Rural Information Systems

New Directions in Data Collection and Retrieval

Edited by *Rueben C. Buse*, professor, Dept. of Agricultural Economics, University of Wisconsin at Madison, and *James L. Driscoll*, deputy assistant manager, Research and Development, Federal Crop Insurance Corporation, USDA

- Summarizes recent efforts of professionals to describe problems caused by profound social and economic transformation in rural areas—and the data and methods required to track these changes for use in developing agricultural policy
- Describes the current state of data on rural America
- Identifies and articulates data problems and needs
- Explores new and alternative information sources and techniques
- Discusses major issues, problems, institutions, and philosophies involved in collection and dissemination of statistics related to changing dimensions of rural areas and new methods of data generation
- Describes use of management information systems and new technologies for accessing social sciences data
