# New Partnerships, Markets, & Infrastructure for Water

**Bobby Cochran, Willamette Partnership**  
[www.willamettepartnership.org](http://www.willamettepartnership.org)

# Our water infrastructure needs are significant

- \$335 and \$298 billion needed to update drinking and wastewater infrastructure;
- Lots of people manage that infrastructure, making it difficult to change; and
- To pay for this is a significant burden on families.

## Dirty water is wasted water

- “Wastewater” is looking to be “resource recovery”
- Nitrates in groundwater drive communities to look for surface water sources to drink

## Timing of water availability matters

- Too much water in the Winter and Spring
- Not enough water in the Summer and Fall

# Public-private partnerships can help

## West Coast Infrastructure Exchange

- Aggregating small projects to attract financing
- Educating private and public partners
- Motivations for cost-effective design and operations
- Helping reduce regulatory and investment risk

## Green Infrastructure investments

- Drinking water source protection
- Water quality trading
- Linking health and the outdoors

**Green Infrastructure is**

**Wastewater infrastructure**

# Tualatin River, Oregon

Restoration for compliance, converting...

Cooling Towers

\$60 - \$150 million

35 miles of restoration

Additional instream flow

\$6 million

# Healthy environments

November 14 the **Wingspread Declaration on Health and Nature** will be released with 27 other leaders from health and conservation at the World Parks Congress & APHA

## Wingspread Declaration on Health and Nature

July 26, 2014

### Nature and human well-being are connected:

The connection between people and the natural world is fundamental to human health, well-being, spirit, and survival. Nature is a source of food, clean water, clean air, medicine, shelter, and economic opportunity. Moreover, in order to thrive, humans require direct access to nature. Whether a city park, a community garden, a tree-lined street, or wilderness - nature in people's daily lives reduces stress, renews the spirit, connects people to each other and increases physical activity. In short, humans are part of nature, our connection with nature is a fundamental human need, and we believe access to nature is a basic right.

# Water finance trends to watch

- Better ability to aggregate small projects for private finance
- Financing for performance
- Expanding state & federal definitions for green infrastructure
- Healthcare paying attention to water and climate
- Higher resolution data, increasing the ability to target performance
