MEXICAN AGRICULTURE DATABOOK

Databook prepared as a part of ongoing research on Mexican agricultural markets and policy and the interaction between the U.S. and Mexican agricultural sectors. Texas Agricultural Market Research Center, Information Report No. IR-3-90 by Kent D. Hall, TAMRC Research Associate and Carlos Livas-Hernandez, Visiting Professor from Universidad Autónoma Agraria Antonio Narro in Saltillo, Coahuila, Mexico, Texas Agricultural Market Research Center, Department of Agricultural Economics, Texas A&M University.

ABSTRACT: This databook contains tables and figures of historical data on Mexican agriculture. It is divided into ten sections: General; Field Crops; Oil Crops and Related Products; Cotton Lint and Henequen; Vegetables; Annual Fruits; Perennial Fruits; Specialty Crops; Livestock; Production Value, Prices and Receipts; and Inputs. The supply/demand data for crops and livestock reported by the U.S. Embassy in Mexico City and obtained through the U.S. Department of Agriculture (USDA) were different than those reported by the Mexican Department of Agriculture, SARH (Secretaría de Agricultura y Recursos Hídricos). Consequently, two sets of supply/demand tables are presented for some crops and livestock. The titles of the tables and figures clearly indicate the source of the data used (SARH, USDA, or other).

The Texas Agricultural Market Research Center (TAMRC) has been providing timely, unique, and professional research on a wide range of issues relating to agricultural markets and commodities of importance to Texas and the nation for more than two decades. TAMRC is a market research service of the Texas Agricultural Experiment Station and the Texas Agricultural Extension Service. The main TAMRC objective is to conduct research leading to expanded and more efficient markets for Texas and U.S. agricultural products. Major TAMRC research divisions include International Market Research, Consumer and Survey Research, Commodity Market Research, and Contemporary Market Issues Research.

TABLE OF CONTENTS

| <u>Section</u> | | <u>Page</u> |
|--|--|-------------|
| General..... | | 1 |
| Field Crops..... | | 20 |
| Oil Crops and Related Products..... | | 35 |
| Cotton Lint and Henequen..... | | 60 |
| Vegetables..... | | 65 |
| Annual Fruits..... | | 70 |
| Perennial Fruits..... | | 76 |
| Specialty Crops..... | | 84 |
| Livestock..... | | 90 |
| Production Value, Prices and Receipts..... | | 121 |
| Inputs..... | | 152 |

LIST OF TABLES

Notes:

- 1) Domestic disappearance is total supply less total exports.
- 2) Coconut production for 1983-1989 was unavailable; it was calculated by dividing copra production by 0.18 which was the average yield of copra from coconut.
