRUAL EXPENSES				\$171,411

Cash paid is the actual amount of money paid out during the year and does not necessarily represent the cost of goods and services actually used.

Accrual expenses are the costs of inputs actually used in this year's production. The value of feed and supplies used out of inventory are included as are the costs of inputs purchased but not paid for (net increases in accounts payable). Items paid for and not used (net additions to inventory) are excluded from accrual expenses as are payments made on inputs used in a prior year (net decreases in accounts payable).

Worksheets are provided to enable any dairy farmer to compute his or her accrual farm income and compare it with the averages on the opposite page.

CASH AND ACCRUAL FARM EXPENSES WORKSHEET

Expansion livestock	_____	_____	_____	_____
Machinery depreciation	_____	_____	_____	_____
Building depreciation	_____	_____	_____	_____
TOTAL ACCRUAL EXPENSES	\$ _____	\$ _____	\$ _____	\$ _____

Cash paid is the actual amount of money paid out during the year and does not necessarily represent the cost of goods and services actually used.

Accrual expenses are the costs of inputs actually used in this year's production. Purchased feed and supplies used out of inventory must be included. Beginning of year less end of year purchased feed and supply inventory equals the change in inventory to include in accrual expenses. Feed, supplies, and services used but not paid for must be included by adding the net increase in operating accounts payable. Increases in operating accounts payable are determined by subtracting the balance at the beginning of the year from the end of year balance.

CASH AND ACCRUAL FARM RECEIPTS
59 Northern Hudson Region Dairy Farms, 1985

Receipt Item	Cash Receipts	Change in + Inventory	Change in Accounts + Receivable	Accrual + Receipts
Milk sales	\$160,253		\$ 892	\$161,145
Dairy cattle	9,431	\$5,010	261	14,703
Dairy calves	1,832		-2	1,830
Other livestock	950	-427	0	523
Crops	2,259	-545	87	1,801
Government receipts	3,961		-1,002	2,959
Custom machine work	16		0	16
Gas tax refund	230		0	230
Other	2,128		833	2,961
Total Accrual Receipts	\$181,060	\$4,038	\$1,069	\$186,168

Cash receipts includes the gross value of milk checks received during the year plus all other payments received for the sale of farm products, services, and government programs.

Accrual receipts represent the value of all farm commodities produced and services actually provided by the farmer during the year. Increases in live-stock inventory caused by herd growth and/or quality, are included as accrual receipts. Decreases in inventory caused by herd reduction are deducted. Changes in inventories of crops grown are accounted for in accrual receipts. Changes in accounts receivable include the January milk check for this December's marketings compared with the previous January's check, and other delayed payments.

CASH AND ACCRUAL FARM RECEIPT WORKSHEET

Receipt Item	Cash Receipts	Change in + Inventory	Change in Accounts + Receivable	Accrual + Receipts
Milk sales	\$ _____	\$ _____	\$ _____	\$ _____
Dairy cattle	_____	_____	_____	_____
Dairy calves	_____	_____	_____	_____
Other livestock	_____	_____	_____	_____
Crops	_____	_____	_____	_____
Government receipts	_____	_____	_____	_____
Custom machine work	_____	_____	_____	_____
Gas tax refund	_____	_____	_____	_____
Other	_____	_____	_____	_____
Total Accrual Receipts	\$ _____	\$ _____	\$ _____	\$ _____

To calculate the change in inventory to be included in the above worksheet, subtract the beginning of year values from the end of year values excluding appreciation. The changes in inventories caused by declining prices must be excluded from the calculation of accrual receipts. Changes in accounts receivable are also determined by subtracting beginning of year balances from end of year balances.

Profitability Analysis

Farm owners/operators contribute labor, management, and capital to their businesses and the best combination of these resources produces optimum profits. Farm profits can be measured as the return to all family resources or as the return to one or more individual resources such as labor and management.

Net farm income is the total combined return to the farm operator(s) and other unpaid family members for their labor, management, and equity capital. It is the farm family's net annual return from working, managing, financing, and owning the farm business. This is not a measure of cash available from the year's business operation. Cash flow is evaluated later in this report.

Net farm income is computed with and without appreciation. Appreciation represents the change in livestock, machinery, and real estate inventory values caused by changes in prices during the year. Appreciation is a major factor contributing to changes in farm net worth and must be included in the profitability analysis.

NET FARM INCOME 59 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
Total accrual receipts	\$186,168	\$ _____
Appreciation: Livestock	-7,253	_____
Machinery	456	_____
Real Estate	3,622	_____
Total Including Appreciation	\$182,993	\$ _____
Total accrual expenses	-171,411	- _____
Net Farm Income (with appreciation)	\$ 11,582	\$ _____
Net Farm Income (without appreciation)	\$ 14,757	\$ _____

Return to operator(s') labor, management, and equity capital measures the total business profits for the farm operators. It is calculated by deducting a charge for unpaid family labor from net farm income. Operator(s') labor is not included in unpaid family labor. Return to operator(s') labor, management, and equity capital has been compiled with and without appreciation. Appreciation is considered an important part of the return to ownership of farm assets.

RETURN TO OPERATOR(S') LABOR, MANAGEMENT, AND EQUITY 59 Northern Hudson Region Dairy Farms, 1985

Item	Average		My Farm	
	With Apprec.	Without Apprec.	With Apprec.	Without Apprec.
Net farm income	\$11,582	\$14,757	\$ _____	\$ _____
Family labor unpaid @ \$550 per month	-1,100	-1,100	- _____	- _____
Return to operator(s') labor, management, & equity	\$10,482	\$13,657	\$ _____	\$ _____

Labor and management income is the share of net farm income without appreciation returned to the operator(s') labor and management. Appreciation is not included as part of the return to labor and management. Labor and management income is determined by deducting the cost of using equity capital at a real interest rate of five percent, from the return to operator(s') labor, management, and equity capital excluding appreciation. The interest charge reflects the long-term average rate of return that a farmer might expect to earn in comparable risk investments in a low inflation economy.

Labor and management income per operator measures the return to each operator's labor and management.

LABOR AND MANAGEMENT INCOME
59 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
Return to operator(s') labor, management, & equity without appreciation	\$13,657	\$_____
Real interest @ 5% on \$311,134 equity capital	<u>-15,557</u>	-_____
Labor & Management Income	\$-1,900	\$_____
Labor & Management Income per 1.25 Operators	\$-1,520	\$_____

Return on equity capital measures the net return remaining for the farmer's equity or owned capital after a charge has been made for the owner-operator's labor and management. The earnings or amount of net farm income allocated to labor and management is the opportunity cost or value of operator(s') labor and management estimated by the cooperators. Return on equity capital is calculated with and without appreciation. The rate of return on equity capital is determined by dividing the amount returned by the end of year farm net worth or equity capital.

RETURN ON EQUITY CAPITAL
59 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
Return to operator(s') labor, management, & equity capital with appreciation	\$ 10,482	\$_____
Value of operator(s') labor & management	<u>-20,971</u>	-_____
Return on equity capital with appreciation	\$-10,489	\$_____
Rate of return on equity capital with appreciation	-3.4%	_____%
Return on equity capital without appreciation	\$-7,314	\$_____
Rate of return without appreciation	-2.4%	_____%

Farm and Family Financial Status

Evaluating the financial status of the farm business and the farm family is an important part of business analysis. The first step is to recognize all the assets and liabilities that make up the balance sheet. The second step is to analyze your filled out balance sheet by evaluating changes made during the year.

1985 FARM BUSINESS & NONFARM BALANCE SHEET 59 Northern Hudson Region Dairy Farms, 1985

Farm Assets			Farm Liabilities & Net Worth

Balance sheet analysis continues by examining financial and debt ratios and factors measuring levels of debt. Percent equity is calculated by dividing net worth by assets. Equity increases as the value of assets increase more than liabilities. The debt to asset ratio is compiled by dividing liabilities by assets. Low debt to asset ratios reflect strength in solvency and the potential capacity to borrow. The debt analysis ratios show how well the debt is structured and managed. Debt levels per unit of production include some old standards that are still useful if used with measures of cash flow and repayment ability.

BALANCE SHEET ANALYSIS
59 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
<u>Financial Ratios - Farm:</u>		
Percent equity	66%	_____ %
Debt/asset ratio: total	0.34	_____

Percent equity	69%	_____ %
Total debt/asset ratio	0.31	_____
<u>Farm Debt Analysis:</u>		
Accounts payable as % of total debt	5%	_____ %
Long-term liabilities as a % of total debt	55%	_____ %
Current & inter. liab. as a % of total debt	45%	_____ %
<u>Farm Debt Levels:</u>	<u>Per Cow</u>	<u>Per Tillable Acre Owned</u>
Total farm debt	\$1,935	\$1,096
Long-term debt	1,064	603
Intermediate & current debt	872	494

Balance sheet analysis concludes with a summary of the inventory balancing procedure for farm real estate and machinery and equipment. It is important to account for the value of these assets used on the balance sheet and the changes that occur from the beginning to end of year. Changes in the livestock inventory are included in the dairy analysis.

FARM INVENTORY BALANCE

* \$4,100 land and \$6,738 buildings and/or depreciable improvements.

Cash Flow Summary and Analysis

Completing an annual cash flow summary and analysis is important to determine how well the cash generated by the business, plus that brought in from outside, met the annual cash needs of the business and the farm family. Understanding last year's cash flow is the first step toward planning and managing cash flow for the current and future years.

The Annual Cash Flow Statement in the following table is structured to compare all the cash inflows with all the cash outflows for the year. Cash inflows include all the cash farm receipts, receipts from the sale of farm assets, additional funds borrowed, as well as the amount of cash available at the beginning of the year. Cash outflows include all the cash farm expenses, capital purchases, principal payments, money taken out of the business, and the cash balance left at year's end. When all the cash inflows and outflows are correct, the statement will balance. If the imbalance (error) amount is positive, recorded cash inflows exceed outflows by this amount. If it is negative, cash outflows are too high in relation to inflows.

ANNUAL CASH FLOW STATEMENT
59 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
<u>Cash Inflows</u>		
Beginning farm cash, checking & savings	\$ 4,302	\$ _____
Cash farm receipts	181,060	_____
Sale of assets: Machinery	334	_____
Real estate	961	_____
Money borrowed (intermediate & long-term)	26,889	_____
Money borrowed (short-term)	1,793	_____

Ending farm cash, checking & savings	4,397	_____
Total	\$217,023	\$ _____
Imbalance (error)	\$ 5,845	\$ _____

Repayment Analysis

The second step of cash flow planning is to compare and evaluate debt payments planned and made last year, and estimate the payments required in the current year. It is helpful to compare and evaluate by using debt payments per unit of production and receipt/debt payment ratios.

FARM DEBT PAYMENTS PLANNED Same 45 Northern Hudson Region Dairy Farms, 1985

Debt Payments	Average		Planned 1986	My Farm		Planned 1986
	1985 Payments Planned	Made		1985 Payments Planned	Made

Per cow	\$373	\$452		\$_____	\$_____	
Per cwt. 1985 milk	\$2.47	\$3.00		\$_____	\$_____	
Percent of total 1985 receipts	16%	19%		_____	_____	
Percent of 1985 milk receipts	18%	22%		_____	_____	

The Cash Flow Coverage Ratio measures the ability of the farm business to meet its planned debt payment schedule. The ratio shows the percentage of planned payments that could have been made with last year's available cash flow. Farmers that did not participate in DFBS last year will find in their report a cash flow coverage ratio based on this year's planned debt payments.

CASH FLOW COVERAGE RATIO Same 45 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
Cash farm receipts	\$194,830	\$_____
- Cash farm expenses	158,138	_____
+ Interest paid	14,071	_____
- Net personal withdrawals from farm*	<u>11,734</u>	_____
(A) - Amount Available for Debt Service	\$39,029	\$_____
(B) - Debt Payments Planned for 1985	\$31,434	\$_____
(A + B) - Cash Flow Coverage Ratio for 1985	1.24	_____

*Personal withdrawals and family expenditures less nonfarm income. If family withdrawals are excluded the cash flow coverage ratio will be incorrect.

ANALYSIS OF THE FARM BUSINESS

The farm business has been divided into three parts to allow a more indepth analysis of the cropping program, the dairy program, and the factors affecting capital and labor efficiency.

Cropping Program Analysis

The cropping program is an important part of the dairy farm business and sometimes it is overlooked and neglected. A complete evaluation of available land resources, how they are being used, how well crops are producing and what it costs to produce them, is required to evaluate alternative cropping and feed purchasing choices.

LAND RESOURCES AND CROP PRODUCTION
59 Northern Hudson Region Dairy Farms, 1985

Item	Average			My Farm		
<u>Land</u>	<u>Owned</u>	<u>Rented</u>	<u>Total</u>	<u>Owned</u>	<u>Rented</u>	<u>Total</u>

Total Tillable Acres	59	244		_____	_____	

Average crop acres and yields compiled for the region are for the number of farms reporting each crop. Yields of forage crops have been converted to tons of dry matter using dry matter coefficients reported by the farmers. Grain production has been converted to bushels of dry grain equivalent based on dry matter information provided.

The following measures of crop management measure how efficiently the land resource is being used and how well total forage requirements are being met.

CROP MANAGEMENT FACTORS
59 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
Total tillable acres per cow	3.09	_____
Total forage acres per cow	2.51	_____
Harvested forage dry matter, tons per cow	7.88	_____

Cropping Program Analysis (continued)

A substantial number of cooperators have allocated crop expenses to hay crop, corn, and other crop production. This additional data has been compiled to show the traditional crop expenses per acre and per production unit for these crops. Corn production has been converted to corn silage equivalent using 5.88 bushels of dry shell equivalent to equal one ton of corn silage as fed.

CROP RELATED ACCRUAL EXPENSES
59 Northern Hudson Region Dairy Farms, 1985

Expense	Total Per Till. Acre	Hay Crop		Corn Per Acre	Per Ton Corn Silage Equiv.	Other Crops Per Acre
		Per Acre	Per Ton DM			
Fertilizer & lime	\$38.52	\$19.98	\$4.97	\$ 61.60	\$2.30	\$20.64

Most machinery costs are associated with crop production and should be analyzed with the crop enterprise. Total machinery expenses include the major fixed costs (interest and depreciation), as well as the accrual operating costs. Although machinery costs have not been allocated to individual crops, they are shown per total tillable acre.

ACCRUAL MACHINERY EXPENSES
59 Northern Hudson Region Dairy Farms, 1985

ERRATA

The correct values for hay crop expenses per ton dry matter and corn silage per ton of silage equivalent on page 14 of the Northern Hudson Dairy Summary are as follows:

<u>Expense</u>	<u>Hay crop per ton DM</u>	<u>Per ton corn silage equiv.</u>
Fertilizer & lime	\$ 8.22	\$4.39
Seeds & plants	2.46	1.41
Spray & other crop expense	<u>0.53</u>	<u>1.38</u>
Total	\$11.21	\$7.16

Dairy Program Analysis

Analysis of the dairy enterprise can tell a great deal about the strengths and weaknesses of the dairy farm business. Changes in dairy herd size and market values that occur during the year are identified in the table below. The change in inventory value without appreciation is attributed to physical changes in herd size and quality. This real increase in inventory has been included as an accrual farm receipt on page 5.

DAIRY HERD INVENTORY
59 Northern Hudson Region Dairy Farms, 1985

Item	Dairy Cows		Heifers	
	Number	Value	Number	Value
Beginning of year (owned)	76	\$64,083	62	\$27,104
+ Change without appreciation		4,153		858
+ Appreciation		<u>-5,282</u>		<u>-2,002</u>
End of year (owned)	81	\$62,954	65	\$25,960
End including leased	81			
Average number	79		62	

My Farm:

+ Change without appreciation	_____	_____	_____	_____
+ Appreciation	_____	_____	_____	_____
End of year (owned)	_____	_____	_____	_____
End including leased	_____	_____	_____	_____
Average number	_____	\$ _____	_____	\$ _____

Total milk sold and milk sold per cow are extremely valuable measures of productivity on the dairy farm. These measures of milk output are based on pounds of milk marketed during the year.

MILK PRODUCTION
59 Northern Hudson Region Dairy Farms, 1985

Item	Average	My Farm
Total milk sold, lbs.	1,175,312	_____
Milk sold per cow, lbs.	14,922	_____
Average milk plant test, percent butterfat	3.72	_____

The cost of producing milk has been compiled using the whole farm method, and is featured in the following table. Accrual receipts from milk sales can be compared with the accrual costs of producing milk per cow and per hundredweight of milk. Using the whole farm method, operating costs of producing milk are estimated by deducting nonmilk accrual receipts from total accrual operating expenses. Total costs of producing milk include the operating costs plus expansion livestock purchased, depreciation on machinery and buildings, the value of operator(s') labor and management, and the interest charge for using equity capital. Note that the cost of labor, management, and equity capital has been excluded in the intermediate compilation.

ACCRUAL RECEIPTS FROM DAIRY AND COST OF PRODUCING MILK
59 Northern Hudson Region Dairy Farms, 1985

Item	Average			My Farm		
	Total	Per Cow	Per Cwt.	Total	Per Cow	Per Cwt.
<u>Accrual Receipts</u>

PROGRESS OF THE FARM BUSINESS

Comparing your business with average data from regional DFBS co-operators that participated in both of the last two years is one part of a business checkup. It is equally important for you to determine the progress your business has made over the past two or three years and to set targets or goals for the future.

PROGRESS OF THE FARM BUSINESS

Farm Business Chart

The Farm Business Chart is a tool which can be used in analyzing a business by drawing a line through the figure in each column which represents the current level of management performance. The figure at the top of each column is the average of the top 10 percent of the 458 farms for that factor. The other figures in each column are the average for the second 10 percent, third 10 percent, etc. Each column of the chart is independent of the others. The farms which are in the top 10 percent for one factor would not necessarily be the same farms which make up the top 10 percent for any other factor.

FARM BUSINESS CHART FOR FARM MANAGEMENT COOPERATORS 458 New York Dairy Farms, 1984

Size of Business			Rates of Production			Labor Efficiency	
Worker Equiv- alent	No. of Cows	Pounds Milk Sold	Pounds Milk Sold Per Cow	Tons Hay Crop DM/Acre	Tons Corn Silage Per Acre	Cows Per Worker	Pounds Milk Sold Per Worker
6.8	255	4,211,900	18,800	4.7	20	45	697,300
4.3	138	2,118,100	17,300	3.7	18	36	560,900
3.6	100	1,551,500	16,500	3.3	16	33	503,900
3.1	83	1,287,200	15,900	2.9	15	30	456,100
2.8	72	1,090,400	15,300	2.7	14	28	423,300
2.5	63	950,300	14,800	2.5	13	26	392,200
2.2	56	818,600	14,200	2.3	12	25	361,400
2.0	49	691,500	13,400	2.0	12	23	328,000
1.7	43	577,800	12,200	1.7	10	20	275,500
1.4	33	395,200	10,000	1.3	8	16	191,300

Feed Bought Per Cow	% Feed is of Milk Receipts	Machinery Costs Per Cow	Labor & Machinery Costs Per Cow	Feed & Crop Expenses Per Cwt. Milk
\$214	11%	\$205	\$ 511	\$2.75
306	16	286	610	3.47
369	19	337	662	3.87
432	22	379	713	4.21
474	25	408	771	4.45
523	27	445	818	4.68
574	28	481	873	4.97
624	31	519	928	5.31
685	33	580	1,004	5.72
809	40	765	1,201	6.73

The cost control factors are ranked from low to high, but the lowest cost is not necessarily the most profitable. In some cases, the "best" management position is somewhere near the middle or average. Many things affect the level of costs, and must be taken into account when analyzing the factors.

Financial Analysis Chart

The farm financial analysis chart is designed just like the Farm Business Chart and may be used to measure the financial health of the farm business. Most of the financial measures used in the chart are presented on pages 7, 10, 12, and 17 of this publication.

FINANCIAL ANALYSIS CHART 458 New York Dairy Farms, 1984

Cash flow coverage ratio		0.78	0.76	0.94	1.18

MEASURE YOUR PERFORMANCE

After you have entered your farm business data on the pages of this workbook, categorize your farm business performance into three groups. List the strong points, those which indicate average performance, and those areas which need improvement. Your business factors that exceed the regional average should be listed as strong points, factors that are close to the regional average should be identified as average, and factors that are below average should be listed under need improvement.

The Farm Business Chart on page 20 and the Financial Analysis Chart on page 21 can be used to identify strengths and weaknesses by comparing your business with a large number of New York dairy farms summarized for the previous year. It is recommended that you use more than one standard for comparison when analyzing the farm business.

STRONG POINTS:

AVERAGE:

_____	_____
_____	_____
_____	_____
_____	_____

NEED IMPROVEMENT:

After identifying opportunities for improvement, consider alternative ways of solving each problem. List each alternative and analyze the consequences in detail. Cooperative Extension conducts many schools, meetings, and provides many printed materials that should be of assistance. Local agribusinesses often provide helpful information and assistance. Seek out information related to the problem under consideration.

Another way to measure your management performance is to compare your current business factors with those from previous years. Page 19 is provided for this purpose. Answering the following questions may also help evaluate your farm business progress.

1. Do livestock number, labor force, and crop acres make up a well balanced unit of resources?
2. Have rates of production shown a steady increase?
3. When will milk output per worker reach 700,000 pounds?
4. Have some costs of production declined over the last two years?
5. Is net farm income improving fast enough to meet your needs?
6. Is growth in net worth keeping up with increased capital investment?
7. Have you reached the business goals set for 1985 and have you set new goals for 1986?
