**New Land Valuation System for an Economy without a Land Market, Aladár Sipos, 324**

**Author Index of IAAE *Occasional Papers* Nos. 1-5, 331**

## Foreword

This book is the fifth in the IAAE *Occasional Paper* series. It contains the 45 contributed papers—together with the discussion opening and summary of the general discussion of each—presented at the Twentieth International Conference of Agricultural Economists, Buenos Aires, Argentina, 24–31 August 1988. A companion publication from that conference—*Agriculture and Governments in an Interdependent World*—contains the invited papers presented at the conference.

The contributed papers were refereed using a blind review process, and the acceptance rate for presentation in contributed paper sessions and publication in full in this series was 15 percent. The referees, representing 11 countries and 6 continents, were Ian Behrmann (RSA), André Brun (France), David Colman (UK), Murray Hawkins (Canada), Wilhelm Henrichsmeier (FRG), Nurul Islam (Bangladesh), Arne Larsen (Denmark), Nora Lustig (Mexico), William Martin (Australia), Marc Nerlove (USA), Hiroyuki Nishimura (Japan), George Ryland (Australia), Bernard Stanton (USA), Stephen Thompson (Canada), and Kelley White (USA).

The International Association of Agricultural Economists is grateful to these referees for their efforts in reviewing the papers, to Bruce Greenshields for organizing the review process and the contributed paper sessions, to Bruce Greenshields and Margot Bellamy for editing this volume, to Patty Beavers and Verla Rape for their production and editorial assistance, and to the Economic Research Service of the US Department of Agriculture for its support of this part of the Association's activities.

The views expressed herein are not necessarily those of the IAAE or of the institutions with which the contributors or editors are connected.

Allen Maunder  
Editor, IAAE
