Organic Food Products

are much more than the product itself. They encompass a range of real or perceived benefits for consumers, including:

Produce Business May 2007 issue, p. 116 http://www.producebusiness.com/e-books/PB07MAY.pdf

- Improving their Health
- Consuming products that are perceived as more Nutritious and Flavorful
- Eating Safely
- Trusting the food source
- Helping Protect the environment

The information that follows was taken from the study 'Organic Food and Drinks Retailing" – US – November 2009, and illustrate consumers' perceptions of organic products and their benefits

Health

"Good Health" was the leading reason for purchasing Organic Foods among 68% of participants in the 2009 Mintel Study*

Photo from: Tap Five Minutes http://www.tapshli.org/tap24.html

Other health-related reasons participants mentioned as reasons for purchasing organics, were:

- For their children to eat well (59%)
- Because of a personal health issue (37%)
- Because of a family member's health issue (13%)
- To address a health issue (e.g. allergies) or treat a medical condition (27%)

Nutrition

Organic Foods are believed to have higher content of trace minerals, Vitamin C and other antioxidants as compared to conventional foods *Additionally:* Consumers of organic foods affirm they have better and richer flavor than their conventional counterparts

Produce Business May 2007 issue, p. 116 http://www.producebusiness.com/e-books/PB07MAY.pdf

Among participants in the 2009 Mintel study*:

- 49% indicated they purchase organic foods because they are more nutritious than regular foods
- 29% purchase them to lose or maintain weight

Safety

45% of participants in the 2009 Mintel study* prefer foods without artificial additives

Produce Business May 2007 issue, p. 116 http://www.producebusiness.com/ebooks/PB07MAY.pdf

 Organic foods are considered "safer" than conventional products due to their lack of artificial flavors, colors, sweeteners, preservatives, residual antibiotics, growth hormones and pesticides

Among the participants in the 2009 Mintel study:

- 73% purchase organic foods because they don't have artificial ingredients and
- •67% purchase them because they don't have artificial preservatives

Assurance

64% of participants in the 2009 Mintel study* look for a guarantee of "100% organic" when purchasing organic food and

60% look for the USDA organic seal on the products they buy

Additionally:

- 65% believe food and beverages can be labeled as "organic" as long as they meet government standards and
- 45% indicated they can trust the term "organic" when they see it on a label

As compared to the previous year (2008):

- 27% of participants purchased more "certified organic produce" and
- 39% of participants purchased about the same amount

Protecting the Environment

82% of participants in the 2009 Mintel study* are more concerned about the environment than they were 5 years ago

Photo: http://jonathanmpelleg.com/company/environment.jpg

- 43% purchase organic products because they are concerned about sustainable farming, harmful pesticides, etc.
- 75% purchased the same amount or more of "environmentally-friendly" household products (e.g. cleaners, recycled paper products, laundry soap, etc.) than the year before

From the 2009 Mintel Study, Consumers' Perceptions of Organic Products' Benefits are evident in:

> • US Consumer Attitudes and Behavior Towards Organic Foods *and*

• The Organic Foods US Market Trends and Forecasts

U.S. Consumer Attitudes & Behavior Towards Organic Foods*

- 59% of participants' households purchase organic foods or beverages
- 23 32% of participants are buying more organic food products than the year before
- 43% 47% of participants are buying organic products at the same rate as one year ago

Sales of Organic Fruits & Vegetables in the U.S. Market

\$ Million 1800 1600 1400 1200 1000 800 600 400 200 0 2005 2006 2007 2008 2009 2010 2011 201

Sales at Current Prices

According to the 2009 Mintel study*:

- Packaged Organic Produce grew 24.2% between 2007-2008
- Sales of organic fruits and vegetables for 2013 are estimated to be over \$1.6 Billion, with packaged organic salads accounting for a major portion of these sales
- Standardized weight, size and price of packaged organic produce may be more appealing than ever, under the current economic conditions

Organic Food & Beverages sold through Food, Drug and Mass Merchandising Stores in the US*

- Increased 41% since 2006, with a particularly strong market during 2007-2008
- By the end of 2009 sales were estimated to be at \$6.2 Billion
- By 2012 sales were projected to be \$8 Billion, with an increase of 28% between 2010-2012

* Not including Walmart, Trader Joe's or Private Label Products
